(2) The Government's share of indirect costs for such sales is at least 50 percent of the total of such indirect costs; and

(3) A contract administration office has been established at the location.

(b) Other critical locations with significant Government business where specifically directed by the HCA. Decisions to implement or terminate cost monitoring should be based upon sound estimates of Government business for the coming year and not upon minor interim volume fluctations. This does not preclude action to start or stop the program during a given year where there is a significant change in volume and the anticipated new level of business is expected to remain stable for a reasonable period of time.

242.7003 Designation of a Cost Monitoring Coordinator.

A member of the contract administration office (CAO) cognizant of a contractor location shall be designated as the Cost Monitoring Coordinator (CMC) after the location

has been identified as qualified under 242.7002 for application of this program. Depending upon the circumstances, the designee may be the ACO or any other staff member whose normal function relates to evaluation of contractor performance.

242.7004 Responsibilities of the Cost Monitoring Coordinator.

(a) In performing his assigned contract administration duties, the Plant Rep/ACO acts as a high-level manager calling upon the various specialists established within DoD to review and report on those areas that fall within their respective areas of expertise. It is not intended that the Plant Rep/ACO duplicate the functional capabilities or work of such specialists. Likewise, the CMC in the contract administration organization will fully utilize the work of these specialists in monitoring contractor costs through coordination with their various organizations.

(b) The CMC shall be responsible for:

(1) Preparing and maintaining an annual consolidated written plan and schedule for reviewing contractor operations from coordinated long-range plans established by each team member including the DCAA auditor. This composite plan and schedule will assure cost monitoring responsibilities are being fully implemented and that the technical and professional expertise of various organizational units of the CAO are used without duplication of effort or skills;

(2) Coordinating the performance of the cost monitoring effort of the organizational units of the CAO;

(3) Coordinating the cost monitoring efforts of the CAO with those of the DCAA auditor;

(4) Advising the head of the CAO of situations where the contractor should correct conditions, policies, or practices which are not considered the most economical and efficient for the performance of Government contracts, and recommending corrective action, including issuance of formal written notices to the contractor advising of specific costs which may not be allowed if incurred;

(5) Coordinating CAO actions to assure that the procuring contracting officer, project manager, the head of the procuring activity, DCAA, and other responsible officials are informed of relevant matters significantly affecting the most economical and effective performance of Government contracts;

(6) Coordinating actions to assist the CAO, DCAA, and other Government personnel in obtaining access to pertinent contractor policies, procedures, and related data, and obtaining the assistance of the head of the CAO when such access is being denied or impaired;

(7) Maintaining an inventory of CAO, DCAA, and other Government reports on significant issues relating to monitoring costs;

(8) Continuously monitoring the status of recommendations made to the contractor concerning cost performance stemming from all Government reports. While contractors are responsible for managing their direct and indirect costs, the CMC monitors the contractors' effort through this task. In the event agreement is not reached on a recommendation and the cost or principle involved is sufficiently important, the CMC should prepare for the ACO's consideration, a *Notice of Intent to Disallow or Not Recognize Costs;*

(9) Maintaining current organizational charts of the operations identifiable to the contractor's functional centers of his cost control systems.

(c) The plan required by (b)(1) above must be tailored to the contractor, taking into account the extent of competition in awarded contracts, the contractor's operating methods, the nature of work being done, procurement cycle stage, business and industry practices, types of contracts involved, degree of technical and financial risk, ratio of Government/commercial work, and extent that performance efficiencies have been previously demonstrated. The plan should stress the importance of anticipating potential problems and provide a means of calling them to the attention of the contractor at an early stage so that preventive action can be taken. Reviews required by this supplement and the contracting officer must be included in the plan.

242.7005 DCAA auditor responsibility.

DCAA audit offices are responsible for performing all necessary contract audit for DoD and providing accounting financial advisory service regarding contracts and subcontracts to all DoD components responsible for procurement and contract administration. The auditor is responsible for submitting information and advice based on his analysis of the contractor's financial and accounting records or other related data as to the acceptability of the contractor's incurred and estimated costs, as well as for reviewing the financial and accounting aspects of the contractor's cost control systems. The auditor is also responsible for performing that part of reviews and such analysis which requires access to the contractor's financial and accounting records supporting proposed costs or pricing data. This does not preclude the Program Manager, PCO, Plant Rep/ACO, or their technical representatives from requesting any data from, or reviewing records of, the contractor (such as CSCS/C data, lists of labor operations, process sheets, etc.) necessary to the discharge of their responsibilities. The CAO will utilize the auditor's services whenever such expertise is needed, particularly regarding the contractor's financial management reports, books, and records.

242.7006 Procedure.

(a) *Selecting operations for review.* It is not possible to review all elements of a contractor's entire operation each year. Therefore, the CMC, together with the auditor, is to select for review those operations that have the greatest potential for charging Government contracts with significant amounts of unacceptable costs. To select these cost-risk areas on a sound and orderly basis, an overview must first be obtained of the contractor's entire operation. Before the beginning of each Government fiscal year, the CMC should arrange for a joint meeting between CAO, DCAA, and other directly interested Government representatives to coordinate selection of the areas to be reviewed during the coming year. The following data will be used in the selection process:

(1) The contractor's forecasts for the coming year supporting direct and indirect costs by functional centers of his cost control system and the results of the latest survey performed of such systems (DCAA responsibility);

(2) Detailed organizational charts for the contractor's entire operation (CAO responsibility);

(3) An outline of the contractor's accounting system to understand the flow of costs by function (DCAA responsibility);

(4) The determination of Government participation in the dollars attributable to the operations and cost accounts under consideration (DCAA responsibility);

(5) A complete list of recent reviews and audits performed by CAO, the DCAA, and other Government representatives that would effect the selection of areas to be reviewed in the current year. This listing should show outstanding weaknesses and deficiencies in the contractor's operations (CAO responsibility);

(6) Evidence of under and overstaffing (CAO–DCAA responsibility);

(7) Significant departures from established contractor productivity standards (CAO responsibility);

(8) Major financial variances from forecasts in prior years (DCAA responsibility);

(9) Evidences of idle or underused capacity (CAO–DCAA responsibility).

(b) *Planning for reviews.* The primary purpose of the joint meeting described above is to develop a mutually acceptable annual plan for reviewing the contractor's operation. The plan should provide coverage for each significant operational area of the contractor over a period of two to three years and should be modified to reflect any changed conditions during subsequent meetings. The schedule and resource limitations of participating organizantions will be considered in preparing the annual plan. The plan will identify the organizations having the primary responsibility for performing the reviews:

(1) The CAO will review the technical aspects of contractor operations requiring minimal of no access to contractors' financial and accounting records and will sign reports on these reviews;

(2) DCAA will review the financial and accounting aspects of contractor operations requiring minimal or no technical considerations and will sign reports on these reviews;

(3) The CAO and DCAA will jointly perform reviews requiring significant CAO and DCAA expertise. Reports resulting from these reviews will be signed by the heads of the respective local organizations.

Some operations reviews such as the purchasing (CAO) and estimating system reviews (DCAA) are assigned to the responsible reviewing organization. These assignments will continue to be recognized. All others will be performed according to the above criteria. The annual plan will be formally approved by heads of the local CAO and the DCAA resident offices.

(c) *Joint Review.*

(1) *Objective.* The objectives of joint CAO–DCAA reviews of contractor operations are:

(i) To optimize the utilization of DCAA–CAO personnel in performing selected operations reviews; and

(ii) To generate joint reports of the reviews that contain findings, conclusions, and recommendations mutually agreed upon by the DCAA auditor and the CAO to improve the effectiveness and economy of contractor operations.

(2) *Exist conference with contractor.* During the course of the review, there may be several informal briefings with contractor management personnel to exchange information. Every opportunity should be afforded each party, to either update the information provided or to conduct additional reviews to preclude misconceptions that could develop as a result of obtaining incomplete or inaccurate data. An exist conference with contractor management personnel provides the opportunity to explain CAO/DCAA findings, conclusions and recommendations. On joint reviews, the ACO or his representative shall arrange the exist conference with the contractor. Both CAO and DCAA will be represented at the exist conference.

(d) *Reports.* All reports prepared separately or jointly by DCAA or CAS personnel will be forwarded through the ACO to the contractor. While these review reports are advisory to the ACO, the ACO has responsibility to assure that (i) appropriate recognition is given to the results of such reviews in any contract negotiations and (ii) the contractor implements appropriate corrective actions. In event of any dispute with the contractor, the ACO has the ultimate responsibility and authority to effect final settlement.

Subpart 242.71—Voluntary Refunds

242.7100 General.

A voluntary refund is a payment or credit, not required by any contractual or other legal obligation, made to the Government by a contractor or subcontractor either as a payment or as an adjustment under one or more contracts or subcontracts. It may be unsolicited or it may be made in response to a request by the Government. Where it is desired to solicit a voluntary refund from a subcontractor, the prime contractor should be encouraged to facilitate the making of such refund. In deciding whether to solicit a voluntary refund or to accept an unsolicited refund, the contracting officer shall ask legal counsel to review the contract or contracts and all data relevant thereto to determine whether the Government's rights would be jeopardized or impaired by the contracting officer's proposed action.

242.7101 Solicited refunds.

Voluntary refunds may be requested during or after contract performance. They shall be requested only when it is considered that the Government was overcharged under a contract or was inadequately compensated for the use of Government-owned property, or in the disposition of contractor inventory, and retention by the contractor or subcontractor of the amount in question would be contrary to good conscience and equity. Generally, retention by the contractor or subcontractor shall not be considered contrary to good conscience and equity, and thus voluntary refund shall not be requested, unless the overcharge or inadequate compensation was due, at least in part, to the fault of the contractor or subcontractor. The decision to solicit a voluntary refund shall be made by the Secretary concerned.

242.7102 Disposition of voluntary refunds.

(a) If a refund is offered prior to final payment, it is preferable that the contract price be appropriately modified to reflect the refund. In such a case, the amount of the refund shall be credited to the applicable appropriation cited in the contract.

(b) In cases where the refund is to be made by check rather then by an adjustment in the contract price, the check shall be made payable to the office designated for the contract administration and shall be forwarded immediately to the comptroller of the appropriate Department or other Departmental officer responsible for the control of funds. When forwarded, the check shall be accompanied by a letter identifying it is a voluntary refund, giving the number of the contract or contracts involved and, where possible, giving the account number of the appropriation to which the refund should be credited.

PART 243—CONTRACT MODIFICATIONS

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 243.1—General

243.104 Notification of contract changes.

(a) No unilateral change will be made in the terms and conditions of a contract except for changes identified as such in writing and signed by the contracting officer pursuant to the "Changes" clause or other clause in the contract. Government representatives shall avoid conduct (written or oral communications, actions and inactions) that could constitute an unauthorized unilateral change in the terms and conditions of a contract. When a contracting officer or other Government representative, by conduct, causes a contractor to perform changed work, such conduct may be the basis for a claim by the contractor. Examples of such Government conduct include: furnishing defective Government specifications; requiring adherence to delivery schedules when a contractor is

entitled to a time extension; denying a contractor the opportunity to employ a permissible method or sequence of work; or erroneously requiring a contractor to perform contrary to his correct interpretation of the contract requirements. Government representatives shall act promptly to resolve such situations as soon as they are made known to the Government.

(b)(1) Only the Procuring Contracting Officer (PCO) is authorized to take the actions prescribed in paragraphs (c) and (d) of the clause at FAR 52.243–7, except when the PCO expressly delegates in writing any or all of such actions to the Administrative Contracting Officer (ACO).

(2) In exceptional cases, the PCO may designate a "specifically authorized representative" to issue directions and interpretations as provided in the clause contained in FAR 52.243–7 when he anticipates that continuity of the contractor's performance for a particular phase or task under a contract is so important that no delay or diminution of performance is acceptable. If such a designation is made, the notice of designation shall: (i) Be in writing and furnished promptly to the contractor, the ACO, and the "specifically authorized representative," and (ii) clearly prescribe the scope and duration of authority of the "specifically authorized representative," *Provided,* however, that such designated authority in no event shall exceed the authority of the PCO. All directions, communications, interpretations, orders and similar conduct of a "specifically authorized representative" shall be reduced to writing as promptly as possible after their occurrence and copies thereof shall be furnished to the contractor and to the PCO and ACO. No notice of designation, however, shall be issued retroactively to confirm directions earlier communicated by a representative of the Government. The PCO shall promptly countermand any directions of "specifically authorized representative" which exceed his designated authority. A sample of such designation is:

I, John Doe, Contracting Officer, pursuant to (a) of the Notification of Changes clause in Contract N000000–83–0001 hereby designate Ralph Roe, quality assurance representative resident at the contractor's facility as my representative empowered to communicate directions, interpretations, determinations and orders concerning qualification test specification No. ABCD dated 6 August 1979 during the forthcoming qualification testing of the XYZ weapon system between 29 November and 4 December 1983.

243.105 Availability of funds.

(S–70)(1) It is the policy of the Department of Defense that unexpended dollar balances determined to be excess to known contractual requirements shall be released promptly. Contracting officers shall monitor contract fund status and take action to reduce the dollar balance of contracts when determined to be in excess of the amounts necessary for payment of outstanding contract requirements.

(2) To accomplish such determination, consultation with contractors and coordination between contracting offices and CAOs may be required to properly establish funding levels. A determination may be based upon, but is not limited to: (i) contractually required funding reports; (ii) fund status reviews; (iii) advice from the contractor; (iv) advice from the buying office, CAO, or DCAA; (v) examination of vouchers or invoices; and (vi) a review of contract progress. Upon determination of excess funds, contracting officers shall take appropriate action to assure such funds are removed from contracts as expeditiously as possible. For release of funds excess to a termination claim, see FAR 49.105–2 and 49.604.

243.170 Identification of FMS contract modifications.

If the modification adds FMS requirements, identify the modification by clearly stamping or otherwise indicating the "FMS Requirement" on the face of the modification and specify within the modification each FMS case identifier code by line/subline item number, e.g., FMS Case Identifier GY–D–DCA, for such added FMS items.

Subpart 243.2—Change Orders

243.201 General.

(a) Fair and economical processing of change orders does not occur automatically merely by issuance of an authorized change order. Procedures are necessary to:

(1) Establish the authority of the Government to request a contractor to originate a change or to evaluate a Government proposed change;

(2) Promote the policy of forward pricing of changes when feasible;

(3) Require the contractor to submit and to certify cost or pricing data in support of his equitable adjustment;

(4) Provide that contractor-originated changes of less than a specified magnitude may be made without price adjustment;

(5) Provide for recording of and accounting for segregable direct costs of changed work in support of equitable adjustment claims; and

(6) Equitably adjust the contract in a single, final and complete supplemental agreement.

243.202 Authority to issue change orders.

(S–70) *Originating engineering change proposals.*

(a) Engineering changes may be originated by either party to the contract. The Government needs to obtain detailed information supporting and documenting the proposed change; to evaluate the technical, cost and schedule effects of implementing the change; and to price the change in advance when possible. The clause at 252.243–7000 may be used to require a contractor to submit engineering change impact evaluation information, including the maximum equitable adjustment resulting from the change.

(b) The clause at 252.242–7000 includes a sample of an optional paragraph (c) supplementing the basic clause to discourage a large number of small-dollar, contractor-initiated engineering changes and to reduce the administrative cost of reviewing such changes.

243.204 Administration.

(S–70) *Correction or revision.* Upon receiving a copy of the change order from the PCO, the ACO shall review it to assure that its provisions are compatible with the status of performance. For example, if the contractor has progressed beyond the effective point specified in the change order, the ACO shall determine the earliest practical point at which the change order could be made effective and advise the PCO accordingly. Correction, revision or supersession of a change order shall be made by issuing another change order. The definitizing supplemental agreement shall cite both change orders.

(S–71) *Responsibility for negotiation of equitable adjustments.* Except for those change orders assigned to the ACO, the PCO shall be responsible for negotiating all equitable adjustments resulting from change orders, including the execution of supplemental agreements in Standard Form 30, Amendment of Solicitation/Modification of Contract. The ACO shall forward to the PCO the contractor's proposal, together with an analysis thereof. Except at the specific request of the PCO, the analysis shall not include the negotiation of any element of the contractor's proposal, although obvious mistakes may be called to the contractor's attention. Differences between the contractor's proposal and the results of the analysis made by the

contract administration office shall be called to the attention of the PCO.

(S–72) *Use of supplemental agreements.* Supplemental agreements are used:

(1) To reflect the agreement reached in the negotiation of change orders;

(2) In preference to a change order when a supplemental agreement is considered feasible, even though authority exists to accomplish the modification by change order;

(3) To definitize letter contracts;

(4) To reflect other agreements of the parties modifying the terms of contract; and

(5) To definitize provisioned items orders.

(S–73) *Modifications to letter contracts.*

(1) Modifications to letter contracts shall be accomplished under the same policies and procedures as those applicable to definitive contracts.

(2) Bilateral modifications (supplemental agreements) issued prior to definitizing a letter contract may be processed in the same manner as the letter contract, i.e., the PCO may sign prior to the contractor.

243.205 Contract clauses.

(S–70) The contracting officer may insert the clause at 252.243–7000, Engineering Change Proposals, under the conditions at 243.202(S–70)(a).

(S–71) The contracting officer shall insert the clause at 252.243–7001, Pricing of Adjustments, in solicitations and contracts when a fixed-price type contract is contemplated.

Subpart 243.3—Forms

243.301 Use of forms.

(a)(2)(ii) The SF 30 shall be used in connection with termination actions as follows:

(A) *Notice of termination for convenience of the Government.* SF 30 shall be used as the initial or confirming notice, and shall include the information outlined in FAR 49.601–2, appropriately modified as required. If the termination is partial, the line items and quantities affected by the termination shall be identified to the extent practicable. If the termination is complete, line item identification may be omitted, since the contract is considered to be physically completed upon issuance of a notice of complete termination. (See DAR Supplement 2 (S2–301.1).) The same modification number and effective date shall be assigned to the initial and confirming modification.

(B) *Notice of termination for default.* SF 30 shall include all information outlined in FAR 49.402–3(g), including the statement that the modification constitutes a decision of the contracting officer from which the contractor has the right of appeal pursuant to the Disputes clause, if the contracting officer has determined that failure to perform was not excusable. If the notice does not include the decision of the contracting officer, the decision, when made, shall be issued in letter form pursuant to FAR 49.402–3(k).

(C) *Amendment to termination notice.* Each amendment to a termination notice, including rescission of the termination, reinstatement of items or quantities previously terminated, or termination of additional items or quantities, shall be issued on SF 30.

(D) *Conversion of default termination to convenience.* If a termination for default is subsequently converted to a termination for convenience of the Government, either by a decision of the contracting officer or by a decision of ASBCA on an appeal filed by the contractor, the converted designation shall be reflected on SF 30. The effective date of the termination for default shall be indicated in the modification as the effective date of the convenience termination.

(E) *Determination of contracting officer.* SF 30 shall be used to reflect a determination of the amount due in settlement of a contract terminated for convenience:

(*a*) In cases where the contractor has lost the right of appeal for failure to submit a timely settlement proposal in accordance with the Termination clause; and

(*b*) To confirm the determination, if the contractor does not appeal the decision of the TCO.

SF 30, prepared pursuant to (a)(2)(ii)(E)(*b*) above, shall indicate the same effective date as the letter determination previously issued. Block 12 of the modification may be limited to a reference to the letter determination and a statement of the net amount determined to be due in settlement of the termination. To assure sequential numbering of modifications, a Supplementary Procurement Instrument Identification Number shall not be assigned to the letter determination.

(a)(S–70) Three copies of Standard Form 30 should be sent to the contractor with instructions to return the original and one copy.

PART 244—SUBCONTRACTING POLICIES AND PROCEDURES

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 244.3—Contractors' Purchasing Systems Reviews

244.301 Objective.

This subpart sets forth the DoD requirements for conducting a contractor purchasing system review (CPSR) under the direction of a purchasing system analyst (PSA). When deemed necessary, Contractor Purchasing System Review Boards may be established in accordance with Departmental procedures. If no board is to be convened, the report shall be forwarded directly to the ACO by the CPSR team captain. If it is determined that a review board is necessary, the report of the CPSR team shall be reviewed and evaluated by the board, which shall make appropriate recommendations to the ACO.

244.302 Requirements.

(b)(1) *Initial review.* An initial review is a complete, intensive, first-time analysis of a contractor's purchasing system.

(2) *Subsequent review.* A subsequent review is an analysis of a contractor's purchasing system, performed to validate the adequacy of the system.

(i) Plants in which there is a full-time resident PSA shall receive, after an initial review, continuing surveillance equivalent to a subsequent review on an annual basis or continuing surveillance with subsequent reviews at 3-year intervals.

(ii) Plants in which there is no resident PSA shall receive, after initial review, surveillance through on-site visits (44.304), and a subsequent review in alternate years. The contracting officer may call for a subsequent review prior to the regularly scheduled review if circumstances indicate the need.

(3) *Special reviews.* A special review is an investigation of specific weaknesses identified in any contractor's purchasing system, using the same techniques followed in performing an initial or subsequent review. The ACO, or the PSA, with the concurrence of the ACO, may initiate special review of any contractor's purchasing system in connection with deficiencies revealed as a result of:

(i) The initial or subsequent review, or continuing indepth surveillance;

(ii) The review of subcontracts submitted under the notification and consent to subcontract requirements of contract clauses;

(iii) Major changes in the contractor's purchasing policies, procedures, or key personnel;

(iv) Changes in plant workload or type of work; or

(v) Information provided by Government personnel.

In conducting special reviews, the same criteria used in initial or subsequent reviews shall be applied to the area being examined. The summary report format will be used as appropriate.

(4) *Followup review.* A followup review is an investigation performed when a contractor's purchasing system approval is withheld or withdrawn, to determine whether a contractor has implemented the recommendations of the ACO and corrected the deficiencies revealed by any purchasing system review. The techniques used in making an initial or subsequent review are employed in the followup review. If approval of a contractor's purchasing system is withheld or withdrawn, a followup review shall be made as soon as evidence is received from the contractor that the factors leading to the action have been corrected. Whether this followup review consists of a complete reexamination of the contractor's purchasing system or is confined to the areas found deficient shall be a matter of judgment and will depend on the time lapse between the notice to the contractor of withholding or withdrawal of approval and the followup review. The summary report format will be used as appropriate.

244.303 Extent of review.

Supplement 1 contains additional guidance for conducting CPSR's on Defense contractors.

244.304 Surveillance.

(a) Each Military Department and the Defense Logistics Agency will establish controls to assure maintenance of a viable surveillance program.

(b) The surveillance plan shall specifically include the contractor response for corrective action to the recommendations made by the ACO as a result of an initial or indepth subsequent purchasing system review and the Government's planned surveillance tests of the contractor's corrective implementation. The surveillance plan shall provide procedures for informing the contractor of surveillance findings and related recommendations; for followup, as necessary, to effect recommended improvements; and when warranted by the findings, for rescinding approval of the contractor's purchasing system. The contractor must make available the necessary procedures and data to permit adequate surveillance.

(1) The surveillance plan shall encompass pertinent phases of the contractor's purchasing system (Preaward/Postaward/Performance/Contract Completion) and pertinent operations which impact the contractor's purchasing and subcontracting. As considered necessary, surveillance shall include:

(i) Determination and limitation of requirements;

(ii) Advance planning (market testing, source development, performance evaluations, program objectives, make-or-buy);

(iii) Solicitation of proposals (development of solicitations, statement of work, specifications/drawings, facility surveys, financial analysis, preaward audits, terms and conditions, selection of contract type, establishing a competitive base, socio-economic consideration, bidders lists, presolicitation and indoctrination of potential bidders);

(iv) Proposal evaluations (cost, technical, and management considerations);

(v) Source selection (restrictive clauses, flowdown of prime contract provisions, compliance with Public Law 87–653, "Truth in Negotiations Act," compliance with Public Law 91–379, "Cost Accounting Standards," cost/price analysis/assist audits and cost studies, progress payments to subcontractors, changes in technical content of statement of work, factfinding and bidders conference);

(vi) Provisioning, management influence and overriding consideration, documentation, compliance with FAR 9.104–4 and other provisions of this Supplement concerning Subcontractor Responsibility;

(vii) Management approvals;

(viii) Advance notification and consent requirements;

(ix) Early definition (TWX and letter contracts);

(x) Change control (timely and effective action);

(xi) Engineering;

(xii) Schedules;

(xiii) Production;

(xiv) Material control;

(xv) Quality control and quality assurance;

(xvi) Management reporting (advance payments, progress payments, cost performance, funding requirements discounts, milestone and progress reports);

(xvii) Management support (residencies, secondary administration, buyer control of commitments, buyer's role, subcontract management, subcontract modification, expediting, transportation, subcontractor system surveillance);

(xviii) Contract completion (termination partial or complete, stopwork orders, default actions, excusable delays);

(xix) Closeout actions;

(xx) Postaward audits; and

(xxi) Performance evaluation and reports (thorough review of all areas, including documentation for future business).

(2) The plan shall give appropriate consideration to the data furnished by the contractor when providing the required advance notification of intent to place certain subcontracts.

(3) Surveillance tests that require audit effort should be accomplished for the ACO by the contract auditor in conjunction with other audit duties.

(4) Certain subcontractors may require additional surveillance because of the emphasis in the flowdown of system acquisition policies in subcontracts, with particular concern for subcontractor cost, schedule, and technical performance. The contracting officer, the PSA, the review team, and/or subcontract management personnel may request assistance of the contract administration office having cognizance over the subcontractor to provide supplementary information as a means of verifying the information obtained from the contractor's records and, if needed, the request will call for a complete report on the subcontractor's purchasing system.

244.305 Granting, withholding, or withdrawing approval.

An exist conference shall be held with the contractor at completion of the inplant review. At that time, the contractor should be given the review team's recommendations signed by the ACO. The contractor shall be requested to furnish his plan for accomplishing the necessary actions within 15 days.

244.305-2 Notification.

(c) If at any time other than during a CPSR, recommendations are made for improvement of an approved system, the contractor shall be requested to furnish within 15 days of such notification a concurrence or position with respect to the recommendations.

244.307 Reports.

After receipt of the complete report (Parts I and II), the ACO, within 5 days, shall review and evaluate the report, prepare a letter to the contractor stating the status of the purchasing system, and provide copies of the report and the letter to those described in FAR 44.307 and such others as approved by the ACO. One copy of the summary report (Part I only) shall be sent to a contracting office when requested. Also,

where there is a resident PSA assigned to the contractor's plant, the cognizant CAS organization has the option of preparing only a summary report, which shall be distributed in accordance with FAR 44.307. A copy of the ACO's letter to the contractor, setting forth the status of the purchasing system, shall be attached to the summary report.

PART 245—GOVERNMENT PROPERTY

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 245.3—Providing Government Property To Subcontractors

245.301 Definitions.

"Agency-peculiar property," as used in DoD, means military property and includes end items and integral components of military weapons systems, along with the related peculiar support equipment which is not readily available as a commercial item.

"Facilities Project" means an undertaking by the Government to provide facilities to a contractor for the performance of a Government contract or subcontract or to modernize or replace facilities for the same purpose.

"Industrial Plant Equipment" (IPE) is that part of plant equipment with an acquisition cost of $5,000 or more; used for the purpose of cutting, abrading, grinding, shaping, forming, joining, testing, measuring, heating, treating, or otherwise altering the physical, electrical or chemical properties of materials, components or end items entailed in manufacturing, maintenance, supply, processing, assembly, or research and development operations; and IPE is further identified by noun name in the following Joint DoD Handbooks:

"Other Plant Equipment" (OPE) is that part of plant equipment, regardless of dollar value, which is used in or in conjunction with the manufacture of components or end items relative to maintenance, supply, processing, assembly or research and development operations, but excluding items categorized as IPE.

"Provide," as used in the context of such phrases as "Government property provides to the contractor" and "Government-provided property," means either to furnish, as in "Government-furnished property," or to acquire, as in "contractor-acquired property."

245.302 Providing facilities.

245.302-1 Policy.

(S-70) A facilities contract shall be terminated when the Government production and research property covered thereby is no longer required for the performance of Government contracts or subcontracts, unless such termination is detrimental to the Government's interests. The contractor shall not be granted the unilateral right, at his election, to extend the time during which he is entitled to use the property provided under the facilities contract.

245.302-70 Securing approval for facilities projects.

(a) The Secretaries of the Military Departments or their designees and the Directors of Defense Agencies may approve requests for Government-owned facilities projects if—

(1) The facilities projects that are funded from procurement appropriations will be approved on a location basis and shall not exceed $5 million for all property efforts (expansion, modernization, rehabilitation, etc.) during one fiscal year;

(2) It is a research and development-funded project that will not exceed $3 million per fiscal year; or

(3) The total plant and equipment investment cost to support a specific major system or subsystem (including ammunition-related project request) will not exceed $25 million during the projected acquisition or maintenance effort. (Approval authority shall not be redelegated lower than the level of Assistant Secretary.) Approval may be granted only when there is compliance with all provisions of this regulation and DoD Directive 4275.5, "Acquisition and Management.

(b) All projects which will exceed the above limitations will be submitted to the Under Secretary of Defense for Research and Engineering for approval.

(c) Facilities projects that involve real property transactions shall not be undertaken prior to reporting such transactions to the Committees on Armed Services of the House of Representatives and the Senate, as required by 10 U.S.C. 2662, and during the 30-day period prescribed therein. Further, Congress must be notified in advance of starting any construction regardless of cost. If not included in the annual budget, submission to all appropriate Congressional Committees will be made by using DD 1391 Forms.

245.302-71 Providing industrial plant equipment (IPE).

(a) Prior to acquiring IPE, having an item acquisition cost of $10,000 or more, DoD Industrial Plant Equipment Requisition (DD Form 1419) shall be submitted to the Defense Industrial Plant Equipment Center, Memphis, Tennessee 38114, to ascertain whether existing reallocable Government-owned facilities can be utilized. If the requested facilities are numerically controlled, DD Form 1342, Section VI (page 2), shall be prepared and submitted with the DD Form 1419. No acquisition of any listed item shall be made until a certificate of nonavailability is received from the Defense Industrial Plant Equipment Center (DIPEC). However, prior to issuing a certificate of nonavailability, DIPEC shall determine if technical data (e.g., parts listings, maintenance, overhaul and repair manuals, wiring diagrams, etc.) are available. If it is determined that such data is not available at the time of issuance of the nonavailability certificate for equipment, DIPEC may request, by an appropriate instruction in block 51 of DD Form 1419, that an additional set of technical (maintenance) data be acquired with the new facilities when they are obtained. This additional set of data shall be delivered to the repository address specified by DIPEC in block 51 of DD Form 1419. In addition to acquiring technical (maintenance) data for new facilities, a description of the features of numerically controlled facilities on DD Form 1342, Section VI (page 2), shall also be acquired.

(b) Acquisition of new numerically controlled facilities shall include the requirement for the builder to complete Section VI of DD Form 1342 in triplicate, affix one copy to inside of numerical control cabinet door in a manner to preclude removal or destruction, place two copies in an envelope, and tape to door near the first copy. When warranted by the urgency of the situation, requests for screening may be submitted to DIPEC by whatever means determined expedient. When submitting urgent screening requirements other than on a DD Form 1419, the following elements of information must be furnished for each item of equipment:

(1) Requisition number;

(2) PEC/NSN;

(3) Description data sufficient to enable DIPEC to make an urgency determination of availability;

(4) Date item required;

(5) Name and address of requiring agency;

(6) Contract number and program;

(7) Statement as to whether item is for production or mobilization, replacement or modernization, whether item will be procured if not available from DIPEC, and date of availability from procurement;

(8) Assigned urgency rating; and

(9) Estimated cost.

(c) Upon notification of availability by DIPEC, a DD Form 1419 will be submitted to DIPEC for each item accepted by the requestor. However, if DIPEC does not have the item available, or cannot furnish the item within the time specified by the requestor, DIPEC will furnish a statement of nonavailability including a certificate number. This statement will be the official Certificate of Nonavailability and will confirm that the plant equipment item has been screened against the idle inventory.

245.302-72 Providing ADPE as government property.

The proposed acquisition of automatic data processing equipment by a contractor shall be submitted through the Administrative Contracting Officer to Headquarters, Defense Logistics Agency, ATTN: Defense ADP Resource Office (DARO), Cameron Station, Alexandria, VA 22314, in accordance with DoD Manual 4160.19-M.

245.303 Providing material.

245.303-2 Procedures.

When the contractor is to be responsible for preparing requisitioning documentation, the contract shall require such documentation to be prepared in accordance with the "Manual for Military Standard Requisitioning and Issue Procedure (MILSTRIP)" (see Appendix H).

245.306 Providing special tooling.

245.306-2 Acquiring special tooling.

(S-70) Criteria for waiving special tooling provisions in subcontracts.

In determining whether rights to acquire special tooling from the subcontractors are not of substantial interest to the Government so as to permit the omission of special tooling provisions from the affected subcontracts pursuant to paragraph (k) of the clause at FAR 52.245-17, the contracting officer shall consider the factors listed in FAR 45.306-2. It is desirable that such determination be made before execution of the contract, to the extent practicable, in which case the price shall reflect the authorized omission of special tooling provisions in any affected subcontract. If this question is presented to the contracting officer after execution of the contract, he shall condition his determination upon securing the contractor's consent to an equitable reduction in the contract price to reflect any reduction in the price of the affected subcontracts resulting from the omission of such provisions.

Subpart 245.4—Contractor Use and Rental of Government Property

245.401 Policy.

The prior approval of the contracting officer having cognizance of Government production and research property is required for any use, whether Government or non-Government, to insure that the

Government receives adequate consideration and that no unfair competitive advantage is crated to the benefit of the contractor or subcontractor. Government use is in support of performance of US Government contracts (including foreign military sales) and non-Government use is all other use (including direct commercial sales to either domestic or foreign customers, and independent research and development).

245.402 Authorizing use of Government production and research property.

(a) A contracting officer desiring to authorize use of Government production and research property under the cognizance of another contracting officer shall request the latter to give his concurrence in such use. If concurrence is denied, the matter shall be raised to a level higher than the contracting officer.

245.403 Rental—use and charges clause.

(a) The Use and Charges clause shall be included in the contract under which the facilities are accountable.

(b) The policies and procedures of Recovery of Nonrecurring Costs in DoD Directive 2140.2, shall apply to the recovery of a fair share of DoD cost for special tooling and special test equipment. Where the recoupment thresholds are not met, charges for special tooling and special test equipment shall be assessed by an equitable method when determined by the cognizant contracting officer to be administratively practicable.

245.405 Contracts with foreign governments or international organizations.

(a) A contractor may use Government production and research property on work for foreign governments and international organizations only upon written approval of the contracting officer having cognizance of the property. Such approval shall be granted only if such use will not interfere with foreseeable requirements of the United States, and if:

(1) The work is undertaken as a DoD Foreign Military Sale; or

(2) In the case of a direct commercial sale, the foreign country or international organization would be authorized to place the contract with the Department concerned under the Arms Export Control Act.

(b) The Use and Charges clause shall not be applicable to wholly Government-owned plants operated by private contractors on a fee basis. In such cases, any sales to foreign countries or international organizations will require an asset use charge (see (c) below) in place of the Use and Charges clause.

(c) In those circumstances where the Secretary or designee determines that a special rental agreement or the Use and Charges clause is not appropriate or is impractical, and Government facilities are to be used for foreign military sales, an asset use charge will be computed and assessed by the DoD officials responsible for preparation of the DoD Offer and Acceptance (DD Form 1513).

(d) When a particular foreign government or international organization has funded the acquisition of specific production and research property, no rental charges, asset use charges, or nonrecurring recoupments shall be assessed that foreign government or international organization for the use of such property.

(e) Requests for waivers or reduction governments of charges for the use of Government facilities on work for foreign governments or international organizations shall be submitted to the contracting officer who shall refer the matter through procurement channels. Approval may be granted only by the Director, Defense Security Assistance Agency for particular sales which would, if made, significantly advance U.S. Government interests in North Atlantic Treaty Organization (NATO) standardization, or foreign procurement in the United States under coproduction arrangements.

(f) Rental charges for the use of U.S. Government production and research property on commercial sales of Defense items to the Government of Canada are waived through 31 July 1985.

245.407 Non-government use of plant equipment.

(a) Non-Government of Industrial Plant Equipment (IPE) exceeding 25% requires prior approval of the Assistant Secretary of the Army (RD&A), Assistant Secretary of the Navy (S&L), Assistant Secretary of the Air Force (RD&L),or the Director of the Defense Logistics Agency. This authority shall not be redelegated without formal OUSDRE(AM) approval. Requests requiring Departmental level approval should be submitted by the contractor to the cognizant contract administration office at least six weeks in advance of the projected use and shall include:

(1) The total number of active IPE items involved and the total acquisition cost thereof; and

(2) An itemized listing of active equipment having an acquisition cost of $25,000 or more, showing for each item the nomenclature, plant equipment code, year of manufacture, and the acquisition cost.

The percentage of non-Government use shall be computed on the basis of the time available for use. For this purpose the contractor's normal work schedule as represented by the scheduled production shift hours shall be used. The base time period for determining percentages for non-Government use shall be neither less than three months or more than one year. Non-Government use of IPE located at a single plant may be averaged for all items used having a unit acquisition cost of less than $25,000. Equipment having a unit acquisition cost of $25,000 or more shall be considered on an item-by-item basis. Approving officials shall retain for periodic review, sufficient documentation of the circumstances justifying non-Government use approvals.

Subpart 245.5—Management of Government Property in the Possession of Contractors

245.505-5 Records of plant equipment.

(a) DD Form 1342 may be used as a source document for setting up prescribed records.

245.505-6 Special reports of plant equipment.

The contractor shall prepare a DD Form 1342 for each item of equipment identified as Industrial Plant Equipment (IPE), including items which, though part of a manufacturing system, would otherwise qualify as industrial plant equipment. Section VI (page 2) of the DD Form 1342 will be prepared for each item of IPE with numerically controlled features. General purpose components of special test equipment, which would otherwise qualify as IPE, should not be reported until there is no longer a requirement for the test equipment. The DD Form 1342, including Section VI, as appropriate, will be prepared in accordance with instructions contained in AR 700-43/NAVSUP PUB 5009/AFM 78-9/DLAM 4215.1, Management of Defense-Owned Industrial Plant Equipment (IPE), at the time (a) of receipt and acceptance of accountability by the contractor; (b) major changes as specified by DLAM 4215.1 occur in the data initially submitted to DIPEC: (c) IPE is no longer required for the purpose authorized or provided; or (d) disposal is completed. The DD Form 1342 prepared at the time IPE is no longer required for the purpose authorized or provided shall reflect all changes in data not previously reported to DIPEC. The contractor shall retain the original of each DD Form 1342 which may be used as the official

property record. Copies of the DD Form 1342, including Section VI, as appropriate, shall be forwarded directly to DIPEC through the property administrator. Each DD Form 1342 will be prepared and forwarded within 15 working days after the events which created the need for its preparation and forwarding. AR 700–43/NAVSUP PUB 5009/AFM 78–9/DLAM 4215.1 is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (see 245.301).

245.505–14 Reports of Government property.

(a) The contractor's property control system shall provide annually the total acquisition cost of Government facilities in the following classifications:

(1) Land right therein;

(2) Other real property, including utility distribution systems, buildings, structures, and improvements thereto;

(3) IPE required to be reported to DIPEC;

(4) Other plant equipment (OPE). The contractor shall furnish to the property administrator, as of 30 September of each year, a report by contract, of the total acquisition cost of Government (DoD) facilities and the quantity of the IPE for which the contractor is accountable in each of the above classifications. This shall include facilities at subcontractor plants and at alternate locations for which the prime contractor is accountable. Reports shall be prepared on DD Form 1662 (Report of Government (DoD) Facilities), and furnished to the property administrator in duplicate no later than 20 October of each year.

Subpart 245.6—Reporting, Redistribution, and Disposal of Contractor Inventory

245.600 Scope of subpart.

In connection with reporting, redistribution, and disposal of contractor inventory, 245.71 prescribes Forms, Instructions, and Reports applicable to DoD plant clearance actions.

245.601 Definitions.

"Controlled substances" means any of the following:

(1) Narcotic (opium), depressant, stimulant (demerol), or hallucinogenic drug (marijuana) or substance;

(2) Any other drug or substance found by the Attorney General to require control as provided by Title II of the Compehensive Drug Abuse Prevention and Control Act of 1970; or

(3) Any other drug or substance required to be controlled by the U.S. by international treaty, convention or protocol.

"Demilitarization" means the act of destroying the military offensive or defensive characteristics inherent in certain types of equipment or material so as to prevent their further military or lethal use.

245.604 Restrictions on purchase or retention of contractor inventory.

(S–70) A contractor, when authorized to sell contractor inventory, shall not sell such inventory to persons known by him to be: (1) A civilian employee of the Department of Defense or the United States Coast Guard whose duties include any functional or supervisory responsibility for or within the Defense Property Disposal Program, or for the disposal of contractor inventory; (2) a member of the Armed Forces of the United States, including the United States Coast Guard, whose duties include any functional or supervisory responsibility for or within the Defense Property Disposal Program, or for the disposal of contractor inventory; or (3) an agent, employee or immediate member of the household of personnel in (S–70) (1) and (2) above.

(S–71) The authority of a contractor to approve a sale, purchase, or retention at less than cost, by a subcontractor, and the authority of a subcontractor to sell, purchase, or retain at less than cost, contractor inventory with the approval of the next higher-tier contractor does not include authority to approve:

(1) A sale by a subcontractor to the next higher-tier contractor or to an affiliate of such contractor or of the subcontractor; or

(2) A sale, purchase, or retention at less than cost, by a subcontractor affiliated with the next higher-tier contractor.

(S–72) Each excluded sale, purchase, or retention requires the written approval of the plant clearance officer.

245.606–3 Acceptance.

(a) If the schedules are acceptable, the plant clearance officer shall, within 15 days, execute and transmit to the contractor a DD Form 1637, Notice of Acceptance of Inventory.

245.606–5 Instructions for preparing and submitting schedules of contractor inventory.

(See 245.7001–4 for specific duties and responsibilities of DoD plant clearance officers.)

(d) *General instructions for completing forms.*

(4) For purposes of indicating condition of the property, the codes indicated below should be used in combination with the disposal condition codes (1–9, X, and S). Use a letter and a number (such as A1 or F7) or two letters (such as SS):

A. New, used, repaired, or reconditioned property which is serviceable and issuable to all customers without limitations or restriction. Includes material with more than 6 months shelf-life remaining.

B. New, used, repaired, or reconditioned property which is serviceable and issuable for its intended purpose but which is restricted from issue to specific units, activities, or geographical areas by reason of its limited usefulness or short service-life expectancy. Includes material with 3 through 6 months shelf-life remaining.

F. Economically reparable property which requires repair, overhaul, or reconditioning. Includes reparable items which are radioactively contaminated.

H. Property which has been determined to be unserviceable and does not meet repair criteria.

S. Property that has no value except for its basic material content.

245.607 Scrap.

245.607–70 Pre-inventory scrap determinations.

The contractor may request the plant clearance officer to make a pre-inventory scrap determination of inventory considered by the contractor to be without value except as scrap. These pre-inventory scrap determinations shall be based on on-site surveys. If the contractor's scrap recommendation is approved, the contractor may make a single descriptive entry on an inventory schedule covering that property and indicating its approximate total cost. If the plant clearance officer determines that any of the property listed by the contractor as scrap is serviceable, usable, or salvable, the contractor shall, in accordance with this determination, submit appropriate inventory schedules. If the determination is made subsequent to the submission of a scrap inventory schedule, the contractor shall be required to submit revised inventory schedules in proper form.

245.607–71 Segregation.

Property determined to be scrap shall be segregated by the contractor to the extent necessary to assure the highest net proceeds. In appropriate cases, when approved by the plant clearance officer, these sales may be consolidated with the contractor's sales of scrap generated from his other work.

245.607–72 Contractor's approved scrap procedure.

(a) When a contractor has an approved scrap procedure, certain property may be routinely disposed of in accordance with that procedure and not

processed under this Part. Production scrap and production spoilage may be disposed of through the contractor's approved scrap procedure. In addition, worn, broken mutilated, or otherwise rejected parts excess to overhaul and repair contracts, may be similarly processed with the approval of the plant clearance officer.

(b) A plant clearance case shall not be established for property which is disposed of through the contractor's approved scrap procedure.

(c) The contractor's scrap and salvage procedures, particularly the sales aspects thereof, shall be reviewed by the plant clearance officer prior to its approval by the property administrator. The plant clearance officer shall assure that the procedure contains adequate requirements for inspection and examination of items to be disposed as scrap. When the contractor's approved scrap procedure does not require physical segregation and disposition of Government-owned from contractor-owned scrap, care shall be exercised to assure that a contract change, which generates a large quantity of property, does not result in an inequitable return to the Government. In these cases, a determination shall be made as to whether separate disposition of Government scrap would be appropriate.

(d) Scrap, other than that disposed of through the contractor's approved scrap procedure, shall be reported on appropriate inventory schedules for disposition in accordance with the provisions of FAR Part 45 and this supplement.

(e) Silver, gold, platinum, palladium, rhodium, iridium, osmium and ruthenium; scrap bearing such metals; and items containing recoverable quantities thereof will be reported to the Defense Property Disposal Service, DPDS–R, Federal Center, Battle Creek, Michigan 49016, for disposition instructions.

245.608 Screening of contractor inventory.

245.608–1 General.

(b) The 75th day shall be designated as the automatic release date (ARD) by the plant clearance officer. The full 90-day period shall be designated as the Screening Completion Date (SCD). Plant clearance officers will designate two dates on all screening documents, the 75th day as the ARD and the 90th day as the SCD, neither of which shall be .xtended.

245.608–7 Reimbursement of costs for transfer of contractor inventory.

Costs incident to movement of IPE under the direction and control of the Defense Industrial Plant Equipment Center shall be borne by the Defense Logistics Agency.

245.608–70 Contractor inventory redistribution system (CIRS).

Serviceable and usable contractor inventory of the type listed on SF Forms 1428, Inventory Schedule B or SF Forms 1434, Inventory Schedule E, having a National Stock Number (NSN) and a line item acquisition value (acquisition value of each unit times the number of units) in excess of $50, or having no NSN and a line item acquisition value in excess of $500 shall be processed as follows:

(a) The 90-day screening period normally applies and the plant clearance officer establishes the ARD and SCD; and

(b) Two copies of the SF Form 1428, SF Form 1434, or authorized substitutes will be transmitted by Standard Form 120 to the Defense Industrial Plant Equipment Center (DIPEC), Attn: DIPEC–SSB; and

(c) DIPEC will return an annotated copy of each SF Form 1428 or 1434 received to the plant clearance officer with a Notification of Receipt form attached. This notification will inform the plant clearance officer which items were processed, and not accepted, or are now available for local area screening; and

(d) Property submitted for CIRS-processing will be subjected to a 30-day DoD screening period. The requiring activity within the requiring Department shall have requisitioning priority over other activities within that requiring Department and over the procuring Department when the requiring and procuring Departments are different. DIPEC reports items not requisitioned to the General Services Administration on the 31st day, unless the plant clearance officer provided special instructions to the contrary on the Standard Form 120; and

(e) DIPEC will issue shipping instructions on DD Form 1348–1 to the plant clearance officer. The plant clearance officer shall reroute requisitions received directly from the requisitioner to DIPEC during the first 45 days of the screening period. Requisitions received by DIPEC or by the plant clearance officer after the 45th day of the screening cycle shall be forwarded directly to the General Services Administration; and

(f) The plant clearance officer will instruct the contractor to send one copy of the completed DD Form 1348–1 to DIPEC, Attn: DIPEC–SSB, when shipment has been made; and

(g) Unless the contracting officer directs otherwise, motor vehicles generated under Army and Navy contracts shall be screened through CIRS.

245.608–71 Procedures for industrial plant equipment.

(a) *Reporting idle industrial plant equipment.* Industrial plant equipment (IPE) having an acquisition cost of $5,000 or more shall be listed on DD Form 1342, DoD Property Record. The DD Form 1342 shall be prepared by the contractor and submitted to the assigned Government property administrator for appropriate review and transmittal to the plant clearance officer. If the IPE has numerically controlled features, the contractor shall prepare and submit DD Form 1342, Section VI (page 2), Numerically Controlled Machine Data. Upon receipt of an acceptable DD Form 1342, the plant clearance officer will designate the 75th day from that date as the ARD, with the 90th day from that date as the SCD. The ARD will be entered in block 24 of the DD Form 1342 and shall not be extended, except as provided in (c) below. The plant clearance officer will forward copies of the DD Form 1342 to the Defense Industrial Plant Equipment Center, Memphis, TN 38114, for all IPE in condition codes other than "X." Condition code "X" IPE shall be processed in accordance with agency procedures. The DD Form 1342 shall be forwarded to DIPEC within 15 working days after becoming idle. No other distribution of this form will be made by the plant clearance officer.

(b) *Screening—first through 30th day.* DIPEC shall screen excess IPE against all requirements submitted by Department of Defense activities, including Department of Defense reserve requirements, with priority being given to requirements of the owning Department through the 30th day. DIPEC will issue a shipping instruction containing appropriate accounting, funding, transportation, routing recommendations, and preservation instructions for items selected to the appropriate contract administration office.

(c) *Screening—31st through 75th day.* On the 31st day, DIPEC will forward excess data to the applicable General Services Administration regional office for Federal utilization screening through the 75th day. During the period from the 31st through the 75th day, the General Services Administration will approve requests from any agency of the

Government on a "first come-first served" basis, and will approve and forward transfer orders containing appropriate accounting, funding, transportation, routing recommendations, and preservation instructions to the appropriate contract administration office. The General Service Administration will forward copies of the approved transfer orders to DIPEC.

(d) *Screening—76th through 90th day.* During this period the General Services Administration will provide for the screening of all remaining IPE for possible donation. The General Services Administration will receive and approve donation applications for IPE and will forward approved donation applications, containing appropriate accounting, funding, transportation, routing recommendations, and preservation instructions to the appropriate contract administration office. The General Services Administration will forward copies of the approved donation applications to DIPEC.

(e) If a Department of Defense requirement develops after the 90th day and the item is still available, the item will be shipped against such requirement, unless the plant clearance officer has justified and compelling reasons for not making the shipment.

(f) Items of plant equipment with an acquisition cost of less than $5,000, and items of plant equipment with an acquisition cost of more than $5,000 not qualifying as IPE, as defined in 245.301, shall not be reported to DIPEC but shall be reported and screened in accordance with FAR 45.608 and this supplement.

(g) The plant clearance officer shall, when IPE has been transferred, donated, sold, destroyed, abandoned, or other disposition taken, assure that the contractor prepares a DD Form 1342 for submission to DIPEC through the property administrator within 15 working days. In the case of a transfer of the IPE, assure that the Shipment Status Card or a copy of the completed shipping document is sent to DIPEC.

245.609 Donations.

(S–70)(1) Classification of eligible donees in order of precedence and approval requirements are:

(i) for property schedules transmitted to GSA—

(A) *Public airports.* Donations approved during the first five days of the donation screening period. State or local public airport donations require approval of an appropriate official of the Federal Aviation Administration, Department of Transportation, and GSA.

(B) *Service educational activities (SEA).* SEA's have the same order of precedence as in (S–70)(2) below. Approval required of their national headquarters and GSA.

(C) *Educational, public health, and civil defense institutions and organizations.* Donations approved on a first-come, first-served basis with public airports and SEAs, during the last 10 days of the donation screening period. GSA has the over-all responsibility for selecting property determined to be usable and necessary for educational, public health and civil defense purposes, including research for any such purposes. Surplus property is screened and distributed for educational, public health, and civil defense purposes by State Agencies for Surplus Property (SASP). Approval of GSA is required.

(ii) For property screened in accordance with FAR 45.608, public airports, SEAs, and SASP screen and select property for donation approval by GSA on a first-come, first-served basis.

(iii) *Public bodies.* Surplus property may be donated to public bodies in lieu of destruction or abandonment in accordance with FAR 45.611.

(2) In addition to the activities indicated in (a) above, a Department may donate, without expense to the United States, certain material not needed by the Department of Defense to veterans' organizations, soldiers' monument associations, state museums, and incorporated museums operated and maintained only for educational purposes, whose charter denies them the right to operate for profit. For guidance as to limitations and requirements for donation to these activities, see Chapter III, Part 3, DoD 4160.21–M.

245.610 Sale of surplus contractor inventory.

245.610–1 Responsibility.

(a) *Property under DoD control.*

(1) *General.*

(i) It is the Department of Defense policy that when surplus contractor inventory is to be disposed of by means of sale, such sale will be conducted by the contractor in possession in accordance with procedures provided in this Section. The contractor is required to use best efforts to sell contractor inventory in the manner, at the times, to the extent, and at the prices approved by the plant clearance officer. The contractor is not required to extend credit to any purchaser.

(ii) Surplus contractor inventory included in the contractor's inventory schedules which has not been utilized or donated under FAR 45.609, or retained at cost pursuant to FAR 45.605, shall be sold in accordance with (a)(2) below at any time after notification by the plant clearance officer that screening has been accomplished. Any such purchase, retention, or sale shall be subject to the approval of the plant clearance officer.

(iii) *Description of Property.* Description of property must be adequate for identification by prospective bidders. Accuracy is essential and commercial terminology desirable. The original manufacturer and brand name shall be included, if appropriate. When property is boxed or packaged, information as to type of packaging shall be included.

(iv) *Condition.* Condition shall be stated as "used" or "unused" and shall not be described as new. If unused property is still in manufacturer's original containers, a statement to that effect shall be included. Appropriate qualifying statements shall supplement the basic noun description, i.e., "well preserved," some surface rust," "repairs required," etc. Condition codes shall not be used. Because of its non-specific meaning to the trade, the term "salvage" risks downgrading of the property in the bidder's viewpoint and shall not be used.

(v) *Lotting* shall be in accordance with the following:

(A) Unused items shall be lotted by make or manufacturer, except when quantities or dollar values are small;

(B) Commercially similar items shall be lotted together when practicable;

(C) Used and unused items shall be lotted separately, unless the quantity, value, or nature is such that it is uneconomical to sell separately;

(D) Within the bounds of economical considerations, the size of lots shall be influenced by an effort to encourage bidding by small businesses or individuals;

(E) No lot shall be so small that the administrative cost of selling will be disproportionate to the anticipated proceeds;

(F) An alternative bid for groups of items or for the entire offering may be solicited by use of an additional item described as follows:

Item ——— (Alternate Bid). This item consists of all property listed and described in Items ——— to ———, inclusive. Award under this item may be made only if the highest acceptable bid on this item is equal to, or greater than, the total of the highest acceptable bids on Items ——— to ———, inclusive.

(vi) *Basis of sale* shall be:

(A) *Unit price basis.* Items offered for sale shall require the bid price to be stated in terms of the quantity or weight

generally applied by industry in the commercial sale of such items.

(B) *Lot price basis.* When a sales offering is made on a lot price basis, bids shall be requested only for the entire lot. Use of the lot price basis shall be held to a minimum, since it precludes adjustments. The lot price basis shall be used only when property cannot be sold by unit measure or the potential monetary recovery is small.

(vii) *Format of invitation.* In large sales, a summary list of items offered shall be set forth and used as an item bid sheet, with detailed item descriptions on attached sheets.

(viii) *Bidder's lists.* The plant clearance officer shall assure that commodity bidder's lists sufficient to obtain adequate competition in the sale of contractor inventory are maintained. The plant clearance officer may obtain additional listings, as required, from the Defense Property Disposal Service (DPDS–R), Federal Center, Battle Creek, Michigan 49016. Use of listings maintained by DPDS is encouraged when extremely large quantities of property, special commodities, or unusual geographic location is involved.

(ix) *Auction, spot bid, and retail sales.* Auction, spot bid, and retail sales shall be utilized for selling contractor inventory, unless approved on an individual case basis by the departmental headquarters of the administering activity.

(x) *Market impact.* Contracting Officers or plant clearance officers shall submit data to the Defense Logistics Services Center (DLSC) relative to the proposed sale of machine tools of any one type on hand at any single location in minimum condition A1, A2, or A4, with a total acquisition cost exceeding $250,000. Sales data shall include the Plant Equipment Code (PEC) number, noun description, quantity, location of property, and the proposed method of sale. DLSC shall advise the contracting officer or plant clearance officer within five working days whether or not sale proposal is approved. Priority for sales approval shall be given in those instances when plant clearance or other expedited actions are involved.

(2) *Competitive sales.*

(i) *General.* Surplus contractor inventory shall be offered for sale on a competitive basis except as provided in (a)(3) below. To the extent feasible, subcontractors and suppliers should be solicited when additional competition is likely to result. The plant clearance officer shall provide the contractor with instructions relative to the method of soliciting bids and the basis for offering the property for sale (i.e., serviceable or scrap). In determining the sales method to be used, the plant clearance officer shall consider the expected sales proceeds (based on previous experience and current market) versus the cost of conducting the sale. When it is determined that an individual sale will be uneconomical, the material to be sold shall be combined with other material offered for sale, disposed of through the contractor's approved production generated scrap disposal procedure or abandoned. Case files will be documented to show the basis for the decision. The contractor's overall program, including all forms and procedures, shall be evaluated by the plant clearance officer and shall be subject to surveillance. To the extent necessary, the plant clearance officer may reserve the right to approve individual sales offerings prior to distribution. When the plant clearance officer determines that sale services are required, such services will be arranged for by the plant clearance officer directly with the organization requested to provide the services. The plant clearance officer will justify and document this need. These documents shall be a part of the plant clearance case file. The agreement reached will provide for the Defense Property Disposal Office or General Services Administration Regional Office to return total proceeds to the plant clearance officer for crediting in compliance with FAR 45.610–3.

(ii) *Solicitation of bids.* Contractors shall solicit bids by formal invitations, unless informal bid procedures have been approved by the plant clearance officer as provided in (a)(2)(ii)(B) below:

(A) *Formal bid procedures.*

Bids shall be solicited a minimum of 15 calendar days in advance of the opening of bids to allow bidders an adequate opportunity to inspect the property and prepare and formally submit bids;

Invitations shall be circulated to a sufficient number of prospective bidders to assure wide competition, including the original suppliers and those prospective bidders designated by the plant clearance officer and the contractor;

In addition to mailing or delivering a notice of the proposed sale to all prospective bidders, the contractor may supplement this sales method by—

Displaying a notice of the proposed sale in appropriate public places;

Displaying a notice of the proposed sale in appropriate trade journals or magazines; or

Publishing a notice of the proposed sale in a newspaper of general circulation in the locality in which the property is located, when the results of such paid commercial advertising is expected to justify the additional expenses involved.

When the acquisition cost of property to be sold at one time, at one place, is $250,000 or more, notice of each such proposed sale shall be transmitted to the U.S. Department of Commerce, Commerce Business Daily Office, Sales Section, P.O. Lock Box 5999, Chicago, Illinois 60680. The notice shall be sent at as early a date as possible in advance of the sale but at least 20 days prior to the date when the bids will be opened, or, in the case of spot bid or auction sale, when the sale will be conducted. Such notice shall be transmitted by fastest mail available and shall be in synopsis form suitable for printing directly from the text so transmitted without editing or condensing. Double space lines will be used to describe each sales action; and the length of the line should be approximately 65, but not to exceed 69 character spaces and will contain the following information in the order listed: the name and address of the contractor who will issue the invitation; the name or title, address, and telephone number of the official from whom copies of the sales offering and other information can be obtained; a description of the property to be sold; when deemed desirable, the total estimated acquisition cost; the number of the invitation or sale; the date of the sale or bid opening, the types of sale, i.e., sealed bid, spot bid, or auction; and the location(s) of the property. The utmost care should be exercised in describing the types of property to be sold in order to assure interest by the maximum number of potential buyers but, at the same time, condense the information so that minimum space in the Department of Commerce publication will be required for printing. Where the acquisition cost is less than $250,000 such notice may be transmitted, when considered desirable, in accordance with the procedures prescribed above.

(B) *Informal bid procedures.* When the amount or value of the property is not large enough to warrant preparation of a formal notice of the proposed sale or other special circumstances are present, invitations to bid may, with the approval of the plant clearance officer, be issued orally, by telephone or by other informal media, so long as the element of competition is maintained and each such sale is fully documented to include a record of solicitations and written confirmation of informal bids. Any bid by the contractor or its employees shall be submitted to the plant clearance officer prior to

solicitation of bids by the contractor from other prospective bidders.

(iii) *Formal invitations.* Sale by formal invitation shall include as a minimum general sale terms and conditions provided in 245.7102–6(a) and, when necessary, special conditions in 245.7102–6(b). The plant clearance officer or his representative shall be present to witness bid openings. Within two working days after bid opening, the contractor shall submit to the plant clearance officer two copies of an abstract of all bids, signed by the witnessing Government representative. All awards shall be subject to the approval of the plant clearance officer as indicated in (a)(2)(iv) below.

(iii) *Bid reservations.* All invitations for bid shall reserve the right to reject any or all bids and shall require payment of the full purchase price prior to delivery of the property to the purchaser.

(iv) *Approval of sale.* Bids shall be evaluated by the plant clearance officer to establish that the sale price is fair and reasonable in the light of reasonable knowledge or test of the market, due regard being given to current prices for products for which quotations are published and to the circumstances, nature, condition, quantity, and location of the property. Current market price appraisal or price received may be obtained from DPDS upon request. Awards shall be approved to that responsible bidder whose bid is most advantageous to the Government, price and other factors considered. Award shall not be approved to any bidder who would not be eligible to enter into a sales contract with the Department of Defense in accordance with the provisions of the Consolidated List of Debarred, Suspended, and Ineligible Contractors. If it is determined that a compelling reason exists to make an award to a contractor on the Consolidated List, the plant clearance officer shall request approval from the departmental headquarters of the administering activity.

(vi) *Award by contractor.* The plant clearance office shall notify the contractor within five working days of the bidder to whom an award shall be made. The contractor shall make the award, collect the proceeds of sale, and release the property to the purchaser. The contractor shall provide the plant clearance office with evidence of delivery reflecting actual quantities released to the purchaser.

(3) *Negotiated sales.*

(i) Negotiated sales, including purchases or retentions at less than cost by the contractor, may be made when the procuring department or the plant clearance officer determines and documents in accordance with FAR 15.304 and 245.613(d), as appropriate, that the use of this method of sale is essential to expeditious plant clearance, or is otherwise justified on the basis of circumstances enumerated below, *provided,* that the Government's interest are adequately protected. Negotiated sales, including purchases or retentions at less than cost by the contractor, shall be at prices which are fair and reasonable and not less than the proceeds which could reasonably be expected to be obtained if the property was offered for competitive sale. Specific conditions justifying negotiated sales are:

(A) Scientific equipment allocated to terminated research and development contracts with educational institutions;

(B) When no acceptable bids have been received as a result of competitive bidding under a suitably advertised sale;

(C) When property is of such small value that the proceeds to be derived would not warrant the expense of a formal competitive sale;

(D) When the disposal will be to states, territories, possessions, political subdivisions thereof, or tax-supported agencies therein, and the estimated fair market value of the property and other satisfactory terms of disposal are obtained;

(E) When the specialized nature and limited use potential of the property would create negligible bidder interest;

(F) When removal of the property would result in a significant reduction in value, or the accrual of disproportionate expenses in handling; or

(G) When it can be clearly established that such action is essential to the Government's interests.

(ii) In those instances when the procuring department has concluded that it is appropriate to sell production equipment to the contractor in possession by means of noncompetitive negotiated sale, the department will provide the CAO with the required sales justification including any special sales provisions that may be appropriate.

(4) *Applicability of antitrust laws.* When contractor inventory with an acquisition cost of $3,000,000 or more (or any patents, processes, techniques, or inventions, irrespective of cost) is to be sold or otherwise disposed of to private interest, the Department concerned shall promptly notify the Attorney General and the Administrator, General Services Administration, of the proposed disposal and the probable terms or conditions thereof. Prior to approving or effecting the proposed disposition, the plant clearance officer shall obtain antitrust clearance by transmitting the following information relative to the proposed sale through departmental channels of the administering activity for submission by that activity to the Department of Justice and the General Services Administration: Report Control Symbol DD DR&E(AR) 1492 has been assigned for this reporting requirement.

(i) Location and description of property (specifying the tonnage, if scrap);

(ii) Proposed sale price of property (explaining the circumstances if proposed purchaser was not highest bidder);

(iii) Acquisition cost of property of Government;

(iv) Manner of sale, indicating whether by—

(A) Sealed bid (specifying number of purchasers solicited and bids received),

(B) Auction or spot bid (stating how sale was advertised), or

(C) Negotiation (explaining why property was not offered for sale by competitive bid);

(v) Proposed purchaser's name, address, and trade name (if any), under which he is doing business;

(vi) If a corporation, give name of state and date of incorporation, and name and address of—

(A) Each holder of 25 percent or more of the corporate stock,

(B) Each subsidiary, and

(C) Each company under common control with proposed purchaser;

(vii) If a partnership, give—

(A) Name and address of each partner, and

(B) Other business connections of each partner;

(viii) Nature of proposed purchaser's business, indicating whether its scope is local, statewide, regional, or national;

(ix) Estimated dollar volume of sales of proposed purchaser (as of latest calendar or fiscal year);

(x) Estimated net worth of proposed purchaser; and

(xi) Proposed purchaser's intended use of property. Disposition shall be withheld pending receipt of advice from the Attorney General as to whether the proposed disposal action would tend to create or maintain a situation inconsistent with the antitrust laws. If the Attorney General advises that the proposed disposition would tend to create or maintain a situation inconsistent with the antitrust laws, such disposition will not be made. When property with a total acquisition cost of $3,000,000 or more is offered for sale on a competitive bid basis, the condition of sale specified in 245.7102–6(b)(viii) shall be included in the invitation for bid. When the sale is not competitive, the

prospective purchaser shall be informed that final consummation of the sale is subject to determination by the Attorney General. The purchaser on either a competitive or noncompetitive sale shall be required to complete a questionnaire, providing the information outlined in (a)(4) (v) through (xi) above.

(5) *Foreign Contractor Inventory.*

(i) To prevent diversion, transshipment, or re-export of contractor inventory located in foreign countries to prohibited destinations and the use of such inventory adversely to the interests of the United States, the sale or other disposition of such inventory by the contractor, including sales to foreign governments, shall be made in accordance with (a)(5) (ii) and (iii) below.

(ii) Sales contracts or other documents for passing title to foreign contractor inventory shall contain the following certificate:

> The Purchaser certifies that the property covered by this contract will be used in ———— (insert name of country). In the event resale or export is to be effected by the Purchaser of any of the property, acquired at a price in excess of One Thousand United States Dollars ($1,000) or its equivalent in other currency at the official rate of exchange, the Purchaser agrees to obtain the approval of ———— (insert name and address of Sales Contracting Officer).

(iii) The sales contracting officer shall approve sales contracts and requests for approval of resales or exports only if:

(A) The proposed purchaser's name does not appear on the Consolidated List of Debarred, Suspended and Ineligible Contractors, and

(B) If the sales contract contains a provision prohibiting exports by purchasers and subpurchasers to communist areas, as listed in FAR 25.702.

(iv) Any disposals of foreign contractor inventory by the United States Government, as distinguished from disposal by a contractor, shall be in accordance with the security trade control regulation on foreign excess sales, and regulations dealing with integrity and reliability checks.

(v) Generally, disposal activities of the Military Departments shall be utilized to accomplish the disposition of surplus contractor inventory located in foreign countries except Canada. Contractor-conducted sales may be authorized, *provided* the interests of the Government are adequately protected.

245.610-3 Proceeds of sale.

(S-70) When payments are due the contractor under the applicable contract, and unless otherwise provided in the contract, the proceeds of any sale, purchase, or retention shall be credited to the Government as part of the settlement agreement, or otherwise credited to the price or cost of the work covered by the contract, or applied in the manner directed by the contracting officer. The plant clearance officer will maintain an open suspense record until he has verified that credit has in fact been applied, unless another Government representative has specifically assumed this responsibility.

(S-71) Proceeds from contractor-conducted sales which have not been credited as provided in (S-70) above shall be collected by the contractor and remitted to the plant clearance officer.

(S-72) All proceeds of sale remitted to the plant clearance officer shall be delivered to the designated disbursing officer by means of DD Form 1131, Cash Collection Voucher, within two working days after receipt. Transmittals shall identify the procurement contract by number and name of the contractor.

245.613 Property disposal determinations.

Written determinations supporting disposal actions in the following categories shall be made and placed in the plant clearance case file:

(a) Salvage determination;

(b) Scrap determinations (not required for production scrap);

(c) Abandonment and/or destruction determinations;

(d) Disposal by noncompetitive sale; and

(e) Other actions considered necessary by the plant clearance officer.

Determinations shall be recorded on DD Form 1641, Disposal Determination/Approval.

Subpart 245.70—Appointment of Property Administrator

245.7001 Appointment of property administrator.

245.7001-1 Selection, appointment and termination.

The selection, appointment and termination of appointment of property administrators shall be made in writing by the Head of a Procuring Activity or designee for the Defense Logistics Agency and by the head of the contract administration office or designee for the other Departments. In selecting qualified property administrators, the appointing authority shall consider experience, training, education, business acumen, judgment, character, and ethics.

245.7001-2 Evaluation criteria.

In considering experience, training and education, the following shall be evaluated:

(a) Experience in accounting, material control, inventory control and allied functions;

(b) Formal education or specialization in such areas as evaluating, monitoring, administering, or coordinating industrial property programs or implementing plans and policies in support of diversified property control system; and

(c) Knowledge of the provisions of this and other applicable regulations.

245.7001-3 Assignment of contracts for property adminstration.

(a) All Department of Defense contracts under which Government property will be provided and which will be performed at a single location by a contractor shall be assigned to a single property administrator.

(b) Each contract under which Government property will be provided to the contractor will be assigned to a property administrator by the CAO. The assignment document shall contain the (1) name and address of the contractor, (2) PII (contract) number, and (3) type of contract.

(c) The assignment shall be terminated when:

(1) It has been determined that no Government property has been or will be furnished or acquired; or

(2) The contract is reassigned to another CAO or to another property administrator.

245.7001-4 Duties and responsibilities of plant clearance officer.

The plant clearance officer shall be responsible for:

(a) Providing the contractor with instructions and advice regarding the proper preparation of inventory schedules;

(b) Accepting or rejecting inventory schedules and DD Form 1342;

(c) Conducting or arranging for inventory verification;

(d) Initiating prescribed screening and effecting resulting transfer and donation actions;

(e) Final plant clearance of contractor inventory;

(f) Pre-inventory scrap determinations, as appropriate;

(g) Evaluating the adequacy of the contractor's procedures for effecting property disposal actions;

(h) Determining method of disposal;

(i) Surveillance of contractor-conducted sales;

(j) Accounting for all contractor inventory reported by the contractor;

(k) Advising and assisting, as appropriate, the contractor, inventory control manager, other federal agencies, or higher headquarters in all actions

relating to the proper and timely disposal of contractor inventory;

(l) Approving method of sale, evaluating bids, and approving sale prices for contractor-conducted sales;

(m) Recommending the reasonableness of selling expenses on contractor-conducted sales;

(n) Securing anti-trust clearance, as required; and

(o) Advising the contractor officer on all property disposal matters.

Subpart 245.71—Forms, Instructions, and Reports

245.7101 Forms.

The forms listed below are prescribed for use in the performance of plant clearance actions covered in FAR Subpart 45.6 and Subpart 245.6.

245.7101-1 Standard Form 97.

Standard Form 97, Certificate of Release of a Motor Vehicle (agency record copy), will be executed by the contracting officer and furnished to the purchaser. Plant clearance officers will process Standard Form 97 in connection with transfers, donations, and sales of motor vehicles. Precautionary measures will be taken to prevent unauthorized persons from obtaining these forms. (245.7102-6)

245.7101-2 DD Form 1131.

DD Form 1131, Cash Collection Voucher, shall be used to remit proceeds of sale to the appropriate disbursing officer.

245.7101-3 DD Form 1149.

DD Form 1149, Requisition and Invoice Shipping Document, shall be used for transfers and donations of excess or surplus contractor inventory, except IPE shall ordinarily be shipped by DD Form 1348-1, provided that any donation of IPE may be shipped via DD Form 1149.

245.7101-4 DD Form 1342.

DD Form 1342, DOD Property Record, shall be used to report idle industrial plant equipment to DIPEC for worldwide screening.

245.7101-5 DD Form 1640.

DD Form 1640, Request for Plant Clearance, shall be used to request plant clearance assistance or transfer plant clearance.

245.7101-6 DD Form 1638.

DD Form 1638, Report of Excess and Surplus Contractor Inventory, shall be used to provide a uniform reporting system of essential management data reflecting the scope and effectiveness of the contractor inventory utilization and disposal program.

245.7101-7 DD Form 1641.

DD Form 1641, Disposal Determination/Approval, shall be used to support disposal determinations.

245.7101-8 DD Form 1635.

DD Form 1635, Plant Clearance Case Register, provides a permanent numerical listing of plant clearance cases and shall be maintained by each office performing a plant clearance function. The space provided on the right-hand side of the form may be used for additional columns and headings considered essential by management officials. In those instances when the plant clearance register has been mechanized, a mechanized form may be used in lieu of the DD Form 1635.

245.7101-9 DD Form 1348-1.

DD Form 1348-1, DOD Single Line Item Release/Receipt Document, shall be used for all transfers of idle Industrial Plant Equipment and Contractor Inventory Redistribution System (CIRS) inventory when directed by DIPEC.

245.7102 Instructions.

Additional instructions are provided below for completing the forms or reports prescribed in this Section.

245.7102-1 Instructions for performing inventory verification and determination of allowability.

The following instructions shall be observed in verifying inventory schedules:

(a) *Allocability.* Determine allocability of inventory by reviewing contract requirements, delivery schedules, bills of material, and other pertinent material. Determine whether schedules include:

(1) Material which would not have been required for completion of the terminated or modified portion of the contract;

(2) Material in quantities indicating an unreasonable anticipation of contract requirements; or

(3) Material which might be utilized on the continuing portion of the contract, or diverted to other work of the contractor, either commercial or Government. Utilize sound judgment and experience gained during the life of the contract in detecting common items. In addition review—

(i) Contractor's purchase orders for current procurement of similar material,

(ii) Contractor's plans and orders for current and scheduled production.

(iii) Contractor's stock record cards, and

(iv) Contractor's bills of material prepared for items similar to the terminated or modified items.

(b) *Quantity.* Assure that the quantities of inventory available are in accordance with the quantities listed on the inventory schedules. While a complete physical count of each item of inventory normally need not be performed, sufficient checks to assure that the quantities are accurate shall be performed.

(c) *Condition.* Assure that the condition of the inventory is in accordance with that shown on the inventory schedules.

245.7102-2 DD Form 1638.

DD Form 1638, Report of Excess and Surplus Contractor Inventory, shall be used by all contract administration offices having plant clearance responsibility for reporting cases under which disposition of contractor inventory actually has been effected. Cases transferred to other offices will not be included. Only the column total for each line of this report will be completed, unless the departmental headquarters of the administering activity desires a breakout of DIPEC-controlled property and directs completion of other column. Reports shall be prepared on a quarterly basis covering report periods ending 31 March, 30 June, 30 September, and 31 December, and shall be submitted in duplicate to the Departmental Headquarters of the administering activity, no later than 10 working days after the close of the report period. This reporting requirement is assigned Report Control Symbol DD(I&L)(Q)1430. All items on the report are self-explanatory except as follows:

(a) *Line 1.* Insert exact totals from line 7 of preceding report.

(b) *Line 2.* Insert net increase or decrease due to shortage, overages, errors, or withdrawals (other than purchases or retentions at cost).

(c) *Line 3.* Insert totals representing all excess inventory reported by the contractors for plant clearance purposes during reporting period.

(d) *Line 4.* Insert total of lines 1, 2, and 3.

(e) *Line 5.* Insert totals representing all plant clearance cases completed during the reporting period. Cases shall not be reported as completed until physical removal (or other final disposition) has been accomplished. Acquisition cost must equal acquisition cost on line 19.

(f) *Line 8.* Insert amount which contractor in possession is retaining or withdrawing at full acquisition cost.

(g) *Line 9.* Insert full acquisition cost in appropriate column, and in "Proceeds" column insert the acquisition cost less approved handling, transportation, or restocking charges.

(h) *Line 10.* Insert total acquisition cost of all transfers accomplished during the reporting period. On lines 10A through 10H, insert subtotals representing value of transfers to each service or agency indicated. Line 10 represents the total of the individual amounts shown on lines 10A through 10H. Caution should be taken to exclude the amount on lines 10A through 10H when obtaining the grand total on line 19 of the several columns of Section II.

(i) *Lines 12 through 14.* Insert gross proceeds. When approved costs of sale are reimbursed from proceeds, net proceeds shall be identified in "Remarks".

(j) *Line 15.* Insert acquisition cost of inventory sold by the contractor with proceeds applied as a credit to overhead.

(k) *Lines 16 and 18.* Lines 16 and 18 may be used to identify and report transactions not otherwise identified.

(l) *Line 19.* Insert total of lines 8 through 18. Acquisition cost must equal acquisition cost on line 5.

245.7102–3 Instructions for establishing a plant clearance case.

Upon receipt of acceptable inventory schedules or DD Form 1342 from the contractor or from other Government sources provided by this Part, the plant clearance officer shall assign a plant clearance case number in accordance with 245.7102–4 and establish a plant clearance case file. The case number, contractor's name, and contract number shall be identified on the case folder. Termination inventory shall be identified with the work "Termination" on the outside of the case folder to insure priority handling. Separate submissions of inventory schedules and DD Forms 1342, applicable to one contract at the same location, shall be consolidated, whenever possible, under one plant clearance case. The plant clearance case file, as a minimum, shall contain the following:

(a) Copy of inventory schedules or DD Form 1342 (The copy of the inventory schedule will be annotated by the plant clearance office to reflect all disposal actions accomplished. Upon completion of all plant clearance actions, this copy should reflect disposition of all inventory reported for plant clearance action.);

(b) Copy of letters or transmittal documents forwarding contractor inventory to the appropriate screening activity;

(c) Copies of all shipping instructions, correspondence, or other instructions directing the disposition of contractor inventory, or evidence of no requirements;

(d) Copies of all shipping documents accomplishing transfer or shipment of contractor inventory;

(e) Copy of Inventory Verification Survey or other forms evidencing completion of allocability review;

(f) Copies of appropriate forms authorizing donation;

(g) Copies of all appropriate forms evidencing the sale of contractor inventory;

(h) Appropriate documentation indicating proper disposition of any proceeds resulting from plant clearance action;

(i) Copies of all other correspondence or forms bearing on disposal actions concerned with the case;

(j) Copies of all pertinent correspondence and approvals concerning Property Disposal Review Board cases, and antitrust clearance, when required; and

(k) Copy of Inventory Disposal Report.

245.7102–4 Instructions for assigning plant clearance case number.

(a) The plant case number shall consist of a three-part, 11-digit number constructed as follows:

(1) The first part shall be a six digit (alphanumeric combination), as shown in the DoD Activity Address Directory assigned to the contract administering activity.

(2) The second part, digits 7 through 10 shall consist of the following: 7th through 9th digits—Consecutively numbered serial number, locally assigned, using alpha and numeric characters commencing with 001 at the beginning of each calendar year, and continuing as necessary through ZZZ.

(3) The third part, 11th digit, will be a single alpha code to identify the Department:

C—Army
Q—Navy
E—Air Force
L—Marine Corps
U—Defense Logistics Agency
N—Defense Nuclear Agency
M—Defense Mapping Agency
S—National Aeronautics and Space Administration
O—Non-DoD Activities

(b) Combined, the plant clearance case number assigned by the plant clearance officer will be in accordance with the following examples: "S4403A–0010–Q" and "54403A–ZZZ2–Q"

(1) "S4403A" indicates that the Dallas Defense Contract Administration Services Region is designated as the office to which the plant clearance officer is assigned.

(2) "0010" indicates that this is the first case established by the Dallas Defense Contract Administration Services Region in calendar year 1970 and "ZZZ2" the 8199th case in calendar year 1972.

(3) "Q" indicates that the Navy is the owning military service.

(c) The plant clearance case number assigned will be recorded on DD Form 1635, Plant Clearance Case Register, which will provide a permanent numerical listing of plant clearance cases.

245.7102–5 Form letter for transmitting DD Form 1342 to DIPEC.

The following minimum information shall be included in the letter:

(1) The number of DD Form 1342 included;

(2) Automatic Release Date;

(3) Screening Complete Date;

(4) Contractor's name and address;

(5) Procurement Instrument Identification (Contract) Number;

(6) The name and address of the procuring activity that awarded the facility or other type contract which permitted the contractor to acquire the industrial plant equipment;

(7) The location of the industrial plant equipment;

(8) Total acquisition cost;

(9) A note stating that the ARD will not be extended;

(10) A note substantially as follows:

All requests for transfer or shipment must indicate appropriate fund citation for packing, crating, and handling charges. Government Bills of Lading (GBL) should be furnished when possible. If shipments will be accomplished by other than a GBL, DIPEC must cite transportation funds; and

(11) A signature block containing the name of the plant clearance officer.

245.7102–6 General sales terms and conditions, and special conditions of sale.

(a) The following general sales terms and conditions shall be included, as a minimum, in contractor-conducted sales by formal invitation:

(1) *Inspection.* The Bidder is invited, urged, and cautioned to inspect the property to be sold prior to submitting a bid. Property will be available for inspection at the places and times specified in the Invitation. In no case will failure to inspect constitute grounds for the withdrawal of a bid after opening.

(2) *Condition and location of property.* Unless otherwise specifically provided in the Invitation, all property listed

therein is offered for sale "as is" and "where is." If it is provided therein that the Contractor shall load, then "where is" means f.o.b. conveyance at the point specified in the Invitation. The description is based on the best available information. However, the Contractor makes no warranty, express or implied, as to quantity, kind, character, quality, weight, size, or description of any of the property or its fitness for any use or purpose. Except as provided in Conditions No. (8) and (10), no request for adjustment in price or for rescission of the sale will be considered. This is not a sale by sample.

(3) *Consideration of bids.* The Bidder agrees that his bid will not be withdrawn within the period of time specified for the acceptance thereof following the opening of bids (sixty (60) calendar days if no period is specified by the Contractor or by the Bidder, but not less than ten (10) calendar days in any case) and that during such period his bid will remain firm and irrevocable. The right is reserved to reject any or all bids, to waive any technical defects in bids, and unless otherwise specified in the offering or by the Bidder, to accept any one item or group of items in the bid. Unless the Invitation otherwise provides, bids may be submitted on any or all items. However, unless the Invitation otherwise provides, a bid covering any listed item must be submitted on the basis of the unit specified for that item and must cover the total number of units designated for that item. In case of error in the extension of prices, unit prices will govern.

(4) *Payment.* The Purchaser agrees to pay for property awarded to him in accordance with the prices quoted in his bid. Payment of the full purchase price, subject to any adjustment pursuant to Condition No. (8), must be made within the time specified for removal and prior to delivery of any of the property. In the event that any adjustment is made pursuant to Condition No. (8), payment must be completed immediately subsequent to such adjustment. The balance of the purchase price after applying the total bid deposit made by the Purchaser (if a bid deposit was required) under the Invitation (or otherwise the full purchase price) shall be paid to the Contractor in cash or by certified check, cashier's check, traveler's check, bank draft, or postal or express money order. The Contractor reserves the right to apply any bid deposits made under this Invitation by a Bidder against any amounts due to the Contractor under a contract awarded by him under this Invitation for Bid. In those instances where the total sum becoming due to the Contractor from the Purchaser on a contract awarded to him under the Invitation is less than the total amount deposited with his bid, the difference shall be promptly refunded. Deposits accompanying bids which are not accepted shall be promptly returned.

(5) *Title.* Unless otherwise specified in the Invitation, title to the items of property sold hereunder shall vest in the Purchaser as and when full and final payment is made, except that if the Invitation provides that loading will be performed by the contractor, title shall not vest until such payment and loading are completed. On all motor vehicles and motor-propelled or motor-drawn equipment requiring licensing, a certificate of release, Standard Form 97, Certificate of Release of a Motor Vehicle, executed by the Contracting Officer (or a State certificate of title), shall be furnished for each vehicle and piece of equipment.

(6) *Delivery and removal of property.* Unless otherwise specified in the Invitation, the Purchaser shall be entitled to obtain the property upon vesting of title of the property in him. Delivery shall be made at the designated location, and the Purchaser shall remove the property at his expense within the period of time originally specified in the Invitation or within such additional time as may be allowed by the Contractor. The Purchaser shall reimburse the Contractor for any damage to the Contractor's property caused by the removal operations of the Purchaser. If the Purchaser is permitted by the Contractor to remove the property after the expiration of the period prescribed or allowed for removal, the Contractor, without limiting any other rights which it may have, may require the Purchaser to pay a reasonable storage charge.

(7) *Default.* If the successful Bidder fails to make full payment, to remove property on the specified date, or to comply with any other terms and conditions thereof, the right is reserved to sell or otherwise dispose of any or all such property and to charge losses and expenses incidental thereto to the account of the defaulting Bidder. The bid deposit (if required in the Invitation) shall be applied against any such losses and expenses.

(8) *Adjustment for variation in quantity or weight.* When property is sold on a "unit price" basis, the Contractor reserves the right to vary the quantity or weight delivered by fifteen percent (15%) from the quantity or weight listed in the Invitation; and the Purchaser agrees to accept delivery of any quantity or weight within these limits. The purchase price shall be adjusted upwards or downward in accordance with the unit price and on the basis of the quantity or weight actually delivered. No adjustment for variation shall be made where property is sold on a "price for the lot" basis.

(9) *Weighing.* When weighing is necessary to determine the exact purchase price hereunder, the Purchaser shall arrange for and pay all expenses of weighing material. All switching charges shall be paid by the Purchaser. When removal is by truck, weighing shall be subject to supervision and accomplished on (i) contractor scales, (ii) certified scales, or (iii) other scales acceptable to both parties. When removal is by rail, weighing shall be on railroad track scales or by other means acceptable to the railroad for freight purposes. Approved weighing shall establish the exact purchase price and govern the making of full payment thereon.

(10) *Risk of loss.* After mailing notice of award and prior to the date specified for removal, the Contractor shall be responsible only for the exercise of reasonable care for the protection of the property. After passage of title and after the date specified for removal of the property or any extension approved in writing by the Contractor, all risk of loss, damage, or destruction from any cause whatsoever shall be borne by the Purchaser.

(11) *Limitation on contractor and government liability.* The measure of Contractor and Government liability in any case when liability of Contractor and Government to the Purchaser has been established shall not exceed refund of such portion of the purchase price as the Contractor may have received.

(12) *Oral statements and modifications.* Any oral statement or representation by any representative of the Contractor changing or supplementing the contract or any condition thereof is unauthorized and shall confer no right upon the Purchaser.

(13) *Eligibility of bidders.* The Bidder certifies that he is not: (i) a civilian employee of the Department of Defense or the United States Coast Guard whose duties include any functional or supervisory responsibility for disposal of contractor inventory; (ii) a member of the Armed Forces of the United States, including the United States Coast Guard, whose duties include any functional or supervisory responsibility for disposal of contractor inventory; (iii) an agent, employee or immediate member of the household of personnel in (a)(13) (i) and (ii) above.

(14) *Claims liability.* The Purchaser or Bidder agrees to save the Contractor and Government harmless from any and all claims, demands, actions, debts, liabilities, judgments, costs, and attorney's fees arising out of, claimed on account of, or in any manner predicated upon loss of or damage to property of, and injuries to or the death of any and all persons whatsoever, in any manner caused or contributed to by the Purchaser or Bidder, their agents, servants or employees, while in, upon, or about the sale or the property site on which the property sold or offered for sale is located, or while going to or departing from such areas; and to save the Contractor and Government harmless from and on account of damages of any kind which the Contractor may suffer as the result of the acts of any of the Purchaser's agents, servants, or employees while in or about the said sites.

(b) The following special conditions of sale shall be included in contractor-conducted sales by formal invitation, as required, or at the specific request and direction of the plant clearance office:

(1) *Demilitarization.* When demilitarization of property by the Purchaser is required, whether on or off the contractor or Government premises, the following special conditions shall be included in the invitation for bids on property located in the United States or outside the United States, as appropriate—

(i) *Demilitarization.* Item(s) ——— are required to be demilitarized by the Purchaser in the manner and to the degree set forth below: ———

(A) Insert item number(s) and specific demilitarization requirements for item(s) shown in Attachment 1, Part 2 of Defense Demilitarization Manual, DoD 4160.21–M–1 for property located in the United States.

(B) For property located outside the United States, insert item number(s) and specific demilitarization requirements for item(s) shown in Attachment 1, Part 3 of DoD 4160.21–M–1.

(ii) *Demilitarization on government premises.* The property requiring demilitarization shall not be removed from Government premises and title shall not pass to the Purchaser until demilitarization has been completed by the Purchaser and approved by the Contractor's authorized representative and a Government representative. Demilitarization will be accomplished as specified elsewhere in the contract. Component parts essential to the military or lethal purpose of the item shall be rendered unusable as prescribed herein. The Purchaser agrees to assume all costs incident to the demilitarization and further agrees to do any necessary work to restore the working area to its present condition after completely removing the demilitarized property.

(iii) *Demilitarization on other than government premises.* The property requiring demilitarization shall be demilitarized by the Purchaser under supervision of qualified Department of Defense personnel and title shall not pass to the Purchaser until demilitarization has been completed by the Purchaser and approved by the Contractor's authorized representative and a Government representative. Demilitarization will be accomplished as specified elsewhere in the contract. Component parts essential to the military or lethal purpose of the item shall be rendered unusable as prescribed herein. The Purchaser agrees to assume all costs incident to the demilitarization.

(iv) *Failure to demilitarize.* If the Purchaser fails to demilitarize the property being sold herein in accordance with the terms of the contract, the contractor may, at his option and upon ten (10) days written notice (calculated from date of mailing) to the Purchaser:

(A) Repossess the property, complete the demilitarization thereof, and return the property to the Purchaser. The Purchaser hereby agrees to pay to the Contractor prior to the return of the property to the Purchaser all costs incurred by the Contractor in repossessing, demilitarizing, and returning the property to the Purchaser.

(B) Repossess the property, complete the demilitarization thereof, resell the property, and charge the defaulting Purchaser with all excess costs occasioned the Contractor thereby. The Contractor shall deduct these costs from the purchase price and refund the balance of the purchase price, if any, to the Purchaser. In the event the excess costs incurred by the Contractor in repossessing, demilitarizing, and reselling the property exceed the purchase price, the defaulting Purchaser hereby agrees to pay these excess costs to the Contractor.

(C) Repossess the property and resell it under similar terms and conditions. In the event this option is exercised, the Contractor shall charge the defaulting Purchaser with all excess costs occasioned the Contractor thereby. The Contractor shall deduct these excess costs for the original purchase price, if any, to the defaulting Purchaser. Should the cost to the Contractor of repossessing and reselling the property exceed the purchase price, the defaulting Purchaser hereby agrees, to pay these excess costs to the Contractor.

(2) *Performance bond.* When work, other than loading, is to be performed by the purchaser and it is considered necessary to insure performance by the purchaser, a performance bond shall be required. Generally, the amount of each performance bond shall be 100% of the estimated cost of the work to be performed. If a requirement for a 100% performance bond would be disadvantageous to the contractor or to the Government, the amount may be reduced to not less than 50% of the estimated cost of the work to be performed. The execution of a performance bond in a specified amount shall be required, as follows:

Performance Bond. Within ten (10) days after notice of award, the Purchaser shall furnish a performance bond in the sum of $——— to cover the Purchaser's obligations and undertakings herein. Such bond shall remain in full force and effect during the term of the contract any extensions as may be agreed upon. The Purchaser shall not be permitted to begin performance until such time as the bond has been received.

(3) *Liability and insurance.* The following shall be required when the work to be performed by the purchaser warrants a special condition of sale:

Liability and Insurance. The Purchaser shall at his own expense procure and maintain during the term of the contract insurance as follows:

(i) Standard workmen's compensation and employer's liability insurance such as may be proper under State and Federal statutes. However, upon receipt of satisfactory evidence that the Purchaser is qualified as a self-insurer under applicable provisions of law, the Contractor may waive this requirement.

(ii) Bodily injury liability insurance in the amount of not less than $300,000 any one occurrence.

(c) Property damage liability insurance including any and all property, whether or not in the care, custody, or control of the Purchaser.

(4) *Dangerous property.* A warning of potential danger shall be included in all cases when it cannot be certified that the property is completely innocuous. The following condition shall be used for this purpose:

Dangerous Property. Purchasers are warned that the property purchased may contain items of an explosive, toxic, or inflammable nature, notwithstanding reasonable care exercised by the Contractor to render the property harmless. The Contractor and the Government assume no liability for damage to the property of the Purchaser, or for personal injuries or disabilities to the Purchaser or his employees, or to any other person, arising from or

incident to the purchaser of the property, or its use or disposition by the Purchaser. The Purchaser shall save the Contractor and the Government harmless from any and all such claims.

(5) *Controlled substances.* The sale of any controlled substance, e.g., narcotics, stimulants, depressants, hallucinogenic drugs, shall be subject to the following special conditions:

Controlled Substances. Bids will be rejected unless the Bidder submits the following certification with his bid: "The undersigned represents and warrants that he is registered under The Comprehensive Drug Abuse Prevention and Control Act of 1970, and is authorized under the law and by the Attorney General, U.S. Department of Justice (Bureau of Narcotics and Dangerous Drugs) to buy controlled substances either as a medical practitioner, dealer or manufacturer of controlled substances."

Narcotic Drug and Chemicals. Bids will be rejected unless the Bidder submits the following certification with his bid: "The undersigned represents and warrants that he is registered under Federal narcotics laws and is authorized by law and by the Bureau of Narcotics, United States Treasury Department, as a manufacturer of narcotics."

(6) *Radioactive material.* The following condition shall be used whenever there is the possibility that the property offered for sale is capable of emitting ionized radiation:

Radioactive Material. Purchasers are warned that the property may be capable of emitting ionized radiation in varying degrees. The Contractor and the Government assume no liability for damage to the property of the Purchaser, or for personal injuries or disabilities to the Purchaser or his employees, or to any other person arising from or incident to the purchase of the property or its use or disposition by the Purchaser. The Purchaser shall hold the Contractor and the Government harmless from any and all such claims. As a safety precaution, the Purchaser should warn future possessors or users of the property that it may be capable of emitting ionized radiation.

(7) *Scrap warranty.* The following condition shall be used whenever property, other than production scrap, is offered for sale as scrap:

Scrap Warranty. The Purchaser represents and warrants that the property will be used only as scrap, in its existing condition or after further preparation, and will not be resold until (a) scrapping has been accomplished, or (b) the Purchaser obtains an identical warranty from any subsequent purchaser.

(8) *Antitrust clearance.* When a sales offering includes property with an acquisition cost of $3,000,000 or more, the following condition shall be included:

Antitrust. To comply with Section 207 of the Federal Property and Administrative Services Act of 1949, as amended, when property offered for sale has an acquisition cost of $3,000,000 or more, or when the property consists of patents, processes, techniques, or inventions, irrespective of cost, the successful Bidder shall be required to furnish additional information and shall allow up to sixty (60) days for acceptance of his bid. Award shall be made only upon advice from the Department of Justice that the proposed sale would not tend to create or maintain a situation inconsistent with the antitrust laws.

(9) *Small business representation.* The following provision shall be included in the general sales terms and conditions for all formal sales invitations covering contractor conducted sales of surplus industrial plant equipment.

Bidder Represents:
(Check appropriate box)
(a) That he (—) is, (—) is not, a small business concern.
(b) For definitions and applicable size standards, see FAR Subpart 19.1 and Code of Federal Regulations, Title 13, Part 121, as amended.
(End of provision)

(c) The following special conditions of sale may be added at the option of the contractor:

(1) *Sales and use tax liability.* If the purchase of the property is subject to a state sales or use tax, a special condition of sale shall be included stipulating that the Purchaser shall pay and the Contractor shall collect the amount of the tax, which shall be itemized separately on the billing document.

(2) *Safety, security, and fire regulations.*

(3) *Bid deposits.*

(4) *Other special conditions.* All other special conditions of sale considered necessary by the Contractor shall be subject to the prior approval of the plant clearance officer. Approval shall be granted, *provided,* the prescribed conditions of sale are not altered or affected thereby and the interest of the Government is not adversely affected.

PART 246—QUALITY ASSURANCE

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 246.1—General

246.101 Definitions.

"Calibration", is the comparison of a measurement system or device of unverified accuracy to a measurement system or device of known or greater accuracy to detect and correct any variation from required performance specification of the unverified measurement system or device.

"Metrology", is the science of weights and measures used to determine conformance to technical requirements including the development of standards and systems for absolute and relative measurements.

"Quality", means the composite of material attributes including performance features and characteristics of a product or service to satisfy a given need.

"Quality Assurance", is a planned and systematic pattern of all actions necessary to provide adequate confidence that adequate technical requirements are established; products and services conform to established technical requirements; and satisfactory performance is achieved.

"Quality Audit", is a systematic examination of the acts and decisions with respect to quality in order to independently verify or evaluate the operational requirements of the Quality program or the specification or contract requirements of the product or service.

"Quality Program", is a program which is developed, planned, and managed to carry out cost effectively all efforts to effect the quality of materials and services from concept through validation, full-scale development, production, deployment, and disposal.

246.102 Policy.

(S–70) The Departments shall develop and manage a cost effective quality program to assure that all services provided and products designed, developed, purchased, produced, stored distributed, operated, maintained, or disposed of, by contractors for the Department of Defense, conform to specified requirements.

(S–71) The Departments will plan and implement a quality program as an integral part of all phases of the acquisition and support process, and will conduct quality audits to assure the attainment of quality products and services.

(S–72) The Government shall determine the type and extent of Government contract quality assurance actions required, based upon the particular acquisition.

(1) These actions may include:

(i) Inspection of supplies and services;

(ii) Review of the contractor's inspection system, quality program, or other means employed by the contractor to control quality and to comply with contract requirements:

(iii) Maintenance of Government records to reflect actions, deficiencies, and corrective measures; and

(iv) Review and evaluation of quality data, including reports from the user, to initiate required corrective actions or to adjust Government contract quality assurance actions.

(2) The Government shall hold contractors responsible for the quality of products and services by means of:

(i) Contract provisions that place responsibility on contractors;

(ii) The Government's exercising its right to reject or return contractor-responsible defective items for repair, correction or replacement; and

(iii) Warranty clauses, when appropriate.

(3) The Government shall consider the use of:

(i) Contractual means for encouraging excellence in the conduct of contractor-responsible quality efforts;

(ii) Incentive fee or award fee arrangements for achieving quality goals;

(iii) Reduced Government surveillance when contractor's quality performance so indicates; and

(iv) Other noncontractual motivation techniques.

(4) Contractors shall be provided maximum flexibility in establishing efficient and effective quality programs within specified contractual requirements.

246.103 Contracting office responsibilities.

The contracting office may conduct, in conjunction, where necessary, with the activity responsible for technical requirements, product-oriented surveys and evaluations to determine the adequacy of the technical requirements relating to quality and product conformance to design intent. The contracting office may arrange with the contract administration office to participate in pre-award surveys, post-award, and preproduction conferences, and first article testing. The contracting office may aid the contract administration office in the transition from research and development to production, aid the technical activity in improving the quality requirements in contracts when first designed for competitive acquisition, and aid in ascertaining the source of difficulties associated with user experience reports.

246.104 Contract administration office responsibilities.

(d) Written instructions from the contracting office shall be continued as prescribed until any recommendation has been acted upon by the contracting office (also see FAR 46.103(c)).

246.170 Organization responsible for technical requirements.

(a) The activity responsible for technical requirements (e.g., specifications, drawings and standards) is responsible for prescribing inspection, testing, or other contract quality requirements that are essential to assure the integrity of products and services.

(b) To the extent feasible, alternative but substantially equivalent inspection methods shall be provided in order to obtain wide competition and low cost. Contractor-recommended alternatives may be authorized when in the interest of the Government and after approval by the activity responsible for technical requirements.

(c) The activity responsible for technical requirements may also prepare instructions regarding the type and extent of Government inspections pertaining to contracts for specific supplies or services that are complex or for which unusual requirements have been established. Such instructions shall be kept to a minimum taking into account the policy contained in 246-474(b). Normally, issuance of these instructions will not be appropriate for standard commercial items except when items having critical characteristics are being purchased. After issuance of these instructions, production problems, product-oriented visits, user experience and input from the contract administration office shall be analyzed periodically to determine whether conditions warrant a change in type and extent of the inspection requirements. Such analysis may result in decreasing or increasing Government inspection. These instructions shall be prepared on a contract-by-contract basis and shall not be issued:

(1) As a substitute for incomplete contract quality requirements;

(2) Where the contract does not impose equal or greater inspection requirements on the contractor;

(3) Encompassing broad or general designations such as "all requirements", "all characteristics", or "all characteristics in the classification of defects";

(4) On routine administrative procedures; or

(5) Specifying continued inspection requirements when statistically sound sampling will provide an adequate degree of protection.

(d) In the preparation of such instructions, the technical activity shall consider, to the extent available and applicable, such factors as:

(1) The past quality history of the contractor;

(2) The criticality of the material acquired in relation to its ultimate use considering such factors as reliability, safety and interchangeability;

(3) Problems encountered in the development of the product;

(4) Problems encountered in the acquisition of the same or similar material;

(5) Previously generated feedback data from receiving, testing or using activities; and

(6) Other contractor's experience in overcoming manufacturing problems.

When knowledge of the determining factors, which resulted in the requirement for Government inspection, would be useful to the contract administration office in performing the contract quality assurance function, these factors should be provided to the contract administration office.

Subpart 246.2—Contract Quality Requirements

246.202 Types of contract quality requirements.

246.202-3 Higher-level contract quality requirements.

(S-70) Inspection System Requirement is a requirement, in addition to the Standard Inspection Requirement, that the contractor establish and maintain an inspection system in accordance with a Government specification. This requirement shall be referenced in contracts when technical requirements are such as to require control of quality by in-process as well as final end-item inspection, including control of such elements of the manufacturing process as measuring and testing equipment, drawings and changes, inspection, documentation and records. The objectives and essential elements of an inspection system are prescribed in MIL-I-45208, which shall be referenced in contracts when an inspection system requirement has been established.

(S-71) Quality Program Requirement is a requirement, in addition to the Standard Inspection Requirement, that the contractor establish and maintain a quality program in accordance with a Government specification. Such a requirement shall be established when the technical requirements of the contact are such as to require control of work operations, in-process controls, and inspection, as well as attention to other factors (e.g., organizations, planning, work instructions, documentation control, advanced metrology). The objectives and essential elements of a quality program are prescribed in MIL-Q-9858 which shall be referenced in contract when a quality program requirement has been established.

246.203 Criteria for use of contract quality requirements.

(c) *Criticality.* Whether peculiar or common, purchases of critical items must have contract quality requirements.

246.204 Application of criteria.

For DoD the following table implements FAR 46–204, Table 46–1, for higher-level contract quality requirements:

TABLE 46–1—CONTRACT QUALITY REQUIREMENTS GUIDE

Item		Type of contract	
Technical description	Complexity	Application	Quality requirement
Commercial	Complex	Critical	MIL-I-45208
Military-Federal	Non-complex	Critical	MIL-I-45208
Military-Federal	Complex	Non-Critical Peculiar	MIL-I-45208
Military-Federal	Complex	Critical	MIL-Q-9858

Subpart 246.3—Contract Clauses

246.370 Material inspection and receiving report.

The contracting officer shall insert the clause at 252.246–7000, Material Inspection and Receiving Report, in solicitations and contracts when delivery of a separate and distinct object or entity, whether separately priced or not, is anticipated. However, when contract administration is retained by the contracting office, the clause is not required in the following situations unless the use of a MIRR is desired by the contracting officer:

(a) Contracts effected under FAR Part 13;

(b) Negotiated subsistence contracts;

(c) Contracts for fresh milk and related fresh dairy products;

(d) Contracts for which the end item is a scientific or technical report;

(e) Research and development contracts not requiring the delivery of separately priced end items;

(f) Base, post, camp or station contracts;

(g) In overseas areas when the contracting officer determines that the preparation and distribution of DD Form 250 by the contractor would be impracticable, the contracting office shall arrange for the contractor to provide the information necessary for the preparation of the DD Form 250 by the contract administration personnel; and,

(h) Contracts for services when hardware is not acquired as an item in the contract, e.g., level of effort type contracts; field service type contracts, etc.

A MIRR is not required when indefinite delivery type contracts are placed by central contracting offices which authorize only base, post, camp or station activities to issue orders, provided that such contracts and orders are not assigned for administration.

246.371 Inspection records.

Inspection records referenced in the following FAR clause paragraphs include any data analysis or summary of records used by the contractor to complement his inspection system: 252.246–2(b), 252.246–4(b), 252.246–5(b), 252.246–6(b), 252.246–7(a), 252.246–8(b), 252.246–10(b), and 252.246–12(b).

Subpart 246.4—Government Contract Quality Assurance

246.405 Subcontracts.

Selective evaluation of the contractor's control of his subcontractors may be requested by the contract administration office responsible for the contract in order to provide that office with additional assurance that supplies being received from subcontractors conform to quality requirements. Communications between contract administration offices concerning contract quality assurance actions to be performed shall be through Government channels. Requests for selective evaluation shall indicate Government contract quality actions to be performed, e.g., specific characteristics, processes and procedures to be verified, tests to be witnessed, and records, reports, and certificates to be evaluated.

246.406 Foreign governments.

(S–70) *FMS Requirements.*

If a contractor's purchase order or subcontract includes FMS requirements and "quality assurance only" is requested at source, the requesting CAO shall clearly indicates "FMS Requirement" on the face of the document and provide the FMS case identifier code, associated item quantity and related DoD prime contract number and contract line/subline item number. When more than one FMS case is involved, the information shall be provided for each.

(S–71) *Quality assurance among NATO countries.*

(1) NATO Standardization Agreement (STANAG) 4107-Mutual Acceptance of Government Quality Assurance sets forth procedures, terms and conditions under which mutual government quality assurance of military material and services is to be performed by the national authority of one NATO country on request of another NATO country, or a NATO organization. This agreement, with certain reservations, has been ratified by the United States and other nations in the North Atlantic Treaty Organization. The Military Departments may request NATO countries to perform quality assurance in accordance with STANAG 4107. Military Departments will also perform quality assurance in accordance with STANAG 4107 when requested by a NATO country. As a reservation to STANAG 4107, the U.S. Government reserves the right to require reimbursement for work performed for other NATO countries and organizations. 242.102–70(d) applies.

(2) NATO Standardization Agreement (STANAG) 4108, Allied Quality Assurance Publications, provides for the application of Allied Quality Assurance Publications (AQAP's). Its annexes furnish a list of AQAP's and the criteria for the application of those AQAP's which are contractually required in contracts between NATO countries.

(S–72) *International military sales (Non-NATO).*

Department of Defense components shall:

(1) Perform quality assurance (QA) services on international military sales contracts or in accordance with existing agreements;

(2) Assure conformance to technical and quality requirements of international military sales contracts;

(3) Keep Government personnel and contractors informed on the use of QA publications; and,

(4) Specify appropriate quality requirements in contracts awarded to other countries, and delegate QA services to the host government whenever satisfactory services are available, as appropriate.

246.470 Quality assurance by other agencies.

Under Pub. L. 85–726 (72 Stat. 776, 49 U.S.C. 1423), the Federal Aviation Administration (FAA) has certain responsibilities and prerogatives in connection with the issuance and continuation of various certificates applicable to the design, manufacture, and airworthiness criteria of certain types of commercial aircraft and of aircraft equipment and accessories. The FAA evaluations are not a substitute for normal Department of Defense evaluations of the contractor's quality assurance measures. Actual records of such FAA evaluations may be of benefit, however, and should be utilized to maximum advantage by the contract administration office. That office is responsible for assuring that the supplies and services conform to the terms of the contract and that any required certificates and approvals are in the possession of the contractor prior to acceptance.

246.471 Contract administration of special commodities.

246.471-1 Subsistence.

(a) Any Federal activity capable of assuring wholesomeness and quality in food, including medical service personnel of the Military Departments, may be designated by the purchasing office to perform Government contract quality assurance actions on a reimbursable basis when appropriate, for subsistence contract items.

(b) The following is an explanation of particular terms used in this section:

(1) Subsistence—food for, and provisions to be used in, feeding of personnel and animals;

(2) Medical Service Personnel—officers and enlisted personnel of the Medical Services of the Departments of the Army, Navy, and Air Force designated to perform the required inspections of subsistence;

(3) Wholesomeness of Food—that characteristic possessed by a food product which promotes good health and well being in the consumer; and

(4) Quality of Food—the required elements or characteristics stated in the specification or other contractual document which the food must possess to comply with the desired degree of excellence exclusive of those characteristics required to assure wholesomeness.

(c) The Surgeons General of the Military Departments are responsible of the acceptance criteria, technical requirements, and inspection procedures needed to assure wholesomeness of foods. Wholesomeness assurance measures will include but not be limited to:

(1) Establishment of standards of tolerances to evaluate wholesomeness.

(2) Inspection of sources for sanitation including sources of component items when required;

(3) Approval of manufacturing processes to assure wholesomeness is incorporated and used; and

(4) Use of test and examination techniques during processing or for the finished item to detect unsanitary practices or unwholesome food.

(d) Maximum utilization shall be made of existing inspection and grading services of other Federal agencies to perform contract quality assurance actions in processing plants economically and efficiently. However, an adequate Government contract quality assurance workload shall be retained for training of medical service personnel and to provide a base for rotation of personnel between the continental United States and overseas.

246.471-2 Petroleum.

The contract administration office may authorize the release of petroleum supplies without requiring the signing or stamping of shipping papers by a representative of the contract administration office, if the alternative procedures of 246.473(b) are used. In that event on petroleum servicing contracts for receiving, storing, and issuing Government-owned petroleum products, the contractor shall be required to type or stamp and to sign the following statement on each copy of the shipping papers:

> I certify that the above supplies were (a) in the quality indicated, (b) taken from Government-owned and approved stocks, and (c) loaded into inspected and approved containers. This shipment was released in accordance with paragraph 46-471-2 under authorization of (Name and title of the authorized representative of the Contract Administration Office) in a letter dated (Date of authorizing letter).
>
> (Signature and Title of Contractor's designated official.)

246.471-3 Construction projects.

(a) On-site inspection of buildings and other structures is normally performed by the Military Department responsible for their construction.

(b) Government contract quality assurance actions for construction materials and supplies acquired for military and civil works projects shall be performed by the contract administration office in accordance with this Section.

(c) The functions in (a) and (b) above will be performed so as to assure compatibility of buildings and structures and installed equipment.

246.472 Inspection stamping.

(a) There is one Department of Defense inspection approval marking design for identification of material which has been inspected for conformance to only a portion of the contract quality requirements, and another for material which has been completely inspected for all contract quality requirements at source. The designs and their uses are as follows:

(1) *Partial (Circle) Inspection Approval Stamp.* This stamp is circular and is used by or under the direct supervision of the Government representative to identify contract or subcontract material which has been subjected to only a portion of the contract quality requirements applicable to the material at the time and place of Government contract quality assurance. Partial inspection approval stamping shall identify, for Government personnel, material which complies and all contract quality requirements applicable at the time and place of Government contract quality assurance, excepting those listed as uninspected on the associated Material Inspection and Receiving Report (DD Form 250), packing list, or comparable document.

(2) *Complete (Square) Inspection Approval Stamp.* This stamp is square and is used by or under the direct supervision of the Government representative to identify contract or subcontract material which has satisfied all contract quality requirements. Complete inspection approval stamping shall identify, for Government personnel, material which is in complete conformance with all contract quality requirements applicable to the material at the time and place of inspection. Complete inspection approval establishes that material which once was partially approved has subsequently received complete approval. One imprint of the square stamp will void multiple imprints of the circle stamp.

(b) The marking of each item is neither required nor prohibited. Ordinarily, the stamping of shipping containers, packing lists, or lost routing tickets adequately serves to provide the necessary indication status and to control or facilitate the movement of material. No material shall be stamped in such a way as to damage the material.

(c) The placing of a Department of Defense Inspection Approval Stamp upon material does not mean that the material has been accepted by the Government. Acceptance is ordinarily evidenced by execution of the acceptance certificate on the applicable inspection and receiving report.

(d) NASA Publications include detailed policies and procedures regarding the use of National Aeronautics and Space Administration (NASA) Quality Status Stamps. When requested by NASA Centers, the Government representative shall use NASA Quality Status Stamps and apply the procedures of current NASA requirements for all NASA delegations.

246.473 Authorizing shipment of supplies.

(a) *General.* Ordinarily, a representative of the contract administration office shall sign or stamp the shipping papers accompanying Government source-inspected supplies of both prime contracts and subcontracts to release them for shipment. In accordance with the criteria in 246.473(b), however, an alternative procedure may be used in which the contractor assumes the

responsibility of the release for shipment of such supplies inspected at his or his subcontractor's facilities, just as the contractor may be given the authority of other functions pertaining to the control of quality. When this alternative procedure is used, it will release Department of Defense manpower for technical functions by eliminating routine signing or stamping of the papers accompanying each shipment.

(b) *Alternative procedures—contractor release for shipment.*

(1) The contract administation office may give the contractor authorization in writing to release supplies for shipment when:

(i) The stamping or signing of the shipping papers by a representative of the contract administration office impairs the operation of a planned Government contract quality assurance program or places an unreasonable demand on the Government representative's time; and

(ii) There is sufficient continuity of production to permit the establishment of a systematic and continuing Government evaluation of the contactor's control of quality; and

(iii) The contractor has a record of satisfactory product quality including quality pertaining to preparation for shipment.

(2) When there is an indication that the conditions in (b)(1)(i) (ii) or (iii) above no longer prevail, the authorization shall be withdrawn in writing.

(3) When the alternative procedure is used, the contractor shall:

(i) Type or stamp, and sign, the following statement on the required copy or copies of the shipping paper(s) or on an attachment thereto:

> The supplies comprising this shipment have been subjected to and have passed all examinations and tests required by the contract, were shipped in accordance with authorized shipping instructions, and conform to the quality, identity and condition called for in contractual requirements and to the quantity shown on this document. This shipment was released in accordance with paragraph 246.475 of the DoD FAR for authorizing Shipment of Supplies under authorization of (Name and Title of the authorized representative of the Contract Administration Office) in a letter dated (Date authorizing letter).
>
> (Signature and Title of Contractor's designated official), and

(ii) Release and process, in accordance with established instructions, the DD Form 250 (Material Inspection and Receiving Report) or any other receiving report authorized by this Supplement.

246.474 Government contract quality assurance actions.

(a) *Planning.*

(1) Government contract quality assurance actions to determine a contractor's compliance with contract quality requirements shall be systematically planned, taking into consideration the relative importance of the product and the variety of tasks required of the available resources. Systematic planning shall include:

(i) Review and analysis of pre-award surveys, post-award conferences, technical data packages, and first article approvals;

(ii) Identification of the specific products, processes and procedures to be subjected to Government contract quality assurance as well as the specific characteristics of such products, processes, or procedures to be verified (in the absence of identification of specific characteristics by the purchasing office, those established by the contractor will be used to the maximum extent possible);

(iii) Provisions for effective distribution and utilization of the Government's efforts and resources between inspection of products and inspection of the contractor's methods of regulating quality; and provisions for keeping and using records.

(2) Planning to determine the extent of Government contract quality assurance actions shall include as a minimum:

(i) Possible effect of failure on health or safety of personnel, or on associated or related equipment;

(ii) Tactical, strategic, or technical importance;

(iii) Complexity and the need for required reliability;

(iv) Pertinency, completeness, and reliability of the contractor's quality records;

(v) Previous quality history of the contractor; and

(vi) Unit cost.

(b) *Implementation.*

(1) Determination of conformance to contract quality requirements shall be made on the basis of objective evidence of quality. In determining the acceptability of supplies or services, the contract administration office shall make optimum use of quality data generated by contractors. To the extent that contractor quality data are available and reliable, as determined by the contract administration office, such data shall be used to adjust the amount of Government contract quality assurance to a minimum consistent with proper assurance that the supplies or services accepted conform to contract quality requirements.

(2) When the contract requires the contractor to conduct particularly expensive tests involving destruction of supplies, extended periods of time for conducting the tests, or other factors contributing to high-testing costs, the tests shall be coordinated between the contractor and the Government to the maximum extent practicable to avoid the need for later independent Government examination and testing.

(3) The following basic actions shall be taken to determine the contractor's compliance with the contract quality requirements:

(i) Review and evaluation of the contractor's inspection procedures;

(ii) Review and evaluation of the contractor's selection, calibration, maintenance, and use of gauges and measuring and test equipment;

(iii) Review and evaluation of the contractor's quality records; and

(iv) Performance of product verification inspection by the Government.

(4) Because of configuration, innumerable design characteristics, and life and reliability requirements, the quality of complex supplies and equipment cannot be adequately evaluated by inspection only; such supplies and equipment must be produced under regulated conditions if adequate assurance of product quality is to be realized. Systematic control of manufacturing processes by the producer is an essential prerequisite for assuring the quality of such items. It is also essential that the Government verify systematically that such control is, in fact, established and maintained by contractors.

(5) The Government, under the Inspection clause at FAR 52.246–2, reserves the right to charge to the contractor any additional cost of Government inspection and test when supplies are not ready at the time such is requested by the contractor or when reinspection or retest is necessitated by prior rejection. When a contract contains this clause, a record shall be maintained of the additional cost occasioned the Government by the delay, reinspection or retest. Such record shall include a description of any delay, the reasons for any reinspection or retest and a statement of the hours spent by the Government, including wait time, as well as the cost of any applicable travel and transportation. When the Quality Assurance Representative considers that the circumstances warrant the assessment of the additional costs occasioned the Government by the delay, reinspection or retest, he shall forward his

recommendation together with the record of additional costs to the contracting officer. If the contracting officer determines that such additional costs should be charged to the contractor, he shall notify the contractor, in writing, of his determination to exercise the Government's right under the Inspection clause and demand payment of such costs in accordance with the collection procedures established under FAR Subpart 32.6. In arriving at any such recommendation and determination, consideration should be given to the frequency of such delay, reinspection or retest under both current and prior contracts; the cause of such delay, reinspection or retest; and the expense of recovering the additional costs. Charges for such delay, reinspection or retest normally should not be assessed when such delay, reinspection or retest occurs only occasionally, or results from causes beyond the contractor's control, or when the expense of recovery outweighs the costs to be recovered. Costs shall be determined at the standard DoD reimbursable rate in effect at the time of the delay, reinspection or retest.

(c) *Maintenance of government records.* Suitable records shall be maintained by the contract administration office as part of the performance records of contractors in order to reflect:

(1) The nature of all Government contract quality assurance actions, including when appropriate the number of observations made and the number and type of deficiencies;

(2) Decisions regarding the acceptability of the products, the processes, and the requirements, together with action taken to correct deficiencies; and;

(3) Distribution of Government contract quality assurance effort.

(d) *Quality evaluation data.* The contract administration office shall establish a system providing as a minimum for the collection, evaluation and use of quality date developed by the contractor during manufacture and by the Government through contract quality assurance actions and reports by users during initial use phase, where available. The objectives of the system are to:

(1) Provide a foundation of technical actions aimed at maintaining and making needed improvements in the quality characteristics of both current and future products (subject to military requirements and cost considerations);

(2) Upgrade the methods and practices used to assure quality during manufacture, delivery, and use of the item;

(3) Provide a basis for managerial decisions relative to the allocation of Government contract quality assurance resources among different products and activities; and

(4) Determine production source capabilities as measured by product quality.

Subpart 246.6—Material Inspection and Receiving Reports

246.670 General.

Appendix I, Material Inspection and Receiving Report, contains procedures and instructions for the use, preparation, and distribution of the Material Inspection and Receiving Report (MIRR) (DD Forms 250 Series) and suppliers commercial shipping/packing lists used to evidence Government contract quality assurance (see FAR 46.401).

246.671 Policy.

(a) Material Inspection and Receiving Reports (MIRRs) are used to document contract quality assurance, acceptance of supplies and services, and shipments. They are used by receiving, status control, technical, contracting, inventory control, requisitioning, and paying activities. MIRRs shall not be used for:

(1) Shipments by subcontractors where direct shipment is not made to the Government; or

(2) Shipment of contractor inventory.

(b) The provisions of Appendix I are applicable to supplies or services acquired by the Department of Defense (DoD) when the Material Inspection and Receiving Report clause (see 252.246–7000) is included in the contract (see 246.370).

(c) When the Department of Defense provides contract quality assurance and/or acceptance services for non-DoD activities, the MIRR shall be prepared in accordance with Appendix I unless otherwise specified in the contract.

Subpart 246.7—Warranties

246.701 Definitions.

"Acceptance", as used in this subpart and in the warranty clauses at FAR 52.246–17, Warranty of Supplies of a Non-Complex Nature; FAR 52.246–18, Warranty of Supplies of a Complex Nature; FAR 52.246–19, Warranty of Systems and Equipment under Performance Specifications or Design Criteria; and FAR 52.246–20, Warranty of Services; means the execution of an official document (e.g., DD Form 250) by an authorized representative of the Government. The above clauses shall be modified accordingly in DoD contracts.

246.704 Authority for use of warranties.

The Chief of the Purchasing Office must approve use of warranty, except for commercial items (see FAR 246.709), firm fixed price and fixed price with economic price adjustment contracts containing quality assurance provisions that reference MIL–I–45208 or MIL–Q–9858; construction contracts when the warranties contained in federal, military or construction guide specifications applicable to a given construction project are used; and technical data, unless the warranty provides for extended liability (see 246.770).

246.705 Limitations.

(a) The contracting officer shall not include warranties in cost reimbursement contracts except for those warranties contained in the FAR clauses at FAR 52.246–3, Inspection of Supplies—Cost Reimbursement; FAR 52.246–8, Inspection of Research Development—Cost Reimbursement; and at 252.246–7001, Warranty of Technical Data.

246.706 Warranty terms and conditions.

(b)(5) *Markings.* If items delivered under the contract are to be stamped or marked, it shall be done in accordance with MIL Standard 129, "Marking of Shipments".

246.708 Warranties of technical data.

The contracting officer shall consider the factors contained in 246.703 in deciding whether to provide for warranties of technical data and whether there should be an extended liability provision (see 252.246–7001, Warranty of Technical Data, Alternates I and II). Particular emphasis should be placed on whether the extended liability is justified by (a) the likelihood that correction or replacement of the nonconforming data, or a price adjustment in lieu thereof, will not afford adequate protection to the Government, and (b) the effectiveness of the additional remedy as a deterrent against furnishing nonconforming data.

246.770 Special contract clauses.

In accordance with 246.708, the contracting officer may insert a clause substantially the same as the clause at 252.246–7001, Warranty of Technical Data, in solicitations and contracts when a fixed-priced or cost-reimbursement contract is contemplated that will require data to be furnished. When this clause is not used, technical data is warranted under the clauses at FAR 52.246–3, Inspection of Supplies—Cost Reimbursement; FAR 52.246–6, Inspection—Time-and-Material and

Labor Hour; FAR 52.246-6, Inspection of Research and Development—Cost Reimbursement; and FAR 52.246-19, Warranty of Systems and Equipment under Performance Specifications or Design criteria.

(a) If extended liability is desired and a firm fixed-price contract is contemplated, the contracting officer may use the clause with its Alternate I.

(b) If extended liability is desired and a fixed-price incentive contract is contemplated, the contracting officer may use the clause with its Alternate II.

PART 247—TRANSPORTATION

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5030.25, DoD FAR Supplement 201.301.

Subpart 247.1—General

247.103 Transportation documentation and audit regulation (TDA).

(b)(2) Appendix N of the MTMR contains the list of carriers and carrier associations that have entered into agreements with MTMC to provide the required transportation under commercial forms and procedures within CONUS.

247.104-3 Cost-reimbursement contracts.

Section 10721 rates are not applicable on Foreign Military Sales (FMS) shipments. However, on stock fund items from a manufacturer to a depot, Section 10721 rates do apply, unless it is clear that the quantity in a specific transportation unit will be delivered to an FMS purchaser. When it is known that a portion of the material in a transportation unit will be delivered to an FMS purchaser, that portion will be shipped on a separate bill of lading and Section 10721 rates will not apply.

247.104-5 Citations of Government rate tenders.

(a) DoD shippers within CONUS use Section IX, Chapter 214 of the MTMR for instructions pertaining to commercial bills of lading to be converted to GBLs.

247.105 Transportation assistance.

(b)(1) The term transportation assistance/traffic management advice includes any and all transportation factors, such as freight rates (for evaluation of bids or routing purposes), other transportation costs, transit agreements, time in transit, or port capabilities.

(2) MTMC is responsible for the performance of traffic management functions within CONUS, including the direction, control, and supervision of all functions incident to the effective and economical acquisition and use of freight and passenger transportation services from commercial for-hire transportation companies, including rail, highway, air, inland waterway, coastwide and intercoastal carriers. Therefore, requests for assistance, rates or other cost factors pertaining to transportation matters other than those outlined above should be directed to the appropriate military activity, i.e., the Military Airlift Command (MAC), Military Sealift Command (MSC) or Headquarters of the Military Service sponsoring the cargo (see 247.372).

(3) The locations and geographical areas of jurisdiction of each area headquarters of the Military Traffic Management Command (MTMC) are listed in Chapter 108 of the MTMR.

(4) Requests for assistance, rates or other costs applicable to shipments of bulk petroleum via ocean tanker transportation should be obtained from the Military Sealift Command.

(5) Requests for assistance, rates or other costs applicable for supplies to be shipped between points outside of the continental United States, including Alaska and Hawaii, shall be obtained from the Headquarters of the Military Service which sponsors the cargo. Requests should be directed as follows:

(i) *Army:* Deputy Chief of Staff for Logistics, Department of the Army, ATTN: LOG/MM-SSB, Washington, D.C. 20315.

(ii) *Navy:* Navy Supply Systems Command, Code 05, Washington, D.C. 20390.

(iii) *Air Force:* Applicable Overseas Air Force Command.

(iv) *Marine Corps:* Director, Transportation Division, HQ, U.S. Marine Corps, COS, Washington, D.C. 20380.

(6) Requests for rates and related costs for the evaluation of bids or proposals shall include the bid opening or proposal due date and the expected date of initial shipment, if established (see 247.373).

Subpart 247.2—Contracts for Transportation or for Transportation-Related Services

247.270 Stevedoring contracts.

247.270-1 Scope of section.

Acquisition procedures peculiar to stevedoring are set forth in this subsection. This section, however, does not contain or cross reference all provisions of this regulation applying to service contracts which shall be adhered to where applicable.

247.270-2 Definition.

Stevedoring is the loading of cargo from an agreed point of rest on a pier or lighter and its storage aboard a vessel, or the breaking out and discharging of cargo from any space in the vessel to an agreed point of rest dockside or in a lighter.

247.270-3 Method of acquisition.

Acquisition of stevedoring services shall be made by formal advertising pursuant to 10 U.S.C. 2304(a) whenever such method is feasible and practicable under existing conditions and circumstances even though such conditions and circumstances would otherwise satisfy the requirements of FAR Part 15.

247.270-4 Type of contract.

Normally, stevedoring services will be contracted for by means of an indefinite quantity type contract. Contracts for single job stevedoring services may be made when no indefinite quantity contract is available to fulfill the requirements.

247.270-5 Technical provisions.

(a) Since conditions vary at different ports and sometimes within the same port, standard technical provisions covering all phases of stevedoring operations are impractical. If car loading and unloading or other dock and terminal work will be performed under a stevedoring contract, technical provisions appropriate for such dock and terminal work should be added to the contract as separate items of work.

247.270-6 Evaluation of bids and proposals.

(a) *General.* Contractors shall be required to include in their bids and proposals tonnage or commodity rates which apply to the bulk of the cargo worked under normal conditions. Schedules of man-hour rates which apply to services not covered by commodity rates or to work performed under hardship conditions shall also be required.

(b) *Analysis of tonnage or commodity rates.*

(1) The price quoted for handling a ton (weight or measurement) of a specified commodity is a commodity rate. This rate is computed by dividing the hourly stevedoring gang cost by the estimated number of tons of the specified commodity which can be handled in one hour. The gang cost consists of the following:

(i) The total hourly wages paid to the men in the gang in accordance with the collective bargaining agreement between the maritime industry and the unions at a specific port;

(ii) Payments of workmen's compensation, social security taxes, unemployment insurance, taxes, and

liability and property damage insurance; and

(iii) General and administrative expenses and profit.

(2) The direct costs shall be verified by the contracting officer. Since the negotiated stevedoring contract is designed to minimize the contractor's risk, the contractor's gang cost should contain no allowance for contingencies and the profit rate should be less than is granted in the usual fixed-price contract. The estimated number of tons of the specified commodity which can be handled in one hour is based on the contractor's experience and should be compared with the records of experience at the required activity. The evaluation of bids and proposals shall include an extension of the quoted commodity rates against the payable tonnage estimated to be handled for each commodity.

247.270–7 Analysis of man-hour and equipment rental rates.

Man-hour rates shall be established for every category of labor expected to be necessary to perform services required under the contract. The development of man-hour rates follows a pattern similar to the method used in arriving at a gang cost. Specifically, it is composed of the basic wage rate of the man, workmen's compensation, social security taxes, insurance, general and administrative expenses, and profit. The evaluations of bids and proposals shall include an extension of the quoted man-hour rates against the estimated man-hour requirements for each artisan classification. Rates for equipment rental shall be extended against estimated equipment hours.

247.270–8 Award of contract.

The award shall be made to the responsible contractor who offers the lowest overall acceptable bid or proposal after evaluating the total estimated cost of tonnage to be moved at commodity rates and estimated cost at man-hour rates.

247.270–9 Contract clauses.

(a) The contracting officer shall insert the clauses at 252.247–7000, Scope of Contract, and 252.247–7001, Schedule of Rates in solicitations and contracts for stevedoring services, as appropriate to the contracting situation. While these clauses, containing technical provisions, cover most situations adequately, the various provisions may be deleted, added to, modified, or rearranged as necessary to meet local conditions.

(b) The contracting officer shall insert the clause at 252.247–7002, Price Escalation, in formally advertised solicitations and contracts for stevedoring services.

(c) The contracting officer shall insert the clause at 252.247–7003, Revision of Prices, in negotiated solicitations and contracts for stevedoring services.

(d) The contracting officer shall insert the clause at 252.247–7004, Changes, in solicitations and contracts for stevedoring services, in lieu of the clause at FAR 52.243–1—Alternate I.

(e) The contracting officer shall insert the clause at 252.247–7005, Termination, in solicitations or contracts for stevedoring services when it is desired that the contract may be terminated by either party.

(f) The contracting officer shall insert the clause at 252.247–7006, Indefinite Quantities-Fixed Charges, in solicitations and contracts for stevedoring services when the contract will provide for the payment of "Fixed Charges."

(g) The contracting officer shall insert the clause at 252.247–7007, Indefinite Quantities-No Fixed Charges, in solicitations and contracts for stevedoring services when the contract will not provide for the payment of "Fixed Charges."

(h) The contracting officer shall insert the clauses at 252.247–7008, Employees of Contractor; 252.247–7009, Removal of Contractor's Employees; and 252.247–7010, Liability and Insurance, in solicitations and contracts for stevedoring services.

247.271 Contracts for the preparation of personal property for shipment or storage.

247.271–1 Scope of section.

Acquisition procedures peculiar to the preparation of personal property for shipment or storage and for the performance of intra-area movement or intra-city movements are set forth in this section. This section, however, does not contain or cross reference all provisions of this regulation applying to service contracts which shall be adhered to where applicable.

247.271–2 Policy.

(a) *Annual contracts.* Services for the preparation of personal property for shipment or storage and for the performance of intra-area movement normally shall be obtained by requirements contracts awarded as a result of formal advertising. Such contracts shall be on a calendar year basis except for noncontinuous requirements for shorter periods. Award of contracts should be made prior to 1 November of each year.

(b) *Area of performance.* The solicitation shall define clearly each area of performance. One or more areas may be established; but, the number should be held to a minimum consistent with local conditions. Each schedule may provide for the same or different areas of performance. An area shall be determined in accordance with the following general guidelines. It shall be an area using political boundaries, streets, or any other features as lines of demarcation. Determination as to the number of areas thereof shall take into consideration such matters as total volume, size of overall area and isolated areas of high population density which will be serviced. Frequently used terminals will be specifically identified and considered as being included in each area of performance described in the solicitation.

(c) *Use of pre-bid conference.* In accordance with provisions of FAR 14.207, the use of pre-bid conference shall be considered and is encouraged.

(d) *Appropriate post-award orientation of contractors.* Contracting officers will assure that in accordance with FAR 42.503, each successful contractor is provided appropriate post-award orientation.

(e) *Maximum requirements-minimum capability.* The quantities established by the contracting officer in the Estimated Quantities clauses must be realistic. He must be assured that the Government's minimum acceptable daily capability will provide for at least the maximum authorized individual weight allowance as prescribed by the Joint Travel Regulations. Extreme caution must be exercised to ensure that the established minimum acceptable daily capability does not preclude the submission of bids by small but otherwise acceptable bidders.

247.271–3 Procedure.

(a) *Single CONUS military installations or activities assigned total multi-service personal property areas of responsibility.*

(1) When two or more military installations or activities are assigned personal property responsibilities for a given area, one military activity shall contract for the estimated requirements of all activities in a contiguous area. The activity shall be designated by mutual agreement of the installation commanders concerned.

(2) The Commander, Military Traffic Management Command (MTMC), shall designate the contracting activity when local commanders are unable to reach an agreement as to the activity to be designated.

(b) *Additional services and excess requirements.*

(1) *Excess requirements.* Excess requirements are those services which exceed the contractors' capabilities available under contracts. When excess requirements exist, they may be obtained by using small purchase procedures (see FAR Part 13).

(2) *Additional services.* Additional services include, but are not limited to, attempted pickups or deliveries, handling in and out, hoisting or lowering of articles, drayage to or from residences outside area of performance, extra long carry, carrying of pianos or organs, re-weighing, waiting time, special packaging, loading or unloading of railroad cars to include bracing and blocking and unbracing and unblocking as required. At the option of the contracting officer, additional services may be obtained by:

(i) Inclusion as items within the contract; provided, they are not used in the evaluation of bids (see 252.247–7100); and

(ii) Using Small Purchase Procedures (see FAR Part 13). Prices for additional services may be predetermined with the contractor or negotiated on a case-by-case basis.

(3) *Ordering of additional services.* Additional services other than attempted pickup or delivery will be performed by the contractor only upon authorization of the contracting officer regardless of the method of purchase. To the maximum extent possible, additional services required incident to an order should be identified prior to placement of the order or during the premove survey when applicable.

(c) *Contract distribution.* In addition to the distribution requirements of FAR Subpart 4.2, one copy of each contract will be furnished as follows:

(1) CONUS personal property shipping activities forward to the MTMC Personal Property Office having jurisdiction over the respective activity. These offices are: Commander, Military Traffic Management Command, Eastern Area, ATTN: MTE–PP, Bayonne, New Jersey 07002; and Commander, Military Traffic Management Command, Western Area, ATTN: MTW–PP, Oakland, California 94626.

(2) Personal property shipping activities in the European and Pacific areas forward to the appropriate Military Traffic Management Command Field Office. Other overseas personal property shipping activities forward to the Commander, Military Traffic Management Command, ATTN: MT–PPQ, Washington, D.C. 20315.

247.271–4 Solicitation provisions, schedule formats, and contract clauses.

(a) *Solicitation provisions and schedule formats.* Solicitation provisions and schedules may be revised as appropriate if negotiation procedures are employed.

(1) The contracting officer shall insert the provision at 252.247–7100, Evaluation of Bids, in solicitations for the preparation of personal property for movement or storage, and for performance of intra-city or intra-area movement. When "additional services" items are added to any schedule, the contracting officer shall insert the provision at Alternate I (also see 247.271–3(b)).

(2) The contracting officer shall insert the provision at 252.247–7101, Award, in solicitations for the preparation of personal property for movement or storage, and for performance of intra-city or intra-area movement.

(3) The contracting officer shall insert the provision at 252.247–7102, Estimated Quantities, in solicitations and resulting contractual instruments for the preparation of personal property for movement or storage, and for performance of intra-city or intra-area movement.

(4) The contracting officer shall insert the schedules at 252.247–7103 in solicitations and resulting contractual instruments for the preparation of personal property for movement or storage, and for performance of intra-city or intra-area movement. When a requirement does not exist for an item or sub-item in a schedule, that item or sub-item number, in its proper numerical sequence, will be indicated and the statement "No Requirement" added. Within Schedules I (Outbound) and II (Inbound), item numbers have been reserved to permit the contracting officer to include additional items as may be required by local conditions. Overseas activities, except those in Alaska and Hawaii, may modify the schedules when necessary to conform with local trade practices and country (including political subdivisions thereof) laws and regulations. All generic terminology, schedule and item numbers in proper sequence shall follow those contained in the basic format. All other modifications, other than those authorized herein, of schedule format will be processed as a request for deviation in accordance with Subpart 201.4. When it is determined to be in the best interest of the Government to have both outbound and inbound services within a given area of performance furnished by the same contractor, the contracting officer may modify the schedule format to combine both services in a single schedule; however, items shall follow the same sequential order as in the basic format. Whenever FED SPEC PPP–B–580 containers are specified in a schedule, containers listed in MTMC Pamphlet 55–12, dated 12 October 1978, may be substituted.

(b) *Contract clauses.* The contracting officer shall insert the clauses set forth below in solicitations and contracts for the preparation of personal property for movement or storage, and for performance of intra-city or intra-area movement (except see 247.271–3(b)). Overseas commands, except those in Alaska and Hawaii, may modify these clauses when necessary to conform with local practices and country (including political subdivisions thereof) laws and regulations.

(1) 252.247–7104, Scope of Contract.

(2) 252.247–7105, Period of Contract. When the period of performance is less than a calendar year, the clause shall be modified to show the appropriate beginning and ending. However, the date for the end of the contract period shall not be later than 31 December of the year in which the contract is awarded.

(3) FAR 52.216–18, Ordering. In addition to the designation of each ordering activity, the individuals authorized to place orders for each activity shall be identified by name or position title. When provisions are made for the placement of oral orders in accordance with FAR 16.506(b), required documentation of such oral orders will be in accordance with Departmental instructions.

(4) 252.247–7106, Ordering Limitation.

(5) 252.247–7107, Contract Areas of Performance.

(6) 252.247–7108, Requirements. The contracting officer shall insert the clause at FAR 52.216–21 except that paragraph (f) of the clause shall be deleted and the paragraph (f) at 252.247–7108 shall be inserted in its place.

(7) 252.247–7109, Facilities. Also see FAR 28.3 regarding insurance policies.

(8) 252.247–7110, Performance.

(9) 252.247–7111, Time Requirements.

(10) 252.247–7112, Demurrage.

(11) 252.247–7113, Vans.

(12) 252.247–7114, Drayage.

(13) 252.247–7115, Liability.

(14) 252.247–7116, Erroneous Shipments.

(15) 252.247–7117, Additional Marking Instructions.

(16) 252.247–7118, Weight Certificates.

(17) 252.247–7119, Report of Lost/Damaged Material.

(18) 252.247–7120, Subcontracting.

(19) 252.247–7121, Additional Services.

Subpart 47.3—Transportation in Supply Contracts

247.301-2 Participation of transportation officers.

See FAR 47.105(b) for information concerning additional traffic management assistance.

247.301-3 Using the Defense Transportation System (DTS).

Contractual documents shall specify that the contractor shall not ship directly to a consolidation or containerization point (CCP) without authorization from the designated contract administration office.

247.305-10 Packing, marking and consignment.

(a)(1) Consignment instructions shall include, as a minimum, the clear text and coded MILSTRIP data as follows:

(i) Department of Defense Activity Address Director (DODAAD), Military Assistance Program Address Director (MAPAD) code (MAPAC and TAC) in accordance with DoD 5105.308–D or H8–1/H8–2 code of consignee and clear text identification of consignee and destination;

(ii) Project code, when applicable;

(iii) Transportation Priority (TP);

(iv) Required Delivery Date (RDD); and

(v) Coded MILSTRIP document number, demand/suffix code, a supplementary address and signal code. Non-MILSTRIP shipments shall include data similar to (a)(1)(i) through (iv) above and the applicable portion of (a)(1)(v), together with the notation "Non-MILSTRIP".

(2) In addition to the data requirements of (a)(1)(i) through (v) of (1) above, amended shipping instructions shall include the following when appropriate:

(i) Name of the activity originally designated, from which the stated quantities are to be deducted; and

(ii) Any other features of the amended instructions not contained in the basic contract.

(b) For contracts assigned for any contract administration function listed in FAR Subpart 42.3 to any office listed in DoD 4105.59–H, DoD Directory of Contract Administration Services Components, such instructions shall include the modification serial number and, if a new line item is created by the issuance of shipping instructions, the new line item number and the existing line item number if affected.

(c) For diversions of petroleum, oil and lubricant (POL) products overseas to new destinations, instructions issued by an office other than that issuing the contract or delivery order and issued by telephone, teletype or telegram are exempted from the requirement to include the modification serial number and the new line item number in such instructions.

(d) See 247.371.

247.306-2 Lowest overall transportation costs.

(a) See 247.105 for information concerning sources for the lowest available freight and related accessorial and incidental charges.

(b) See 247.372 and 247.373.

247.370 DD Form 1384 (1 Apr 66), Transportation Control and Movement Document.

Reporting procedures and instructions for this form will be in compliance with DoD Regulation 4500.32–R, MILSTAMP.

247.371 The Standard Form 30, Amendment of Solicitation/Modification of Contract.

When complete consignment instructions are not initially known (See 247.305–10) Form 30 will be used to issue or amend consignment instructions and when necessary, to confirm consignment instructions issued telephonically, via teletype or telegram. When issued to confirm delivery instructions the Form 30 will:

(a) Be stamped or marked "CONFIRMATION" in block letters and shall specify in detail those instructions being confirmed.

(b) Contain no changes to the instructions being confirmed. The confirming Standard Form 30 shall be processed as follows:

(1) For contracts assigned for any contract administration function listed in Subpart 242.3 to any office listed in DoD 4105.59–H within five working days;

(2) For diversions of petroleum, oil and lubricants (POL) products overseas to new destinations within 30 days of instructions being confirmed.

(3) Other contracts—

(i) Telephone—within five working days; and

(ii) Teletype or telegraph—consolidate on a monthly basis.

247.372 DD Form 1653 (1 Mar 68), Transportation Data for IFBs and RFPs.

DD Form 1653 which will contain recommendations to the PCO concerning f.o.b. terms best suited for the procurement, and other suggested transportation provisions for inclusion in the IFB/RFP, shall be completed upon request of the PCO by the transportation specialist, for association with the appropriate purchase request. When appropriate, DD Form 1653 will also include information on combined port handling and transportation charges to be included in the IFB/RFP in connection with export shipments.

247.373 DD Form 1654 (1 Mar 68), Evaluation of Transportation Cost Factors.

DD Form 1654 permits procurement personnel to furnish basic information to the transportation office for development of transportation cost factors which shall be used by the procuring contacting officer in the evaluation of f.o.b. origin bids or proposals.

Subpart 247.5—Ocean Transportation by U.S.-Flag Vessels

247.503 Applicability.

(S–70) For the purpose of this subpart, the following geographic areas are established:

(1) *North Atlantic:* Includes Eastern Canada from the United States border to Goose Bay, Labrador; and Narsarssuak, Greenland.

(2) *U.S. East Coast:* Includes the eastern United States from the Canadian border to (and including) Key West, Florida.

(3) *U.S. Gulf:* Extends from (but excluding) Key West, Florida, to the Mexican border.

(4) *Caribbean:* Includes Bermuda; Bahamas; Cuba; Puerto Rico, Haiti; Dominican Republic; Jamaica; Windward and Leeward Islands; Trinidad; the eastern coast of Mexico; the eastern coast of Central America; and the northern coast of South America up to (and including) French Guiana.

(5) *Eastern South America:* Includes the eastern coast of South America from (but excluding) French Guiana to Cape Horn.

(6) *North Europe:* From the northern boundary of Portugal includes northern Atlantic and Biscay ports of Spain; Bordeaux/Hamburg range; Scandinavian and Baltic Sea Ports; England, Wales, Scotland and Ireland; Iceland.

(7) *Mediterranean:* Includes Azores; Canary Islands; Morocco; Spanish Morocco; Mediterranean ports extending from Gibraltar to Suez Canal; ports on Adriatic and Aegean Sea, Sea of Marmora and Black Sea; and Atlantic ports of Portugal and Spain from Gibraltar to the northern boundary of Portugal.

(8) *West Africa:* Includes the western coast of Africa from northern boundary of Rio de Oro to southern boundary of Angola and includes the Cape Verde Islands, Ascension Island and St. Helena.

(9) *South and East Africa:* Includes the southern and eastern coast of Africa and Madagascar from southern boundary of Angola on the west coast and around the south and east coast to Cape Guardafui between the Gulf of Aden and the Indian Ocean.

(10) *South Asia:* Extends from Suez to but excluding New Guinea. Includes the shores of the Red Sea; shore of the Gulf of Aden; the northern shores of the Indian Ocean including extensions such as the Persian Gulf; the East Indies including Borneo, the Celebes, etc., but excluding the Philippines and New Guinea; and the Malay Peninsula excluding Thailand.

(11) *New Guinea-Australia:* Includes Australia; New Guinea; Tasmania; New Zealand and Melanesia (comprising generally the Admiralty Islands, New Ireland, New Britain, the Solomons, New Hebrides and New Caledonia).

(12) *East Asia:* Includes the ports of the mainland and islands of East Asia from and including Thailand to and including Japan; includes the Philippines, Formosa, the Ryukyu Islands and the Bonins.

(13) *Hawaii-Central Pacific:* Hawaiian Islands; Wake/Marcus; and Oceania and Micronesia (comprising generally Palau, Marianas, Carolines, Gilberts, Fijis, Marquesas, Tuamotu Archipelago, etc., but excluding oceanic island possessions of South American countries).

(14) *Alaska and Aleutian Islands:* Includes the western coast of Canada and Alaska (including the Aleutian Islands) south of Cape Prince of Wales.

(15) *U.S. Northwest:* Includes all Oregon and Washington ports.

(16) *U.S. West Coast:* Includes all California.

(17) *Western Mexico and Central America:* Includes the western coast of Mexico and the western coast of Central America.

(18) *Western South America:* Includes the western coast of South America from (and including) the Republic of Colombia to Cape Horn, and the Pacific Islands possessions of South American countries.

(19) *Exempt Areas:*

(i) Alaska north of Cape Prince of Wales.

(ii) Greenland, except Narsarssuak.

(iii) Northern and eastern Canada from Goose Bay, Labrador, to Alaska.

(iv) Ports and facilities under security restrictions in otherwise nonexempt areas.

(v) Antarctica.

(S–71) The procedures set forth at FAR 47.506 and 47.506 below are applicable to all ocean shipments of supplies except:

(1) Shipments in vessels assigned to United States Navy fleets other than the Military Sealift Command;

(2) Shipments which originate or terminate in "exempt areas" as established in (S–70) above;

(3) Shipments which originate and terminate in the same geographic area; provided, however, that supplies of the type described in FAR 47.503(a)(1) shall be transported in United States flag vessels to the extent such vessels are available at fair and reasonable United States-flag rates.

247.506 Procedures.

(S–70) Except for those supplies obtained for nonreimbursable contributions to foreign assistance programs for which the ocean transportation is to be provided by and at the expense of the recipient government, ocean transportation and supplies owned by the Government and in the possession of either a Department, or a contractor, or subcontractor of any tier, of a Department, will be provided by the Military Sealift Command. Upon receipt of advice from the contracting officer, the Military Sealift Command shall take such action as may be necessary and practicable to assure proper utilization of Government vessels and private United States vessels in accordance with this subpart and applicable regulations. The Commander of the Military Sealift Command or his designated representative is authorized to make any determination as to availability of United States-flag vessels required to assure such proper utilization.

247.507 Contract clauses.

(a) Forward the applicable shipping document specified in the clause set forth at FAR 52.247–64 to the Department of the Navy (Commander, Military Sealift Command, ATTN: MT–5), Washington, D.C. 20390, for shipments made under arrangements by the contractor or by a Government agency other than the Military Sealift Command.

(S–70) The contracting officer shall insert the clause at 252.247–7200, Ocean Transportation of Government-Owned Supplies, in solicitations and contracts which may involve ocean transportation or property owned by the Government and in the possession of the contractor or any of his subcontractors, including any contract under which title to property may pass to the Government prior to shipment.

PART 249—TERMINATION OF CONTRACTS

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 249.1—General Principles

249.102 Notice of termination.

See 243.301(a)(1)(S–70) for use of the Standard Form 30 (SF 30), Amendment of Solicitation/Modification of Contract, in providing notice of termination and amendment of the termination notice.

249.105 Duties of termination contracting officer after issuance of notice of termination.

249.105–1 Termination status report.

Upon receipt of the termination notice, it is the responsibility of the contract adminisration office to prepare DD Form 1598, Contract Termination Status Report, and transmit two copies to the purchasing office and one copy to the headquarters office to which the contract administration office is directly responsible. In addition, these reports shall be furnished on a quarterly basis for the quarters ending March, June, September, and December, within 30 days after the end of the respective quarter, and upon closing of the termination case. This reporting requirement is assigned Report Control Symbol: DD(I&L)(Q&AR) 1411.

249.108 Settlement of subcontract settlement proposals.

249.108–4 Authorization for subcontract settlements without approval or ratification.

(a)(1)(ii) However, no industrial plant equipment included in such inventory shall be disposed of prior to screening pursuant to FAR 45.6.

(e) However, industrial plant equipment, the cost of which is included in determining the amount of the claim, shall not be disposed of prior to screening pursuant to FAR 45.6.

249.109 Settlement agreements.

249.109–7 Settlement by determination.

See 243.301(a)(S–70) for use of the Standard form 30 (SF 30), Amendment of Solicitation/Modification of Contract, to reflect a determination of the amount due.

249.110 Negotiation memorandum.

(a)(1) *Format for termination contracting officer's settlement memorandum for fixed-price type contract terminated for convenience of the Government.* This memorandum shall be addressed to a reviewing authority or the file as appropriate.

Contractors and subcontractors should be encouraged to use this format appropriately modified to cover subcontract settlements submitted for review and approval.

Part I—General Information

1. *Identification.* (Identify memorandum as to its purpose and content.)

a. Name and address of the contractor. Comment on any pertinent affiliation between prime and subcontractors relative to the overall settlement.

b. Names and titles of both contractor and Government personnel who participated in the negotiation.

2. *Description of Terminated Contract.*

a. Date of contract and contract number.

b. Type of contract (*e.g.*, fixed price, or fixed price incentive).

c. General description of contract items.

d. Total contract price.

e. Furnish reference to the contract termination clauses (cite FAR/DoD FAR Supplement designation or other special provisions).

3. *Termination Notice.*

a. Reference termination notice and state effective date of termination.

b. Scope and nature of termination (complete or partial), items terminated, unit price and total price of items terminated).

c. State whether termination notice was amended, and if so, explain.

d. Statement whether contractor stopped work on effective termination date. If he did not, furnish details. Also state whether subcontracts were terminated promptly by the contractor.

e. Statement as to diversion of common items and return of goods to suppliers, if any.

f. Furnish information as to contract performance and timely deliveries on part of contractor.

Part II—Contractor's Settlement Proposal

1. *Date and Amount.* Indicate date and location where claim was filed. State gross amount of claim. (If interim settlement proposals were filed, furnish information for each claim.)

2. *Basis of Claim.* State whether claim was filed on inventory, total cost or other basis. Explain approval granted in connection with submission on other than inventory basis.

3. *Examination of Proposal.* State type of reviews made and by whom (audit, engineering, legal, or other).

Part III—Tabular Summary of Contractor's Claim

Prepare a summary substantially as follows:

(Where field recommendations are to be considered, expand the format to include such recommendations.)

AUDITOR'S RECOMMENDATION

	Contractor's Proposal	Dollars accepted	Cost questioned	Unresolved items	TCO negotiated amount
Item Claimed:					
1. Contractor's costs as set forth on Settlement Proposal, Metals, Raw materials, etc...					
Total					
2. Profit					
3. Settlement Expense					
4. Total					
5. Settlement with Subs					
6. Acceptable Finished Product					
7. Gross Total					
8. Disposal and Other Credits					
9. Net Settlement					
10. Partial, Progress & Advance Payments					
11. Net Payment Requested					

Part IV—Discussion of Settlement

1. *Contractor's Cost.*

a. If the settlement was negotiated on the basis of individual items, specify the factors and consideration with respect to each item.

b. In the case of a lump sum settlement, comment on the general basis for and major factors concerning each element of cost and profit included therein.

c. Comment on any important adjustments made to costs claimed or any significant amounts in relation to the total claim.

d. If a partial termination is involved, state whether the contractor has requested an equitable adjustment in the price of the continued portion of the contract.

e. Comment on any unadjusted contractual changes which are included in the settlement.

f. Comment on whether or not a loss would have been incurred and explain adjustment for loss, if any.

g. Furnish other information believed helpful to any reviewing authority in understanding the recommended settlement.

2. *Profit.* Explain the basis and factors considered in arriving at a fair profit.

3. *Settlement Expenses.* Comment on and summarize those expenses not included in audit review.

4. *Subcontractor's Settlements.*

Number of Settlements . . . Net Amount

Approved by Termination Contracting Officer _____

Concluded by contractor under delegation of authority

No Cost Settlements _____

Total _____

5. *Partial Payments.* Furnish total amount of partial payments, if any.

6. *Progress or Advance Payments.* Furnish total of unliquidated amounts, if any.

7. *Claims of the Government Against the Contractor Included in Settlement Agreement Reservations.* List all outstanding claims, if any, which the Government has against the contractor in connection with the terminated contract or terminated portion thereof.

8. *Assignments.* List any assignments, giving name and address of assignee.

9. *Disposal Credits.* Furnish information as to applicable disposal credits and give dollar amounts of all disposal credits.

10. *Plant Clearance.* State whether all plant clearance action has been complete and all inventory sold, retained or otherwise properly disposed of in accordance with applicable plant clearance regulations. Comment on any unusual matters pertaining to plant clearance. Consolidated closing plant clearance report is attached.

11. *Government Property.* State whether all Government property has been accounted for.

12. *Special Tooling.* If involved, furnish comment on disposition.

13. *Summary of Settlement.* Summarize the settlement in tabular form substantially as follows:

TABULAR SUMMARY FOR COMPLETE OR PARTIAL TERMINATION—Continued

	Amount claimed	Allowed amount
Prime Contractor's Charges (before disposal credits)	$	$
Plus: Subcontractor charges (after disposal credits)		
Gross Settlement	$	$
Less: Disposal Credits—Prime	XXXXX	
Net Settlement	$	
Less: Prior Payment Credits (This Settlement)		
Previous Partial Settlements		
Other Credits or Deductions		
Total		$
Net Payment		
Total Contract Price (Complete Termination)		$
CPIT (for partial termination): Less: Total Payments to date		
Net Payment from this Settlement		
Fund Reserved for Reservations		
Final Contract Price (Terminated Portion for partial termination)		$
Reduction in Contract Price		

14. *Exclusions.* Describe any proposed reservation of rights to the Government or to the contractor.

Part V—Recommendation

1. *Recommendation.* Include statement as to the amount of the gross settlement and recommendation that it is fair and reasonable to the Government and the contractor.

2. *Signature.* The Contracting Officer will sign and date the memorandum.

(End of Memorandum)

(2) *Format for termination contracting officer's settlement memorandum for cost-reimbursement type contracts.* This memorandum shall be addressed to a reviewing authority or the file as appropriate. This format may be appropriately modified and used to cover subcontract settlements.

Part I—General Information

1. *Identification.* (Identify memorandum as to its purpose and content.)

a. Name and address of the contractor. Comment on any pertinent affiliation between prime and subcontractors relative to the overall settlement.

b. Names and titles of contractor and Government personnel who participated in the negotiation.

2. *Description of Terminated Contract.*

a. Date of contract and contract number.

b. Type of contract.

c. General description of contract items.

d. State total contract cost and fee data if complete termination.

e. Furnish reference to the contract termination clauses (cite FAR/DoD FAR Supplement —— or other special provisions).

3. *Termination Notice.*

a. Reference termination notice and state effective date of termination.

b. Scope and nature of termination (complete or partial, items terminated, estimated costs and fee data applicable to items terminated).

c. State whether termination notice was amended, and if so, explain.

d. Explain scope of the settlement as to whether settlement concerns fee only or whether costs are also included.

Part II—Contractor's Settlement Proposal

1. *Date and Amount.* Indicate date and location where claim was filed. State gross amount of claim. (If interim settlement proposals were filed, furnish information for each claim.)

2. *Examination of Proposal.* State type of reviews made and by whom (audit, engineering, legal, or other).

Part III—Tabular Summary of Settlement

1. *Summary.* Summarize the proposed settlement in tabular form substantially as shown in Attachments A and B. Partial settlements may be summarized on Attachment B.

2. *Comments.* Furnish comments in amplification of tabular summaries.

a. Summary of Final Settlement (see Attachment A).

(1) If the auditor's final report was not available for consideration, state the circumstances.

(2) Explain how the fixed fee was adjusted. Identify basis used, such as percentage of completion. Include a description of factors considered and how they were considered. Include any tabular summaries and breakdowns deemed helpful to an understanding of the process. Factors which may be given consideration are outlined in FAR 49.305.

(3) Briefly identify matters included in liability for property and other charges against the contractor arising from the contract.

(4) Identify reservations included in the settlement that are other than standard reservations required by regulations and which are concerned with pending claims and refunds.

(5) Explain substantial or otherwise important adjustments made in cost figures submitted by the contractor in arriving at the proposed settlement.

(6) If unreimbursed costs were settled on a lump sum basis, explain the general basis for and the major factors considered in arriving at this settlement.

(7) Comment on an unusual item of cost included in the claim and on any phase of cost allocation requiring particular attention and not covered above.

(8) If auditor's recommendations for nonacceptance were not followed, explain briefly the main reasons why such recommendations were not followed.

(9) On items recommended for further consideration by the auditor, explain, in general, the basis for the action taken thereon.

(10) If any cost previously disallowed by a contracting officer is included in the proposed settlement, identify and explain the reason for inclusion of such costs.

(11) Show settlements with subcontractors by breakdown as follows:

	Number of settlements	Total dollar amount
Approved by Termination Contracting Officer		
Concluded by contractor under delegation of authority.		
No Cost Settlements		
Total		

(12) The following summary will be followed where settlement includes costs and fixed fee in a complete termination.

Gross Settlement	$
Less: Disposal credits	
Net Settlement	
Less: Prior Payments	
Other credits or deductions	
Total	
Net Payment	
Total contract estimated cost plus fixed fee	
Less: Net settlement	
Estimated reserve for exclusions	
Final contract price (Consisting of $— for reimbursement of costs and $— for adjusted fixed fee)	
Reduction in contract price (credit)	

(13) *Plant Clearance.* Indicate dollar value of termination inventory and state whether plant clearance has been completed. Attach consolidated plant clearance report (DD Form 1636, Inventory Disposal Report).

(14) *Government Property.* State whether all Government property has been accounted for.

Part IV—Recommendation

1. *Recommendation.* Set forth the amount of the proposed negotiated settlement and make recommendation that the settlement is fair and reasonable to the Government and the contractor and as such should be approved.

2. *Signature.* The termination contracting officer and negotiator will sign and date the memorandum.

SUMMARY OF SETTLEMENT—COST TYPE CONTRACT [1]

Contract No. ————

Termination No. ————

	Amount claimed	Amount allowed
1. Previous Reimbursed Costs—Prime and Subs	$	$
2. Previous Unreimbursed Costs		
3. Total Cost Settlement	$	$
4. Previous Fees Paid—Prime	$	$
5. Previous Fees Unpaid—Prime		
6. Total Fee Settlement	$	$
7. Gross Settlement		
	$	$
	$	$
Less: Deductions not reflected in Items 1–7		
a. Disposal credits	$	
b. Other charges against contractor arising from contract	$	
8. Net Settlement	$	
Less: Prior Payment credits		
9. Net Payment	$	
10. Recapitulation of previous settlements (insert number of previous partial settlements effected on account of this particular termination):		
Aggregate gross amount of previous settlements	$	
Aggregate net amount of previous partial settlements	$	
Aggregate net payment provided in previous partial settlements	$	
Aggregate amount allowed for prime contractor acquired property taken over by the Government in connection with previous partial settlements.	$	

[1] Use applicable portion for partial settlement.

Attachment A

UNREIMBURSED COSTS SUBMITTED ON DD FORM 547[1]

Costs	Amounts claimed by contractor's proposal	Auditor's Recommendation		TCO's computation
		Cost questioned	Unresolved items	
1. Direct material				
2. Direct labor				
3. Indirect factory expense				
4. Dies, jigs, fixtures and special tools				
5. Other costs				
6. General and administrative expense				
7. Fee				
8. Settlement expense				
9. Settlements with subs				
10. Total costs (Items 1–9)				

[1] Expand the format to include recommendations of technical personnel as required.

Attachment B

(End of Memorandum)

Subpart 249.4—Termination for Default

249.402 Termination of fixed-price contracts for default.

249.402-3 Procedure for default.

See 243.301(a)(1)(70) for use of the Standard Form 30 (SF 30), Amendment of Solicitations/Modification of Contract, in providing notice of termination.

Subpart 249.6—Contract Termination Forms and Formats

249.601 Notice of termination for convenience.

See 243.301(a)(1)(70) for use of the Standard Form 30 (SF 30), Amendment of Solicitation/Modification of Contract, in providing notice of termination.

Subpart 249.70—Special Requirements

249.7001 Terminated contracts with Canadian Commercial Corporation.

(a) The termination and settlement of contracts with the Canadian Commercial Corporation shall be effected in accordance with the provisions of (1) the Letter of Agreement between the Department of Defense Production (Canada) and the United States Department of Defense (see Appendix T.201, Canadian Agreements); (2) policies in T.201 and Part 49; and (3) the Manual of Procedure on Termination of Contracts, Department of Defence Production (Canada).

(b) The termination proposal of Canadian Commercial Corporation shall be submitted in the form prescribed in FAR 49.602 and shall reflect the amount of settlements with subcontractors. The letter transmitting the proposal shall certify that (1) subcontract settlements with Canadian subcontractors have been approved by the Contracts Settlement Committee of the Department of Defence Production (Canada), if required pursuant to the Manual of Procedure on Termination of Contracts, Department of Defence Production (Canada), and (2) that disposition of inventory has been completed. The TCO shall prepare an appropriate settlement agreement pursuant to the provisions of FAR 49.603.

(c) All Canadian subcontracts shall be settled by the Canadian Commercial Corporation pursuant to T.201. Schedules listing serviceable or usable contractor inventory shall be submitted by the Canadian Commerical Corporation to the TCO for screening in accordance with the provisions of FAR 45.6. Transfer instructions resulting from screening procedures shall be submitted to the Canadian Commercial Corporation for action. At the expiration of the screening period, the TCO shall advise the Canadian Commercial Corporation to proceed with disposition of contractor inventory determined to be surplus to the requirements of the Government. The settlement of Canadian subcontracts shall not be subject to approval or ratification by the TCO, except that in cases that result in a proposed negotiated settlement in excess of the total contract price of the prime contract, ratification of the proposed settlement by the United States PCO, evidenced by a contract modification increasing the contract price and obligating required additional funds shall be obtained by the TCO prior to final settlement.

(d) Termination proposals submitted by the United States subcontractors and suppliers normally should be referred by the Canadian Commercial Corporation to the TCO (normally DCASR, Cleveland) for settlement in accordance with this Part and T.201. Upon

completion of all settlement action, the TCO shall advise the Canadian Commercial Corporation of the amount of the net settlement agreed upon, which shall be included in the termination proposal submitted pursuant to (b) above. Execution of a settlement agreement with the subcontractor shall be the responsibility of the Canadian Commercial Corporation.

249.7002 Prior notification of significant contract terminations.

(a) Prior Defense Department clearance of the information release is required before any notice or any information concerning a proposed contract termination involving a reduction in employment of 100 or more contractor employees is released to a contractor. Coordination of the timing of the notice to the contractor and release of information to Congress or the public is the responsibility of each Department through its liaison point designated in (d) below. In a labor surplus area, a lesser number than 100 may be significant, and if so, such information release should be similarly cleared.

(b) The following information will be submitted to the appropriate Departmental liaison point:

(1) Contract number, date, type of contract;

(2) Name of company;

(3) Nature of contract or end item;

(4) The reasons for the termination;

(5) Contract price of items terminated;

(6) Total number of contractor employees, involved including the Government's estimate of the number who may be discharged;

(7) Statement of anticipated impact on the company and the community (identify); identify area labor category; whether contractor is large or small business, and include any known impact on hardcore disadvantage employment programs;

(8) Total number of subcontractors involved as well as the impact in this area, if known; and

(9) Draft (unclassified) of suggested press release of information.

(c) Clearance to release the information will be requested as soon as possible after the decision has been made to terminate a contract. Pending receipt of clearance to release, information pertinent to the termination will require "For Official Use Only" handling unless a security clearance is required.

(d) The Departmental liaison points for prior clearance to release information on significant terminations are as follows:

Army—OSA, OCLL (SACLL), ASA (I&L) (copy)
Navy—Chief of Legislative Affairs (OLA–N)
Air Force—HQ USAF (AF/RDC)
Defense Logistics Agency—DLA–PC
Defense Communications Agency—Contract Management Division (Code 260)
Defense Nuclear Agency—Chief, Office of Procurement, OATR
Defense Mapping Agency—DMA/LO

(e) Liaison offices of Departments will act promptly on the request for clearance to release information (not later than two working days after receipt) to avoid the accrual of termination costs.

(f) This reporting requirement is assigned Report Control Symbol: DD(I&L) (AR) 1412.

249.7003 Special termination costs.

(a) The clause at 252.249–7000, Special Termination Costs, is authorized for use in an incrementally funded contract when:

(1) The contract term is two years or more;

(2) The contract is estimated to require total RDT&E financing in excess of $100 million;

(3) Adequate resources are available within existing appropriated amounts to cover the contingent reserved liability for special termination costs in the event of contract termination; and

(4) The use of the clause in the contract is approved by the Secretary of the Department concerned or his designee. The clause may be used in circumstances other than those in (a)(1) and (2) above when approved by the Secretary of the Department concerned or his designee. Any addition to the categories of special termination costs listed in paragraph (a)(1) through (4) of the clause in 252.249–7000 shall be processed in accordance with 201.404.

(b) The contractor and the contracting officer shall agree upon an amount that represents their best estimate of the total special termination costs to which the contractor would be entitled in the event of termination of the contract. Such amount shall be inserted in the clause.

(c) A provision allowing for negotiated adjustments of the amount reserved for special termination costs may be inserted as paragraph (d) of the clause. Contract provisions for periodic adjustments by mutual agreement of the parties may be established based on, among other things, (1) set time periods within the contract, (2) the Government's incremental assignment of funds to the contract, or (3) the time when certain performance milestones are accomplished by the contractor. Provisions for such adjustments may be considered desirable in contracts containing unusually long performance periods, or in contracts where the contractor's cost risk associated with the contingent special termination costs, in the event of Government termination, fluctuates extensively over the period of the contract, depending on the scope of work to be performed during a certain period of the contract, or the amount of funds to be assigned to the contract during any one increment.

PART 250—EXTRAORDINARY CONTRACTUAL ACTIONS

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

250.001 Definitions.

"Agency head," as used within this part by the Department of Defense, does not include heads of defense agencies.

"Secretarial level," as used within this part by the Department of Defense, means an official at or above the level of an Assistant Secretary (or his Deputy) of Defense or of the Army, Navy, or Air Force, and a Contract Adjustment Board established by the Secretary concerned.

Subpart 250.1—General

50.103 Deviations.

For purposes of this section, "defense agencies" include the Departments of the Army, Navy, and Air Force, as well as agencies within the Office of the Secretary of Defense.

250.104 Reports.

Departmental and agency supplements will designate officials responsible for preparing and processing the reports required by this section.

250.105 Records.

(S–70) *Record of requests and dispositions.*

(1) *General.* In order that adequate records of actions by each Department pursuant to the Act may be maintained, 250.303(S–71) requires the preparation of a preliminary record when each request is filed for an adjustment under FAR Subpart 50.3, and 250.308(S–70) requires the preparation of a final record indicating the disposition of the request. This paragraph describes in detail the information which should be included in these records. A suggested format for the records is shown in 250.105(S–70)(4). It is designed so that the information required for the preliminary and final record with respect to each request may be combined on the same form. Departmental and agency supplements will designate the offices or officials responsible for preparing, submitting, receiving, and maintaining all records required by this part. Records required

by this supplement shall be maintained in the Departments of the Army, Navy, and Air Force by their respective Contract Adjustment Boards and in the Headquarters of the defense agencies.

(2) *Preliminary records.* Each preliminary record prepared pursuant to 250.303(S–71) should contain the following information:

(i) *Type of record.* The fact that the record is a preliminary record should be indicated.

(ii) *Date of contractor's request.* The date on the face of the contractor's request for adjustment should be inserted.

(iii) *Date received by government.* The date the request for adjustment is received in any Government office to which the contractor may properly submit his request should be inserted.

(iv) *Name and address of contractor.* The full and correct name and address of the contractor filing the request should be inserted. If the contractor is a small business, this fact should be indicated.

(v) *Name and address of the contractor's representative, if any.* If a particular named person (employee, attorney, etc.) is the point of contact with the contractor, his full name and address should be inserted.

(vi) *Cognizant contracting officer or office.* The contracting officer administering the contract for which an adjustment was requested or, if none, the contracting officer or office cognizant of the request should be inserted.

(vii) *Procuring activity.* The name of the procuring activity with jurisdiction over the contracting officer or official referred to in (6) above, should be inserted.

(viii) *Property or service involved.* A brief description of the item being procured or services being rendered should be inserted.

(ix) *Extent of performance as of date of request.* A brief indication, as of the date of the request, of the degree of completion of the contract should be inserted; for example, 50 percent completed, or performance not yet begun; if work is completed, indicate date of completion and whether final payment has been made.

(x) *Contract number and date.* The identifying numbers and dates of the contracts for which an adjustment is requested should be inserted. If there is no contract, then the word "None" should be inserted. If the question arises under a letter of intent, then that fact and the date of such letter should be inserted.

(xi) *Advertised or negotiated.* Whether the contract was entered into pursuant to advertising or negotiation should be indicated. If negotiated, the specific authority should be indicated; example: "Neg. — 10 U.S.C. 2304(a)(14)".

(xii) *Type of contract.* The type of contract involved (see FAR Part 16) should be inserted; e.g., FFP (firm fixed-price), FPI (fixed-price incentive), CPFF (cost-plus-fixed-fee), or T&M (time and materials).

(xiii) *Category of case.* Whether the request involves an amendment without consideration, a mistake, or an informal commitment should be indicated. If the case involves two or more categories, each should be indicated; however, the most significant category involved should be listed first.

(xiv) *Amount or description of request.* If the request is expressed in dollars, as a change in price, then that fact should be inserted as follows: "$5,250 increase" or "$5,250 decrease." If the request seeks an adjustment which cannot be expressed in monetary terms, then some brief description of it should be inserted, such as "Cancellation" or "Modification of Terms." The fact that an adjustment is not easily expressed in dollar terms should not deter an estimate if such an estimate is made by the contractor in his request.

(xv) *Date of this record.* The date on which the record is signed and forwarded should be inserted.

(xvi) *Signature.* The record should be signed by an authorized representative of the reporting authority.

(3) *Final records.* Each final record prepared pursuant to 250.306 (S–70) should contain the information listed in (S–70)(2) (ii) through (xvi) above, and, in addition, should contain the following information:

(i) *Type of record.* The fact that the record is a final record should be indicated.

(ii) *Action below secretarial level.* The disposition of the case, the office which took action, and the date thereof should be inserted. The disposition should be indicated as: "withdrawn," "denied," "approved," or "forwarded." If the request was approved in whole or in part, the dollar amount or nature of the action should be indicated in a manner similar to that described in 250.105 (S–70)(2)(xiv). The date should correspond with the date of the Memorandum of Decision or of the letter forwarding the request to the Board.

(iii) *Action by contract adjustment board and date.* The disposition of the case by the Contract Adjustment Board and the date thereof should be indicated in a manner similar to that described in (S–70)(2) above.

(iv) *Implementation and date.* The contractual action or correspondence which implements the decision of the approving authority or of the Board should be inserted as follows: "amendment," "new contract," or "letter of denial."

(4) *Sample format.* The preliminary and final records described in (S–70) (2) and (3) above may be prepared in a format substantially as follows:

☐ PRELIMINARY	RECORD OF REQUEST FOR ADJUSTMENT PUBLIC LAW 85–804	FINAL ☐
DATE OF REQUEST		DATE RECEIVED BY GOVERNMENT
CONTRACTOR'S NAME AND ADDRESS		☐ SMALL BUSINESS
NAME AND ADDRESS OF CONTRACTOR'S REPRESENTATIVE, IF ANY

Subpart 250.2—Delegation of and Limitations on Exercise of Authority

250.201 Delegation of authority.

(b) Authority to approve actions under FAR Subpart 50.4—Residual Powers, obligating $50,000 or less may not be delegated below the level of the Head of the Contracting Activity (but see FAR 50.201(d) for indemnification authority).

(S–70) *Authority delegated:*

(1) *Departments of the Army, Navy, and the Air Force.* Delegations and levels of authority for actions by the Departments of the Army, Navy, and Air Force under the Act and the Executive Order are contained in their departmental supplements.

(2) *Defense agencies.* Subject to the restrictions on delegations of authority in FAR 50.201 and 50.201 above, the Directors of the Defense Logistics Agency, the Defense Communications Agency, the Defense Nuclear Agency, the National Security Agency, and the Defense Mapping Agency may exercise and further delegate authority under the

Act and the Executive Order. Levels of such authority are contained in defense agency supplements. Recommendations for approval of actions in excess of the authority delegated by this paragraph will be submitted to the Under Secretary of Defense, Research and Engineering.

(3) *Approvals.* Authorities may be delegated and redelegated only with the written approval of the Secretary of Director concerned.

250.202 Contract Adjustment Boards.

(S–70) *Organization and authority.*

(1) *Organization.* A Contract Adjustment Board has been established within the Departments of the Army, Navy, and Air Force by the Secretary. Such Boards consist of a Chairman and not less than two nor more than six other members, one of whom may be designated the Vice-Chairman. A majority constitutes a quorum for any purpose and the concurring vote of a majority of the total Board membership constitutes an action of the Board. Alternates may be appointed to act in the absence of members.

(2) *Authority.* The Contract Adjustment Board in each Department has been given authority to approve, authorize and direct appropriate action under the standards set forth in FAR Subpart 50.3 in any case submitted to it, by an official designated to submit cases, and to make all determinations and findings which are necessary or appropriate. When deemed necessary to the exercise of the foregoing authority, such Boards may authorize any appropriate action not precluded by FAR 50.203, including the modification or release of any obligations.

Subpart 250.3—Contract Adjustments

250.303 Contractor requests.

(S–70) *Filing of requests.* If a request is filed with an administrative contracting officer, it shall be forwarded promptly to the procuring contracting officer for appropriate action. If such filing is impracticable, requests will be deemed to be properly filed if filed with the following addresses for forwarding to the cognizant contracting officer:

(1) *In the Army:* The Head of Contracting Activity listed in Part 202 appearing to be cognizant of the contract or commitment involved;

(2) *In the Navy:* The Head of Contracting Activity listed in Part 202 appearing to be cognizant of the contract or commitment involved;

(3) *In the Air Force:* Commander Air Force Logistics Command, ATTN: PPC, Wright-Patterson Air Force Base, Ohio;

(4) *In the Defense Logistics Agency:* Commanders of the Defense Supply Center concerned;

(5) *In the Defense Communications Agency:* Director, DCA, ATTN: Code 260;

(6) *In the Defense Nuclear Agency:* Director, DNA, ATTN: OAPR;

(7) *In the National Security Agency:* Director, NSA; and

(8) *In the Defense Mapping Agency:* Director, DMA, ATTN: LO.

(S–71) *Record of request.* At the time the request is filed, a preliminary record as described in 250.105(S–70)(2) shall be prepared by, and forwarded within 30 days after the close of the month in which prepared, to those officials designated pursuant to 250.105(S–70)(1).

250.305 Processing cases.

(S–70) *Processing cases by Contract Adjustment Board.*

(1) *Statement to Board.* Cases to be submitted for consideration of the cognizant Contract Adjustment Board shall be forwarded by means of a letter signed by the officer or official responsible for the case. The letter shall state:

(i) The nature of the case;

(ii) The basis for the Board's authority to act;

(iii) The findings of fact essential to the case (see FAR 50.304) arranged chronologically with cross references to supporting enclosures;

(iv) The conclusions drawn from applying the standards for deciding cases, as set forth in FAR subpart 50.3, to the findings of fact; and

(v) The disposition recommended, and, if contractual action is recommended, the opinion of the signer that such action will facilitate the national defense.

The letter shall enclose copies of the contractor's request, the evidentiary materials, and all endorsements, reports and comments of cognizant Government officials. The letter and enclosure shall be in duplicate.

(2) *Amendments without consideration under FAR 50.302–1(a).* A letter to the Board recommending an amendment without consideration under the standards of FAR 50.302–1(a) should, in addition to the requirements of paragraph (a) above, ordinarily cover, with supporting data as appropriate, the findings and conclusions with respect to all of the items set forth in FAR 50.304(b) and, in addition, findings as to:

(i) The contractor's performance record, including the quality of product, rate of production and promptness of deliveries;

(ii) The importance to the Government, particularly to the operating forces, of the performance of the contract by the contractors and the importance of the contractor to the national defense;

(iii) Forecast of future contracts with the contractor; and

(iv) Other available sources of supply for the supplies or services covered by the contract, and the time and cost of having contract performance completed by such other sources.

(3) *Forwarding to Boards.* Cases to be submitted to the Boards will be forwarded through channels in accordance with departmental supplements.

(4) *Processing by Boards.* Upon receipt of cases, the Contract Adjustment Boards, each in accord with its own procedures, shall render decisions as expeditiously as practicable. The chairman shall sign a Memorandum of Decision disposing of the case, which shall be dated and shall contain the information required by FAR 50.306. The Memorandum of Decision shall omit any information classified "Confidential" or higher. The Board's decision will be communicated to the appropriate officer or official for implementing action.

250.306 Disposition.

(S–70) Record of disposition.

(1) In each case when the request for relief is denied or approved below the Secretarial level, each of the following documents shall be submitted to the office designated pursuant to 250.105–(S–70)(1) within 30 days after the close of the month during which it is executed:

(i) Two copies of the Memorandum of Decision;

(ii) One copy of the contractual document implementing any decision approving contractual action (not to be submitted in the case of the Army); and

(iii) One copy of a final record, as prescribed in 250.105–(S–70)(3) prepared by the office designated pursuant to 250.105–(S–70)(1).

(2) When a Contract Adjustment Board decision is implemented, the documents listed in (S–70)(1) (ii) and (iii) above shall be prepared and submitted to the Board by the activity which forwarded the case to the Board.

Subpart 250.4—Residual Powers

250.403–70 Indemnification under contract involving both research and development and work that cannot be so classified.

Certain contracts require a substantial amount of research and developmental work as well as a substantial amount of work that cannot be so classified. When indemnification is to be provided for

such contracts, an appropriate clause, utilizing the authority of both 10 U.S.C. 2354 and Pub. L. 85–804 may be used. In such cases, the use of Pub. L. 85–804 to provide indemnification is limited to work which cannot be indemnified pursuant to 10 U.S.C. 2354 and is subject to compliance with FAR subpart 50.4. Indemnification pursuant to the authority of 10 U.S.C. 2354 is covered by 235.070.

Subpart 250.70—Act and Executive Order

250.7000 Scope.

This subpart sets forth in full the Act and Executive Order.

250.7001 Act of August 28, 1958, as amended.

(Public Law 85–804); 72 Stat. 972, as amended by 87 Stat. 605 (1973); 50 U.S.C. 1431–1435, as amended:

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the President may authorize any department or agency of the Government which exercises functions in connection with the national defense, acting in accordance with regulations as prescribed by the President for the protection of the Government, to enter into contracts or into amendments or modifications of contracts heretofore or hereafter made and to make advance payments thereon, without regard to other provisions of law relating to the making, performance, amendment, or modification of contracts, whenever he deems that such action would facilitate the national defense. The authority conferred by this Section shall not be utilized to obligate the United States in an amount in excess of $50,000 without approval by an official at or above the level of an Assistant Secretary or his Deputy, or an assistant head or his deputy, of such department or agency, or by a Contract Adjustment Board established therein. The authority conferred by this Section may not be utilized to obligate the United States in any amount in excess of $25,000,000 unless the Committees on Armed Services of the Senate and the House of Representatives have been notified in writing of such proposed obligation and 60 days of continuous session of Congress have expired following the date on which such notice was transmitted to such Committees and neither House of Congress has adopted, within such 60 day period, a resolution disapproving such obligation. For purposes of this Section, the continuity of a session of Congress is broken only by an adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of such 60 day period.

Sec. 2. Nothing in this Act shall be construed to constitute authorization hereunder for—

(a) the use of the cost-plus-a-percentage-of-cost system of contracting;

(b) any contract in violation of existing law relating to limitation of profits;

(c) the negotiation of purchases of or contracts for property or services required by law to be procured by formal advertising and competitive bidding;

(d) the waiver of any bid, payment, performance, or other bond required by law;

(e) the amendment of a contract negotiated under section 2304(a)(15), title 10, United States Code, or under section 302(c)(13) of the Federal Property and Administrative Services Act of 1949, as amended (63 Stat. 377, 394), to increase the contract price to an amount higher than the lowest rejected bid of any responsible bidder, or;

(f) the formalization of an informal commitment, unless it is found that at the time the commitment was made it was impracticable to use normal procurement procedures.

Sec. 3(a) All actions under the authority of this Act shall be made a matter of public record under regulations prescribed by the President and when deemed by him not to be detrimental to the national security.

(b) All contracts entered into, amended, or modified pursuant to authority contained in this Act shall include a clause to the effect that the Comptroller General of the United States or any of his duly authorized representatives shall, until the expiration of three years after final payment, have access to and the right to examine any directly pertinent books, documents, papers, and records of the contractor or any of his subcontractors engaged in the performance of and involving transactions related to such contracts or subcontracts.

Sec. 4(a) Every department and agency acting under authority of this Act shall, by March 15 of each year, report to Congress all such actions taken by that department or agency during the preceding calendar year. With respect to actions which involve actual or potential cost to the United States in excess of $50,000, the report shall—

(1) name the contractor;

(2) state the actual costs or estimated potential cost involved;

(3) describe the property or services involved; and

(4) state further the circumstances justifying the action taken. With respect to (1), (2), (3), and (4), above, and under regulations prescribed by the President, there may be omitted any information the disclosure of which would be detrimental to the national security.

(b) The Clerk of the House and the Secretary of the Senate shall cause to be published in the Congressional Record all reports submitted pursuant to this section.

Sec. 5. This Act shall be effective only during a national emergency declared by Congress or the President and for six months after the termination thereof or until such earlier time as Congress, by concurrent resolution, may designate."

250.7002 Executive Order 10789 of November 14, 1958.

(23 FR 8897) as amended by Executive Order 11051, dated 27 September 1962, Executive Order 11382 of November 28, 1967, and Executive Order 11610 of July 22, 1971:

"AUTHORIZING AGENCIES OF THE GOVERNMENT TO EXERCISE CERTAIN CONTRACTING AUTHORITY IN CONNECTION WITH NATIONAL DEFENSE FUNCTIONS AND PRESCRIBING REGULATIONS GOVERNING THE EXERCISE OF SUCH AUTHORITY.

By virtue of the authority vested in me by the act of August 28, 1958, 72 Stat. 972, hereinafter called the act, and as President of the United States, and in view of the existing national emergency declared by Proclamation No. 2914 of December 16, 1950, and deeming that such action will facilitate the national defense, it is hereby ordered as follows:

Part 1—Department of Defense

Under such regulations, which shall be uniform to the extent practicable, as may be prescribed or approved by the Secretary of Defense:

1. The Department of Defense is authorized, within the limits of the amounts appropriated and the contract authorization provided therefor, to enter into contracts and into amendments or modifications of contracts heretofore or hereafter made, and to make advance payments thereon, without regard to the provisions of law relating to the making, performance, amendment, or modification of contracts, whenever, in the judgment of the Secretary of Defense, the Secretary of the Army, the Secretary of the Navy, or the Secretary of the Air Force, or the duly authorized representative of any such Secretary, the national defense will be facilitated thereby.

(a) The limitation in paragraph 1 to amounts appropriated and the contract authorization provided therefor shall not apply to contractual provisions which provide that the United States will hold harmless and indemnify the contractor against any of the claims or losses set forth in subparagraph (b), whether resulting from the negligence or wrongful act or omission of the contractor or otherwise (except as provided in subparagraph (b)(2)). This exception from the limitations of paragraph 1 shall apply only to claims or losses arising out of or resulting from risks that the contract defines as unusually hazardous or nuclear in nature. Such a contractual provision shall be approved in advance by an official at a level not below that of the Secretary of a military department and may require each contractor so indemnified to provide and maintain financial protection of such type and in such amounts as is determined by the approving official to be appropriate under the circumstances. In deciding whether to approve the use of an indemnification provision and in determining the amount of financial protection to be provided and maintained by the indemnified contractor, the appropriate official shall take into account such factors as the availability, cost and terms of private insurance, self-insurance, other proof of financial responsibility and workmen's compensation insurance. Such approval and determination, as required by the preceding two sentences, shall be final.

(b)(1) Subparagraph (a) shall apply to claims (including reasonable expenses of litigation and settlement) or losses, not compensated by insurance or otherwise, of the following types:

(A) Claims by third persons, including employees of the contractor, for death, personal injury, or loss of, damage to, or loss of use of property;

(B) Loss of, damage to, or loss of use of property of the contrtactor;

(C) Loss of, damage to, or loss of use of property of the Government;

(D) Claims arising (i) from indemnification agreements between the contractor and a subcontractor or subcontractors, or (ii) from such arrangements and further indemnification arrangements between the subcontractor at any tier, *provided* that all such arrangements were entered into pursuant to regulations prescribed or approved by the Secretaries of Defense, the Army, the Navy, or the Air Force.

(2) Indemnification and hold harmless agreements entered into pursuant to this subsection, whether between the United States and a contractor, or between a contractor and a subcontractor, or between two subcontractors, shall not cover claims or losses caused by the willful misconduct or lact of good faith on the part of any of the contractor's or subcontractor's directors or officers or principal officials which are (i) claims by the United States (other than those arising through subrogation) against the contractor or subcontractor, or (ii) losses affecting the property of such contractor or subcontractor. Regulations to be prescribed or approved by the Secretaries of Defense, the Army, the Navy or the Air Force shall define the scope of the term *"principal officials"*.

(3) The United States may discharge its obligation under a provision authorized by subparagraph (a) by making payments directly to subcontractors or to third persons to whom a contractor or subcontractor may be liable.

(c) A contractual provision made under subparagraph (a) that provides for indemnification must also provide for—

(1) notice to the United States of any claim or action against, or of any loss by, the contractor or subcontractor which is covered by such contractual provision; and

(2) control or assistance by the United States, at its election, in the settlement or defense of any such claim or action.

2. The Secretaries of Defense, the Army, the Navy, and the Air Force, respectively, may exercise the authority herein conferred and, in their discretion and by their direction, may delegate such authority to any other military or civilian officers or officials of their respective departments, and may confer upon any such military or civilian officers or officials the power to make further delegations of such authority within their respective commands or organizations: *Provided*, That the authority herein conferred shall not be utilized to obligate the United States in an amount in excess of $50,000 without approval by an official at or above the level of an Assistant Secretary or his Deputy, or by a departmental Contract Adjustment Board.

3. The contracts hereby authorized to be made shall include agreements of all kinds (whether in the form of letters of intent, purchase orders, or otherwise) for all types and kinds of property or services necessary, appropriate, or convenient for the national defense, or for the invention, development, or production of, or research concerning, any such property or services, including, but not limited to, aircraft, missiles, buildings, vessels, arms, armament, equipment or supplies of any kind, or any portion thereof, including plans, spare parts and equipment therefor, materials, supplies, facilities, utilities, machinery, machine tools, and any other equipment without any restriction of any kind as to type, character, location, or form.

4. The Department of Defense may by agreement modify or amend or settle claims under contracts heretofore or hereafter made, may make advance payments upon such contracts of any portion of the contract price, and may enter into agreements with contractors or obligors modifying or releasing accrued obligations of any sort, including accrued liquidated damages or liability under surety or other bonds. Amendments or modifications of contracts may be with or without consideration and may be utilized to accomplish the same things as any original contract could have accomplished hereunder, irrespective of the time or circumstances of the making, or the form, of the contract amended or modified, or of the amending or modifying contract, and irrespective of rights which may have accrued under the contract or the amendments or modifications thereof.

5. Proper records of all actions taken under the authority of the act shall be maintained within the Department of Defense. The Secretaries of Defense, the Army, the Navy, and the Air Force shall make such records available for public inspection except to the extent that they, or their duly authorized representatives, may respectively deem the disclosure of information therein to be detrimental to the national security.

6. The Department of Defense shall, by March 15 of each year, report to the congress all actions taken within that department under the authority of the act during the preceding calendar year. With respect to actions which involve actual or potential cost to the United States in excess of $50,000, the report shall (except as the disclosure of such information may be deemed to be detrimental to the national security)—

(a) name the contractor;

(b) state the actual cost or estimated cost involved;

(c) describe the property or services involved; and

(d) state further the circumstances justifying the action taken.

7. There shall be no discrimination in any act performed hereunder against any person on the ground of race, religion, color, or national origin, and all contracts entered into, amended, or modified hereunder shall contain such nondiscrimination provision as otherwise may be required by statute or Executive order.

8. No claim against the United States arising under any purchase or contract made under the authority of the act and this order shall be assigned except in accordance with the Assignment of Claims Act of 1940 (54 Stat. 1029), as amended.

9. Advance payments shall be made hereunder only upon obtaining adequate security.

10. Every contract entered into, amended, or modified pursuant to this order shall contain a warranty by the contractor in substantially the following terms:

"The Contractor warrants that no person or selling agency has been employed or retained to solicit or secure this contract upon an agreement or understanding for a commission, percentage, brokerage, or contingent fee, except bona-fide employees or bona-fide established commercial or selling agencies maintained by the Contractor for the purpose of securing business. For breach or violation of this warranty the government shall have the right to annul this contract without liablity or, in its discretion, to deduct from the contract price or consideration, or otherwise recover, the full amount of such commission, percentage, brokerage, or contingent fee."

11. Except as provided in the act of September 1966 (80 Stat. 850), contracts entered into, amended, or modified pursuant to authority of this order shall include a clause to the effect that the Comptroller General of the United States or any of his duly authorized representatives shall, until the expiration of three years after final payment, have access to and the right to examine any directly pertinent books, documents, papers, and records of the contractor or any of his subcontractors engaged in the performance of, and involving transactions related to, such contracts or subcontracts. Before exercising the authority provided in the Act of September 27, 1966, (80 Stat. 850), the Secretaries of Defense, the Army, the Navy, or the Air Force, or their designees, shall first determine that all reasonable efforts have been made to include the clause prescribed above and that alternate sources of supply are not reasonably available.

12. Nothing herein contained shall be construed to constitute authorization hereunder for—

(a) the use of the cost-plus-a-percentage-of-cost system of contracting;

(b) any contract in violation of existing law relating to limitation of profits of fees;

(c) the negotiation of purchases of or contracts for property or services required by law to be procured by formal advertising and competitive bidding;

(d) the waiver of any bid, payment, performance, or other bond required by law;

(e) the amendment of a contract negotiated under section 2304(a)(15) of title 10 of the United States Code to increase the contract price to an amount higher than the lowest rejected bid of any responsible bidder; or

(f) the formalization of an informal commitment, unless the Secretary of Defense, the Secretary of the Army, the Secretary of the Navy, or the Secretary of the Air Force, or the duly authorized representative of any such Secretary, finds that at the time the commitment was made it was impracticable to use normal procurement procedures.

13. The provisions of the Walsh-Healey Act (49 Stat. 2036), as amended, the Davis-Bacon Act (49 Stat. 1101), as amended, the Copeland Act (48 Stat. 948), as amended, and the Eight Hour Law (37 Stat. 137), as amended, if otherwise applicable, shall apply to contracts made and performed under the authority of this order.

14. Nothing herein contained shall prejudice anything heretofore done under Executive Order No. 9001 of December 27, 1941, or Executive Order No. 10210 of February 2, 1951, or any amendments or extensions thereof, or the continuance in force of an action heretofore taken under those orders or any amendments or extensions thereof.

15. Nothing herein contained shall prejudice any other authority which the Department of Defense may have to enter into, amend, or modify contracts, and to make advance payments.

Part II— Extension of Provisions of Paragraphs 1–14

21. Subject to the limitations and regulations contained in paragraphs 1 to 14, inclusive, hereof, and under any regulations prescribed by him in pursuance of the provisions of paragraph 22 hereof, the head of each of the following named agencies is authorized to perform or exercise as to his agency, independently of any Secretary referred to in the said paragraphs 1 to 14, all the functions and authority vested by those paragraphs in the Secretaries mentioned therein:

Department of the Treasury
Department of the Interior
Department of Agriculture
Department of Commerce
Department of Transportation
Atomic Energy Commission
General Services Administration
National Aeronautics and Space Administration
Tennessee Valley Authority
Government Printing Office

22. The head of each agency named in paragraph 21 hereof is authorized to prescribe regulations governing the carrying out of the functions and authority vested with respect to this agency by the provisions of paragraph 21 hereof. Such regulations shall, to the extent practicable, be uniform with the regulations prescribed or approved by the Secretary of Defense under the provisions of Part 1 of this order.

23. Nothing contained herein shall prejudice any other authority which any agency named in paragraph 21 hereof may have to enter into, amend, or modify contracts and to make advance payments.

24. Nothing contained in this Part shall constitute authorization thereunder for the amendment of a contract negotiated under section 302(c)(14) of the Federal Property and Administrative Services Act of 1949 (63 Stat. 394), as amended by section 2(b) of the act of August 28, 1958, 72 Stat. 966, to increase the contract price to an amount higher than the lowest rejected bid of any responsible bidder.

DWIGHT D. EISENHOWER"

PART 251—USE OF GOVERNMENT SOURCES BY CONTRACTORS

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 251.1—Contractor Use of Government Supply Sources

251.100 Scope of subpart.

FAR Subpart 251.1 and this Subpart are applicable to the acquisition of supplies to be delivered in the United States, its possessions, or Puerto Rico. (The use of GSA sources by grantees is not authorized.)

251.102 Authorization to use Government supply sources.

(e) The following is the form of authorization to the contractor:

Subject: Authorization to Purchase from Government Supply Sources.
(Contractor's Name) ————————
(Address) ————————

1. You are hereby authorized to utilize Government sources in performing Contract No. ——— for the Department of ——— as follows:

(Insert applicable purchasing authority given to the contractor.)

2.a. Purchase Orders Under Federal Supply Schedules or Personal Property Rehabilitation Price Schedules. Orders will be placed in accordance with the terms and conditions of the attached Schedule(s) and this authorization. A copy of the authorization shall be attached to the order (unless a copy was previously furnished to the Federal Supply Schedule or Personal Property Rehabilitation Price Schedule contractor) and the order shall contain the following statement:

This order is placed under written authorization from ——— dated ——— (*———). In the event of any inconsistency between the terms and conditions of this order and those of your Federal Supply Schedule or Personal Property Rehabilitation Price Schedule contract, the latter will govern.

b. Requisitioning from GSA or DoD. Orders will be placed in accordance with the Federal Standard Requisitioning and Issue Procedures (FEDSTRIP) or Military Standard Requisitioning and Issue Procedures (MILSTRIP), as appropriate, and this authorization. Orders shall include the activity address code cited in paragraph 5 below. Bills will not be issued by Government supply sources until after the supplies have been shipped. Payment shall be made promptly upon receipt of billings.

3. Insert other provisions, as necessary.

4. This authority hereby granted is not transferable or assignable.

5. The DoD Activity Address Directory (DODAAD) (DLAH 4140.1, AR 725–60–1, MCO P4420.2H, CG 364, AFM 75–6, NAVSUP PUB 5544)** Activity Address Code to which this Authorization applies is ———.

6. This authorization expires ———.
(Contracting Officer) ————————

(e)(3)(ii) In addition to the procedure and form authorized by FAR 251.102(e)(3)(ii), contractors are also authorized to use DD Form 1155 when requisitioning from the VA.

251.103 Ordering from government supply sources.

(b) "Contracting agency" as used in FAR 251.103(b) shall be construed to mean the contracting officer.

251.104 Furnishing assistance to contractors.

(b)(2) GSA Form 457 may be obtained from the GSA regional office serving the area in which the requesting activity is located.

251.106 Title.

(b) With DoD, title to property having an acquisition cost of $5,000 or less shall vest in the contractor under the circumstances prescribed in FAR 251.106(b).

251.107 Contract clause.

The contracting officer shall insert the clause at 252.251–7000, Ordering from Government Supply Sources, in solicitations and contracts which include the clause at FAR 251.251–1.

Subpart 251.2—Contractor Use of Interagency Motor Pool Vehicles

251.202 Authorization.

(a)(2) See FAR 28.307–2(c), and FAR 28.308 and 28.001 for policy on contractor insurance and self-insurance, respectively, and FAR 31.205–19 for allowability of insurance costs.

(5) Paragraph (e) of the clause at 252.251–7001 satisfies the requirement of FAR 51.202(a)(5) for the written statement required by that paragraph.

251.205 Contract clause.

The contracting officer shall insert the clause at 252.251–7001, Use of Interagency Motor Pool Vehicles and Related Services, in solicitations and contracts which include the clause at FAR 52.251–2.

* Insert "a copy of which is attached," or "a copy of which you have on file," or other suitable language, as appropriate.

** The sponsoring service assumes responsibility for monitoring and controlling all activity address codes utilized in the letters of authority.

SUBCHAPTER H—CLAUSES AND FORMS

PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 252.1—Instructions for Using Provisions and Clauses

252.101 Using Part 252.

(b) *Numbering.*

(2) *Provisions of clauses that supplement the FAR.*

(ii) Provisions and clauses in this supplement are not preceded by the assigned CFR chapter number. The sequential numbers are "7000" or higher, not to exceed "8999." Sequential numbers "9000" and higher are reserved for departmental supplementation (see 201.104–2).

(f) *Dates.* Provisions and clauses in this supplement that were formerly in the DAR bear the DAR date when the provision or clause was transferred verbatim to this supplement.

252.106 Derivations of FAR provisions and clauses.

Provisions and clauses in this supplement derived from the DAR do not include derivation notations.

Subpart 252.2—Texts of Provisions and Clauses

252.270 Scope of subpart.

This subpart sets forth the texts of all DoD FAR Supplement provisions and clauses and for each, gives a cross-reference to the location in the DoD FAR Supplement that prescribes its use.

252.203–7000 Advertising and coupon redemption for military resale activities.

As prescribed at 203.570, insert the following clause:

ADVERTISING AND COUPON REDEMPTION FOR MILITARY RESALE ACTIVITIES (APR 1974)

The Contractor will not represent in any manner, expressed or implied, that the products purchased hereunder are approved or endorsed by any element of the United States Government. Any advertisement by the Contractor, including price-off coupons, which refers to a military resale activity, shall contain the following statement:

"This advertisement is neither paid for nor sponsored, in whole or in part, by any element of the United States Government."

(End of clause)

252.204–7000 Contract schedule subline items not separately priced—withholding of billing and payment.

As prescribed at 204.7104–2(c)(2), insert the following clause:

CONTRACT SCHEDULE SUBLINE ITEMS NOT SEPARATELY PRICED—WITHHOLDING OF BILLING AND PAYMENT (NOV 1970)

If the unit price of any contract subline or exhibit subline item contained in the Schedule of this contract is not separately priced ("NSP" entered as the unit price column), and the unit price for such subline item is included within the unit price of a related subline item, payment shall not be made nor shall the Contractor invoice the Government for any portion of a contract line item or exhibit line item which contains an "NSP" subline until the total quantity of all related contract subline items or exhibit subline items have been delivered and accepted. This clause is not applicable to technical data.

(End of clause)

252.204–7004 Data Universal Numbering System (DUNS) number reporting.

As prescribed at 204.670–3, insert the following provision:

DATA UNIVERSAL NUMBERING SYSTEM (DUNS) NUMBER REPORTING (DEC 1980)

In the block with its name and address, the offeror should supply the Data Universal Numbering System (DUNS) Number applicable to that name and address. The DUNS Number should be preceded by "DUNS:". If the offeror does not have a DUNS Number, it may obtain one from any Dun and Bradstreet branch office. No offeror should delay the submission of its offer pending receipt of its DUNS Number.

(End of provision)

252.204–7005 Overseas distribution of defense subcontracts.

As prescribed at 204.670–4, insert the following clause:

OVERSEAS DISTRIBUTION OF DEFENSE CONTRACTS (JUN 1982)

(a) For each subcontract or modification thereof which exceeds $10,000, where the principal place of performance is outside the United States or its territories and possessions, the Contractor agrees to furnish the information listed below on a quarterly basis to Director of Information, Operations and Reports, Washington, D.C. 20301.

(i) Name and address of prime contractor (or subcontractor required to report).

(ii) Prime contract number.

(iii) Name and address of overseas subcontractor. (This item is important for discussion of trade balances with other countries, but submission of this information is not mandatory.)

(iv) Subcontract number (including modification number) being reported.

(v) Dollar amount of this action (enclose decommitments in parentheses).

(vi) Principal place of subcontract performance.

(vii) Type of supply or service.

(b) The required information, if any, shall be as of the last day of the calendar year quarter and submitted within ten (10) days of the end of each quarter.

(c) The prime Contractor agrees to insert a provision substantially similar to this in all first-tier subcontracts over $100,000 except subcontracts for ores, natural gas, utilities, petroleum products and crudes, timber (logs), and subsistence. The prime Contractor shall also identify the applicable prime contract number to the subcontractor for reporting purposes.

(End of clause)

252.208–7000 Required sources for miniature and instrument ball bearings.

As prescribed at 208.7303(a), insert the following clause:

REQUIRED SOURCES FOR MINIATURE AND INSTRUMENT BALL BEARINGS (JUL 1971)

(a) For the purpose of this clause:

"Domestic manufacture" means manufacture in the United States or Canada and, when a ball bearing assembly is involved, all components of the bearing must also have been manufactured in the United States or Canada; and

"Miniature and instrument ball bearings" are all rolling contact ball bearings with a basic outside diameter (exclusive of flange diameters) of 30 millimeters or less, irrespective of material, tolerance, performance, or quality characteristics.

(b) The Contractor agrees that end items and components thereof delivered under this contract shall contain miniature and instrument ball bearings that are of domestic manufacture only.

(c) The requirement for delivery in (b) above may be waived in whole or in part by the Contracting Officer when such waiver is determined to be in the Government's interest. In the event a waiver is granted, the Contractor agrees to acquire for non-Government use, domestically manufactured miniature and instrument ball bearings of a like quantity and type.

(d) The Contractor agrees to retain until the expiration of three (3) years from the date of final payment under this contract and to make available during such period, upon request of the Contracting Officer, records showing compliance with this clause.

(e) The Contractor agrees to insert this clause, including this paragraph (e), in every subcontract and purchase order issued in performance of this contract, unless he knows that the item being purchased contains no miniature or instrument ball bearings.

(End of clause)

252.208–7001 Required sources for precision components and mechanical time devices.

As prescribed at 208.7403(a), insert the following clause:

REQUIRED SOURCES FOR PRECISION COMPONENTS FOR MECHANICAL TIME DEVICES (AUG 1971)

(a) For the purpose of this clause:

"Domestic manufacture" means manufacture in the United States or Canada, and, when a mechanical timing assembly is involved, all precision components of the assembly must also have been manufactured in the United States or Canada.

"Precision components for mechanical time devices" are parts which closely relate so that precise control and selection of working production tolerances can be maintained to accomplish the desired function and reliability. In terms of accuracy, such precision components have total tolerances under 0.003 inches, eccentricities less than 0.0015 inches, and surface finishes better than 65 rms. Examples of such precision components include: gears, pinions, posts, and plates.

(b) The Contractor agrees that end items and components thereof delivered under this contract shall contain precision components for mechanical time devices that are of domestic manufacture only.

(c) The requirement for delivery in (b) above may be waived in whole or in part by the Contracting Officer when such waiver is determined to be in the Government's interest. In the event a waiver is granted, the Contractor agrees to acquire, for non-Government use, domestically manufactured precision components for mechanical time devices of a like quantity and type.

(d) The Contractor agrees to retain until the expiration of three (3) years from the date of final payment under this contract and to make available during such period, upon request of the Contracting Officer, records showing compliance with this clause.

(e) The Contractor agrees to insert this clause, including this paragraph (e), in every subcontract and purchase order issued in performance of this contract, unless he knows that the item being purchased contains no precision components for mechanical time devices.

(End of clause)

252.208-7002 Required sources for high-purity silicon.

As prescribed at 208.7503(a), insert the following clause:

REQUIRED SOURCES FOR HIGH-PURITY SILICON (JUN 1983)

(a) For the purpose of this clause:

"Domestic manufacture" means high-purity silicon manufactured in the United States or Canada. When an item or subassembly containing high-purity silicon is involved, all such high-purity silicon incorporated in the item or subassembly must also have been manufactured in the United States or Canada.

"High-purity silicon" is N or P type and has a resistivity greater than 3000 ohm-centimeter.

(b) The Contractor agrees that end items and components thereof delivered under this contract shall contain high-purity silicon of domestic manufacture only.

(c) The requirement for delivery in (b) above may be waived in whole or in part by the Contracting Officer when such waiver is determined to be in the Government's interest.

(d) The Contractor agrees to retain until the expiration of three (3) years from the date of final payment under this contract and to make available during such period, upon request of the Contracting Officer, records showing compliance with this clause.

(e) The Contractor agrees to insert this clause, including this paragraph (e), in every subcontract or purchase order which involves the purchase of an item or subassembly containing high-purity silicon.

(End of clause)

252.210-7000 Brand name or equal.

As prescribed at 210.004(b)(3)(ii)(B), insert the following provision:

BRAND NAME OR EQUAL (APR 1973)

(As used in this clause, the term "brand name" includes identification of products by make and model.)

(a) If items called for by this Invitation for Bids have been identified in the Schedule by a "brand name or equal" description, such identification is intended to be descriptive, but not restrictive, and is to indicate the quality and characteristics of products that will be satisfactory. Bid offering "equal" products including products of the brand name manufacturer other than the one described by brand name will be considered for award if such products are clearly identified in the bids and are determined by the Government to meet fully the salient characteristics requirements referenced in the Invitation for Bids.

(b) Unless the bidder clearly indicates in his bid that he is offering an "equal" product, his bid shall be considered as offering a brand name product referenced in the Invitation for Bids.

(c)(1) If the bidder proposes to furnish an "equal" product, the brand name, if any, of the product to be furnished shall be inserted in the space provided in the Invitation for Bids, or such product shall be otherwise clearly identified in the bid. The evaluation of bids and the determination as to equality of the product offered shall be the responsibility of the Government and will be based on information furnished by the bidder or identified in his bid, as well as other information reasonably available to the purchasing activity. CAUTION TO BIDDERS. The purchasing activity is not responsible for locating or securing any information which is not identified in the bid and reasonably available to the purchasing activity. Accordingly, to insure that sufficient information is available, the bidder must furnish as a part of his bid all descriptive material (such as cuts, illustrations, drawings, or other information) necessary for the purchasing activity to (i) determine whether the product offered meets the salient characteristics requirements of the Invitation for Bids and (ii) establish exactly what the bidder proposes to furnish and what the Government would be binding itself to purchase by making an award. The information furnished may include specific references to information previously furnished or to information otherwise available to the purchasing activity.

(2) If the bidder proposes to modify a product so as to make it conform to the requirements of the Invitation for Bids, he shall (i) include in his bid a clear description of such proposed modifications, and (ii) clearly mark any descriptive material to show the proposed modifications.

(3) Modifications proposed after bid opening to make a product conform to a brand name product referenced in the Invitation for Bids will not be considered.

(End of provision)

252.210-7001 Availability of descriptions listed in DoD Directive 5000.19-L, Volume II.

As prescribed at 210.011 (S-70), insert the following provision:

AVAILABILITY OF DESCRIPTIONS LISTED IN DOD DIRECTIVE 5000.19-L, VOLUME II (APR 1984)

Copies of the Acquisition Management Systems and Data Requirements Control List, DoD Directive 5000.19-L, Volume II, may also be ordered from the supply point listed herein. When requesting a data item description, the request shall cite the applicable data item number set forth in the solicitation.

(End of provision)

252.210-7002 Availability of specifications and standards not listed in DODISS, data item descriptions not listed in Department of Defense Directive 5000.19-L, Volume II, and plans, drawings, and other pertinent documents.

As prescribed at 210.011 (S-71), insert the following provision:

AVAILABILITY OF SPECIFICATIONS AND STANDARDS NOT LISTED IN DODISS, DATA ITEM DESCRIPTIONS NOT LISTED IN DOD DIRECTIVE 5000.19-L, VOLUME II, AND PLANS, DRAWINGS, AND OTHER PERTINENT DOCUMENTS (JUN 1977)

The specifications, standards, plans, drawings, descriptions and other pertinent documents cited in this solicitation may be obtained by submitting request to:

(Activity) _____

(Complete Address) _____

Requests should give the number of the solicitation and the title and number of the specification, standard, plan, drawing or other pertinent document requested, exactly as cited in this solicitation.

(End of provision)

252.210-7003 Availability for examination of specifications, standards, plans, drawings, data item descriptions, and other pertinent documents.

As prescribed at 210.011(S-71), insert the following provision:

AVAILABILITY FOR EXAMINATION OF SPECIFICATIONS, STANDARDS, PLANS, DRAWINGS, DATA ITEM DESCRIPTIONS, AND OTHER PERTINENT DOCUMENTS (JUN 1977) The specification, standards, plans, drawings, descriptions, and other pertinent documents cited in this solicitation may be examined at the following locations:

_____

(Insert Complete Address)

(End of provision)

252.212-7000 Exclusion of periods in computing completion schedules.

As prescribed at 212.102(b), insert the following clause:

EXCLUSION OF PERIODS IN COMPUTING COMPLETION SCHEDULES (JAN 1965)

No work will be required during the period between ——— and ——— inclusive and such period has not been considered in computing the time allowed for completion. The Contractor may, however, perform work during all or any part of this period upon giving prior written notice to the Contracting Officer. If the work performed during such period is less than * (——— cubic yards) (the average monthly work necessary to complete the contract within the time specified) and the Contracting Officer maintains an inspection force during this period to inspect the work, the Contractor will be charged the percentage of the cost of maintaining such force that his work is less than * (——— cubic yards) (the average monthly work necessary to complete the contract within the time specified).

(End of clause)

252.213–7000 Inconsistency between English version and translation of contract.

As prescribed at 213.505–2(S–73)(2)(ii)(B), insert the following provision:

INCONSISTENCY BETWEEN ENGLISH VERSION AND TRANSLATION OF CONTRACT (APR 1966)

In the event of inconsistency between any terms of this contract and any translation thereof into another language, the English language meaning shall control.

(End of clause)

252.213–7001 Returnable gas cylinders.

As prescribed at 213.505–2(S–73)(1)(xxxiii), insert the following clause:

RETURNABLE GAS CYLINDERS (OCT 1966)

(a) Cylinders shall remain the property of the Contractor but will be loaned without charge to the Government for a period of thirty (30) days* after the date of delivery of the cylinders to the f.o.b. point specified in the contract. Beginning with the first day after the expiration of the thirty (30) day loan period to and including the day the cylinders are delivered to the Contractor where the original delivery was f.o.b. origin or to and including the date the cylinders are delivered or are made available for delivery to the Contractor's designated carrier in the case where the original delivery was f.o.b. destination, the Government shall pay the Contractor a rental of ——— dollars ($———) per cylinder per day, regardless of type or capacity.

(b) This rental charge will be computed separately for cylinders of different types, sizes, and capacities, and for each point of delivery named in the contract. A credit of thirty (30) cylinder days will accrue to the Government for each cylinder, regardless of type or capacity, delivered by the Contractor. A debit of one (1) cylinder day will accrue to the Government for each cylinder for each day after delivery to the f.o.b. point specified in this contract. At the end of the contract, if the total number of debits exceeds the total number of credits, rental shall be charged for the difference. If the total number of credits equals or exceeds the total number of debits, no rental charges will be made for the cylinders. No rental shall accrue to the Contractor in excess of the replacement value per cylinder specified in (c) below.

(c) For each cylinder lost or damaged beyond repair, while in the Government's possession, the Government shall pay to the Contractor the replacement value as follows, less the allocable rental paid therefor:

(i) Oxygen cylinders of 100–110 cubic foot capacity $———;

(ii) Oxygen cylinders of 200–220 cubic foot capacity $———;

(iii) Acetylene cylinders of 100–150 cubic foot capacity $———; and

(iv) Acetylene cylinders of 230–300 cubic foot capacity $———.

(d) Cylinders lost, or damaged beyond repair, and paid for by the Government shall become the property of the Government, subject to the following: If any lost cylinder is located within ——— (insert period of time) after payment by the Government, it may be returned to the Contractor by the Government, and the Contractor shall pay to the Government an amount equal to the replacement value, less rental computed in accordance with (a) above, beginning at the expiration of the thirty (30) day loan period specified in (a) above, and continuing to the date on which the cylinder was delivered to the Contractor.

(End of clause)

252.214–7000 Discounts.

As prescribed at 214.407–3, insert the following provision:

DISCOUNTS (APR 1984)

Prompt payment discounts will not be considered in the evaluation of offers. However, any offered discount will form a part of the award, and will be taken if payment is made within the discount period indicated in the offer by the offeror. As an alternative to offering a prompt payment discount in conjunction with the offer, offerors awarded contracts may include prompt payment discounts on individual invoices.

(End of provision)

252.215–7000 Pricing of adjustments.

As prescribed at 215.804–8(S–70), insert the following clause:

PRICING OF ADJUSTMENTS (APR 1984)

When costs are a factor in any determination of a contract price adjustment pursuant to the Changes clause or any other clause of this contract, such costs shall be in accordance with Part 31 of the Federal Acquisition Regulation and the DoD FAR Supplement in effect on the date of this contract.

(End of clause)

252.216–7000 Economic price adjustment—basic steel, aluminum, brass, bronze or copper mill products.

As prescribed at 216.203(S–70)(a), insert the following clauses:

ECONOMIC PRICE ADJUSTMENT—BASIC STEEL, ALUMINUM, BRASS, BRONZE OR COPPER MILL PRODUCTS (AUG 1978)

(a) The Contractor warrants that the unit price stated herein for ——— is not in excess of the Contractor's applicable established price in effect on the date set for opening of bids (or the contract date if this is not a contract entered into by means of formal advertising) for like quantities of the same item. The term "unit price" excludes any part of the price which reflects requirements for preservation, packaging and packing beyond standard commercial practice. The term "established price" means one which (1) is an established catalog or market price for a commercial item sold in substantial quantities to the general public and (2) meets the criteria of FAR 15.804–3. Such price is the net price after applying any applicable standard trade discounts offered by the Contractor from his catalog, list, or schedule price.

(b) The Contractor shall promptly notify the Contracting Officer as to the amount and effective date of each decrease in any applicable established price, and each corresponding contract unit price shall be decreased by the same percentage that the said established price is decreased. Such decrease shall apply to items delivered on and after the effective date of the decrease in the Contractor's established price, and this contract shall be modified accordingly. The Contractor shall certify on each invoice that each unit price stated therein reflects all decreases required by this clause, or shall certify on the final invoice that all price decreases required by this clause have been applied in the manner herein required.

(c) If the Contractor's applicable established price is increased after the date set for opening of bids (or the contract date, if this is not a contract entered into by means of formal advertising), the corresponding contract unit price shall be increased, upon the Contractor's request in writing to the Contracting Officer, by the same percentage that the established price is increased and the contract shall be modified accordingly, *provided* that:

(1) The aggregate of the increases in any contract unit price under this clause shall not exceed ten percent (10%) of the original contract unit price;

(2) The increased contract unit price shall be effective on the effective date of the increase in the applicable established price if the Contractor's written request is received by the Contracting Officer within 10 days thereafter, but if not, the effective date of increased unit price shall be the date of receipt by the Contracting Officer of such request;

(3) The increased contract unit price shall not apply to quantities scheduled under the contract for delivery before the effective date

---

* (Delete inapplicable provision).

* The time period may be modified to comply with the customary commercial practice for the particular type of container being rented.

of the increased contract unit price unless the Contractor's failure to deliver before such date results from causes beyond the control and without the fault of negligence of the Contractor, within the meaning of the "Default" clause of this contract.

(4) No modification incorporating an increase in a contract unit price shall be executed pursuant to this clause until the increase in the applicable established price has been verified by the Contracting Officer.

(d) Within 30 days after receipt of the Contractor's written request the Contracting Officer may cancel, without liability to either party, any portion of the contract affected by the requested increase and undelivered at the time of such cancellation, except that the Contractor may thereafter deliver any items which the Contractor certifies, by notice received by the Contracting Officer within 10 days after the Contractor receives the cancellation notice, were completed or in the process of manufacture at the time of receipt of such cancellation notice, and the Government shall pay for such items so delivered at the contract unit price increased to the extent provided by (c) above. Any standard steel supply shall be deemed to be in the process of manufacture when the steel therefor is in any state of processing after the beginning of the furnace melt.

(e) Pending any cancellation of this contract as provided in (d) above and thereafter if there is no cancellation, the Contractor shall continue deliveries according to the delivery schedule of the contract and shall be paid for such deliveries at the contract unit price increased to the extent provied by (c) above.

(End of clause)

252.216-7001 Economic price adjustment—nonstandard steel items.

As prescribed at 216.203 (S–70)(b), insert the following clause:

ECONOMIC PRICE ADJUSTMENT—NONSTANDARD STEEL ITEMS (AUG 1978)

(a) The term "established price" as used in this clause is one which (1) is an established catalog or market price of a commercial item sold in substantial quantities to the general public and (2) meets the criteria of Federal Acquisition Regulation 215.804–3. Such a price is the net price after applying any applicable standard trade discounts offered by the Contractor from his catalog, list, or scheduled price. (But see Note (8)).

(b) Each contract unit price shall be subject to revision, pursuant to the provisions of this clause, to reflect changes in the cost of labor and steel. For the purpose of any such price revision, the proportion of the contract unit price attributable to costs of labor not otherwise included in the price of the steel item identified in paragraph (d) below shall be ——— percent, and the proportion of the contract unit price attributable to the cost of steel shall be ——— percent. *(See Note (1)).*

(c) For the purposes of this paragraph, the term "labor index" shall mean the average straight time hourly earnings of the Contactor's employees in the ——— shop of the Contractor's ——— plant *(see Note (2))* for any particular month. The word "month" as used herein means "calendar month;" *provided,* however, that if the Contractor's accounting period does not coincide with the calendar month, then such accounting period shall be used throughout the clause in lieu of "month." Unless otherwise specified in this contract, the labor index shall be computed by dividing the total straight time earnings of the Contractor's employees in the particular shop identified above for any given month by the total number of straight time hours worked by such employees in that month. Any revision in a contract unit price to reflect changes in the cost of labor shall be computed solely by reference to the "base labor index," which shall be the average of the labor indices for the three months consisting of the month of ———, 19— *(see Note (3))*, the month immediately preceding and the month immediately following, and to the "current labor index," which shall be the average of the labor indices for the month in which delivery of supplies is required to be made in accordance with the terms of this contract and the month preceding.

(d) Any revision in a contract unit price to reflect changes in the cost of steel shall be computed solely by reference to the "base steel index," which shall be the Contractor's established price *(see Note (8))* including all applicable extras of $——— per ——— [*see Note (4)*] for ——— *(See Note (5))* on ———, 19—, [*See Note (6)*] and the "current steel index," which shall be the Contractor's established price *(see Note (8))* of said item including all applicable extras in effect ——— days *(see Note (7))* prior to the first day of the month in which delivery of supplies is required to be made in accordance with the terms of the contract.

(e) Each contract unit price shall be revised for each month in which, by the terms of this contract, delivery of supplies is required to be made, and such revised contract unit price shall apply to the deliveries of those quantities of supplies required to be made in that month regardless of when actual delivery be made of said quantities of supplies. Each revised contract unit price for any month shall be computed by adding together the following three amounts: (1) the amount (representing the adjusted cost of labor) obtained by multiplying ——— percent of the contract unit price by a fraction, the numerator of which shall be the current labor index and the denominator of which shall be the base labor index; (2) the amount (representing the adjusted cost of steel) obtained by multiplying ——— percent of the contract unit price by a fraction, the numerator of which shall be the current steel index and the denominator of which shall be the base steel index; and (3) the amount equal to ——— percent of the original contract unit price (representing that portion of such unit price which relates neither to the cost of labor nor to cost of steel and which is therefore not subject to revision *(see Note (1))* ; *provided,* however, that any revised contract unit price made pursuant to the provisions of this clause shall in no event exceed one hundred and ten percent (110%) of the original contract unit price. All computations shall be made to the nearest one-hundredth of one cent.

(f) Pending revisions of the contract unit prices, if any, to be made pursuant to this clause, the Contractor shall be paid the contract unit price for deliveries made. Within thirty days after the final delivery of supplies, or within such further period of time as may be authorized by the Contracting Officer, the Contractor shall furnish a statement setting forth and certifying the correctness of (1) the average straight time hourly earnings of the Contractor's employees in the shop of the Contractor identified in paragraph (c) above which earnings are relevant to the computations of the "base labor index" and the "current labor index" and (2) the Contactor's established prices (*see Note (8)*) including all applicable extras for like quantities of the item identified in paragraph (d) above, which prices are relevant to the computation of the "base steel index" and the "current steel index." Upon request of the Contracting Officer, the Contractor shall make available his records used in the computation of the labor indices. After the reciept of such certificate by the Contracting Officer, the revised contract unit prices shall be computed in accordance with the provisions of this clause, and this contract shall be modified accordingly. However, no modification to this contract shall be made pursuant to this clause until the revised established price (*see Note (8)*) has been verified by the Contracting Officer.

(g) In the event of any total or partial termination of any item of this contract for the convenience of the Government, the month in which notice of such termination is received by the Contractor, if prior to the month in which the delivery is required by this contract, shall be considered the month in which delivery of such terminated or partially terminated item is required for the purpose of determining the current labor and steel indices under paragraphs (c) and (d) hereof; *provided,* however, that as to the quantity of such item which is not terminated for convenience, the month in which delivery is required by this contract shall continue to apply for determining said indices. In the case of termination of any steel item for default of the Contractor, any price revision shall be limited to the quantity of such item which has been delivered by the Contractor and accepted by the Government prior to receipt by the Contractor of notice of termination for default.

(h) As used in this clause the phrase "the month in which delivery of supplies is required to be made in accordance with the terms of this contract" shall mean any month in which under the terms of this contract a specific quantity of units of the supplies called for by this contract is required to be delivered; *provided,* however, that in the case of the failure of the Contractor to make delivery of such quantity shall have arisen out of causes beyond the control and without the fault or negligence of the Contractor, within the meaning of the clause of this contract entitled "Default," the quantity not delivered shall be required to be delivered as promptly as possible after the cessation of the cause of such failure, and the delivery schedule set forth in this contract shall be amended accordingly.

Notes

(1) Bidder insert the same percentage figures for the corresponding blanks in paragraphs (b) and (e)(1) and (2). In paragraph (e)(3), bidder insert the percentage representing the difference between the sum or the percentages inserted in paragraph (b) and (100 percent.

(2) Bidder identify the shop and plant in which the standard steel mill item identified in paragraph (d) will be finally fabricated or processed into the contract item.

(3) Bidder insert the month of bid opening, or the month in which the Contractor submitted his proposal if this is a negotiated contract.

(4) Bidder insert the unit price and unit measure of the standard steel mill item used by the Contractor in the manufacture of the contract item.

(5) Bidder identify the standard steel mill item used by the Contractor in the manufacture of the contract item.

(6) Bidder insert the date set for bid opening, or the date of the Contractor's quotation if this is a negotitated contract.

(7) Bidder insert the number of days which represents the Contractor's best estimate of the period of item required for processing the standard steel mill item in the shop identified in paragraph (c).

(8) In negotiated procurements of nonstandard steel items, when there is no "established price" or when it is not desirable to use such price, this paragraph may refer to another appropriate price basis, such as an established interplant price.

(End of clause)

252.217-7000 Exercise of option to fulfill foreign military sales commitments.

As prescribed at 217.208(d), insert the following clause:

EXERCISE OF OPTION TO FULFILL FOREIGN MILITARY SALES COMMITMENTS (APR 1984)

The U.S. Government may exercise the option or options under the option clause of this contract to fulfill Foreign Military Sales commitments undertaken by the U.S. Government on behalf of a foreign country. At the date of exercise of the option, the U.S. Government will identify the foreign country for the purpose of negotiating an equitable price adjustment for any additional cost or profit considerations attributable to Foreign Military Sales included in 225.7304 and paragraph 215.905-1(b)(7)(iii)(E) of the DoD FAR Supplement. Failure to agree to such an equitable adjustment shall be treated as a dispute within the meaning of the clause of this contract titled "DISPUTES".

(End of clause)

252.217-7300 Delivery vehicles.

As prescribed at 217.7301-5(a)(1), insert the following clause:

DELIVERY VEHICLES (APR 1967)

The supplies delivered under this contract shall be transported in clean, closed vehicles. The vehicles shall be maintained in a sanitary condition to prevent contamination of the supplies and shall be equipped to maintain any temperature requirement prescribed in the specification or elsewhere in this contract. The vehicles shall be subject to inspection by the Government at all reasonable times and at all places, including the plant of the Contractor. Supplies tendered for acceptance in vehicles which are not sanitary, or which are not equipped to maintain any prescribed temperatures, may be rejected without further inspection.

(End of clause)

252.217-7301 Time of delivery.

As prescribed at 217.7301-5(a)(2), insert the following clause:

TIME OF DELIVERY (APR 1967)

Individual written delivery orders issued or oral delivery orders placed under this contract shall specify the locations to which deliveries shall be made and the quantities for each location. Deliveries will be completed within the hours prescribed in the Schedule of this contract and on the days specified by the order. Orders which call for delivery within less than twenty-four (24) hours from the time the Contractor receives said orders shall be governed by paragraph (e) of the clause entitled "Requirements."

(End of clause)

ALTERNATE I

If an indefinite quantity contract is used, rather than a requirements contract, the following shall be substituted for the last sentence of the basic clause:

The Contractor shall not be required to deliver within less than ——— hours from the time the Contractor receives a delivery order.

253.217-7302 Change in plant location.

As prescribed at 217.7301-5(a)(3), insert the following clause:

CHANGE IN PLANT LOCATION (APR 1967)

The performance of any work under this contract at any place other than that named in this contract is prohibited unless specific written advance approval is obtained from the Contracting Officer.

(End of clause)

252.217-7303 Sanitary conditions.

As prescribed at 217.7301-5(a)(4), insert the following clause:

SANITARY CONDITIONS (APR 1967)

(a) All plant facilities, machinery, equipment, and apparatus used in the production, processing, handling, storage, or delivery of supplies under this contract, and all supplies (as the term "supplies" is defined in paragraph (a) of the clause entitled "Inspection of Supplies (Fixed Price") delivered under this contract, shall meet the sanitary standards, including bacteriological requirements, prescribed by the specifications cited elsewhere in this contract.

(b) All plant facilities machinery, equipment, and apparatus used in the production, processing, handling, storage, or delivery of supplies under this contract shall be subject to inspection and test by the Government at all places and at all reasonable times.

(c) The Government shall notify the Contractor in writing of any failure to meet the sanitary standards, including bacteriological requirements, prescribed by this contract. If such failure has not been corrected within three (3) days from the date the Contractor receives said notice, the whole or any part of this contract may be terminated for default or, at the option of the Contracting Officer, the Contractor's right to perform under this contract may be partially or wholly suspended for not less than ten (10) days, and for such longer period of time as the Contracting Officer deems appropriate to permit correction of such failure. A suspension shall not operate to extend the life of this contract and shall not be considered sufficient cause for the extension of any delivery time. During the period of any such suspension, the Government may procure from other sources, upon such terms and in such manner as the Contracting Officer may deem appropriate, supplies similar to those specified in the Schedule, and the Contractor shall be liable to the Government for any excess costs for such similar supplies. If the Contractor does not correct the failure to meet the sanitary standards, including bacteriological requirements, within any suspension period specified by the Contracting Officer, the Government may terminate the unexpired portion of this contract for default without allowing additional time for correction, notwithstanding paragraph (a)(2) of the clause entitled "Default (Fixed Price Supply and Service)."

(End of clause)

ALTERNATE I

If an indefinite quantity contract is used, rather than a requirements contract, the following shall be inserted in paragraph (c) of the basic clause after the third sentence:

The quantity of supplies designated in the Schedule as "Minimum" shall be reduced, in the event of a suspension, by an amount proportionate to the ratio between the number of days the Contractor's right to perform is suspended and the number of days in the contract period. The quantity of supplies designated as "Maximum" shall not be reduced.

252.217-7304 Remedies under delivery orders.

As prescribed at 217.7301-5(a)(5), insert the following clause:

REMEDIES UNDER DELIVERY ORDERS (APR 1967)

All rights and remedies afforded to the Government under the provisions of this contract may be exercised and enforced by the Government with respect to each written or oral delivery order placed under this contract.

(End of clause)

ALTERNATE I

If delivery orders are to be placed by an activity other than the activity which awarded the contract, the following may be added to the basic clause to establish authority in the ordering officer under the

Changes, Extras, Inspection, Default (Fixed Price Supply and Service), and Dispute clauses for the administration of individual delivery orders:

For the purpose of the exercise of the Government's rights and remedies under one or more individual delivery orders, the term "Contracting Officer" as used in the "Changes," "Extras," "Inspection of Supplies—Fixed Prices," "Default (Fixed Price Supply and Service)," and "Disputes" clauses, shall include the person executing or placing said order or orders.

252.217-7305 Examination and testing.

As prescribed at 217.7301–5(b)(1), insert the following clause:

EXAMINATION AND TESTING (DEC 1969)

(a) The Government examination and testing of dairy products shall be in accordance with the DoD Handbook No. H–57, "Supplement A—Procurement Quality Assurance for Fresh Dairy Products." The Contract agrees that a lot consists of a day's production of the type of product delivered or intended to be delivered. Whether sampling is conducted at origin or at destination, the Contractor agrees that the results of the tests performed using the samples selected in accordance with DoD Handbook No. H–57, Supplement A, will apply to the entire contract quantity of each type product delivered on the date specified at the time of sampling and that the results will be used in determining the weighted average of butterfat, milk solids non-fat, and total solids for the monthly period.

(b) The Government reserves the right to test all products to be delivered under the contract. Samples selected by the Government at origin shall be furnished at the expense of the Contractor and shall be considered to be representative of all the products delivered to the Government from the lot sampled. The Contractor shall certify the quantity of all products delivered from lots sampled at origin. Samples selected by the Government at destination shall be furnished at the expense of the Government and shall be considered to be representative of all of that type of product delivered to the Government on the date sampled.

(c) When samples are selected from containers of ½ gallon size or smaller, the entire content of the container shall constitute the sample; when samples are selected from containers larger than ½ gallon, a ½ pint sample shall be withdrawn for laboratory analysis.

(d) When the butterfat, milk solids, non-fat or total solids of any type of product as determined by chemical analysis is less than required by this contract, the Contractor shall reimburse the Government for the deficiency in the amount determined pursuant to the clause entitled "Deficiency Adjustment." For this purpose the butterfat, milk solids non-fat, and total solids content of the entire quantity of each type of product delivered during a monthly period shall be deemed to be the weighted average of the result of the tests of all samples thereof selected during said period. If the butterfat, milk solids non-fat, or total solids content of any type of product in any monthly period, as determined by a chemical analysis of at least two (2) samples, is less than required by this contract, the Contractor shall reimburse the Government for the deficiency in an amount determined pursuant to the clause entitled "Deficiency Adjustment." Deficiencies so computed, totaling $25 or less during a monthly accounting period will not be assessed. Monthly periods commence on the first (1st) day of the contract period and on the same day of each succeeding calendar month thereafter. The butterfat, milk solids non-fat, and total solids contents of one type of product will not be averaged with or offset against the content of another type of product, and the content of products delivered in any one monthly period will not be averaged with or offset against the content of products delivered in any other monthly period. No payment will be made for butterfat, milk solids non-fat, and total solids content in excess of the amount required by this contract.

(End of Clause)

252.217-7306 Deficiency adjustment.

As prescribed at 217.7301–5(b)(2), insert the following clause:

DEFICIENCY ADJUSTMENT (DEC 1969)

(a) The amount to be paid by the Contractor to the Government as consideration for the acceptance of supplies deficient in butterfat, milk solids non-fat, or total solids, pursuant to the clause entitled "Examination and Testing," shall be determined in accordance with the following formulas:

(1) *Butterfat:* Subtract the total pounds of butterfat delivered from the total pounds of butterfat required to be delivered, and multiply the remainder by the butterfat value.

(2) *Milk solid non-fat.* Subtract the total pounds of milk solids non-fat delivered from the total pounds of milk solids non-fat required to be delivered, and multiple the remainder by the milk solids non-fat value.

(3) *Total solids.* To the total solids add any shortages for butterfat, milk solids non-fat, previously price adjusted and subtract from the total solids required to be delivered. Multiply the remainder by the milk solids non-fat value.

(B) The term "butterfat value" shall mean the average Chicago top "Wholesale Selling Price" of Grade A, 92 score butter during the monthly period for which the deficiency is computed, as reported in the Weekly Dairy Comments, Dairy and Poultry Market News, published by the Department of Agriculture, Consumer and Marketing Service, Chicago, Illinois, multiplied by 1.30. The term "milk solids non-fat value" shall mean the average Chicago top price for "Commercial sales, Extra Grade, Nonfat Dry Milk, Spray (bags)" during the monthly period for which the deficiency is computed, as reported in the aforementioned Weekly Dairy Comments, multiplied by 1.45.

(c) The Contractor shall certify the tare weights of all containers on the shipping documents, and furnish a copy thereof to the Government inspector(s) at destination(s). The tare weight of dispenser containers shall include all parts of the container delivered as a unit, including lids, tubes, and seals. If different types of containers with different tares are included in a single delivery, the Contractor shall furnish the tare weight and identifying characteristics of each type of container. Volume and net weight shortages of any line item, revealed by inspecting a representative sample of said line item, shall be adjusted for payment by the receiving installation for the entire quantity of the line item delivered on the day the shortage is discovered. For the purpose of determining net weight, the following will apply:

(1) The weight factor of 8.8 pounds per gallon will be used for chocolate flavored milk and chocolate flavored drink.

(2) The weight factor of 8.6 pounds per gallon will be used for milk whole fresh, buttermilk fluid, milk whole fresh cultured, and milk skim fresh.

(3) The weight factor of 8.5 pounds per gallon will be used for fresh cream eighteen percent (18%) butterfat or less, half-and-half fresh, and cream sour cultured.

(4) The weight factor of 8.4 pounds per gallon will be used for all creams with a butterfat percentage or more than eighteen percent (18%).

(5) Other items such as cottage cheese, butter and so forth, shall be weighed in accordance with the weight stated on the container.

(6) For ice cream and frozen desserts, weight shall be determined based on applicable commodity specification.

(d) The foregoing is an agreed method for the adjustment of prices of noncomplying products, and is without prejudice to the Government's right to terminate for default or to pursue any other remedy under this contract or as provided by law.

(End of clause)

252.217-7307 Warning.

As prescribed at 217.7301–5(b)(3), insert the following clause:

WARNING (DEC 1969)

The Government shall notify the Contractor orally or in writing of any failure to meet sanitary standards, or when two of the 1st four consecutive lots tested are nonconforming for the same specification requirement. Oral notifications will be confirmed in writing. When this notice is based on product nonconformance, it shall be in effect so long as two of the last four consecutive lots tested exceed the same limit of the specification. An additional sample shall be taken within fourteen (14) days of such notice, but not before three (3) days have elapsed.

(End of clause)

252.217-7308 Suspension.

As prescribed at 217.7301–5(b)(4), insert the following clause:

SUSPENSION (DEC 1969)

The Contractor's right to perform may be suspended when three out of the last five consecutive lots tested are nonconforming for the same specification requirement. This suspension shall not operate to extend the life of this contract and shall not be considered sufficient cause for the extension

of any delivery time. During the period of any such suspension, the Government may procure from other sources, upon such terms and in such a manner as the Contracting Officer may deem appropriate, supplies similar to those specified in the Schedule, and the Contractor shall be liable to the Government for any excess costs for such similar supplies. It is the responsibility of the Contractor to use the period of suspension to effect corrections of deficiencies and to notify the Government when such corrections are completed. Concurrently with initial notification, or any time after notification, but prior to correction of deficiencies and notification to the Government thereof, the Contractor's right to perform under this contract may be partially or wholly suspended immediately if such failure results in the production of a product which is considered to be a health hazard. Any suspension shall not exceed ten (10) days.

(End of clause)

ALTERNATE I

If an indefinite quantity contract is used, rather than a requirements contracts, the following shall be added to the basic clause:

The quantity of supplies designated in the Schedule as "Minimum" shall be reduced, in the event of a suspension, by an amount proportionate to the ratio between the number of days the Contractor's right to perform is suspended and the number of days in the contract period. The quantity of supplies designated as "Maximum" shall not be reduced.

252.217-7309 Default.

As prescribed at 217.7301-5(b)(5), insert the following clause:

DEFAULT (DEC 1969)

If the Contractor does not correct the deficiencies within this period of suspension, the Contracting Officer may terminate the unexpired portion of this contract for default without allowing additional time for correction; notwithstanding subparagraph (a)(2) of the clause entitled "Default (Fixed Price Supply and Service)."

(End of clause)

252.217-7310 Reinstatement.

As prescribed at 217.1703-5(b)(6), insert the following clause:

REINSTATEMENT (DEC. 1969)

When the Contractor's right to perform has been suspended for product nonconformances, this right may be reinstatement only after the Contractor certifies, in writing, that corrective action has been taken, and the Government has verified that the Contractor has taken corrective action to its satisfaction and has so notified the Contractor in writing.

(End of clause)

252.217-7311 Code dating.

As prescribed at 217.7301-5(c), insert the following clause:

CODE DATING (APR 1967)

A code may be used to comply with the requirement set forth in the Schedule or specifications of this contract for showing a date on the labels of items delivered hereunder, *provided* that, prior to the use of a code, a written explanation thereof is furnished to the Contracting Officer and approved by him in writing. No changes in the code symbols, code system or explanation thereof, shall be made without the advance written approval of the Contracting Officer.

(End of clause)

252.217-7312 Marking.

As prescribed at 217.7301-5(d), insert the following clause:

MARKING (APR 1967)

Notwithstanding any specification references to MIL-STD-129, commercial markings are acceptable.

(End of clause)

252.217-7313 Responsibility for containers and equipment.

As prescribed at 217.7301-5(e), insert the following clause:

RESPONSIBILITY FOR CONTAINERS AND EQUIPMENT (APR 1967)

The Contractor shall maintain all reusable containers and equipment in a sanitary condition and in a good state of repair and working order. At the time of each delivery, the Contractor shall remove from the premises of the Government all empty reusable containers, unless the Contracting Officer grants permission in writing for less frequent removal. The Government shall not be liable for any damage to, or loss or destruction of, containers and equipment furnished by the Contractor.

(End of clause)

252.217-7314 Containers and equipment.

As prescribed at 217.1703-5(f), insert the following clause:

CONTAINERS AND EQUIPMENT (APR 1967)

(a) Dispenser containers and filling equipment used by the Contractor in the performance of this contract, and any refrigerated bulk milk dispenser cabinets furnished by the Contractor, shall comply with MIL-STD-175, "Minimum Sanitary Standards for the Equipment and Methods for Handling of Milk and Milk Products in Bulk Milk Dispensing Operations," as amended.

(b) Any bulk milk dispenser cabinets required by the Schedule to be furnished by the Contractor shall be installed, serviced, and maintained to the satisfaction of the Contracting Officer. All responsibility for the supply, installation, maintenance, and removal thereof, including labor and material costs, and for any damage thereto or loss or destruction, shall remain with the Contractor.

(c) When, and for as long as, the Contractor fails to furnish bulk milk dispenser cabinets or milk dispenser containers as required in the Schedule, or does not properly service, maintain, and repair said dispenser cabinets, so that milk cannot be dispensed as needed by the Government, the Contractor shall deliver a sufficient quantity of milk in half-pint containers to satisfy orders for milk dispenser containers, at the price per gallon for milk dispenser containers.

(d) Any contamination, spoilage, leakage, or other loss of any contents of a dispenser container due to functional failure of the dispenser cabinets or dispenser containers, except for a general power failure at the Government installation, shall be replaced immediately by the Contractor without cost to the Government.

(e) The tare weight of dispenser containers required to be certified in accordance with paragraph (b) of the clause entitled "Examination and Testing" shall include all parts of the container delivered as a complete unit, including lids, tubes, and seals.

(End of clause)

252.219-7000 Small business and small disadvantaged business subcontracting plan (master plans).

As prescribed at 219.708(b), insert the following clause:

SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS SUBCONTRACTING PLAN (MASTER PLANS) (APR 1984)

Master plans, referred to in FAR 52.219-9 must be approved by the contractor's contract administration office. (End of clause)

252.219-7001 Notice of combined small business-labor surplus area set-aside.

As prescribed at 219.502-70(d)(1), insert the following clause:

NOTICE OF COMBINED SMALL BUSINESS—LABOR SURPLUS AREA SET-ASIDE (JUN 1978)

(a) *General.*

(1) Offers under this procurement are solicited from small business concerns only and the procurement is to be awarded only to one or more small business concerns. This action is based on a determination by the Contracting Officer, alone or in conjunction with a representative of the Small Business Administration, that it is in the interest of maintaining or mobilizing the Nation's full productive capacity, in the interest of war or national defense programs, or in the interest of assuring that a fair proportion of the Government procurement is placed with small business concerns. Offers received from firms which are not smll business concerns shall be considered nonresponsive and shall be rejected.

(2) Part of this procurement, identified in the solicitation as the "labor surplus area (LSA) set-aside portion," has been further set aside for award only to one or more LSA concerns, which are also small business concerns, and, to a limited extent, to small business concerns which do not qualify as LSA concerns. Award of the LSA setaside portion will be made after awards have been made on the non-LSA set-aside portion.

(b) *Definitions.*

(1) A "small business concern" is a concern, including its affiliates which is indepently owned and operated, is not dominant in the field of operation in which it is making on offer on Government contracts,

and can further qualify under the criteria set forth in the regulations of the Small Business Administration (CFR Title 13, section 121.3–8). In addition to meeting these criteria, a manufacturer or a regular dealer submitting offer in his own name must agree to furnish in the performance of the contract, end items manufactured or produced by small business concerns; *provided*, that this additional requirement does not apply in connection with construction or service contracts.

(2) *Labor surplus area.* The term "labor surplus area" means a geographic area which at the time of award is classified as such by the Secretary of Labor in the Department of Labor "Listing of Eligible Labor Surplus Areas Under Defense Manpower Policy 4 and Executive Order 10582."

(3) *Labor surplus area concerns.* The term "labor surplus area concern" means a concern that agrees to perform or cause to be performed a substantial proportion of a contract in labor surplus areas. A concern shall be deemed to perform a substantial proportion of a contract in labor surplus areas if the aggregate costs that will be incurred by the concern or its first tier subcontractors on account of manufacturing or production performed in labor surplus areas amount to more than 50% of the contract price.

(c) *Procedures.*

(1) *Determining eligibility:*

(i) To be eligible to participate in the LSA set-aside portion of this procurement, a labor surplus area concern which is also a small business concern (or a small business concern to the extent indicated below) must submit a responsive offer on the non-LSA set-aside portion.

(ii) The Government reserves the right not to award to any concern submitting a token offer on the non-LSA set-aside portion or attempting by any other device to secure an unfair advantage over other offerors.

(2) *Determining priority for award:* Labor surplus concerns which are also small business concerns and other small business concerns eligible under (1) above will participate in the set-aside in the following order of priority:

Group 1. Small business concerns which are also labor surplus area (LSA) concerns.

Group 2. Small business concerns which are not labor surplus area (LSA) concerns. Within each of the above groups, offers on the LSA set-aside portion will be requested from concerns in the order of their offers on the non LSA set-aside portion, beginning with the lowest responsive offer. Concerns may offer less than the total LSA set-aside portion.

(3) *General rule.* Subject to the exceptions listed in (ii) and (iii) below, awards under the LSA set-aside shall be made at the highest unit price for each item awarded on the non LSA set-aside, adjusted to reflect transportation, rent free use of Government property and other cost factors considered in evaluating offers on the non-LSA set-aside portion. The LSA set-aside award price shall be subject to the same discount terms used in the evaluation of the highest non-LSA set-aside award price.

(ii) *Award price involving foreign end products* (see FAR Part 25).

(A) When the highest award price on the non-LSA set-aside is established by an award for a foreign end product, the award price for the LSA set-aside portion shall be the award price on the non-LSA set-aside as adjusted in evaluating the offer submitting the foreign end product for award under applicable Buy American procedures, except for awards on the LSA set-aside to concerns offering foreign end products, in which case the general rule applies.

(B) Award under the LSA set-aside to a concern offering a foreign end product, when the highest award price on the non-LSA set-aside portion is established by an award to a firm offering a domestic source end product, shall be at a price which, after application of the evaulation factors used under Buy American procedures for determining eligibility of a foreign end product for award, is equal to the highest award price on the non LSA set-aside portion, adjusted or reflect transportation and other factors considered in evaluating the offers.

(iii) *Obtaining offers and processing LSA set-aside awards.*

(A) When an unaccepted low offer is not involved: if there is no unaccepted low offer meeting the criteria in (B) below, eligible concerns in the order of priority in (2) above will be requested to offer on the LSA set-aside quantity at the highest unit price awarded in the non-LSA set-aside portion. Concerns may offer less than the total LSA set-aside portion. If any part of the LSA set-aside portion is not taken by eligible concerns, the partial LSA set-aside is automatically dissolved as to the unawarded portion. Such unawarded portion may be procured by advertising or negotiation, as appropriate, in accordance with existing reguations.

(B) When an unaccepted low offer is involved: if *a.* a responsive offer is submitted on the non LSA set-aside portion at a unit price which, when adjusted, is lower than the adjusted highest unit price awarded on the non LSA set-aside portion, but cannot be accepted (e.g., because of "all-or-none" or other quantity limitations, or because the offer is nonresponsible), and *b.* at the time of negotiation for the LSA set-aside portion, the offer could be accepted (e.g., because the LSA set-aside quantity is large enough that the quantity limitations could be complied with, or because the offeror has now become responsible), then the following procedures shall be followed.

Step one. Eligible concerns (in the order of priority in (2) above) will be requested to offer at the adjusted unit price of the unaccepted offer, a quantity of the LSA set-aside portion equal to the quantity of the unaccepted offer.

Step two. If no eligible concern is willing to take the entire quantity of the unaccepted offer, then all eligible concerns (in the order of priority in (2) above) shall be requested to make offers on any lesser portion at the same price, until either the entire quantity is awarded or all eligible concerns refuse any further portions of such quantity.

Step three.

Case 1. If the unaccepted offer was submitted by a concern not eligible to participate in the LSA set-aside, and if any of the quantity under Step Two is not awarded, then it and all other remaining quantities of the LSA set-aside portion must be withdrawn and resolicited. If the entire quantity under Step Two is awarded among eligible concerns, Steps Four, Five and Six are applicable to the remaining LSA set-aside portion.

Case 2. If the unaccepted offer was submitted by a concern eligible to participate in the LSA set-aside, Steps Four, Five and Six are applicable to the remaining LSA set-aside portion regardless of whether any quantity under Step Two is not awarded after all eligible concerns have been afforded an opportunity to offer on the unaccepted quantity. However, the concern which submitted the unaccepted offer shall be eliminated from consideration under Step Four and Step Five, for award at higher prices, unless the concern first accepts a quantity of the LSA set-aside portion equal to the entire quantity of its unaccepted offer at the adjusted price of its offer.

Step four. In case there is more than one unaccepted offer which meets the conditions of *a.* and *b.* above, Steps One, Two and Three above shall be applied with respect to the quantities of each such offer in turn, from lowest price to highest.

Step five. Eligible concerns in the order of priority in (2) above will be requested to offer, at the highest unit price awarded on the non-LSA set-aside portion on any quantity of the LSA set-aside portion, remaining after Steps One, Two, Three and Four have completed.

Step six. If the entire LSA set-aside portion is not taken by eligible concerns pursuant to Steps One through Five above, the partial LSA set-aside is automatically dissolved as to the unawarded portion and such unawarded portion may be procured by advertising or negotiation as appropriate, in accordance with existing regulations.

(d) *Agreement.* The offeror agrees that if awarded a contract as a small business LSA concern under the set-aside portion of this procurement, he will perform or cause to be performed a substantial proportion of the contract in areas classified at the time of award or at the time of performance of the contract as LSA.

(e) *Identification of areas of performance.* Each offeror desiring to be considered for award as a LSA concern on the LSA set-aside portion of this procurement shall identify in Section — of his offer the geographical areas in which he proposes to perform, or cause to be performed, a substantial proportion of the contract. If the Department of Labor classification of any such area changes after the offeror has submitted this offer, the offeror may change the areas in which he proposes to perform, *provided*, that he so notifies the contracting officer before award of the LSA set-aside portion. Such offerors are instructed to insert in the clause entitled "Eligibility for Preference as a Labor Surplus Area Concern" in Section — of the solicitation, the address(es) where costs incurred on account of manufacturing or production (by offeror or first tier subcontractor) will amount to more than fifty percent (50 %) of the contract price.

CAUTION: Failure to list the location of manufacture or production and the percentage of costs to be incurred at each location in the space provided in the clause entitled "Eligibility for Preference as a Labor Surplus Area Concern" set forth in Section — of the solicitation will preclude consideration of the offeror as a LSA concern.

(f) *Requirements contract.* Only one award will be made for each item or sub-item of the non-LSA set-aside portion and only one award will be made for each item or sub-item of the LSA set-aside portion. For the purpose of equitably distributing orders in accordance with this "Notice of Combined Small Business-Labor Surplus Area Set-Aside," the Government will apportion the quantities to be ordered as equally as possible between the non-LSA set-aside Contractor and the LSA set-aside Contractor to whom the awards are made.

(End of clause)

252.219-7002 Notice of combined small business—labor surplus area set-aside—alternate.

As prescribed at 219.502-70(d)(2), insert the following clause:

NOTICE OF COMBINED SMALL BUSINESS—LABOR SURPLUS AREA SET-ASIDE—ALTERNATE (JUN 1978)

(a) *General.*

(1) Offers under this procurement are solicited from small business concerns only and the procurement is to be awarded only to one or more small business concerns. This action is based on a determination by the Contracting Officer, alone or in conjunction with representative of the Small Business Administration, that it is in the interest of maintaining or mobilizing the Nation's full productive capacity, in the interest of war or national defense programs, or in the interest of assuring that a fair proportion of the Government procurement is placed with small business concerns. Offers received from firms which are not small business concerns shall be considered nonresponsive and shall be rejected.

(2) Part of this procurement, identified in the solicitation as the "labor surplus area (LSA) set-aside portion," has been further set aside for award only to one or more LSA concerns, which are also small business concerns, and, to a limited extent, to small business concerns which do not qualify as LSA concerns. Award of the LSA set-aside portion will be made after awards have been made on the non-LSA set-aside portion.

(b) *Definitions.*

(1) A "small business concern" is a concern, including its affiliates, which is independently owned and operated, is not dominant in the field of operation in which it is making an offer on Government contracts and can further qualify under the criteria set forth in the regulations of the Small Business Administration (CFR Title 13, section 121.3-8). In addition to meeting these criteria, a manufacturer or a regular dealer submitting offers in his own name must agree to furnish in the performance of the contract, end items manufactured or produced by small business concerns; *provided,* that this additional requirement does not apply in connection with construction or service contracts.

(2) *Labor surplus area.* The term "labor surplus area" means a geographic area which at the time of award is classified as such by the Secretary of Labor in the Department of Labor "Listing of Eligible Labor Surplus Areas Under Defense Manpower Policy 4B and Executive Order 10582."

(3) *Labor surplus area concerns.* The term "labor surplus area concern" means a concern that agrees to perform or cause to be performed a substantial proportion of a contract in labor surplus areas. A concern shall be deemed to perform a substantial proportion of a contract in labor surplus areas if the aggregate costs that will be incurred by the concern or its first tier subcontractors on account of manufacturing or production performed in labor surplus areas amount to more than 50% of the contract price.

(c) *Procedures.*

(1) *Determining eligibility:*

(i) To be eligible to participate in the LSA set-aside portion of this procurement, a labor surplus area concern which is also a small business concern (or a small business concern to the extent indicated below) must submit a responsive offer on the non-LSA set-aside portion.

(ii) The Government reserves the right not to award to any concern submitting a token offer on the non-LSA set-aside portion or attempting by any other device to secure an unfair advantage over other offerors.

(2) *Determining priority for award:* Labor surplus concerns eligible under (1) above will participate in the LSA set-aside in the following order of priority:

Group 1. Small business concerns which are also LSA concerns. A concern in this group which has received an award on the non-LSA set-aside portion of an item shall first be requested to offer the same percentage of the LSA set-aside portion. If a percentage of the LSA set-aside portion of the item remains to be awarded, a drawing by lot shall determine the order of priority within this group for negotiations for the balance of the item.

Group 2. Small business concerns which are not LSA concerns. If a quantity of the item remains unawarded after negotiations with concerns in Group 1, the same procedure shall be followed for Group 2.

(3) *Determining the LSA set-aside award price:*

(i) *General rule:* Subject to the exceptions listed in (ii) and (iii) below, award under the LSA set-aside shall be made at the highest unit price for each item awarded on the non-LSA set-aside, adjusted to reflect transportation, rent free use of Government property and other cost factors considered in evaluating offers on the non-LSA set-aside portion. When any one of separate quantities offered on an item cannot be accepted without awarding other quantities of that item at higher prices, the weighted average price shall be used to determine the highest unit price for award if the highest award of the non-LSA set-aside portion of an item was made on such a conditioned offer. When offers on the non-LSA set-aside portion tie-in two or more items so that an award cannot be made for a quantity on one item without a concurrent award of a quantity on another item, such tie-in conditions will be disregarded and the price offered for each quantity under each item shall be considered separately The LSA set-aside award price shall be subject to the same discount terms used in the evaluation of the highest non-LSA set-aside award price.

(ii) *Award price involving foreign end products (see Part 25 of FAR and DoD FAR supplement).*

(A) When the highest award price on the non-LSA set-aside is established by an award for a foreign end product, the award price for the LSA set-aside portion shall be the award price on the non-LSA set-aside as adjusted in evaluating the offer submitting the foreign end product for award under applicable Buy American procedures, except for awards on the LSA set-aside to concerns offering foreign end products in which case the general rule applies.

(B) Award under the LSA set-aside to a concern offering a foreign end product, when the highest award price on the non-LSA set-aside portion is established by an award to a firm offering a domestic source end product, shall be at a price which, after application of the evaluation factors used under Buy American procedures for determining eligibility of a foreign end product for award, is equal to the highest award price on the non-LSA set-aside portion, adjusted to reflect transportation and other factors considered in evaluating the offers.

(iii) *Obtaining offers and processing LSA set-aside awards.*

(A) When an unaccepted low offer is not involved: if there is no unaccepted low offer meeting the criteria in (B) below, eligible concerns in the order of priority in (2) above will be requested to offer on the LSA set-aside quantity at the highest unit price awarded on the non-LSA set-aside portion. Concerns may offer less than the total LSA set-aside portion. If any part of the LSA set-aside portion is not taken by eligible concerns, the partial LSA set-aside is automatically disolved as to the unawarded portion. Such unawarded portion may be procured by advertising or negotiation, as appropriate, in accordance with existing regulations.

(B) When an unaccepted low offer is involved: if (I) a responsive offer is submitted on the non-LSA set-aside portion at a unit price which, when adjusted, is lower than the adjusted highest unit price awarded on the non-LSA set-aside portion, but cannot be accepted (e.g., because of "all-or-none" or other quantity limitations, or because the offeror is nonresponsible), and (II) at the time of negotiation for the LSA set-aside portion, the offer could be accepted (e.g., because the LSA set-aside quantity is large enough that the quantity limitations could be compiled with or because the offeror has now become responsible), then the following procedures shall be followed.

Step one. Eligible concerns (in the order of priority in (2) above) will be requested to offer at the adjusted unit price of the unaccepted offer, a quantity of the LSA set-aside portion equal to the quantity of the unaccepted offer.

Step two. If no eligible concern is willing to take the entire quantity of the unaccepted offer, then all eligible concerns (in the order of priority in (2) above) shall be requested to make offers on any lesser portion at the same price, until either the entire quantity is awarded or all eligible concerns refuse any further portions of such quantity.

Step three.

Case 1. If the unaccepted offer was submitted by a concern not eligible to participate in the LSA set-aside, and if any of the quantity under Step Two is not awarded, then it and all other remaining quantities of the LSA set-aside portion must be withdrawn and resolicited. If the entire quantity under Step Two is awarded among eligible concerns, Steps Four, Five and Six are applicable to the remaining LSA set-aside portion.

Case 2. If the unaccepted offer was submitted by a concern eligible to participate in the LSA set-aside, Steps Four, Five and Six are applicable to the remaining LSA set-aside portion regardless of whether any quantity under Step Two is not awarded after all eligible concerns have been afforded an opportunity to offer on the unaccepted quantity. However, the concern which submitted the unaccepted offer shall be eliminated from consideration under Step Four and Step Five, for award at higher prices, unless that concern first accepts a quantity of the LSA set-aside portion equal to the entire quantity of its unaccepted offer at the adjusted price of its offer.

Step four. In case there is more than one unaccepted offer which meets the conditions of (I) and (II) above, Steps One, Two and Three above shall be applied with respect to the quantities of each such offer in turn, from lowest price to highest.

Step five. Eligible concerns in the order of priority in (2) above will be requested to offer, at the highest unit price awarded on the non-LSA set-aside portion on any quantity of the LSA set-aside portion, remaining after Steps One, Two, Three and Four have been completed.

Step six. If the entire LSA set-aside portion is not taken by eligible concerns pursuant to Steps One through Five above, the partial LSA set-aside is automatically dissolved as to the unawarded portion and such unawarded portion may be procured by advertising or negotiation as appropriate, in accordance with existing regulations.

(4) *Determining the LSA set-aside quantity:*

(i) The maximum quantity of an item which may be awarded to any eligible concern shall be determined by applying the percentage of the total non LSA set-aside portion of an item on which an offer was made to the total quantity of the LSA set-aside portion of that item.

(ii) If a concern offers on two or more items on the non LSA set-aside portion, but conditions its offer in such a manner that the total of all these quantities may not be awarded, or offers a quantity which, at the option of the Government, may be applied to one or more items, the overall maximum which can be offered on the LSA set-aside portion of the items affected will be determined by applying the percent of the total quantities of these items on the non-LSA set-aside portion that could have been awarded to the total of these items on the LSA set-aside portion.

(iii) Notwithstanding the foregoing, if the entire LSA set-aside portion of an item is not awarded after completion of the above steps, then the unawarded balance shall be offered to those concerns who were previously awarded quantities on the LSA set-aside portion but who were prevented from accepting additional quantities because of the quantity limitations stated above. The unawarded quantity will first be offered to that concern in the first priority which has received the largest quantity of the item. If two or more offerors in the first priority received an identical quantity, a drawing by lot shall determine their priority. If a balance still remains, this procedure shall be repeated with the offerors in each of the original priority groups in turn, to dispose of any balance of the item still remaining.

(d) *Agreement.* The offeror agrees that if awarded a contract as a small business LSA concern under the set-aside portion of this procurement, he will perform or cause to be performed a substantial proportion of the contract in areas classified at the time of award or at the time of performance of the contract as LSA.

(e) *Identification of areas of performance.* Each offeror desiring to be considered for award as a LSA concern on the LSA set-aside portion of this procurement shall identify in Section K of his offer the geographical areas in which he proposes to perform, or cause to be performed, a substantial proportion of the contract. If the Department of Labor classification of any such area changes after the offeror has submitted his offer, the offeror may change the areas in which he proposes to perform, *provided,* that he so notifies the Contracting Officer before award of the LSA set-aside portion. Such offerors are instructed to insert in the clause entitled "Eligibility for Preference as a Labor Surplus Area Concern" in Section K of the solicitation, the address(es) where costs incurred on account of manufacturing or production (by offeror or first tier subcontractor) will amount to more than fifty percent (50%) of the contract price.

CAUTION: Failure to list the location of manufacture or production and the percentage of cost to be incurred at each location in the space provided in the clause entitled "Eligibility for Preference as a Labor Surplus Area Concern" set forth in Section K of the solicitation will preclude consideration of the offeror as a LSA concern.

(f) *Requirements contract.* Only one award will be made for each item or sub-item of the non LSA set-aside portion and only one award will be made for each item or sub-item of the LSA set-aside portion. For the purpose of equitably distributing orders in accordance with this "Notice of Combined Small Business-Labor Surplus Area Set-Aside," the Government will apportion the quantities to be ordered as equally as possible between the non-LSA set-aside Contractor and the LSA set-aside Contractor to whom the awards are made.

(End of clause)

252.219-7003 Determining the set-aside award price.

As prescribed at 219.508(d), insert the following clause:

DETERMINING THE SET-ASIDE AWARD PRICE (APR 1984)

In determining the price for the set-aside portion when the clause at FAR 252.219-7, Notice of Partial Small Business Set-Aside, is included herein, the following procedures will be used:

(a) *General rule.* Subject to the exceptions listed in (b) and (c) below, awards under the set-aside shall be made at the highest unit price for each item awarded on the non-set-aside, adjusted to reflect transportation, rent free use of Government property and other cost factors considered in evaluating offers on the non-set-aside portion. The set-aside award price shall be subject to the same discount terms used in the evalution of the highest non-set-aside award price.

(b) *Award price involving foreign end products (see Part 25 of the FAR and DoD FAR supplement.*

(1) When the highest award price on the non-set-aside is established by an award for a foreign end product, the award price for the set-aside portion shall be the award price on the non-set-aside as adjusted in evaluating the offer submitting the foreign end product for award under applicable Buy American procedures, except for awards on the set-aside to concerns submitting foreign end products in which case the general rule applies.

(2) Award under the set-aside to a concern offering a foreign end product, when the highest award price on the non-set-aside portion is established by a domestic source end product, shall be at a price which, after application of the evaluation factors used under Buy American procedures for determining eligibility of a foreign end product for award, is equal to the highest award price on the non-set-aside portion, adjusted to reflect transportation and other factors considered in evaluating the offers.

(c) *Obtaining offers and processing set-aside awards.*

(1) When an unaccepted low offer is not involved; if there is no unaccepted low offer meeting the criteria in (ii) below, eligible concerns in the order of priority in FAR 19.202-3 will be requested to offer on the set-aside quantity at the highest unit price awarded on the non-set-aside portion. Concerns may offer less than the total set-aside portion. If any part of the set-aside portion is not taken by eligible small business concerns, the partial set-aside is automatically dissolved as to the unawarded portion. Such unawarded portion may be procured by advertising or negotiation, as appropriate, in accordance with existing regulations.

(2) When an unaccepted low offer is involved; if (i) a responsive offer is submitted on the non-set-aside portion at a unit price which, when adjusted, is lower than the adjusted highest unit price awarded on the non-set-aside portion, but cannot be accepted

(e.g., because of "all-or-none" or other quantity limitations, or because the offeror is nonresponsible), and (ii) at the time of negotiation for the set-aside portion, the offer could be accepted (e.g., because the set-aside quantity is large enough that the quantity limitations could be complied with, or because the offeror has now become responsible), then the following procedures shall be followed:

Step one. Eligible concerns (in the order of priority in FAR 19.202–3) will be requested to offer at the adjusted unit price of the unaccepted offer, a quantity of the set-aside portion equal to the quantity of the unaccepted offer.

Step two. If no eligible concern is willing to take the entire quantity of the unaccepted offer, then all eligible concerns (in the order of priority in FAR 19.202–3) shall be requested to make offers on any lesser portion at the same price, until either the entire quantity is awarded or all eligible concerns refuse any further portions of such quantity.

Step three.

Case 1. If the unaccepted offer was submitted by a concern not eligible to participate in the set-aside, and if any of the quantity under Step Two is not awarded, then it and all other remaining quantities of the set-aside portion must be withdrawn and resolicited. If the entire quantity under Step Two is awarded among eligible concerns, Steps Four, Five and Six are applicable to the remaining set-aside portion.

Case 2. If the unaccepted offer was submitted by a concern eligible to participate in the set-aside, Steps Four, Five and Six are applicable to the remaining set-aside portion regardless of whether any quantity under Step Two is not awarded after all eligible concerns have been afforded an opportunity to offer on the unaccepted quantity. However, the concern which submitted the unaccepted offer shall be eliminated from consideration under Step Four and Step Five, for award at higher prices, unless that concern first accepts a quantity of the set-aside portion equal to the entire quantity of its unaccepted offer, at the adjusted price of its offer.

Step four. In case there is more than one unaccepted offer which meets the conditions of (c)(2) (i) and (ii) above, Steps One, Two and Three above shall be applied with respect to the quantities of each such offer, in turn, from lowest to highest.

Step five. Eligible concerns in the order of priority in FAR 19.202–3 will be requested to offer at the highest unit price awarded on the non-set-aside portion of any quantity of the set-aside portion remaining after Steps One, Two, Three and Four have been completed.

Step six. If the entire set-aside portion is not taken by eligible small business concerns pursuant to Steps One through Five above, the partial set-aside is automatically dissolved as to the unawarded portion and such unawarded portion may be procured by advertising or negotiation as appropriate, in accordance with existing regulations.

(End of clause)

252.219–7004 Eligibility for preference as a labor surplus concern.

As prescribed at 219.508(S–70), insert the following clause:

ELIGIBILITY FOR PREFERENCE AS A LABOR SURPLUS CONCERN (JUNE 1978)

Each offeror desiring to be considered for award as a labor surplus area (LSA) concern on the set-aside portion of this procurement, specified elsewhere in the schedule, shall indicate below the address(es) where costs incurred on account of manufacturing or production (by offeror or first tier subcontractor) will amount to more than fifty percent (50%) of the contract price:

Name of Company:————————
Street Address:————————
City/County:————————
State:————————

(If more than one location is to be used, list each location and the costs to be incurred at each, stated as a percentage of the contract price.)

CAUTION: Failure to list the location of manufacture or production and the percentage, if required, of cost to be incurred at each location will preclude consideration of the offeror as a LSA concern.

(End of clause)

252.220–7000 Notice of labor surplus area set-aside.

As prescribed at 220.7003(b)(2)(i), insert the following clause:

NOTICE OF LABOR SURPLUS AREA SET-ASIDE (JUN 1978)

(a) *General.* Part of this procurement, identified in the Schedule as the "set-aside portion," has been set aside for preferential award to one or more labor surplus area (LSA) concerns, and, to a limited extent, to other business concerns which do not qualify as LSA concerns. Award of the set-aside portion will be made after awards have been made on the non-set-aside portion.

(b) *Procedures.*

(1) *Determining eligibility.*

(i) To be eligible to participate in the set-aside portion of this procurement, a concern must submit a responsive offer on the non-set-aside portion.

(ii) The Government reserves the right not to award to any concern submitting a token offer on the non-set-aside portion or attempting by any other device to secure an unfair advantage over other offerors.

(2) *Determining priority for award.* Labor surplus concerns and other business concerns eligible under (1) above will participate in the set-aside in the following order of priority:

Group 1. LSA concerns which are also small business concerns.

Group 2. Other LSA concerns.

Group 3. Small business concerns which are not LSA concerns.

Group 4. Other business concerns which are not LSA concerns.

Within each of the above groups, offers on the set-aside portion will be requested from concerns in the order of their offers on the non-set-aside portion, beginning with the lowest responsive offer. Concerns may offer less than the total set-aside portion.

(3) *Determining the set-aside award price.*

(i) *General rule.* Subject to the exceptions listed in (ii) and (iii) below, awards under the set-aside shall be made at the highest unit price for each item awarded on the non-set-aside, adjusted to reflect transportation, rent free use of Government property and other cost factors considered in evaluating bids on the non-set-aside portion. The set-aside award price shall be subject to the same discount terms used in the evaluation of the highest non-set-aside award price.

(ii) *Award price involving foreign end products, (See Part 25 of the FAR and Part 225 of the DoD FAR supplement)*

(A) When the highest award price on the non-set-aside is established by an award for a foreign end product, the award price for the set-aside portion shall be the award price on the non-set-aside as adjusted in evaluating the offer submitting the foreign end product for award under applicable Buy American procedures, except for awards on the set-aside to concerns offering foreign end products in which case the general rule applies.

(B) Award under the set-aside to a concern offering a foreign end product when the highest award price on the non-set-aside portion is established by a domestic source end product shall be at a price which, after application of the evaluation factors used under Buy American procedures for determining eligibility of a foreign end product for award, is equal to the highest award price on the non-set-aside portion, adjusted to reflect transportation and other factors considered in evaluating the offers.

(iii) *Obtaining offers and processing set-aside awards.*

(A) When an unaccepted low offer is not involved: if there is no unaccepted low offer meeting the criteria in (B) below, eligible concerns in the order of priority in (2) above will be requested to offer on the set-aside quantity at the highest unit price awarded on the non-set-aside portion, *provided* that if any part of the set-aside portion is not taken by eligible concerns in the first 3 groups, awards will be made in Group 4 at prices no higher than the lower price awarded on the non-set-aside portion.

(B) When an unaccepted low offer is involved: if *a.* a responsive offer is submitted on the non-set-aside portion at a unit price which, when adjusted, is lower than the adjusted higher unit price awarded on the non-set-aside portion, but cannot be accepted (e.g., because of "all-or-none," or other quantity limitations, *or* because the bidder is nonresponsible), and *b.* at the time of negotiation for the set-aside portion, the offer could be accepted (e.g., because the set-aside quantity is large enough that the quantity limitations could be complied with, or because the bidder has now become responsible), then the following procedures shall be followed:

Step one. Eligible concerns (in the order of priority in (2) above), excluding Group 4 firms, will be requested to offer at the adjusted unit price of the unaccepted bid, a

quantity of the set-aside portion equal to the quantity of the unaccepted offer.

Step two. If no eligible concern will offer to take the entire quantity of the unaccepted offer, then all eligible concerns (in the order of priority in (2) above), excluding Group 4 firms, shall be requested to offer on any lesser portion at the same price, until either the entire quantity is awarded or all eligible concerns refuse any further portions of such quantity.

Step three. Steps Four, Five and Six are applicable to the remaining set-aside portion regardless of whether any quantity under Step Two is not awarded after all eligible concerns have been afforded an opportunity to offer on the unaccepted quantity. *However,* the concern which submitted the unaccepted offer shall be eliminated from consideration under Step Four and Step Five, for award at higher prices, unless that concern first accepts a quantity of the set-aside portion equal to the entire quantity of its unaccepted offer at the adjusted price of its offer.

Step four. In case there is more than one unaccepted offer which meets the conditions of *a.* and *b.* above, Steps One, Two and Three above shall be applied with respect to the quantities of each such offer in turn, from lowest price to highest.

Step five. Eligible concerns in the order of priority in (2) above will be requested to offer at the highest unit price awarded on the non-set-aside portion or any quantity of the set-aside portion remaining after Steps One, Two, Three and Four have been completed, *provided,* that if any part of the set-aside portion is not taken by eligible concerns in the first 3 groups, awards will be made in Group 4 beginning with the lowest offeror on the non-set-aside portion at prices no higher than the lowest price awarded on the non-set-aside portion.

Step six. If the entire set-aside portion is not taken by eligible concerns pursuant to Steps One through Five above, the partial set-aside is automatically dissolved as to the unawarded portion and such unawarded portion may be procured by advertising or negotiation as appropriate, in accordance with existing regulations.

(c) *Definitions.*

(1) "Labor surplus area" means a geographic area which at the time of award is classified as such by the Secretary of Labor in the Department of Labor "Listing of Eligible Labor Surplus Areas Under Defense Manpower Policy 4B and Executive Order 10582."

(2) "Labor surplus area concerns," means a concern that agrees to perform or cause to be performed a substantial proportion of a contract in labor surplus area. A concern shall be deemed to perform a substantial proportion of a contract in labor surplus areas if the aggregate costs that will be incurred by the concern or its first tier subcontractors on account of manufacturing or production performed in labor surplus areas amount to more than 50% of the contract prices.

(3) "Small business concern" is a concern, including its affiliates, which is independently owned and operated, is not dominant in the field of operation in which it is offering on Government contracts, and can further qualify under the criteria set forth in regulations of Small Business Administration (CFR Title 13, Section 121.3–8). In addition to meeting these criteria, a manufacturer or a regular dealer submitting offers in his own name must agree to furnish in the performance of the contract end items manufactured or produced by small business concerns; *provided,* that this additional requirement does not apply in connection with construction or service contracts.

(d) *Agreement.* The offeror agrees that if awarded a contract as a LSA concern under the set-aside portion of this procurement, he will perform or cause to be performed a substantial proportion of the contract in areas classified at the time of award or at the time of performance of the contract as LSA.

(e) *Identification of areas of performance.* Each offeror desiring to be considered for award as a LSA concern on the LSA set-aside portion of this procurement shall identify in Section K of his offer the geographical areas in which he proposes to perform, or cause to be performed, a substantial proportion of the contract. If the Department Labor classification of any such area changes after the offeror has submitted his offer, the offeror may change the areas in which he proposes to perform, *provided,* that he so notifies the Contracting Officer before award of the LSA set-aside portion. Such offerors are instructed to insert in the clause entitled *"Eligibility for Preference as a Labor Surplus Area Concern"* in Section K of the solicitation, the address(es) when costs incurred on account of manufacturing or production (by offeror or first tier subcontractor) will amount to more than fifty percent (50%) of the contract price.

CAUTION: Failure to list the location of manufacture or production and the percentage of cost to be incurred at each location in the space provided in the clause entitled "Eligibility for Preference as a Labor Surplus Area Concern" set forth in Section K of the solicitation will preclude consideration of the offeror as a LSA concern.

(f) *Requirements Contract.* Only one award will be made for each item or sub-item of the non-set-aside portion and only one award will be made for each item or sub-item of the set-aside portion. For the purpose of equitably distributing orders in accordance with this "Notice of Labor Surplus Area Set-Aside," the Government will apportion the quantities to be ordered as equally as possible between the non-set-aside Contractor and the set-aside Contractor to whom the awards are made.

(End of clause)

252.220–7001 Notice of labor surplus area set-aside—alternate.

As prescribed at 220.7003(b)(2)(ii), insert the following clause:

NOTICE OF LABOR SURPLUS AREA SET-ASIDE—ALTERNATE (APR 1984)

(a) *General.* Part of this procurement, identified in the Schedule as the "set-aside portion," has been set aside for preferential award to one or more labor surplus area (LSA) concerns, and, to a limited extent, to other business concerns which do not qualify as LSA concerns. Award of the set-aside portion will be made after awards have been made on the non-set-aside portion.

(b) *Procedures.*

(1) *Determining eligiblity.*

(i) To be eligible to participate in the set-aside portion of this procurement, a concern must submit a responsive offer on the non-set-aside portion.

(ii) The Government reserves the right not to award to any concern submitting a token offer on the non-set-aside portion or attempting by any other device to secure an unfair advantage over other offerors.

(2) *Determining priority for award.* Labor surplus concerns and other business concerns eligible under (1) above will participate in the set-aside in the following order of priority:

Group 1. LSA concerns which are also small business concerns. A concern in this group which has received an award on the non-set-aside portion of an item shall first be requested to offer the same percentage of the set-aside portion. If a percentage of the set-aside portion of the item remains to be awarded, a drawing by lot shall determine the order of priority within this group for negotiations for the balance of the item.

Group 2. Other LSA concerns. If a quantity of an item remains unawarded after negotiations have been completed with concerns in Group 1, the same procedure shall be followed for Group 2.

Group 3. Small business concerns which are not LSA concerns. If a quantity of an item remains unawarded after negotiations with concerns in Group 2, the same procedure shall be followed for Group 3.

Group 4. Other business concerns which are not LSA concerns. If a quantity of the item remains unawarded after negotiations with concerns in Group 3, the same procedure shall be followed for Group 4.

(3) *Determining the set-aside price.*

(i) *General rule.* Subject to the exception listed in (ii) and (iii) below, awards under the set-aside shall be made at the highest unit price for each item awarded on the non-set-aside, adjusted to reflect transportation, rent free use of Government property and other cost factors considered in evaluating bids on the non-set-aside portion. When any one of separate quantities offered on an item cannot be accepted without awarding other quantities of that item at higher prices, the weighted average price shall be used to determine the highest unit price for award if the highest award of the non-set-aside portion of an item was made on such a conditioned offer. When offers on the non-set-aside portion tie-in two or more items so that an award cannot be made for a quantity on one item without a concurrent award of a quantity on another item, such tie-in conditions will be disregarded and price offered for each quantity under each item shall be considered separately. The set-aside award price shall be subject to the same discount terms used in the evaluation of the highest non-set-aside award price.

(ii) *Award price involving foreign end products (See Part 25 of the FAR and Part 225 of the DoD FAR supplement)*

(A) When the highest award price on the non-set-aside is established by an award for a foreign end product, the award price for the set-aside portion shall be the award price on the non-set-aside as adjusted in evaluating

the offer submitting the foreign end product for award under applicable Buy American procedures, except for awards on the set-aside to concerns offering foreign end products in which case the general rule applies.

(B) Award under the set-aside to a concern offering a foreign end product when the highest award price on the non-set-aside portion is established by a domestic source end product shall be at a price which, after application of the evaluation factors used under Buy American procedures for determining eligibility of a foreign end product for award, is equal to the highest award price on the non-set-aside portion, adjusted to reflect transportation and other factors considered in evaluating the offers.

(iii) *Obtaining offers and processing set-aside awards.*

(A) When an unaccepted low offer is not involved: If there is no unaccepted low offer meeting the criteria in (B) below, eligible concerns in the order of priority in (2) above will be requested to offer on the set-aside quantity at the highest unit price awarded on the non-set-aside portion. Concerns may offer less than the total set-aside portion, *provided* that if any part of the set-aside portion is not taken by eligible concerns in the first 3 groups, awards will be made in Group 4 at prices no higher than the lowest price awarded on the non-set-aside portion.

(B) When an unaccepted low offer is involved: If *a.* a responsive offer is submitted on the non-set-aside portion at a unit price which, when adjusted, is lower than the adjusted highest unit price awarded on the non-set-aside portion, but cannot be accepted (e.g., because of "all-or-none," or other quantity limitations, or because the bidder is nonresponsible), and *b.* at the time of negotiation for the set-aside portion, the offer could be accepted (e.g., because the set-aside quantity is large enough that the quantity limitations could be complied with or because the bidder has now become responsible), then the following procedures shall be followed:

Step one. Eligible concerns (in the order of priority in (2) above), excluded Group 4 firms, will be requested to offer at the adjusted unit price of the unaccepted bid, a quantity of the set-aside portion equal to the quantity of the unaccepted offer.

Step two. If no eligible concern will offer to take the entire quantity of the unaccepted offer, then all eligible concerns (in the order of priority in (2) above), excluding Group 4 firms, shall be requested to offer on any lesser portion at the same price, until either the entire quantity is awarded or all eligible concerns refuse any further portions of such quantity.

Step three. Steps Four, Five and Six are applicable to the remaining set-aside portion regardless of whether any quantity under Step Two is not awarded after all eligible concerns have been afforded an opportunity to offer on the unaccepted quantity. *However,* the concern which submitted the unaccepted offer shall be eliminated from consideration under Step Four and Step Five, for award at higher prices, unless that concern first accepts a quantity of the set-aside portion equal to the entire quantity of its unaccepted offer, at the adjusted price of its offer.

Step four. In case there is more than one unaccepted offer which meets the conditions of *a.* and *b.* above, Steps One, Two and Three above shall be applied with respect to the quantities of each such offer in turn, from lowest price to highest.

Step five. Eligible concerns in the order of priority in (2) above will be requested to offer at the highest unit price awarded on the non-set-aside portion of any quantity of the set-aside portion remaining after Steps One, Two, Three and Four have been completed, *provided* that if any part of the set-aside portion is not taken by eligible concerns in the first 3 groups, awards will be made in Group 4 at prices no higher than the lowest price awarded on the non-set-aside portion.

Step six. If the entire set-aside portion is not taken by eligible concerns pursuant to Steps One through Five above, the partial set-aside is automatically dissolved as to the unawarded portion and such unawarded portion may be procured by advertising or negotiation as appropriate, in accordance with existing regulations.

(4) *Determining the set-aside quantity.*

(i) The maximum quantity of an item which may be awarded to any eligible concern shall be determined by applying the percentage of the total non-set-aside portion of an item on which an offer was made to the total quantity of the set-aside portion of that item.

(ii) If a concern offers on two or more items on the non-set-aside portion, but conditions its offer in such a manner that the total of all these quantities may not be awarded, or offers a quantity which, at the option of the Government, may be applied to one or more items, the overall maximum which can be offered on the set-aside portion of the items affected will be determined by applying the percent of the total quantities of these items on the non-set-aside portion that could have been awarded to the total of these items on the set-aside portion.

(iii) Notwithstanding the foregoing, if the entire set-aside portion of an item is not awarded after completion of the above steps, then the unawarded balance shall be offered to those concerns who were previously awarded quantities on the set-aside portion but who were prevented from accepting additional quantities because of the quantity limitations stated above. The unawarded quantity will first be offered to that concern in the first priority which has received the largest quantity of the item. If two or more offerors in the first priority received an identical quantity, a drawing by lot shall determine their priority. If a balance still remains, this procedure shall be repeated with the offerors in each of the original priority groups in turn, to dispose of any balance of the item still remaining.

(c) *Definitions.*

(1) "Labor surplus area" means a geographic area which at the time of award is classified as such by the Secretary of Labor in the Department of Labor "Listing of Eligible Labor Surplus Areas Under Defense Manpower Policy 4B and Executive Order 10582."

(2) "Labor surplus area concerns" means a concern that agrees to perform or cause to be performed a substantial proportion of a contract in labor surplus areas. A concern shall be deemed to perform a substantial proportion of a contract in labor surplus areas if the aggregate costs that will be incurred by the concern or its first tier subcontractors on account of manufacturing or production performed in labor surplus areas amount to more than 50% of the contract price.

(3) "Small business concern" is a concern, including its affilitates, which is independently owned and operated, is not dominant in the field of operation in which it is offering on Government contracts, and can further qualify under the criteria set forth in regulations of the Small Business Administration (CFR Title 13, Section 121.3–8). In addition to meeting these criteria, a manufacturer or a regular dealer submitting offers in his own name must agree to furnish in the performance of the contract end items manufactured or produced by small business concerns: *provided,* that this additional requirement does not apply in connection with construction or service contracts.

(d) *Agreement.* The offeror agrees that if awarded a contract as an LSA concern under the set-aside portion of this procurement, he will perform or cause to be performed by a first tier subcontractor a substantial proportion of the contract in areas classified at the time of award or at the time of performance of the contract as LSA.

(e) *Identification of areas of performance.* Each offeror desiring to be considered for award as a LSA concern on the LSA set-aside portion of this procurement shall identify in Section K of his offer the geographical areas in which he proposes to perform, or cause to be performed a substantial proportion of the contract. If the Department of Labor classification of any such area changes after the offeror has submitted his offer, the offeror may change the areas in which he proposed to perform, *provided,* that he so notifies the Contracting Officer before award of the LSA set-aside portion. Such offerors are instructed to insert in the clause entitled "Eligibility for Preference as a Labor Surplus Area Concern" in Section K of this solicitation, the address(es) where costs incurred on account of manufacturing or production (by offeror or first tier subcontractor) will amount to more than fifty percent (50%) of the contract price.

CAUTION: Failure to list the location of manufacture or production and the percentage of cost to be incurred at each location in the space provided in the clause entitled "Eligibility for Preference as a Labor Surplus Area Concern" set forth in Section K of the solicitation will preclude consideration of the offeror as an LSA concern.

(f) *Requirements contract.* Only one award will be made for each item or sub-item of the non-set-aside portion and only one award will be made for each item or sub-item of the set-aside portion. For the purpose of equitably distributing orders in accordance with this "Notice of Labor Surplus Area Set-Aside," the Government will apportion the quantities to be ordered as equally as possible between the non-set-aside Contractor and the set-aside Contractor to whom the awards are made.

(End of clause)

252.222-7000 Potential application of the service contract act, As Amended (Fixed Price).

As prescribed at 222.1006(S-70), insert the following clause:

POTENTIAL APPLICATION OF THE SERVICE CONTRACT ACT, AS AMENDED (FIXED PRICE) (SEP 1979)

(a) The Contractor warrants that the prices set forth in this contract do not include any allowance for any contingency to cover increased costs for which adjustment is provided under this clause.

(b) In the event that during the performance of this contract, it is determined by appropriate authority that the provisions of the Service Contract Act of 1965, as amended, apply to any of the work covered by this contract, the Contracting Officer may unilaterally implement such determination by requiring payment of the appropriate wage and fringe benefit scale, and the Contractor agrees to comply with such implementation. In the event that compliance with the Contracting Officer's direction results in any increase in the labor rates paid under this contract, the Contractor agrees to enter promptly into negotiations to reflect such an increase. Such contract adjustment shall be limited to increases in wages or fringe benefits affected by the above determination, and the concomitant increases in social security and unemployment taxes and workmen's compensation insurance, but shall not otherwise include any amount for profit, or for general administrative costs or overhead.

(c) Within 30 days of receipt of the applicable wage and fringe benefit scale, the Contract will submit a proposal for any contract price change to the Contracting Officer. With the submission of his proposal for adjustment, the Contractor shall also submit, if requested by the Government, all necessary and pertinent data used by him in preparing the proposal upon which he received the original award of this contract. The Contracting Officer or his authorized representative shall be access to and the right to examine any directly pertinent books, documents, papers, and records of the Contractor until the expiration of 3 years after final payment under this contract.

(d) This clause shall be deemed to constitute the exclusive contractual remedy of the Contractor for adjustment arising out of the decision to apply the Service Contract Act, as amended, to work covered by this contract. Failure of the parties to reach an understanding as to such adjustment shall be considered a dispute subject to the Disputes clause of the contract.

(End of clause)

252.222-7001 Service Contract Act (SCA) minimum wages and fringe benefits.

As prescribed at 222.1006(S-71), insert the following clause:

SERVICE CONTRACT ACT (SCA) MINIMUM WAGES AND FRINGE BENEFITS (SEP 1979)

An SCA wage determination applicable to this work has been requested from the U.S. Department of Labor (DOL). If an SCA wage determination is not incorporated herein, the bidders/offerors shall consider the economic terms of the collective bargaining agreement (CBA) between the incumbent Contractor _____ and the _____ (union). Copies of the agreement can be obtained from the Contracting Officer. Pursuant to DOL Regulation, 29 CFR 4.1c the economic terms of that agreement (or any new CBA negotiated ten or more days prior to the opening of bids, or the commencement of the contract in the case of negotiated contracts, exercise of options, or extensions) will apply to the contract resulting from this solicitation, notwithstanding the absence of a wage determination reflecting such terms, unless it is determined, after a hearing pursuant to section 4(c) of the SCA, that they are substantially at variance with the wages prevailing in the area.

(End of clause)

252.228-7000 Reimbursement for war hazard losses.

As prescribed at 228.305(e)(2), insert the following clause:

REIMBURSEMENT FOR WAR HAZARD LOSSES (JUL 1968)

(a) The Contractor's costs for assuming liability for employee protection against war hazard risks pursuant to paragraph (b) of the clause of this contract entitled "Workmen's Compensation and War Hazard Insurance" shall be an allowable cost under this contract, subject to the following:

(i) The Contractor shall submit proof of loss files to support payment or denial of each claim.

(ii) As soon as practicable, but no later than one year after the expiration or termination of this contract, unless the time shall be extended by the Contracting Officer, the Contractor shall convert each claim which has not been finally settled into a suitable arrangement under which the claim can be extinguished by the Contractor with a lump sum payment. Subject to approval by the Contracting Officer, the Contractor shall thereupon obtain necessary release documents and settle the claim by lump sum arrangement, taking into account any payments previously made.

(iii) As to any potential claim which is known to, or reasonably should be within the knowledge of, the Contractor at the time of final settlement under this contract, The Contractor shall, at that time, present to the Government a full report and evaluation, indicating as to each potential claim that a reasonable investigation of the circumstances has been made, the results thereof, an evaluation of the merits, and an estimate of the amount involved should the potential claim mature into a valid obligation.

(iv) The cost of insurance against a liability reimbursable under this clause shall not be an allowable cost or otherwise recoverable under this contract.

(b) The Government may require the Contractor to assign to the Government in the manner, at the times, and to the extent directed by the Contracting Officer all right, title and interest of the Contractor to any refund, rebate or recapture arising out of any claim settlement. The Government may handle such assigned entitlements in such manner as it deems appropriate and may recover any benefits related to claim settlements.

(c) The Contractor shall, as soon as practicable after an occurrence which appears to give rise to a claim under this portion of the contract, perform such investigations as may be appropriate and promptly notify the Contracting Officer in writing of any additional amount estimated to be necessary to be obligated on account of such claim or potential claim. In addition, the Contractor shall give the Government or its representatives immediate written notice of any suit or action filed, the cost or expense of which may be reimbursable to the Contractor under this clause. The Contractor agrees to render full assistance to the Government in connection with any third party suit or claim relating to this clause or its subject matter which the Government elects to prosecute or defend in its own behalf.

(End of clause)

252.228-7001 Ground and flight risk.

As prescribed at 228.306(a)(1), insert the following clause:

GROUND AND FLIGHT RISK (OCT 1975)

(a) Notwithstanding any other provisions of this contract, except as may be specifically provided in the Schedule as an exception to this clause, the Government, subject to the definitions and limitations of this clause, assumes the risk of damage to, or loss or destruction of, aircraft "in the open", during "operation", and in "flight", as these terms are defined below, and agrees that the Contractor shall not be liable to the Government for any such damage, loss, or destruction, the risk of which is so assumed by the Government.

(b) For the purposes of this clause:

(i) Unless otherwise specifically provided in the Schedule, the term "aircraft" means—

(A) Aircraft (including (I) complete aircraft, and (II) aircraft in the course of being manufactured, disassembled, or reassembled; provided, that an engine or a portion of a wing or a wing is attached to a fuselage of such aircraft) to be furnished to the Government under this contract (whether before or after acceptance by the Government; and

(B) Aircraft (regardless of whether in a state of disassembly or reassembly) furnished by the Government to the Contractor under this contract; including all property installed therein, or in the process of installation, or temporarily removed from such aircraft; provided, however, that such aircraft and property are not covered by a separate bailment agreement.

(ii) The term "in the open" means located wholly outside of buildings on the Contractor's premises or at such other places as may be described in the Schedule as being in the open for the purposes of this clause, except that aircraft furnished by the Government shall be deemed to be in the open at all times while in Contractor's possession, care, custody, or control.

(iii) The term "flight" means any flight demonstration, flight test, taxi test, or other flight, made in the performance of this contract, or for the purpose of safeguarding the aircraft, or previously approved in writing by the . . .* With respect to land based aircraft "flight" shall commence with the taxi roll from a flight line on the Contractor's premises, and continue until the aircraft has completed the taxi roll in returning to a flight line on the Contractor's premises; with respect to seaplanes, "flight" shall commence with the launching from a ramp on the Contractor's premises and continue until the aircraft has completed its landing run upon return and is beached at a ramp or the Contractor's premises; with respect to helicopters, "flight" shall commence upon engagement of the rotors for the purpose of take-off from the Contractor's premises and continue until the aircraft has returned to the ground on the Contractor's premises and the rotors are disengaged; and with respect to vertical take-off aircraft, "flight" shall commence upon disengagement from any launching platform or device on the Contractor's premises, provided, however, that aircraft off the contractor's premises shall be deemed to be in flight when on the ground or water only during periods of reasonable duration following emergency landing, other landings made in the performance of this contractor, or landings approved by . . .* in writing.

(iv) The term "Contractor's premises" means those premises designated as such in the Schedule or in writing by the . . .* and any other place to which aircraft are moved for the purpose of safeguarding the aircraft.

(v) The term "operation" means operations and tests, other than on any production line, of aircraft, when not in flight, whether or not the aircraft is in the open or in motion during the making of any such operations or tests, and includes operations and tests of equipment, accessories, and power plants, only when installed in aircraft.

(vi) The term "flight crew member" means the pilot, the co-pilot and unless otherwise specifically provided in the Schedule, the flight engineer, navigator, bombardier-navigator, and defensive systems operator, when required, or assigned to their respective crew positions, to conduct any flight on behalf of the Contractor.

(c)(1) The Government's assumption of risk under this clause, as to aircraft in the open, shall continue in effect unless terminated pursuant to subparagraph (3) below. Where the . . .* finds that any of such aircraft is in the open under unreasonable conditions, he shall notify the Contractor in writing of the conditions he finds to be unreasonable and require the Contractor to correct such conditions within a reasonable time.

(2) Upon receipt of such notice, the contractor shall act promptly to correct such conditions, regardless of whether he agrees that such conditions are in fact unreasonable. To the extent that the Contracting officer may later determine that such conditions were not in fact unreasonable, an equitable adjustment shall be made in the contract price to compensate the Contractor for any additional costs he incurred in correcting such conditions and the contract shall be modified in writing accordingly. Any dispute as to the unreasonableness of such conditions or the equitable adjustment shall be deemed to be a dispute concerning a question of the fact within the meaning of the clause of the contract entitled "Disputes".

(3) If the . . .* finds that the Contractor failed to act promptly to correct such conditions or has failed to correct such conditions within a reasonable time, he may terminate the Government's assumption of risk under this clause, as to any of the aircraft which is in the open under such conditions, such terminations to be effective at 12:01 A.M. on the fifteenth day following the day of receipt by the Contractor of written notice thereof. If the Contracting Officer later determines that the Contractor acted promptly to correct such conditions or that the time taken by the Contractor was not in fact unreasonable, an equitable adjustment shall, notwithstanding paragraph (g) of this clause, be made in the contract price to compensate the Contractor for any additional costs he incurred as a result of termination of the Government's assumption of risk under this clause and the contract shall be modified in writing accordingly. Any dispute as to whether the Contractor failed to act promptly to correct such conditions, or as to the reasonableness of the time for correction of such conditions, or as to such equitable adjustment, shall be deemed to be a dispute concerning a question of fact within the meaning of the clause of this contract entitled "Disputes".

(4) In the event the Government's assumption of risk under this clause is terminated in accordance with (3) above, the risk of loss with respect to Government-furnished property shall be determined in accordance with the clause of this contract, if any, entitled "Government Property" until the Government's assumption of risk is reinstated in accordance with (5) below.

(5) When unreasonable conditions have been corrected, the Contractor shall promptly notify the Government thereof. The Government may elect to again assume the risks and relieve the Contractor of liabilities as provided in this clause, or not, and the . . .* shall notify the Contractor of the Government's election. If, after correction of the unreasonable conditions the Government elects to again assume such risks and relieve the Contractor of such liabilities, the Contractor shall be entitled to an equitable adjustment in the contract price for costs of insurance, if any, extending from the end of the third working day after the Contractor notifies the Government of such correction until the Government notifies the Contractor of such election. If the Government elects not to again assume such risks, and such conditions have in fact been corrected, the Contractor shall be entitled to an equitable adjustment for costs of insurance, if any, extending after such third working day.

(d) The Government's assumption of risk shall not extend to damage to, or loss or destruction of, such aircraft:

(i) Resulting from failure of the Contractor, due to willful misconduct or lack of good faith of any of the contractor's managerial personnel, to maintain and administer a program for the protection and preservation of aircraft in the open, and during operation, in accordance with sound industrial practice (the term "Contractor's managerial personnel" means the Contractor's directors, officers, and any of his managers, superintendents, or other equivalent representatives, who has supervision or direction of all or substantially all of the contractor's business, or all or substantially all of the Contractor's operations at any one plant or separate location at which this contract is performed, or a separate and complete major industrial operation in connection with the performance of this contract);

(ii) Sustained during flight if the flight crew members conducting such flight have not been approved in writing by the . . .*;

(iii) While in the course of transportation by rail, or by conveyance, on public streets, highways, or waterways, except for Government-fufnished property;

(iv) To the extent that such damage, loss or destruction is in fact covered by insurance;

(v) Consisting of wear and tear, deterioration (including rust and corrosion), freezing, or mechanical, structural, or electrical breakdown or failure, unless such damage is the result of other loss, damage consists of reasonable wear and tear or deterioration, or results from inherent vice in such property, this exclusion shall not apply; or

(vi) Sustained while the aircraft is being worked upon and directly resulting therefrom, including but not limited to any repairing, adjusting, servicing or maintenance operation, unless such damage, loss, or destruction, is of a type which would be covered by insurance which would customarily have been maintained by the Contractor at the time of such damage, loss, or destruction, but for the Government's assumption of risk under this clause.

(e) With the exception of damage to, or loss or destruction of aircraft in "flight", the Government's assumption of risk under this clause shall not extend to the first $1,000 of loss or damage resulting from each event separately occurring. The Contractor assumes the risk of and shall be responsible for the first $1,000 of loss of or damage to aircraft "in the open" or during "operation" resulting from each event separately occurring, except for reasonable wear and tear and except to the extent the loss or damage is caused by negligence of Government personnel. If the Government elects to require that the aircraft be replaced or restored by the contractor to the condition in which it was immediately prior to the damage, the equitable adjustment in the price authorized by paragraph (i) below shall not include the dollar amount of the risk assumed by the Contractor under this paragraph. In the event the Government does not elect repair or replacement, the Contractor agrees to credit the contract price or pay the Government $1,000 (or the amount of the loss is smaller) as directed by the Contracting Officer.

(f) A subcontractor shall not be relieved from liability for damage to, or loss or destruction of, aircraft while in his possession or control, except to the extent that the subcontract, with the prior written

approval of the Contracting Officer, provides for relief of the subcontractor from such liability. In the absence of such approval, the subcontract shall contain appropriate provisions requiring the return of such aircraft in as good condition as when received, except for reasonable wear and tear or for the utilization of the property in accordance with the provisions of this contract. Where a subcontractor has not been relieved from liability for any damage, loss, or destruction of aircraft and any damage loss, or destruction occurs, the Contractor shall enforce the liability of the subcontractor for such damage to, or loss or destruction of, the aircraft for the benefit of the Government.

(g) The Contractor warrants that the contract price does not and will not include, except as may be otherwise authorized in this clause, any charge or contingency reserve for insurance (including self-insurance funds or reserves) covering any damage to, or loss or destruction of, aircraft while in the open, during operation, or in flight, the risk of which has been assumed by the Government under the provisions of this clause, whether or not such assumption may be terminated as to aircraft in the open.

(h) In the event of damage to, or loss or destruction of, aircraft in the open, during operation, or in flight, the Contractor shall take all reasonable steps to protect such aircraft from further damage, separate damaged and undamaged aircraft, put all aircraft in the best possible order and further, except in cases covered by (e) above, the Contractor should furnish to the . . . a statement of:

(i) The damaged, lost, or destroyed aircraft;

(ii) The time and origin of the damage, loss or destruction;

(iii) All known interests in commingled property of which aircraft are a part; and

(iv) The insurance, if any, covering any part of the interest in such commingled property. Except in cases covered by (e) above, an equitable adjustment shall be made in the amount due under this contract for expenditures made by the Contractor in performing his obligations under this paragraph (h) and this contract shall be modified in writing accordingly.

(i) If prior to delivery and acceptance by the Government any aircraft is damaged, lost, or destroyed and the Government has under this clause assumed the risk of such damage, loss or destruction, the Government shall either (1) require that such aircraft be replaced or restored by the Contractor to the condition in which it was immediately prior to such damage, or (2) shall terminate this contract with respect to such aircraft. In the event that the Government requires that the aircraft be replaced or restored, an equitable adjustment shall be made in the amount due under this contract and in the time required for its performance, and this contract shall be modified in writing accordingly. If, in the alternative, this contract is terminated under this paragraph with respect to such aircraft and under this clause the Government has assumed the risk of such damage, loss, or destruction, the Contractor shall be paid the contract price for said aircraft (or, if applicable, any work to be performed on said aircraft) less such amounts as the Contracting Officer determines (1) that it would have cost the Contractor to complete the aircraft (or any work to be performed on said aircraft) together with anticipated profit, if any, on any such uncompleted work, and (2) to be the value, if any, of the damaged aircraft or any remaining portion thereof retained by the Contractor. The Contracting Officer shall have the right to prescribe the manner of disposition of the damage, lost, or destroyed aircraft, or any remaining parts thereof; and, if additional costs of such disposition are incurred by the Contractor, a further equitable adjustment will be made in the amount due to the Contractor. Failure of the parties to agree upon an equitable adjustment or upon the amount to be paid in the event of termination of the contract with respect to any aircraft, shall be a dispute concerning a question of fact within the meaning of the "Disputes" clause of this contract.

(j) In the event the Contractor is at any time reimbursed or compensated by any third person for any damage, loss, or destruction of any aircraft, the risk of which has been assumed by the Government under the provisions of this clause and for which the Contractor has been compensated by the Government, he shall equitably reimburse the Government. The Contractor shall do nothing to prejudice the Government's rights to recover against third parties for any such damage, loss, or destruction and, upon the request of the . . .*, shall at the Government's expense furnish to the Government all reasonable assistance and cooperation (including the prosecution of suit and the execution of instruments of assignment or subrogation in favor of the Government) in obtaining recovery.

(End of clause)

* In the foregoing clause, insert in contracts of the Department of the Army, the Department of the Navy, the Department of the Air Force, and in contracts to be administered by the Defense Contract Administration Services the activity designated in combined regulation identified as Air Force Regulation 55–22, Army Regulation 95–20, NAVAIR Instruction 3710.1A, Defense Logistics Agency Regulation 8210.1, dated 5 October 1971, subject: Requirements for Contractor Operating Procedures and Flights Crews, enclosure 1.

252.228–7002 Flight risks.

As prescribed at 28.307–2(S–70)(1), insert the following clause:

FLIGHT RISKS (OCT. 1975)

(a) Notwithstanding any other provision of this contract, and particularly subparagraph (g)(1) of the "Government Property" clause and paragraph (c) of the "Insurance—Liability to Third Persons" clause, the Contractor shall not (i) be relieved of liability for, damage to, or loss or destruction of, aircraft sustained during flight, or (ii) be reimbursed for liabilities to third persons for loss of or damage to property, or for death or bodily injury, which are caused by aircraft during flight, unless the flight crew members have previously been approved in writing by . . .*. (See footnote at end of clause.)

(b) For purposes of this clause:

(i) Unless otherwise specifically provided in the Schedule, the term "aircraft" means any aircraft, whether furnished by the Contractor under this contract (either before or after acceptance by the Government) or furnished by the Government to the Contractor under this contract, including all Government Property placed or installed therein or attached thereto; *provided*, however, that such aircraft and property are not covered by a separate bailment agreement.

(ii) The term "flight" means any flight demonstration, flight test, taxi test, or other flight, made in the performance of this contract, or for the purpose of safeguarding the aircraft, or previously approved in writing by the . . .*. (See footnote at end of clause.) As to land based aircraft, "flight" shall commence with the taxi roll to a flight line; as to sea planes, "flight" shall commence with the launching from a ramp and continue until the aircraft has completed its landing run and is beached at a ramp; as to helicopters, "flight" shall commence upon engagement of the rotors for the purpose of take-off and continue until the aircraft has returned to the ground and rotors are disengaged; and for vertical take-off aircraft, "flight" shall commence upon disengagement from any launching platform or device and continue until the aircraft has been re-engaged to any launching platform or device.

(iii) The term "flight crew members" means the pilot, the co-pilot and, unless otherwise specifically provided in the Schedule, the flight engineer, navigator, bombardier-navigator, and defense systems operator, when required, or assigned to their respective crew positions, to conduct any flight on behalf of the Contractor.

(c) If any aircraft is damaged, lost, or destroyed during flight, and if the amount of such damage, loss, or destruction exceeds one hundred thousand dollars ($100,000) or twenty percent (20%) of the estimated cost (exclusive of any fee) of this contract, whichever is less, and if the Contractor is not liable for the damage, loss or destruction pursuant to the "Government Property" clause of this contract together with paragraph (a) above, then an equitable adjustment for any resulting repair, restoration, or replacement that is required under this contract shall be made (i) in the estimated cost, delivery schedule, or both, and (ii) in the amount of any fee to be paid to the Contractor, and the contract shall be modified in writing accordingly; *provided*, in determining the amount of adjustment in the fee that is equitable, any fault of the Contractor, his employees, or any subcontractor, which materially contributed to the damage, loss, or destruction shall be taken into consideration. Failure to agree on any adjustment shall be a dispute concerning a question of fact within the meaning of the "Disputes" clause of this contract.

(End of clause)

* In the foregoing clause, insert in contracts of the Department of the Army, the Department of the Navy, the Department of the Air Force, and in contracts to be administered by the Defense Contract Administration Services the activity

designated in combined regulation identified as Air Force Regulation 55–22, Army Regulation 95–20, NAVAIR Instruction 3710.1A, Defense Logistics Agency Regulation 8210.1, dated 8 October 1971, subj: Requirements for Contractor Operating Procedures and Flight Crews, enclosure 1.

In the foregoing clause, the definition of "aircraft" may be appropriately modified in the Schedule if the contract covers helicopters, vertical take-off aircraft, lighter-than-air airships, or other nonconventional types of aircraft.

252.228–7003 Capture and detention.

As prescribed at 228.309(S–70), insert the following clause:

CAPTURE AND DETENTION (JUN 1968)

(a) As used in this clause:

(1) "Captured person" means any employee of the Contractor—

(i) Who is assigned to duty outside the United States for the performance of this contract, and

(ii) Who is found to be missing from his place of employment under circumstances that make it appear probable that his absence is due to the action of the force of any power not allied with the United States in a common military effort, or who is known to have been taken prisoner, hostage, or otherwise detained by the force of any such power, whether or not such person is actually engaged in his employment at the time of capture; *Provided* that at the time the person was captured and detained the person was either:

(A) Engaged in activity directly arising out of the course of his employment under this contract, or

(B) Captured in an area in which the captured person was present only because such presence was required in order to perform this contract;

(2) A "period of detention" begins with the day of capture and continues until the captured person is returned to his place of employment, or to the United States, or is able to be returned to the jurisdiction of the United States, or until his death is in fact established or legally can be presumed to have occurred by evidence satisfactory to the Contracting Officer, whichever shall occur first;

(3) "United States" comprises geographically the fifty states and the District of Columbia; and

(4) "War Risk Hazards Compensation Act" refers to the statute compiled in Chapter 12 of Title 42, U.S. Code (sections 1701–1717), as amended.

(b) If pursuant to an agreement entered into prior to the capture, the Contractor is obligated to pay and shall have paid benefits to a captured person, or his dependents, on account of his detention, the Government will reimburse the Contractor for such payments up to an amount which will equal the lesser of (i) the total wage or salary (computed at the rate being paid at the time of capture) due from the Contractor to the captured person for the period of detention, of (ii) that amount which would have been payable to such person if the detention had occurred under circumstances wherein the benefit provisions of the War Risk Hazards Compensation Act would have been applicable.

(c) The period of detention shall not be considered as time spent in the performance of this contract, and the Government shall not be obligated to make payment under this contract on account of such person for the period of the detention except as provided in this clause.

(d) The obligation of the Government to make payments provided for by this clause shall be applicable to the entire period of detention except that it is expressly conditioned upon and subject to the availability of funds from which payment can be made. The rights and obligations of the parties under this clause shall survive the earlier expiration, completion or termination of this contract.

(e) The Contractor shall not be reimbursed under the provisions of this clause for payments made to employees for a period of detention during which the employees were entitled to compensation for capture and detention under the War Risk Hazards Compensation Act, as amended.

(End of clause)

252.228–7004 Bonds or other security.

As prescribed at 228.103–2(a)(4), insert the following provision:

BONDS OR OTHER SECURITY (APR 1977)

A bid guarantee in the penal sum of $——— must accompany the bid. Within ten (10) days after receipt of a notice of award, the Contractor shall furnish a performance bond (Standard Form 25) in the penal sum of $——— and payment, in full, of any sum due the Government. The bond of any surety company holding a certificate of authority from the Secretary of the Treasury as an acceptable surety on Federal bonds will be accepted. Individual sureties will be accepted if each such surety deposits with the Contracting Officer cash, bonds, or notes of the United States, or certified check drawn to the order of the office designated for contract administration, or such other security as the Contracting officer may deem necessary, for the required amount of the guaranty, under the agreement that the collateral so deposited shall remain in the possession and control of the Treasurer of the United States until the completion of the contract. The formal contract and notice to proceed will be issued on receipt of an acceptable performance bond and payment of any sum due the Government.

(End of provision)

252.228–7005 Insurance.

As prescribed at 228.311(S–70), insert the following clause:

INSURANCE (JAN 1965)

(a) The Contractor shall procure and thereafter maintain such bonds and insurance in such forms and such amounts comments and for such periods of time as the Contracting Officer may require in writing and shall be reimbursed for the cost thereof.

(b) In every instance where this contract requires the United States to reimburse the Contractor for the payment of the premium on a bond or insurance policy, the bond or insurance policy shall contain an endorsement or other recital excluding by appropriate language any claim on the part of the insurer or obligor to be subrogated, on payment of a loss or otherwise, to any claim against the United States.

(c) The Contractors shall give the Contracting Officer or his representative immediate notice in writing of any suit or action filed against the Contractor arising out of the performance of this contract and of any claim against the Contractor the cost and expense of which are reimbursable under the provisions of the Clause entitled "Allowable Cost and Payment," and the risk of which is then uninsured or in which the amount claimed exceeds the amount of insurance coverage. The Contractor shall furnish immediately to the Contracting Officer copies of all pertinent papers received by the Contractor. Insofar as the following shall not conflict with any policy or contract of insurance, and upon request to the Contracting Officer, the Contractor shall do any and all things to effect an assignment and subrogation in favor of the Government, of all Contractor's rights and claims except against the Government, arising from or growing out of such asserted claims, and if required by the Contracting Officer, shall authorize representatives of the Government to settle and/or defend any such claim and to represent or take charge of any such litigation affecting the Contractor.

(End of clause)

252.228–7006 Accident reporting and investigation involving aircraft, missiles, and space launch, vehicles.

As prescribed at 228.7101, insert the following clause:

ACCIDENT REPORTING AND INVESTIGATION INVOLVING AIRCRAFT, MISSILES, AND SPACE LAUNCH VEHICLES (JAN 1969)

(a) The Contractor shall report promptly to the Administrative Contracting Officer all pertinent facts relating to each accident involving an aircraft, missile, or space launch vehicle being manufactured, modified, repaired, or overhauled under or in connection with this contract.

(b) If the Government elects to conduct an investigation of the accident, the Contractor will cooperate fully and assist the Government's personnel until the investigation is completed.

(c) The Contractor will include a clause in each of his applicable subcontracts to require subcontractor cooperation and assistance in accident investigation under this clause.

(End of clause)

252.228–7007 Safety precautions for ammunition and explosives.

As prescribed at 228.7102(a), insert the following clause:

SAFETY PRECAUTIONS FOR AMMUNITION AND EXPLOSIVES (SEP 1970)

(a) As used in this clause:

(1) "Ammunition" and "explosives" shall have the meaning set forth in DoD

Contractors' Safety Manual for Ammunition, Explosives, and Related Dangerous Materials, DoD 4145.26M;

(2) "Accident" means an event causing damage or injury involving ammunition or explosives which results in one or more of the following:

(i) One or more fatalities,*

(ii) One or more disabling injuries,*

(iii) Ten or more non-disabling injuries,*

(iv) Damage to Government property exceeding $10,000,

(v) Production interruption exceeding twenty-four (24) hours.

(b) The Contractor shall comply with the DoD Contractor's Safety Manual for Ammunition, Explosives and Related Dangerous Materials (DoD Manual 4145.26M), in effect on the date of the solicitation for this contract, as it relates to ammunition and explosives, and any other additional or more stringent requirements included in the schedule of this contract.** If the Contracting Officer notifies the Contractor of any noncompliance with such Manual, or schedule provisions, the Contractor shall immediately take corrective action. If the Contractor fails or refuses to take corrective action within the time specified by the Contracting Officer, the Contracting Officer may at any time remove Government personnel whenever the Contractor is in noncompliance with the safety requirements of this clause. Either action by the Contracting Officer shall not entitle the contractor to an adjustment of the contract price or other reimbursement for resulting increased costs, or to an adjustment of the delivery or performance schedule. However, should direction to cease performance be issued or Government personnel be removed and it is later determined that the Contractor had, in fact, complied with the Manual, or schedule provisions, the Contractor shall be entitled to an equitable adjustment in delivery schedule, in contract price, or both, in accordance with the procedures provided for in the clause of this contract entitled "Changes".

(c) The Contractor shall immediately notify the Contracting Officer after an accident involving ammunition or explosives. The Contractor shall also, in accordance with this contract or as required by the Contracting Officer, conduct an investigation and submit a written report of the accident to the Contracting Officer.

(d) Neither the requirements of this clause nor any act or failure to act by the Government in surveillance or enforcement thereof shall affect or relieve the Contractor of responsibility for the safety of his personnel and his property and for the safety of the general public in connection with the performance of this contract, or impose or add to any liability of the Government for such safety. The Contractor is not entitled to rely on the requirements of this clause or on any Government surveillance or enforcement in accordance with DoD 4145.26M in discharging the Contractor's responsibility.

(e) The Contractor shall insert the substance of this clause, including this paragraph (e), with appropriate changes in the designation of the parties, in every subcontract hereunder which involves ammunition and explosives as defined in (a) above.

(f) Nothing contained herein shall relieve the Contractor from complying with applicable federal, state, and local laws, codes, ordinances and regulations (including the obtaining of licenses and permits) in connection with the performance of this contract.

*As defined in American National Standards Institute, Safety Standard, entitled "USA Standard Method of Recording and Measuring Work Injury Experience, Z16.1", in effect on the date of the solicitation.

**The Contracting Officers shall not reference in the schedule of the contract ammunition and explosive safety publications of DoD components in their entirety. Contracting Officers shall select and identify in the schedule of the contract applicable paragraphs or portions of such publications. Where contract performance will occur on a military installation, Contracting Officers may also include necessary regulations of the installation covering ammunition and explosives applicable to performance on the installation.

(End of clause)

ALTERNATE I (SEP 1970)

As prescribed at 228.7102(d), add the following paragraph:

(g) The Contractor shall comply with the requirements for a shipper's certificate set forth in the manual entitled "Packaging and Handling of Dangerous Materials for Transportation by Military Aircraft" (U.S. Government Printing Office Catalog Number D 301.7:71/4/2, also identified as AFM 71-4/TM-38-250/NAVAIR 15-03-500-MCO P4030.10/DSAM 4145.3).

252.229-7000 Fixed-price, into-plane, fuel contracts at overseas locations.

As prescribed at 229.402-1(S-70), insert the following clause:

FIXED-PRICE, INTO-PLANE, FUEL CONTRACTS AT OVERSEAS LOCATIONS (JAN 1979)

(a) As used throughout this clause, the following terms shall have the meanings set forth below:

(1) The term "direct tax" means any foreign tax, duty, fee, or like charge, directly applicable to the completed supplies or service covered by this contract. It includes any foreign tax, duty, fee, or like charge, directly applicable to the importation, exportation, production, manufacture, distribution, transportation, storage, withdrawal from storage, handling, receipt, sale, or delivery of such supplies or services. The term does not include unemployment compensation taxes; social security taxes; income taxes; excess-profits taxes; capital stock taxes; property taxes, except such property taxes as are assessed either on completed supplies covered by this contract or on the Contractor's interest in or use of Government-owned property supplied under this contract; and such other taxes as are not within the definition of the term "direct tax" as set forth in this paragraph. If this contract provides for the furnishing of supplies in Puerto Rico, the term "direct tax" also includes the U.S. import tax on petroleum.

(2) The term "nonrefundable tax" means any direct tax which the Contractor is required to pay and, in respect to which, he is unable to obtain a refund or drawback.

(b) The contract prices do not include any direct tax.

(c) The Contractor shall use all reasonable efforts to collect all refunds or drawbacks due to the Contractor, either in its own right or under any rights and privileges arising out of this contract, of any direct tax which the Contractor is required to pay or bear the burden of.

(d) The Government shall reimburse the Contractor for any nonrefundable tax. Contractor invoices for such reimbursement shall be submitted separately on a monthly basis and, when applicable, shall show credit deductions for all refunds or drawbacks received by the Contractor.

(e) Prior to submitting an initial invoice for any nonrefundable tax, the Contractor shall furnish the Contracting Officer, for approval, a written statement in quadruplicate showing the nature of the refundable tax, the unit rate thereof in U.S., dollars per U.S. gallon, and the airport and grade of product involved. The Contractor shall notify the Contracting Officer by a written statement in quadruplicate of any changes in said unit rates and of any additional nonrefundable tax. The Contracting Officer will inform the Accounting and Finance Office of his approval or disapproval of the rates for which reimbursement is sought. All invoices for any nonrefundable tax submitted by the Contractor shall be forwarded by the Contractor directly to the Accounting and Finance Officer, Attn: Examination Section, DLA Administrative Support Center, Cameron Station, Alexandria, Virginia, 22314, who will certify the invoices for payment only in accordance with unit rates for such taxes as approved by the Contracting Officer.

(f) The provisions of this paragraph (f) shall apply only to the extent that this contract is performed within any of the following foreign countries: Australia, the Bahamas, Bahrain, Barbados, Belgium, Canada, Republic of China, Denmark (including Greenland), Ethiopia, Federal Republic of Germany (including West Berlin), France, Greece, Iceland, Iran, Italy, Japan, Republic of Korea, Luxembourg, the Netherlands, New Zealand, Norway, Panama, the Philippines, Portugal (including the Azores), Saudi Arabia, Spain, Thailand, Trinidad and Tobago, Turkey, the United Kingdom (including Anegada Island, Antigua Island, Ascension Island, Bermuda, British Indian Ocean Territories (Diego Garcia), Mahe Island, and Turks and Caicos Island), and Yugoslavia. The contract price, including the price in subcontracts, does not include any tax or duty which the Government of the United States and the Government of any of the foregoing countries have agreed shall not apply to expenditures in that country by the United States. If any such tax or duty has been included in the contract price through error or otherwise, the contract price shall be correspondingly reduced.

(End of clause)

252.231-7000 Supplemental cost principles.

As prescribed at 231.201, insert the following clause:

SUPPLEMENTAL COST PRINCIPLES (APR 1984)

When the allowability of costs under this contract are determined in accordance with Subpart 41.2 of the Federal Acquisition Regulation, the allowability of costs shall also be determined by the Contracting Officer in accordance with Subpart 231.2 of the DoD FAR Supplement in effect at the date of this contract.

(End of clause)

252.232-700 Invoices.

As prescribed at 232.111(S-70), insert the following clause:

INVOICES (OCT 1982)

(a) An invoice is a written request for payment under the contract for supplies delivered or for services rendered. In order to be proper, an invoice must include as applicable the following:

(1) Invoice date;

(2) Name of contractor;

(3) Contract number (including order number, if any), contract line item number, contract description of supplies or services, quantity, contract unit of measure and unit price, and extended total;

(4) Shipment number and date of shipment (bill of lading number and weight of shipment will be shown for shipments on Government bills of lading);

(5) Name and address to which payment is to be sent (which must be the same as that in the contract or on a proper notice of assignment);

(6) Name (where practicable), title, phone number and mailing address of person to be notified in event of a defective invoice; and

(7) Any other information or documentation requires by other provisions of the contract (such as evidence of shipment).

Invoices shall be prepared and submitted in quadruplicate (one copy shall be marked "original") unless otherwise specified.

(b) For purposes of determining if interest begins to accrue under the Prompt Payment Act (Pub. L. 97-177):

(1) A proper invoice will be deemed to have been received when it is received by the office designated in the contract for receipt of invoices and acceptance of the supplies delivered or services rendered has occurred;

(2) Payment shall be considered made on the date on which a check for such payment is dated;

(3) Payment terms (e.g., "net 20") offered by the Contractor will not be deemed a "required payment date;" and

(4) The following periods of time will not be included;

(i) after receipt of an improper invoices and prior to notice of any defect or impropriety, but not to exceed 15 days (or any lesser period established by this contract); and

(ii) between the date of a notice of any defect or impropriety and the date a proper invoice is received. When the notice is in writing, it shall be considered made on the date shown on the notice.

(End of clause)

252.232-7001 Advance payment pool.

As prescribed at 232.412(S-70), insert the following clause:

ADVANCE PAYMENT POOL (APR 1984)

Notwithstanding other provisions of this contract, advance payments will be made for the work called for hereunder in accordance with the Determinations, Findings and Authorization for advance payments dated ————. Payments made pursuant to this clause shall be governed by the terms and conditions of the Advance Payment Pool Agreement, as it may be amended from time to time, between the United States of America and ———— (insert the name of the contractor), which agreement is hereby incorporated by reference with the same force and effect as though fully set forth herein.

(End of clause)

252.232-7002 Disposition of payments.

As prescribed at 232.412(S-71), insert the following clause:

DISPOSITION OF PAYMENTS (APR 1984)

Payment will be by a dual payee Treasury check drawn payable to the contractor or the ———— (insert name of the disbursing officer designated in the advance payment pool agreement) and forwarded to the ———— (insert name of the disbursing office designated in the advance payment pool agreement) for appropriate disposition.

(End of clause)

252.232-7003 Progress payments for foreign military sales acquisitions.

As prescribed at 232.502-4(S-70), insert the following clause:

PROGRESS PAYMENTS FOR FOREIGN MILITARY SALES ACQUISITIONS (APR 1984)

If this contract includes FMS requirements, the contractor shall submit progress payment requests in accordance with the following:

(a) The contractor shall submit a separate progress payment request for each separate progress payment rate in this contract.

(b) The contractor shall submit a supporting schedule showing the amount of each request distributed to each country's requirements in the contract. This schedule shall also show the contract line items and total prices thereof applicable to each separate progress payment rate.

(c) Each progress payment request shall:

(1) Identify the contract requirements to which it applies, (i.e., FMS or U.S.).

(2) Be calculated on the basis of the prices, costs (including estimated costs to complete), subcontractor progress payments, and progress payment liquidations of the contract requirements to which it applies. The contractor in preparing these requests shall distribute costs among contract line items and countries in a manner acceptable to the Administrative Contracting Officer.

(End of clause)

252.232-7004 Flexible progress payments.

As prescribed at 232.502-4(S-71), insert the following clause:

FLEXIBLE PROGRESS PAYMENTS (APR 1984)

This contract is subject to flexible progress payment procedures. The progress payment rate of this contract is ——%, and this percentage applies in lieu of the uniform, standard progress payment rate and liquidation rate of the "Progress Payments" clause. The progress payment rate of this contract was determined by the DoD Cash Flow Computer Model, (dated ————), using five percent (5%) as the targeted rate for the Contractor's investment (as a weighted average of costs) in its work in process inventory over the life of the contract. If actual and projected case flow data generated during performances of this contract reveal that the progress payment rate will result in an investment in work in process inventory by the Contractor in excess of seven percent (7%), or less than three percent (3%), the progress payment rate shall be redetermined by using the DoD Cash Flow Computer Model. Unless it contained an error, the version of the DoD Cash Flow Computer Model that was used initially in this contract will be used for any redetermination permitted by this clause. In no event will the progress payment rate be less than the uniform, standard progress payment rate that would have applied to this contract absent flexible progress payment procedures, and in no event will the progress payment rate be greater than one hundred percent (100%).

(End of clause)

252.233-7000 Certification of requests for adjustment or relief exceeding $100,000.

As prescribed at 233.7000, insert the following clause:

CERTIFICATION OF REQUESTS FOR ADJUSTMENT OR RELIEF EXCEEDING $100,000 (FEB 1980)

(a) Any contract claim, request for equitable adjustment to contract terms, request for relief under Public Law 85-804, or other similar request exceeding $100,000 shall bear, at the time of submission, the following certificate given by a senior company official in charge at the plant or location involved:

I certify that the claim is made in good faith, that the supporting data are accurate and complete to the best of my knowledge and belief; and that the amount requested accurately reflects the contract adjustment for which the Contractor believes the Government is liable.

(Official's Name)————————————

(Title)————————————

(b) The certification in paragraph (a) requires full disclosure of all relevant facts, including cost and pricing data.

(c) The certification requirement in paragraph (a) does not apply to:

(1) requests for routine contract payments; for example, those for payment for accepted supplies and services, routine vouchers under

cost-reimbursement type contracts, and progress payment invoices; and.

(2) final adjustments under incentive provisions of contracts.

(d) In those situations where no claim certification for the purposes of Section 813 has been submitted prior to the inception of a contract dispute, a single certification, using the language prescribed by the Contract Disputes Act but signed by a senior company official in charge at the plant or location involved, will be deemed to comply with both statutes.

(End of clause)

252.235-7000 Indemnification under 10 U.S.C. 2354—fixed price.

As prescribed at 235.071(a), insert the following clause:

INDEMNIFICATION UNDER 10 U.S.C. 2354—FIXED PRICE (APR 1974)

(a) Pursuant to the authority to 10 U.S.C. 2354, notwithstanding any other provisions of this contract, but subject to the following paragraphs of this clause, the Government shall hold harmless and indemnify the Contractor against:

(1) Claims (including reasonable expenses of litigation or settlement) by third persons (including employees of the Contractor) for death, bodily injury (including sickness or disease), or loss of, damage to, or loss of use of property;

(2) Loss of or damage to property of the Contractor, and loss of use of such property, but excluding loss of profit; and

(3) Loss of, damage to, or loss of use of property of the Government; to the extent that such a claim, loss or damage (i) arises out of the direct performance of this contract; (ii) is not compensated by insurance or otherwise; and (iii) results from a risk defined in this contract to be unusually hazardous. Any such claim, loss, or damage within deductible amounts of Contractor's insurance shall not be covered under this clause.

(b) The Government shall not be liable for any such claim, loss or damage that results from willful misconduct or lack of good faith on the part of any of the Contractor's directors or officers, or on the part of any of his managers, superintendents, or other equivalent representatives, who has supervision or direction of (1) all or substantially all of the Contractor's business, or (2) all or substantially all of the Contractor's operations at any one plant or separate location in which this contract is being performed, or (3) a separate and complete major industrial operation in connection with the performance of this contract. The Contractor shall not be indemnified under this clause for liability assumed under any contract or agreement (except for subcontracts which are covered by paragraph (d) below) unless such assumption of liability has been specifically approved by the Contracting Officer; (or in contracts with the Department of the Navy, *The Department.)*

(c) No payment shall be made by the Government under this clause unless the amount thereof shall first have been certified to be just and reasonable by the Secretary or his representative designated for such purpose. Such payments shall be made from funds as stated in 10 U.S.C. 2354. The rights and obligations of the parties under this clause shall survive the termination, expiration, or completion of this contract.

(d) With the prior written approval of the Contracting Officer, the Contractor may include in any subcontract under this contract the same provisions as those in this clause, whereby the Contractor shall indemnify the subcontractor against any risk defined in this contract to be unusually hazardous. Such a subcontract shall provide the same rights and duties, and the same provisions for notice, furnishing of papers and the like, between the Contractor and the subcontractor as are established by this clause. The Contracting Officer may also approve sumilar indeminification of lower tier subcontractors upon the same terms and conditions. Subcontracts providing for indemnification within the purview of this clause shall entitle the Contractor or the Government, or both, to direct, participate in, and supervise the settlement or defense of relevant actions and claims. The Government shall indemnify the Contractor with respect to his obligation to subcontractors under subcontract provisions thus approved by the Contracting Officer. The Government may discharge its obligations under this paragraph by making payments directly to subcontractors or persons to whom the subcontractors may be liable.

(e) If insurance coverage maintained by the Contractor on the date of the execution of this contract is reduced, the liability of the Government under this clause shall not, by reason of such reduction, be increased to cover risks theretofore insured, unless the Contracting Officer consents thereto in consideration of an equitable adjustment to the Government, if appropriate, of the price in a fixed-price contract, or the fee in a cost-reimbursement type contract, in such amount as the parties may agree.

(f) The Contractor shall (i) promptly notify the Contracting Officer of any occurence, action or claim he learns of that reasonably may be expected to involve indemnification under this clause, (ii) furnish evidence or proof of any claim, loss or damage in the manner and form required by the Government, and (iii) immediately furnish to the Government copies of all pertinent papers received by the Contractor. The Government may direct, paticipate in, and supervise the settlement or defense of any such claim or action. The Contractor shall comply with the Government's directions, and execute any authorizations required, in regard to such settlement or defense.

(g) The Contractor shall procure and maintain, to the extent available, such insurance against unusually hazardous risks as the Contacting Officer (or in contracts with Department of the Navy, *The Department)* may from time to time require or approve. All such insurance shall be in such form, in the amounts, for the periods of time, at such rates, and with such insurers, as the Contracting Officer (or in contracts with Department of the Navy, *The Department) may from time to time require or approve. The obligations of the Government under this clause shall not apply to claims, loss or damage to the extent that insurance is available and is either required or approved pursuant to this paragraph. The Contractor shall be reimbursed the cost of any such insurance in excess of that maintained by the Contractor as of the date of this contract, to the extent the cost thereof is properly allocable to this contract and is not included in the contract price.*

(End of clause)

252.235-7001 Indemnification under 10 U.S.C. 2354—cost reimbursement.

As prescribed at 235.071(b), insert the following clause.

INDEMNIFICATION UNDER 10 U.S.C. 2354—COST REIMBURSEMENT (APR 1974)

(a) Pursuant to the authority of 10 U.S.C. 2354, notwithstanding any other provision of this contract, but subject to the following paragraphs of this clause, the Government shall hold harmless and indemnify the Contractor against:

(1) Claims (including reasonable expenses of litigation or settlement) by third persons (including employees of the Contractor) for death, bodily injury (including sickness or disease), or loss of, damage to, or loss of property;

(2) Loss of or damage to property of the Contractor, and loss of use of such property, but excluding loss of profit; and

(3) Loss of, damage to, or loss of use of property of the Government; to the extent that such a claim, loss or damage (i) arises out of the direct performance of this contract; (ii) is not compensated by insurance or otherwise; and (iii) results from a risk defined in this contract to be usually hazardous. Any such claim, loss, or damage within deductible amounts of Contractors's insurance shall not be covered under this clause.

(b) The Government shall not be liable for any such claim, loss or damage that results from willful misconduct or lack of good faith on th part of any of the Contractor's directors or officers, or on the part of any of his managers, superintendents, or other equivalent representatives who has supervision or direction of (1) all or substantially all of the Contractor's business, or (2) all or substantially all or the Contractor's operations at any one plant or separate location in which this contract is being performed, or (3) a separate and complete major industrial operation in connection with the performance of this contract. The Contractor shall not be indemnified under this clause for liability assumed under any contract or agreement (except for subcontracts which are covered by paragraph (d) below) unless such assumption of liability has been specifically approved by the Contracting Officer, (or in contracts with the Department of the Navy, *The Department).*

(c) No payment shall be made by the Government under this clause unless the amount thereof shall first have been certified to be just and reasonable by the Secretary or his representative designated for such purpose. Such payments shall be made from funds as stated in 10 U.S.C. 2354. The rights and obligations of the parties under this

clause shall survive the termination, expiration, or completion of this contract.

(d) With the prior written approval of the Contracting Officer, the Contractor may include in any subcontract under this contract the same provisions as those in this clause, whereby the Contractor shall indemnify the subcontractor against any risk defined in this contract to be unusually hazardous. Such a subcontract shall provide the same rights and duties, and the same provisions for notice, furnishing of papers, and the like, between the Contractor and the subcontractor as are established by this clause. The Contracting Officer may also approve similar indemnification of lower tier subcontractors upon the same terms and conditions. Subcontractors providing for indemnification within the purview of this clause shall entitle the Contractor or the Government, or both, to direct, participate in, and supervise the settlement or defense of relevant actions and claims. The Government shall indemnify the Contractor with respect to his obligations to subcontractors under subcontract provisions thus approved by the Contracting Officer. The Government may discharge its obligations under this paragraph by making payments directly to subcontractors or to persons to whom the subcontractors may be liable.

(e) If insurance coverage maintained by the Contractor on the date of the execution of this contract is reduced, the liability of the Government under this clause shall not, by reason of such reduction, be increased to cover risks theretofore insured, unless the Contracting Officer consents thereto in consideration of an equitable adjustment to the Government, if appropriate, of the price in a fixed-price contract, or the fee in a cost-reimbursement type contract, in such amount as the parties may agree.

(f) In addition to the Contractor's responsibilities under the "Insurance—Liability to Third Persons" clause of this contract, which are hereby made applicable to claims under this clause, the Contractor shall (1) promptly notify the Contracting Officer of any occurrence he learns of that reasonably may be expected to involve indemnification under this clause, (2) furnish evidence or proof of any claim, loss or damage covered by this clause in the manner and form required by the Government, and (3) to the extent required by the Government, permit and authorize the Government to direct, participate in, and supervise the settlement or defense of any such claim or action. The cost of insurance (including self-insurance), covering a risk defined in this contract as unusually hazardous, shall not be reimbursed either as a direct or indirect cost except to the extent that such insurance has been required or approved under the "Insurance—Liability to Third Persons" clause hereof.

(g) The "Limitation of Cost" clause of this contract does not apply to the Government's obligations under this clause. Such obligations shall be excepted from the release required under the "Allowable Cost, Fee, and Payment" clause of this contract.

(h) For purposes of this clause, a claim, loss or damage shall be considered to have arisen out of the direct performance of this contract if the cause for such claim, loss or damage occurred during the period of performance of this contract or as a result of the performance of this contract.

(End of clause)

252.235-7002 Recovery of nonrecurring costs on commercial sales.

As prescribed in 235.071(c), insert the following clause:

RECOVERY OF NONRECURRING COSTS ON COMMERCIAL SALES (FEB 1980)

(a) Definitions.

(1) *Commercial sale* means a sale to a customer (either foreign or domestic) other than the U.S. Government by a defense contractor of products, technology, material, services, and/or development or production techniques that were originally developed, improved, or produced using DoD appropriations/funds.

(2) *Domestic organization* means any U.S. nongovernmental organization or private commercial firm.

(3) *Technology* means a collection of information of any kind that can be used or adapted for use in the design, production, manufacture, utilization, or reconstruction of articles or material. It may take a tangible form, such as a scale model, prototype, blueprint, or an operating manual, or may take an intangible form, such as technical advice.

(4) *Nonrecurring research, development, test, and evaluation (RDT&E) costs* are those costs funded by an RDT&E appropriation to develop or improve the product or technology under consideration. This includes costs of any engineering change proposal initiated prior to date of the contract with the customer, as well as projections of such costs, to the extent additional effort applicable to the sale model or technology is necessary or planned. It does not include costs funded by either Procurement or Operations and Maintenance appropriations to improve the product.

(5) *Nonrecurring production costs* are those one-time costs incurred in support of previous production of the model specified and those costs specifically incurred in support of the total projected production run from which delivery is to be made, which would normally be expensed against a production run. These nonrecurring costs include such costs as preproduction, special tooling, special test equipment, production engineering, product improvement, destructive testing, and pilot model production, testing, and evaluation.

(6) *"Special" RDT&E and nonrecurring production costs* are those incurred for and paid by an FMS customer in developing a special feature or unique requirement under a DoD Offer and Acceptance (DD Form 1513).

(7) *Fair market price of technology*, such as that sold or licensed under a licensing or technical assistant agreement, is a price negotiated between a buyer and seller when the monetary return to the seller is primarily determined by the buyer's need for the technology and the potential market for the product(s) produced from the technology.

(8) *Model* is the generic term applied to a basic item and all modifications to that item. The model can generally be identified by a basic alphanumeric designation, such as a ship hull series, an equipment or system series, an airframe series, or a vehicle series. Recoupment within a model series is identified by determining total nonrecurring investment (RDT&E or production, as appropriate) applicable to that model series estimated to be produced for DoD requirements, FMS, and commercial sales.

(9) *Major defense equipment*, as applicable herein, means any item of significant combat equipment on the United States Munitions List having a nonrecurring research and development cost of more than $50 million or a total production cost of more than $200 million.

(b) In the event the Contractor intends to enter into domestic or foreign commercial sales for items in this contract, or essentially similar items, or enter into license or technical assistance agreements for the technology developed under this contract, he shall promptly notify the Contracting Officer (or the original DoD Contracting Officer in the event the contract is closed) to obtain the applicable nonrecurring recoupment charge.

(1) The Contractor agrees that, with respect to (2) below, he will:

(i) Reimburse the U.S. Government for a fair share of U.S. Government expenditures for nonrecurring costs applicable to the items, or, in the case of technology, the Government's proportionate share of the fair market price of the technology for the commercial customer. In the event that the current charge is unavailable, the Contractor will submit information required to support the development of the appropriate charge.

(ii) Reimburse a fair share of nonrecurring costs related to a special feature or product paid by a foreign government or international organization under a U.S. Government Foreign Military Sales case where the Contractor enters into a commercial sale or license agreement for the same or similar special feature or product.

(2) The Government will require reimbursement under the provisions of this clause when:

(i) The Government's investment in research, development, test, and evalution (RDT&E) equals or exceeds $5 million.

(ii) The Government's investment in nonrecurring production costs equals or exceeds $5 million.

(iii) A foreign government's RDT&E and nonrecurring production costs for a special feature or product equal or exceed $5 million (when requested under an FMS case and agreed to by the U.S. Government).

(iv) Reimbursement for investment costs below the thresholds in (i) through (iii) are specifically approved by the Secretary of Defense or his designee.

(3) For each commercial sale of the item, the amount to be reimbursed to the U.S. Government for nonrecurring costs shall be determined by dividing the total nonrecurring costs incurred and projected to be incurred by the total production quantity of the item, past and projected, including the production quantity for the Department of Defense (or FMS purchaser in the case of special feature or product recoupment), and multiplying the result by the quantity involved in each

commercial sale or license agreement. In principle, for defense equipment for which several model designators exist, the nonrecurring costs and the total production quantity should be accumulated over the entire range of models and major subsystems that are basically similar to the model and subsystems being sold. In a combination FMS and commercial sale of a product, the Contractor agrees to reimburse the Government for the nonrecurring costs associated with the commercial portion of the customer's purchase.

(4) For each commercial sale of technology, these factors will be considered in determining fair market price: (i) the costs incurred by the Department of Defense in developing the technology being considered for sale; (ii) the costs that would be incurred by the buyer in independently developing the technology; and (iii) the estimated dollar value of the product(s) that will be produced by the buyer upon transfer of the technology. In the case of sale or license of technology to a domestic organization, the fair market price will be the lower of either a fair share of the DoD investment cost indentified to the development of the technology or a proportionate share of the fair market price for the technology based on demand or the potential monetary return on investment. For sales or licenses of technology to foreign commercial customers, this price will be the greater of these two alternatives. The foregoing domestic pricing criterion will only be applied if the prospective commercial purchases agrees that, in the event the technology is transferred from the prospective purchaser to a foreign recipient prior to its becoming generally available, the domestic purchases will provide further payment to the Government on the basis of the foreign pricing criterion.

(c) The determination by the Government of the amount to be reimbursed pursuant to this clause shall not be subject to the Disputes clause.

(d) In the case of a commercial sale to a foreign government or international organization that qualifies for U.S. Government Foreign Military Sales, the Contractor agrees to inform his customer that any Defense-furnished goods, services, and transportation (i.e., DoD support costs) can be provided only by means of a Foreign Military Sales case (DoD Offer and Acceptance, DD Form 1513) executed by the U.S. Government and the customer. The foreign government, at its option, may designate the Contractor to act as its agent in executing the Foreign Military Sales case and/or to receive possession or performance of the goods, services, or transportation.

(e) In the event of a commercial sale of items developed under this contract, or essentially similar items, or sale or license of technology relating thereto, the Contractor agrees to relieve the Government for any and all loss or liability that might result from the contractor's use of Government data, tooling, test equipment or facilities.

(f) Notwithstanding the provisions of the clauses of this contract entitled "Patent Rights—Retention by the Contractor" and "Rights in Technical Data and Computer Software," the Contractor agrees that his rights to enter into production for commercial sales of the items or essentially similar items, or to sell or license related technology, are expressly contingent upon compliance with the provisions of this clause, provided that the Secretary of Defense or his designee may waive the Government's rights under this clause, in whole or in part, whenever he determines that such action would be in the best interests of the Government.

(g) The substance of this provision shall be placed in all subcontracts for components, or items which can be sold commercially and which meet, or are expected to meet, the thresholds set forth herein.

(End of clause)

252.235–7003 Care of laboratory animals.

As prescribed at 235.071(d), insert the following clause:

CARE OF LABORATORY ANIMALS (APR. 1974)

(a) Before undertaking performance of any contract involving the use of laboratory animals the Contractor shall register with the Secretary of Agriculture of the United States in accordance with Section 6, Pub. L. 89–544, Laboratory Animal Welfare Act, 24 August 1966 as amended by Pub. L. 91–579, Animal Welfare Act of 1970, 24 December 1970. The Contractor shall furnish evidence of such registration to the contracting officer.

(b) The Contractor shall acquire animals used in research and development programs from a dealer licensed by the Secretary of Agriculture, or from exempted sources in accordance with the Public Laws enumerated in (a) above.

(c) In the care of any live animals used or intended for use in the performance of this contract, the Contractor shall adhere to the principles enunciated in the *Guide for Care and Use of Laboratory Animals* prepared by the Institute of Laboratory Animals Resources, National Academy of Sciences—National Research Council, and in the United States Department of Agriculture's regulations and standards issued under the Public Laws enumerated in (a) above. In case of conflict between standards, the higher standard shall be used. Contractor reports on portions of the contract in which animals were used shall contain a certificate stating that the animals were cared for in accordance with the principles enunciated in the *Guide for Care and Use of Laboratory Animals* prepared by the Institute of Laboratory Animal Resources, NAS–NRC, and/or in the regulations and standards as promulgated by the Agricultural Research Service, USDA, pursuant to the Laboratory Animal Welfare Act of 24 August 1966, as amended (Pub. L. 89–544 and Pub. L. 91–579).

Note: The Contractor may request registration of his facility an a current listing of licensed dealers from the Regional Office of the Animal and Plant Health Inspection Service (APHIS), USDA, for the region in which his research facility is located. The location of the appropriate APHIS Regional Office as well as information concerning this program may be obtained by contacting the Senior Staff Office, Animal Care Staff, USDA/APHIS, Federal Center Building, Hyattsville, Maryland 20782.

(End of clause)

252.235–7004 Frequency authorization.

As prescribed at 235.071(e), insert the following clause:

FREQUENCY AUTHORIZATION (OCT 1966)

(a) Authorization of radio frequencies required in support of this contract shall be obtained through the Contracting Officer by the Contractor or subcontractor in need thereof. Frequency management procedures prescribed in the Schedule of this contract shall be followed in obtaining radio frequency authorization.

(b) For any experimental, developmental or operational equipment for which the appropriate frequency allocation has not been made, the Contractor or subcontractor shall provide the technical operating characteristics of the proposed electromagnetic radiating device to the Contracting Officer during the initial planning, experimental, or developmental phases of contractural performance. DD Form 1494, "Application for Frequency Allocation", shall be used for this purpose and shall be prepared in accordance with instructions contained on the form.

(c) This clause including this paragraph (c), shall be included in all subcontracts which call for developing, producing, testing, or operating a device for which a radio frequency authorization is required.

(End of clause)

252.236–7000 Composition of contractor.

As prescribed at 236.571–1, insert the following clause:

COMPOSITION OF CONTRACTOR (JAN 1965)

If the Contractor hereunder is comprised of more than one legal entity, each such entity shall be jointly and severally liable hereunder.

(End of clause)

252.236–7001 Modification of proposals—price breakdown.

As prescribed at 236.571–2, insert the following clause:

MODIFICATION OF PROPOSALS—PRICE BREAKDOWN (APR 1968)

The Contractor, in connection with any proposal he makes for a contract modification, shall furnish a price breakdown, itemized as required by the Contracting Officer. Unless otherwise directed, the breakdown shall be in sufficient detail to permit an analysis of all material, labor, equipment, subcontract, and overhead costs, as well as profit, and shall cover all work involved in the modification, whether such work was deleted, added or changed. Any amount claimed for subcontracts shall be supported by a smiliar price breakdown. In addition, if the proposal includes a time extension, a justification therefore shall also be furnished. The proposal, together with the price breakdown and time extension justification, shall be furnished by the date specified by the Contracting Officer.

(End of clause)

252.236–7002 Contract drawings, maps and specifications.

As prescribed at 236.571–3, insert the following clause:

CONTRACT DRAWINGS, MAPS AND SPECIFICATIONS (JAN 1965)

(a) One set of sepia of large scale contract drawings, maps and specifications will be furnished the Contractor without charge except applicable publications incorporated into the technical provisions by reference. Additional sets will be furnished on request at the cost of reproduction. The work shall conform to the following contract drawings and maps, all of which form a part of these specifications and are available in the office of

(Address) _____

Title, File, and Drawing No.

(b) Omissions from the drawings or specifications or the misdescription of details of work which are manifestly necessary to carry out the intent of the drawings and specifications, or which are customarily performed, shall not relieve the Contractor from performing such omitted or misdescribed details of the work but they shall be performed as if fully and correctly set forth and described in the drawings and specifications.

(c) The Contractor shall check all drawings furnished him immediately upon their receipt and shall promptly notify the Contracting Officer of any discrepancies. Figures marked on drawings shall in general be followed in preference to scale measurements. Large scale drawings shall in general govern small scale drawings. The Contractor shall compare all drawings and verify the figures before laying out the work and will be responsible for any errors which might have been avoided thereby.

(End of clause)

252.236–7003 Shop drawings.

As prescribed at 236.571–4, insert the following clause:

SHOP DRAWINGS (OCT 1976)

(a) The term "shop drawings" includes drawings, diagrams, layouts, schematics, descriptive literature, illustrations, schedules, performance and test data, and similar materials furnished by the Contractor to explain detail specific portions of the work required by the contract.

(b) If this contract requires shop drawings, the Contractor shall coordinate all such drawings and review them for accuracy, completeness, and compliance with contract requirements and shall indicate his approval thereon as evidence of such coordination and review. Shop drawings submitted to the Contracting Officer without evidence of the Contractor's approval may be returned for resubmission. The Contracting Officer will indicate his approval or disapproval of the shop drawings and if not approved as submitted shall indicate his reason therefore. Any work done prior to such approval shall be at the Contractor's risk. Approval by the Contracting Officer shall not relieve the Contractor from responsibility for any errors or omissions in such drawings, nor from responsibility for compiling with the requirements of this contract, except with respect to variations described and approved in accordance with (c) below.

(c) If shop drawings show variations from the contract requirements, the Contractor shall describe such variations in writing, separate from the drawings, at the time of submission. If the Contracting Officer approves any such variation(s), he shall issue an appropriate contract modification, except that, if the variation is minor and does not involve a change in price or in time of performance, a modification need not be issued.

(d) The Contractor shall submit to the Contracting Officer for approval four copies (unless otherwise indicated herein) of all shop drawings as called for under the various headings of these specifications. Three sets (unless otherwise indicated herein) of all shop drawings will be retained by the Contracting Officer and one set will be returned to the Contractor.

(End of clause)

252.236–7004 Contract prices—bidding schedules.

As prescribed at 236.572–1, insert the following clause:

CONTRACT PRICES—BIDDING SCHEDULES (APR 1968)

Payment for the various items listed in the Bidding Schedule shall constitute full compensation for furnishing all plant, labor, equipment, appliances, and materials, and for performing all operations required to complete the work in conformity with the drawings and specifications. All costs for work not specifically mentioned in the Bidding Schedule shall be included in the contract prices for the items listed.

(End of clause)

252.236–7005 Salvage materials and equipment.

As prescribed at 236.572–2, insert the following clause:

SALVAGE MATERIALS AND EQUIPMENT (JAN 1965)

The Contractor shall maintain adequate property control records for all materials or equipment specified to be salvaged. These records may be in accordance with the Contractor's system of property control, if approved by the property administrator. The Contractor shall be responsible for the adequate storage and protection of all salvaged materials and equipment which are broken or damaged during salvage operations as the result of his negligence, or while in his care.

(End of clause)

252.236–7006 Misplaced material.

As prescribed at 236.572–3, insert the following clause:

MISPLACED MATERIAL (JAN 1965)

Should the Contractor during the progress of the work, lose, dump, throw overboard, sink, or misplace material, plant, machinery, or appliance, which in the opinion of the Contracting Officer may be dangerous to or obstruct navigation, the Contractor shall recover and remove the same with the utmost dispatch. The Contractor shall give immediate notice, with description and location of such obstructions, to the Contracting Officer or inspector, and when required shall mark or buoy such obstructions until the same are removed. Should he refuse, neglect, or delay compliance with the above requirements, such obstructions may be removed by the Contracting Officer, and the cost of such removal may be deducted from any money due or to become due to the Contractor, or may be recovered under his bond. The liability of the Contractor of the removal of a vessel wrecked or sunk without fault or negligence shall be limited to that provided in Sections 15, 19, and 20 of the River and Harbor Act of March 3, 1899 (33 U.S.C. 410 et seq.).

(End of clause)

252.236–7007 Identification of employees.

As prescribed at 236.572–4, insert the following clause:

IDENTIFICATION OF EMPLOYEES (JAN 1965)

The Contractor shall be responsible for furnishing to each employee and for requiring each employee engaged on the work to display such identification as may be approved and directed by the Contracting Office. All prescribed identification shall immediately be delivered to the Contracting Officer for cancellation upon the release of any employee. When required by the Contracting Officer the Contractor shall obtain and submit fingerprints of all persons employed or to be employed on the project.

(End of clause)

252.236–7008 Superintendence of subcontractors.

As prescribed at 236.572–5, insert the following clause:

SUPERINTENDENCE OF SUBCONTRACTORS (JAN 1965)

(a) The Contractor shall be required to furnish the following, in addition to the superintendence required by the general Provision entitled "SUPERINTENDENCE BY THE CONTRACTOR":

(i) If more than 50% and less than 70% of the value of the contract work is subcontracted, one superintendence shall be provided at the site and on the Contractor's payroll to be responsible for coordinating, directing, inspecting and expediting the subcontract work.

(b) If the Contracting Officer, at any time after 50% of the subcontracted work has been completed, finds that satisfactory progress is being made, he may waive all or part of the above requirement for additional superintendence subject to the right of the Contracting Officer to reinstate such requirements if at any time during the progress of the remaining work he finds that satisfactory progress is not being made.

(End of clause)

252.236-7009 Payment for mobilization and preparatory work.

As prescribed at 236.572.6, insert one of the following clauses:

(a) PAYMENT FOR MOBILIZATION AND PREPARATORY WORK, PAYMENT ITEM NO. ——— (MAR 1979)

(a) Payments will be made under this contact on the actual expenditures made by the Contractor for mobilization and preparatory work under payment Item No. ——— as follows: The Contractor may submit to the Contracting Officer certified accounts of the actual payments made by him for construction plant exceeding $10,000 in value per unit, as appraised by the Contracting Officer at the site of the work, acquired for the execution of the work; for the transportation of all plant and equipment to the site; for material purchased for the prosecution other contract, but not to be incorporated in the work; for construction of camps, access roads or railroads, trailer courts, mess halls, dormitories or living quarters, field headquarters facilities and construction yards, and for personal services and hire of plant on work preparatory to commencing actual work on the construction items for which payment is provided under the terms of the contract. Accounts so submitted must be accompanied by certificate of the Contractor, supported by receipted bills or certified copies of payrolls and freight bills, showing that he has acquired said construction plant and material free from all encumbrances and agreement that it will not be removed from the site and that structures and facilities prepared or erected of the prosecution of the contract work will be maintained and not dismantled prior to the completion and acceptance of the entire work without the written permission of the Contracting Officer. If the Contracting Officer finds that said construction plant, material, equipment and the mobilization and preparatory work performed are suitable and necessary to the efficient prosecution of the contract and that the said preparatory work has been done with proper economy and efficiency, payment, less the prescribed retained percentage, will be made therefore to the Contractor. Payment for construction plant, material and structures and facilities prepared or erected for prosecution of the contract work shall not exceed the cost thereof to the Contractor less the estimated value upon the completion of the contract as determined by the Contracting Officer. In no event shall such payment exceed 100% of the cost to the Contractor of any such items which have no appreciable salvage value and 75% of the cost to the Contractor of such items which have an appreciable salvage value. The findings of the Contracting Officer as to the suitability and value of the construction plant, equipment, materials, structures of facilities shall not be subject to appeal.

(b) Payments for mobilization and preparatory work will be made in accordance with (a) above, and such payments will be deducted from the contract price for Item No. ——— "Mobilization and Preparatory Work" until the total amount thus charged to this item reduces this item to zero after which no further payments will be made under this item. If the total of such payments made does not reduce this item to zero, the balance will be paid to the Contractor in the final payment under the contract. The retained percentage will be paid in accordance with the clause of this contract entitled "Payments to Contractor".

(End of clause)

(b)(1) MOBILIZATION AND DEMOBILIZATION PAYMENT ITEM NO. ——— (JAN 1965)

(a) All costs connected with the mobilization and demobilization of all of the contractor's dredging plant equipment will be paid for at the contract lump sum price for this item. ——— percent (——%) of the lump sum price will be paid to the Contractor upon completion of his mobilization at the work site. The remaining ——— percent (——%) will be included in the final payment for work under this contract.

(b) In the event the Contracting Officer considers that the amount in this item (—— %), which represents mobilization, does not bear a reasonable relation to the cost of the work in this contract, the Contracting Officer may require the Contractor to produce cost data to justify this portion of the bid. Failure to justify such price to the satisfaction of the Contracting Officer will result in payment of actual mobilization costs, as determined by the Contracting Officer at the completion of mobilization and payment of the remainder of this item in the final payment under this contract. The determination of the Contracting Officer is not subject to appeal.

(End of clause)

(b)(2) MOBILIZATION AND DEMOBILIZATION, PAYMENT ITEM NO. ——— (OCT 1975)

(a) All costs connected with the mobilization and demobilization of all of the Contractor's dredging plant and equipment will be paid for at the contract lump sum price for this item. ——— percent (——%) of the lump sum price will be paid to the Contractor upon completion of his mobilization at the work site. The remaining ——— percent (——%) will be paid to the Contractor upon completion of demobilization.

(b) In the event the Contracting Officer considers that the amount in this item (—— %), which represents mobilization and (—— %) which represents demobilization, does not bear a reasonable relation to the cost of the work in this contract, the Contracting Officer may require the Contractor to produce cost data to justify this portion of the bid. Failure to justify such price to the satisfaction of the Contracting Officer will result in payment of actual mobilization costs, as determined by the Contracting Officer at the completion of mobilization, and actual demobilization costs, as determined by the Contracting Officer at the completion of demobilization, and payment of the remainder of this item in the final payment under this contract. The determination of the Contracting Officer is not subject to appeal.

(End of clause)

Note: The percentage of the lump sum price for mobilization and demobilization in paragraph (a) of the above clauses at 252.236-7009(b) (1) and (2), attributed to mobilization should generally be 60% and the remaining 40% considered to be the cost of demobilization. These percentages may be varied to reflect the situation contemplate under the particular contract, but in no event should mobilization exceed 80% of the payment item.

252.236-7011 Airfield safety precautions.

As prescribed at 236.572-8, insert the following clause.

AIRFIELD SAFETY PRECAUTIONS (APR 1968)

(a) The operation of all aground equipment (mobile or stationary), the placement of all materials, and the performance of all work, upon and in the vicinity of all airfields, shall be done in accordance with this clause. The requirements of this clause are in addition to any other safety requirements of this contract.

(b) For purposes of this clause the following definitions shall apply.

(1) "Landing Areas" means the following:

(i) The primary surfaces which are comprised of the surface of the runways, the runway shoulders, and the lateral safety zones (the length of each primary surface is the same as the runway length; the width of each primary surface is 2,000 feet (1,000 feet on each side of the runway centerline)*); (see footnote at end of clause)

(ii) The "clear zone" beyond the ends of each runway—i.e., the extension of the "primary surface" for a distance of 1,000 feet beyond each end of each runway;

(iii) All taxiways plus the lateral clearance zones along each side for the length of the taxiways (the outer edge of each lateral clearance zone is laterally 250 feet from the far or opposite edge of the taxiway, i.e., a 75-foot-wide taxiway would have a combined width of taxiway and lateral clearance zones of 425 feet); and

(iv) All aircraft parking aprons plus the area 125 feet in width extending beyond each such edge all around the aprons.

(2) "Safety precaution areas" means those portions of approach-departure clearance zones and transitional zones where placement of objects incident to contract performance might result in vertical projections at or above the approach-departure clearance surface or the transitional surface.

(A) The "approach-departure clearance surface" is an extension of the primary surface and the clear zone at each end of each runway, for a distance of 50,000 feet, first along an inclined (glide angle) and then along a horizontal plane, both flaring symmetrically about the runway centerline extended. The inclined plane (glide angle) begins in the clear zone 200 feet past the end of the runway (and primary surface) at the same elevation as the end of the runway, and continuous upward at a slope of 50:1 (one foot vertically for each 50 feet horizontally) to an elevation of 500 feet above the established

airfield elevation; at that point the plane becomes horizontal, continuing at that same uniform elevation to a point 50,000 feet longitudinally from the beginning of the inclined plane (glide angle) and ending there. The width of the surface at the beginning of the inclined plane (glide angle) is the same as the width of the clear zone; thence it flares uniformly, reaching the maximum width of 16,000 feet at the end.

(B) The "approach-departure clearance zone" is the ground area under the approach-departure clearance surface.

(C) The "transitional surface" is a sideways extension of all primary surfaces, clear zones, and approach-departure clearance surfaces along inclined planes. The inclined plane in each case begins at the edge of the surface. The slope of the inclined plant is 7:1 (one foot vertically for each 7 feet horizontally), and it continues to the point of intersection with the innter horizontal surface (which is the horizontal plant 150 feet above the established airfield elevation) or the outer horizontal surface (which is the horizontal plant 500 feet above the established airfield elevation), whichever is applicable.

(D) The "transitional zone" is the ground area under the transitional surface. (It adjoins the primary surface, clear zone and approach-departure clearance zone.)

(c) The Contractor shall report to the Contracting Officer before initiating any work and shall notify him of proposed changes of locations and operations.

(d) Neither equipment nor personnel shall use any runway for purposes other than aircraft operation without permission of the Contracting Officer unless the runway is closed by order of the Contracting Officer and marked as provided in (e)(2) below.

(e)(1) The Contractor shall place nothing upon the areas without authorization of the Contracting Officer.

(2) Unless otherwise authorized by the Contracting Officer, the Contractor shall outline those landing areas hazardous to aircraft, with red flags by day, and with electric, battery-operated, low-intensity red flasher lights by night.

(3) Before entering any landing area at an airfield where flying is controlled, additional permission must be obtained every time from the control tower operator, unless the landing area is marked as hazardous to aircraft in accordance with (2) above.

(4) All vehicles which the Contractor operates in landing areas shall be identified by means of a flag on a staff attached to and flying above the vehicle. The flag shall be three feet square and shall consist of a checkered pattern of international orange and white square of one foot on each side (except that the flag may vary up to 10 percent from each of these dimensions).

(5) Unless otherwise authorized by the Contracting Officer, all other equipment and materials in the landing areas shall be marked with red flags by day, and with electric, battery-operated low-intensity red flasher lights by night.

(6) Work shall be carried on so as to leave that portion of the landing area which is available to aircraft free from hazards, holes, piles of material, and projecting shoulders that might damage an airplane tire.

(f)(1) The Contractor shall place nothing upon the safety precaution areas without authorization of the Contracting Officer.

(2) Unless otherwise authorized by the Contracting Officer, all equipment and materials in safety precaution areas shall be marked with red flags by day, and with electric, battery-operated, low-intensity red flasher lights by night.

(3) All objects placed in safety precaution areas, which project above the approach-departure clearance surface or above the transitional surface must be provided at night with a red light or red lantern.

(g) The Contractor shall keep all paved surfaces, such as runways, taxiways, and hardstands, clean at all times and, specifically, free from small stones which might damage aircraft propellers or jet aircraft.

(h) While work is actually being performed on the airfield by the Contractor, the operation of mobile equipment shall be governed by the safety provisions above. At all other times all mobile equipment shall be removed to locations approved by the Contracting Officer at a distance of at least 750 feet from the runway centerline plus any additional distance necessary to insure compliance with the other provisions of this clause.

(i) Only those trenches may be opened for which material is on hand and ready for placing therein. As soon as practicble after material has been placed and work approved, trenches shall be backfilled and compacted as required by the contract. Meanwhile all hazardous conditions shall be marked and lighted in accordance with the other provisions of this clause.

(End of clause)

252.236–7012 Contractor-prepared network analysis system.

As prescribed at 236.572–9, insert the following clause:

CONTRACTOR-PREPARED NETWORK ANALYSIS SYSTEM (APR 1968)

The progress chart to be prepared by the Contractor pursuant to the clause entitled "Schedules for Construction Contractor", shall consist of a network analysis system as described below. In preparing this system the scheduling of construction is the responsibility of the Contractor. The requirement for the system is included to assure adequate planning and execution of the work and to assist the Contracting Officer in appraising the reasonableness of the proposed schedule and evaluating progress of work.

(a) An example of one of the numerous acceptable types of network analysis systems is shown in Appendix I of Corps of Engineers Regulation ER 1–1–11 entitled "Network Analysis System", single copies of which are available to bona fide bidders on request. Other systems which are designed to serve the same purpose and employ the same basic principles as are illustrated in Appendix I will be accepted subject to the approval of the Contracting Officer.

(b) The system shall consist of diagrams and accompanying mathematical analyses. The diagrams shall show elements of the project in detail and the entire project in summary.

(1) Diagrams shall show the order the interdependence of activities and the sequence in which the work is to be accomplished as planned by the Contractor. The basic concept of a network analysis diagram will be followed to show how the start of a given activity is dependent on the completion of preceding activities and its completion restricts the start of following activities.

(2) Detailed network activities shown on detailed or subnetwork diagram shall include, in addition to construction activities, etc. submitted and approval of samples of materials and shop drawings, the procurement of critical materials and equipment, fabrication of special material and equipment and their installation and testing. All activities of the Government that affect progress and contract required dates for completion of all or parts of the work will be shown. The detail of information shall be such that duration times of activities will range from three (3) to thirty (30) days with not over two percent (2%) of the activities exceeding these limits. The activities which comprise the following separate buildings and features shall be separately identifiable by coding or use of subnetworks or both:

Building or feature ————————
Minimum number activities ————————

The selection and number of activities shall be subject to the Contracting Officer's approval. Detailed networks, when summary networks are also furnished, need not be time scaled but shall be drafted to show a continuous flow from left to right with no arrows from right to left. The following information shall be shown on the diagrams for each activity: preceding and following event numbers, description of the activity, cost, and activity duration.

(3) Summary Network. If the project is of such size that the entire network cannot be readily shown on a single sheet, a summary network diagram shall be provided. The summary network diagram shall consist of a minimum of fifty activities and a maximum of one hundred and fifty activities, and shall be based on and supported by detailed diagrams. Related activities shall be grouped on the network. The critical path shall be plotted generally along the center of the sheet with channels with increasing float placed towards the top or bottom. The summary network shall be time scaled using units of approximately one-half inch equals one week or other suitable scale approved by the Contracting Officer. Weekends and holidays shall be indicated. Where slack exists, the activities shall be shown at the time when they are scheduled to be accomplished.

(4) The mathematical analysis of the network diagram shall include a tabulation of each activity shown on the detailed network diagrams. The following information will be furnished as a minimium for each activity:

(i) Preceding and following event numbers (numbers shall be selected and assigned so as to permit identification of the activities with bid items);

(ii) Activity description:

(iii) Estimated duration of activities (the best estimated available at time of computation);
(iv) Earliest start date (by calendar date);
(v) Earliest finish date (by calendar date);
(vi) Scheduled or actual start date (by calendar date);
(vii) Schedules or actual finish date (by calendar date);
(viii) Latest start date (by calendar date);
(ix) Latest finish date (by calendar date);
(x) Slack or float;
(xi) Monetary value of activity;
(xii) Responsibility for activity (Prime contractor, subcontractors, suppliers, Government, etc.);
(xiii) Manpower required;
(xiv) Percentage of activity completed;
(xv) Contractor's earnings based on portion of activity completed; and
(xvi) Bid item of which activity is a part.

(5) The program or means used in making the mathematical computation shall be capable of compiling the total value of completed and partially completed activities and subtotals from separate buildings or feature listed in paragraph (b)(2).

(6) In addition to the tabulation of activities, the computation will include the following data:
(i) Identification of activities which are planned to be expedited by use of overtime or double shifts to be worked including Saturdays, Sundays and holidays;
(ii) On-site manpower loading schedule;
(iii) A description of the major items of construction equipment planned for operations of the project. (The description shall include the type, number of units and unit capacities. A schedule showing proposed time equipment will be on the job keyed to activities on which equipment will be used shall be provided); and
(iv) Where portions of the work are to be paid by units costs, the estimated number of units in an activity which was used in developing the total activity cost.

(7) The analysis shall list the activities in sorts or groups as follows:
(i) By the preceding event number from lowest to highest and then in the order of the following event number;
(ii) By the amount of slack, then in order of preceding event number;
(iii) By responsibility in order of earliest allowable start dates; and
(iv) In order of latest allowable start dates, then in order of preceding event numbers, and then in order of succeeding event numbers.

(c) Submission and approval of the system shall be as follows:
(1) A preliminary network defining the Contractor's planned operations during the first sixty (60) calendar days after notice to proceed will be submitted within ten (10) days. The Contractor's general approach for the balance of the project shall be indicated. Cost of activities expected to be completed or partially completed before submission and approval of the whole schedule should be included.
(2) The complete network analysis consisting of the detailed network mathematical analysis (on-site manpower loading schedule, equipment schedule) and network diagrams shall be submitted within forth (40) calendar days after receipt of notice to proceed.

(d) The Contractor shall participate in a review and evaluation of the proposed network diagrams and analysis by the Contracting Officer. Any revisions necessary as a result of this review shall be resubmitted for approval of the Contracting Officer within ten (10) calendar days after the conference. The approved schedule shall then be the schedule to be used by the Contractor for planning, organizing and directing the work and for reporting progress. If the Contractor thereafter desires to make changes in his method of operating and scheduling he shall notify the Contracting Officer in writing stating the reasons for the change. If the Contracting Officer considers these changes to be of a major nature he may require the Contractor to revise and submit for approval, without additional cost to the Government, all or the affected portion of the detailed diagrams and mathematical analysis and the summary diagram to show the effect on the entire project. A change may be considered of a major nature if the time estimated to be required or actually used for an activity or the logic of sequence of activities is varied from the original plant to a degree that there is a reasonable doubt as to the effect on the contract completion date or dates. Changes which affect activities with adequate slack time shall be considered as minor changes, except that an accumulation of minor changes may be considered a major change when their cumulative effect might affect the contract completion date.

(e) The Contractor shall submit at intervals of fifteen (15) calendar days a report of the actual construction progress by updating the mathematical analyses. Revisions causing changes in the detailed network shall be noted on the summary network, or a revised issue of affected portions of the detailed network furnished. The summary network shall be revised as necessary for the sake of clarity. However, only the initial submission or completion revisions need be time scaled. Subsequent minor revision need not be time scaled.

(f) The report shall show the activities or portions of activities completed during the reporting period and their total value as basis for the Contractor's periodic request for payment. Payment made pursuant to the General Provision entitled "Payments to Contractor" will be based on the total value of such activities completed or partially completed after verification by the Contracting Officer. The report will state the percentage of the work actually completed and schedules as of the report date and the progress along the critical path in terms of days ahead or behind the allowable dates. If the project is behind schedule, progress along other paths with negative slack shall also be reported. The Contractor shall also submit a narrative report with the update analysis which shall include but not be limited to a description of the problem areas, current and anticipated, delaying factors and their impact, and an explanation of corrective actions taken or proposed.

(g) Sheet size of diagrams shall be 30 by 42 inches. Each updated copy shall show a date of the latest revision.

(h) Initial submittal and complete revisions shall be submitted in six (6) copies.

(i) Periodic reports shall be submitted in four (4) copies.

(End of clause)

252.236–7013 Government-prepared network analysis system (APR 1968).

As prescribed at 236.572–10, insert the following clause:

GOVERNMENT-PREPARED NETWORK ANALYSIS SYSTEM (APR 1968)

The progress chart prepared by the Contractor pursuant to the clause entitled "Schedules for Contruction Contracting" will include the following:

(a) The Contractor shall submit to the Contracting Officer a chart showing the initial progress schedule covering the first sixty (60) days of his construction operations within —— days after receipt by him of the Notice to Proceed.

(b) The Contractor shall submit a chart showing the construction progress schedule in accordance with the clause entitled "Schedules for Construction Contracting" for the entire work under this contract within —— days after receipt of the Notice to Proceed.

(c) In addition to the above information the Contractor will also provide information of the Government to prepare and maintain a surveillance system and verify progress payments using the network analysis system of scheduling as described in Appendix I of the Corps of Engineers Regulation, ER 1–1–11, entitled "Network Analysis System", single copies of which are available to bona fide bidders upon request. In preparing this data the scheduling is the responsibility of the contractor. The requirement is included to assure adequate planning and execution of the work and to assist the Contracting Officer in appraising the reasonableness of the proposed schedule and evaluating the progress of the work. The data shall include, but not be limited to:

(1) A description of the Contractor's detailed construction plan of the project including the cost or weighted value, the order and interdependence, and the estimated duration of the activities which make up the project. Data shall be in sufficient detail to permit preparation of the network and schedule analysis by the Government.

(2) Revisions and updating of the data on scheduling with reasons for the revisions, as required by the Contracting Officer, shall be furnished by the Contractor in a timely and progressive manner to assist the Government in keeping the network and schedule analysis in a current working status.

(d) Pursuant to the General Provision entitled "Payments to Contractor", progress payments will be made on the basis of weighted value or cost assigned to each activity or group of activities as related to the total contract cost of the activity.

(End of clause)

252.236–7014 Statement of work.

As prescribed at 236.573–1, insert the following clause:

STATEMENT OF WORK (JAN 1965)

The Contractor shall furnish all labor, materials, equipment, and services (except those furnished by the Government) for the construction of (insert a brief description of the project) in accordance with the drawings and specifications or instructions attached hereto as Appendix "A" and made a part hereof, or to be furnished hereafter by the Contracting Officer and subject in every detail to his supervision, direction, and instructions.

(End of clause)

252.236–7015 Estimated cost, performance period.

As prescribed at 236.573–2, insert the following clause:

ESTIMATED COST, PERFORMANCE PERIOD (JAN 1965)

It is estimated that the construction cost of work required under this contract will be ——— Dollars, ($———), exclusive of the Contractor's fee, and that the work herein contracted for will be ready for utilization by the Government on or before——19—. It is expressly understood, however, that neither the Government or the Contractor guarantees the correctness of either of these estimates.

(End of clause)

252.236–7016 Direct payments.

As prescribed at 236.573–3, insert the following clause:

DIRECT PAYMENTS (JAN 1965)

(A) *To Suppliers, Laborers, and Mechanics.* If bills for purchase of material, machinery or equipment, or payrolls covering employment of laborers or mechanics incurred by the Contractor or by any subcontractor hereunder are not paid promptly by the Contractor or subcontractor, as the case may be, the Contracting Officer may, in his discretion, withhold from payments otherwise due the Contractor an amount equivalent to the amount of any such bill or payroll. Should the Contractor neglect or refuse to pay such bills or payrolls or to direct any subcontractor to pay such bills or payrolls within five (5) days after notice from the Contracting Officer so to do, the Government shall have the right to pay such bills or payrolls directly, and in such event a deduction equal to five percent (5%) of the amount so paid directly shall be made from the Contractor's fee.

(b) *To Common Carriers.* The Government reserves the right to pay directly to common carriers any or all freight charges on construction plant, materials and supplies.

(End of clause)

252.236–7017 Approved construction plant.

As prescribed at 236.573–4, insert the following clause:

APPROVED CONSTRUCTION PLANT (JAN 1965)

Upon approval of the Contracting Officer, construction plant furnished by the Contractor will be shown in the attached Appendix "B" or modification thereto.

(End of clause)

252.236–7018 Option for supervision and inspection services.

As prescribed at 236.574, insert the following clause:

OPTION FOR SUPERVISION AND INSPECTION SERVICES (APR 1972)

At any time prior to six (6) months after satisfactory completion and acceptance of the work to be furnished hereunder, the Government at its option, may direct, by a written order, the Architect-Engineer to perform any part or all of the supervision and inspection services provided under Appendix A. Upon receipt of such direction, the Architect-Engineer shall proceed with such work and services.

(End of clause)

252.236–7019 Notice of approval of restricted designs.

As prescribed at 236.575, insert the following clause:

NOTICE OF APPROVAL OF RESTRICTED DESIGNS (APR 1972)

In the performance of this contract, the contractor shall, to the extent practicable, make maximum use of structures, machines, products, materials, construction methods, and equipment which are readily available through Government or competitive commercial channels, or through standard or proven production techniques, methods, and processes. Unless approved by the Contracting Officer the contractor shall not, in the performance of the work called for by this contract, produce a design or specification such as to require in this construction work the use of structures, products, materials, construction equipment, or processes which are known by the contractor to be available only from a safe source. As to any such design or specification the Architect-Engineer shall report to the Contracting Officer giving the reason or reasons why it is considered necessary to so restrict the design or specification.

(End of clause)

252.236–7050 Patent indemnity.

(a) *Patent Indemnity.* As prescribed at 236.576, insert the following clause:

PATENT INDEMNITY (JUN 1974)

Except as otherwise provided, the Contractor agrees to indemnify the Government and its officers, agents, and employees against liability, including costs and expenses, for infringement upon any Letters Patent of the United States (except Letters Patent issued upon an application which is now or may hereafter be, for reasons of national security, ordered by the Government to be kept secret or otherwise withheld from issue) arising out of the performance of this contract or out of the use or disposal by or for the account of the Government of supplies furnished or construction work performed hereunder.

(End of clause)

(b) *Items excluded from patent indemnity.* As prescribed at 236.576, insert the following clause:

ITEMS EXCLUDED FROM PATENT INDEMNITY (APR 1966)

The "Patent Indemnity" clause of this contract shall not apply to the following (Specifically identify the items to be excluded).

(End of clause)

252.236–7051 Rights in shop drawings.

As prescribed at 236.577, insert the following clause:

RIGHTS IN SHOP DRAWINGS (APR 1966)

(a) Shop drawings for construction means drawings, submitted to the Government by the Construction Contractor, subcontractor or any lower tier subcontractor pursuant to a construction contract, showing detail (i) the proposed fabrication and assembly of structural elements and (ii) the installation (i.e., form, fit, and attachment details) of materials or equipment. The Government may duplicate, use, and disclose in any manner and for any purpose shop drawings delivered under this contract.

(b) This clause, including this paragraph (b), shall be included in all subcontracts hereunder at any tier.

(End of clause)

252.236–7052 Architectural designs and data—government rights.

As prescribed at 236.578, insert one of the following clauses, if appropriate:

(a) GOVERNMENT RIGHTS (UNLIMITED) (MAR 1979)

The Government shall have unlimited rights, in all drawings, designs, specifications, notes and other works developed in the performance of this contract, including the right to use same on any other Government design or construction without additional compensation to the Contractor. The Contractor hereby grants to the government a paid-up licence throughout the world to all such works to which he may assert or establish any claim under design patent or copyright laws. The Contractor for a period of three years after completion of the project agrees to furnish the original or copies of all such works on the request of the Contracting Officer.

(End of clause)

(b) DRAWINGS AND OTHER DATA TO BECOME PROPERTY OF GOVERNMENT (MAR 1979)

All designs, drawings, specifications, notes and other works developed in the performance of this contract shall become the sole property of the Government and may be used on any other design or contruction without additional compensation to the Contractor. The Government shall be considered the "person for whom the work was prepared" for the purpose of authorship in any copyrightable work under Section 201(b) of Title 17, United States Code. With respect thereto, the Contractor agrees not to assert or authorize others to assert any rights nor establish any claim under the design patent or copyright laws. The Contractor for a period of three years after completion of the

project agrees to furnish all retained works on the request of the Contracting Officer. Unless otherwise provided in this contract, the Contractor shall have the right to retain copies of all works beyond such period.

(End of clause)

252.236-7081 Cost limitation.

As prescribed at 236.580-1, insert the following provision:

COST LIMITATION (1974 APR)

A bid which does not contain separate bid prices for the items identified as subject to a cost limitation may be considered nonresponsive. A bidder by signing his bid certifies that each price bid on items subject to a cost limitation includes an appropriate apportionment of all applicable estimated costs, direct and indirect, as well as overhead and profit. Bids may be rejected which (i) have been materially unbalanced for the purpose of bringing affected items within cost limitations, or (ii) exceed the cost limitations unless such limitations have been waived by the Under Secretary of Defense (Research and Engineering) prior to award.

(End of provision)

252.236-7082 Additive or deductive items.

As prescribed at 236.580-2, insert the following provisions:

ADDITIVE OR DEDUCTIVE ITEMS (1968 APR)

The low bidder for purposes of award shall be the conforming responsible bidder offering the low aggregate amount for the first or base bid item, plus or minus (in the order of priority listed in the schedule) those additive or deductive bid items providing the most features of the work within the funds determined by the Government to be available before bids are opened. If addition of another bid item in the listed order of priority would make the award exceed such funds for all bidders, it shall be skipped and the next subsequent additive bid item in a lower amount shall be added if award thereon can be made within such funds. For example, when the amount available is $100,000 and a bidder's base bid and four successive additives are $85,000, $10,000, $8,000, $6,000 and $4,000, the aggregate amount of the bid for purposes of award would be $99,000 for the base bid plus the first and fourth additives, the second and third additives being skipped because each of them would cause the aggregate bid to exceed $100,000. In any case, all bids shall be evaluated on the basis of the same additive or deductive bid items, determined as above provided. The listed order of priority need be followed only for determining the low bidder. After determination of the low bidder as stated, award in the best interests of the Government may be made to him on his base bid and any combination of his additive or deductive bid for which funds are determined to be available at the time of the award. *Provided* that award on such combination of bid items does not exceed the amount offered by any other conforming responsible bidder for the same combination of bid items.

(End of provision)

252.237-7000 Statement of work.

As prescribed by 237.304(S-70), insert the following clause:

STATEMENT OF WORK (OCT 1976)

(a) The Contractor shall furnish all labor, material and equipment and perform all work required for the dismantling, demolition and removal, or both, of———(identify properly)———

(b) The work shall be commenced——— and shall be completed not later than———

(c) All property retained by the Government will be conditioned, handled and stored by the Contractor in such manner and place as prescribed in the specifications.

(End of clause)

ALTERNATE I (OCT 1976)

In accordance with FAR 37.302, where the contractor is required to furnish a performance bond or other security in an mount deemed adequate to assure completion of the work and to protect the Government against damage to adjoining property during the performance of the contract, the following paragraph (d) shall be added to the above clause:

(d) A performance bond or other security in the penal sum of ——— dollars ($———) shall be furnished by the Contractor.

252.237-7100 Award to single bidder.

As prescribed at 237.7103(a), insert the following provision:

AWARD TO SINGLE BIDDER (OCT 1965)

Subject to the provisions contained herein, award shall be made to a single bidder. Bids must include unit prices for each item listed in order that bids may be properly evaluated. Failure to do this shall be cause for rejection of the entire bid. Bids shall be evaluated on the basis of the estimated quantities shown, and award shall be made to that responsible bidder whose total aggregate price is low.

(End of provision)

252.237-7101 Award to single offeror.

As prescribed at 237.7103(b), insert the following provision: services:

AWARD TO SINGLE OFFEROR (OCT 1983)

Subject to the provisions contained herein, award shall be made to a single offeror. Offers must include unit prices for each item listed in order that offers may be properly evaluated. Failure to do this shall be cause for rejection of the entire offer. Offers shall be evaluated on the basis of the estimated quantities shown. Discussions may be held with those offerors determined to be within the competitive range, and award shall be made to that responsible offeror whose total aggregate offer is determined to be in the best interest of the Government.

(End of provision)

252.237-7102 Requirements.

As prescribed at 237.7103(c) and (d), insert the following clause:

REQUIREMENTS (OCT 1965)

(a) This is a requirements contract for the supplies or services specified in the Schedule, and for the period set forth in this contract. Delivery of supplies or performance of services shall be made only as authorized by orders issued in accordance with the clause entitled "Delivery Orders and Invoices." The quantities of supplies or services specified herein are estimates only and are not purchased hereby. Except as may be otherwise provided herein, in the event the Government's requirements for supplies or services set forth in the Schedule do not result in orders in the amounts or quantities described as "estimated" or "maximum" in the Schedule, such event shall not constitute the basis for an equitable price adjustment under this contract.

(b) The Government shall order from the Contractor all the supplies, services, and transportation set forth in the Schedule which are required to be purchased by the Government activity named herein, and the Contractor shall furnish to the Government such supplies, services, and transportation as may be ordered by the Contracting Officer. The Government, however, reserves the right not to order supplies and services under this contract in instances where the body is removed from the area for medical, scientific, or other cogent reason. In the event of an epidemic or other emergency, the Contractor shall not be required to provide services in excess of the capacity of his facilities.

(End of clause)

252.237-7103 Area of performance.

As prescribed at 237.7103(c), insert the following clause:

AREA OF PERFORMANCE (APR 1974)

(a) The area of performance is specified in Attachment 1 to this contract. This contract includes taking possession of the remains at the place where they are located, transporting them to the Contractor's place of preparation, and transporting them thereafter to a place designated by the Contracting Officer. The Contractor shall not be entitled to reimbursement for transportation when both the place where the remains were located and the delivery point are within the area of performance.

(b) If remains are located outside the area of performance, the Government may call on the Contractor or obtain the services elsewhere. If the Government calls on the Contractor, the Contractor shall be paid the amount per mile indicated in the Schedule for the number of miles required to transport the remains by a reasonable route from the point where located to the boundary of the area of performance. If the Government elects to

have the remains brought into the area of performance by some other means, it may require the Contractor to perform after the remains are within the area of performance.

(c) The Government may require the Contractor to deliver remains to any point within one hundred (100) miles of the area of performance. In this case, the Contractor shall be paid the amount per mile indicated in the Schedule for a number of miles required to transport the remains by a reasonable route from the boundary of the area of performance to the delivery point.

(End of clause)

252.237-7104 Specifications.

As prescribed at 237.7103 (c) and (d), insert the following clause:

SPECIFICATIONS (OCT 1965)

Armed Services Specifications Care of Remains of Deceased Personnel, hereinafter referred to as "Specifications" are attached hereto and made a part of this contract.

(End of clause)

252.237-7105 Using activities.

As prescribed at 237.7103 (c) and (d), insert the following clause:

USING ACTIVITIES (OCT 1965)

Contracting Officers of the following activities may order services and supplies under this contract:

_____

_____

_____

(End of clause)

252.237-7106 Delivery orders and invoices.

As prescribed at 237.7103 (c) and (d), insert the following clauses:

DELIVERY ORDERS AND INVOICES (OCT 1965)

Delivery orders for supplies or services shall be issued by the Contracting Officer and shall set forth (i) the supplies or services being ordered; (ii) the quantities to be furnished; (iii) delivery or performance dates; (iv) place of delivery or performance; (v) packing and shipping instructions; and (vi) the address to which invoices for services rendered under this contract shall be sent. Amendments to delivery orders may be made by the Contracting Officer issuing the order. Each delivery order or change order shall cite the funds from which payment for the supplies or services ordered shall be made.

(End of clause)

252.237-7107 Delivery and performance.

As prescribed at 237.7103 (c) and (d), insert the following clause:

DELIVERY AND PERFORMANCE (OCT 1965)

Except as otherwise herein provided, the Contractor shall furnish the material ordered and perform the services specified in each case as promptly as possible but in no event later than thirty-six (36) hours after the Contractor has received notification to remove the remains, exclusive of the time necessary for the Government to inspect and check results of preparation. The Government may, at no additional charge, require the Contractor to hold the remains for an additional period not to exceed seventy-two (72) hours from the time the remains are casketed and final inspection completed.

(End of clause)

252.237-7108 Subcontracting.

As prescribed at 237.7103 (c) and (d), insert the following clause:

SUBCONTRACTING (OCT 1965)

No contract shall be made by the Contractor with any other party for furnishing any of the work or services herein contracted for without the written approval of the Contracting Officer. This provision does not apply to contracts of employment between the Contractor and his personnel.

(End of clause)

252.237-7109 Additional default provision.

As prescribed at 237.7103 (c) and (d), insert the following clause:

ADDITIONAL DEFAULT PROVISION (OCT 1965)

(a) This clause supplements the "Default (Fixed Price Supply and Service)" clause of this contract.

(b) This contract may be terminated for default by written notice without the ten (10) day notice specified under (a)(2) of the "Default (Fixed Price Supply and Service)" clause if during the performance of this contract:

(1) The Contractor, through circumstances reasonably within his control or that of persons in his employ, performs any act or acts under or in connection with this contract, or fails in the performance of any service under this contract and such acts or failures may reasonably be considered to reflect discredit upon the Department of Defense in fulfilling its responsibility for proper care of remains;

(2) The Contractor, either by his own act or through persons in his employ, solicits relatives or friends of the deceased to purchase supplies or services not provided for under this contract. (The Contractor may furnish supplies or arrange for services not provided for under this contract, only where such other supplies or services are voluntarily requested, selected and paid for by the representatives of the deceased.);

(3) The services, or any part thereof, to be performed under this contract are, without the written authorization of the Contracting Officer, performed by an individual, partnership, corporation, or other person or business association whatsoever, other than the Contractor to whom this contract is awarded, his employees and members of the firm;

(4) The Contractor refuses to perform the services required for any particular remains; or

(5) The Contractor advertises in any way that he has a contract for mortuary services with the Government.

(c) All other provisions of the "Default (Fixed Price Supply and Service)" clause shall apply to a termination made pursuant to this "Additional Default Provision" clause.

(End of clause)

252.237-7110 Group interment.

As prescribed at 237.7103 (c) and (d), insert the following clause:

GROUP INTERMENT (OCT 1965)

Payments to the Contractor for supplies and services provided for remains to be interred as a group shall be made on the basis of the number of caskets furnished rather than on the basis of the number of persons in the group.

(End of clause)

252.237-7111 Professional requirements.

As prescribed at 237.7103 (c) and (d), insert the following clause:

PROFESSIONAL REQUIREMENTS (OCT 1965)

The Contractor shall meet all state and local licensing requirements and shall furnish the highest quality of professional services. Preparation and transportation of remains shall be performed in accordance with all applicable Federal, state, and local health laws, statutes, and regulations. The Contractor shall obtain and furnish all necessary health department and shipping permits at no additional cost to the Government, and shall insure that all necessary health department permits are in order for disposition of the remains.

(End of clause)

252.237-7112 Facility requirements.

As prescribed at 237.7103 (c) and (d), insert the following clause:

FACILITY REQUIREMENTS (OCT 1965)

The Contractor's building shall have complete facilities for maintaining the highest standards of solemnity, reverence, and assistance to the family, and for prescribed ceremonial services. The preparation room shall be clean, sanitary, and adequately equipped. The Contractor shall have, or be able to obtain, catafalques, church trucks and equipment for Protestant, Catholic, and Jewish services. The funeral home, furnishings, grounds and surrounding area shall be carefully maintained so as to present a clean and well-kept appearance.

(End of clause)

252.237-7113 Preparation history.

As prescribed at 237.7103 (c) and (d), insert the following clause:

PREPARATION HISTORY (OCT 1965)

For each body prepared, or in the case of group interment for each casket handled, the Contractor shall state briefly the results of the embalming process on a certificate furnished by the Contracting Officer.

(End of clause)

252.237-7200 Instruction to bidders (count of articles).

As prescribed at 237.7204(a), insert the following provision:

INSTRUCTION TO BIDDERS (COUNT OF ARTICLES) (OCT 1981)

(a) Bids must include unit prices for each item in a lot. Unit prices must include all costs to the Government of providing the services, including pickup and delivery charges. Failure to bid on any item in a lot shall be cause for rejection of the bid on that lot. Bids shall be evaluated on the basis of the estimated quantities stated in the invitation. Subject to the provision contained herein, award generally shall be made to a single bidder for all lots. The Government reserves the right, however, to award by individual lot when the Contracting Officer determines that this is more advantageous to the Government.

(b) Upon application to the Contracting Officer, types of articles to be serviced may be inspected prior to bidding.

(End of provision)

252.237-7201 Instruction to bidders (bulk weight).

As prescribed at 237.7204(b), insert the following provision:

INSTRUCTION TO BIDDERS (BULK WEIGHT) (OCT 1981)

(a) Bids must be submitted on a unit price per pound of serviced laundry. Unit prices must include all costs to the Government of providing the service, including pickup and delivery charges. Bids shall be evaluated on the basis of the estimated pounds of serviced laundry stated in the invitation. Subject to the provision contained herein, award generally shall be made to a single bidder for all lots. The Government reserves the right, however, to award by individual lot when the Contracting Officer determines that this is more advantageous to the Government.

(b) Upon application to the Contracting Officer, types of articles to be serviced may be inspected prior to bidding.

(End of provision)

252.237-7202 Count of articles.

As prescribed at 237.7204(c)(1), insert the following clause:

COUNT OF ARTICLES (APR 1967)

(a) The Contractor shall be liable for return of the number and kind of articles furnished for service under this contract, in accordance with the count of the Contracting Officer, or the number and kind of articles agreed upon as a result of a joint count by the Contractor and the Contracting Officer at the time of delivery to the Contractor.

(b) Delivery tickets in the number of copies required, and in the form approved by the Contracting Officer shall be completed by the Contractor at the time of his receipt of the articles to be serviced. One copy of each delivery ticket shall accompany the Contractor's invoice.

(End of clause)

ALTERNATE I (APR 1967)

As prescribed at 237.7204(c)(2), add the following paragraph (c) to the basic clause:

(c) Individual laundry bundle delivery tickets shall be provided by the Contractor as specified in the clause entitled "Individual Laundry" of the Contract Clauses of this contract.

252.237-7203 Loss or damage (count of articles).

As prescribed at 237.7204(d), insert the following clause:

LOSS OR DAMAGE (COUNT OF ARTICLES) (OCT 1981)

(a) The Contractor shall indemnify the Government for any property delivered to the Contractor for servicing under this contract which is lost, or which is damaged and, in the opinion of the Contracting Officer, cannot be repaired satisfactorily. In either of these events, the Contractor shall pay to the Government the value thereof in accordance with Federal Supply Schedule price lists. If the property is not on these price lists, the Contracting Officer shall determine a fair and just price. Credit shall be allowed for any depreciation in the value of the property at the time of loss or damage, and the parties hereto shall determine the amount of the allowable credit. If the parties fail to agree upon the value of the property, or fail to agree on the amount of credit due, the dispute shall be determined as provided in the clause hereof entitled "Disputes."

(b) In case of damage to any property which the Contracting Officer and the Contractor agree can be satisfactorily repaired, the Contractor shall repair the property at his expense in a manner satisfactory to the Contracting Officer.

(End of clause)

252.237-7204 Weight of articles (bag type).

As prescribed at 237.7204(e)(1), insert the following clause:

WEIGHT OF ARTICLES (BAG TYPE) (OCT 1981)

(a) The Contractor shall be liable for the return of the articles furnished for service under this contract.

(b) Delivery tickets in the number of copies required, and in the form approved by the Contracting Officer, shall be completed by the Contractor at the time of his receipt of the articles to be serviced. One copy of each delivery ticket shall accompany the Contractor's invoice.

(c) Prior to Contractor pickup of articles for service under this contract, the Contracting Officer shall ensure that each bag contains only articles within a single bag type as specified in the Schedule. The Contracting Officer shall ensure each bag is weighed and that this weight and bag type are identified on the bag. The bag shall always be included in this weight. This weight and the bag type shall be verified by the Contractor who shall record the verified weight and bag type on the delivery ticket. One copy of the delivery ticket shall be retained by the Government.

(d) At the time of delivery, the Contractor shall record the weight and bag type of serviced laundry on the delivery ticket. The Contracting Officer will ensure that this weight and bag type are verified at time of delivery.

(End of clause)

252.237-7205 Weight of articles (unsorted).

As prescribed at 237.7204(e)(2), insert the following clause:

WEIGHT OF ARTICLES (UNSORTED) (OCT 1981)

(a) The Contractor shall be liable for the return of the articles furnished for service under this contract.

(b) Delivery tickets in the number of copies required, and in the form approved by the Contracting Officer, shall be completed by the Contractor at the time of his receipt of the articles to be serviced. One copy of each delivery ticket shall accompany the Contractors invoice.

(c) Prior to Contractor pickup of articles for service under this contract, the Contracting Officer shall ensure each bag is weighed and that this weight is identified on the bag. The bag shall always be included in this weight. This weight shall be verified by the Contractor who shall record the verified weight on the delivery ticket. One copy of the delivery ticket shall be retained by the Government.

(d) At the time of delivery, the Contractor shall record the weight of serviced laundry on the delivery ticket. The Contracting Officer shall ensure that this weight is verified at time of delivery.

(End of clause)

252.237-7206 Loss or damage (weight of articles).

As prescribed at 237.7204(e)(3), insert a clause substantially as follows:

LOSS OR DAMAGE (WEIGHT OF ARTICLES) (OCT 1981)

(a) The Contractor shall indemnify the Government for any property delivered to the Contractor for servicing under this contract which is lost, or which is damaged, and in the opinion of the Contracting Officer, cannot be repaired satisfactorily. In either of these events, the Contractor shall pay to the Government the value thereof in accordance with the price of ——* per pound. The Contractor shall only be required to pay the Government for any losses which exceed the maximum weight loss allowable by the clause hereof entitled "Maximum Weight Loss." If the parties fail to agree on the amount of credit due, the dispute shall be determined as provided in the clause hereof entitled "Disputes."

(b) In the case of damage to any property which the Contracting Officer and the Contractor agree can be satisfactorily repaired, the Contractor shall repair the property at his expense in a manner satisfactory to the Contracting Officer.

* Insert reasonable per pound price based on the average per pound value of the property to be serviced. When the contract requires laundry services on a bag type basis, reasonable per pound prices shall be identified by bag type.

(End of clause)

252.237-7207 Maximum weight loss.

As prescribed at 237.7204(e)(4), insert the following clause:

MAXIMUM WEIGHT LOSS (OCT 1981)

The maximum weight loss allowable in servicing the laundry is ——* percent of the weight recorded on delivery tickets, as set forth in the clause entitled "Weight of Articles," when the laundry is picked up. Any weight loss in excess of this amount shall be subject to the clause hereof entitled "Loss or Damage."

* Insert applicable percentage not to exceed eight percent (8%).

(End of clause)

252.237-7208 Individual laundry.

As prescribed at 237.7204(f), insert the following clause:

INDIVIDUAL LAUNDRY (APR 1967)

(a) The Contractor shall provide laundry service on both a unit bundle and on a piece-rate bundle basis for individual personnel when required by this contract. The total number of pieces listed in the column "Estimated Quantity" in the Schedule is the estimated amount of individual laundry for this contract, but does not constitute any representation as to the amount of individual laundry to be required. Individuals may elect whether they shall patronize the laundry services. Services covered by this provision shall be on a weekly basis, and the schedule for pickup and delivery shall be as specified elsewhere in this contract. Charges for individual laundry shall be on a per unit bundle or a piece-rate basis as indicated on the form, to be furnished by the Contractor, accompanying the bundle at time of pickup.

(b) The maximum number of pieces to be allowed per bundle is as specified in the Schedule and as follows: *

(1) Bundle consisting of twenty-six (26) pieces including laundry bag. This bundle shall contain approximately —— of outer garments which are to be starched and pressed. Outer garments shall include but not be limited to cotton shirts, trousers, jackets, dresses, coats.

(2) Bundle consisting of thirteen (13) pieces including laundry bag. This bundle shall contain approximately —— pieces of outer garments which are to be starched and pressed. Outer garments shall include but not be limited to cotton shirts, trousers, jackets, dresses, coats.

(c) Individual laundry bundles shall be accompanied by forms listing the items contained therein, prepared by the patrons concerned. Forms on individual laundry bundles shall clearly identify unit bundle or piece-rate bundle as applicable when both services are provided by this contract.

* The number of pieces and the composition of a bundle may be revised by the Contracting Officer prior to advertising to meet local conditions.

(End of clause)

252.237-7209 Special definitions of government property.

As prescribed at 237.7204(g), insert the following clause:

SPECIAL DEFINITIONS OF GOVERNMENT PROPERTY (APR 1967)

(a) The term "Government-furnished property," as used in this contract, means any supplies or facilities furnished to the Contractor by the Government for use in connection with the performance of this contract, but does not include the articles delivered to the Contractor to be laundered or dry cleaned.

(b) The term "Government-owned property," as defined in his contract, means all of the articles delivered to the Contractor to be laundered or dry cleaned, expressly including any articles which may actually be owned by individual Government personnel.

(End of clause)

252.237-7400 Definitions (communications).

As prescribed at 237.7413(a), insert the following clause:

DEFINITIONS (COMMUNICATIONS) (APR 1971)

(a) The term "Communication Service Authorization" (CSA) means an order for services or facilities under this contract.

(b) The term "Appropriate Governmental Regulatory Body" means the Federal Communications Commission, any state-wide regulatory body, or any body with less than state-wide jurisdiction when operating pursuant to state authority. Regulatory bodies whose decisions are not subject to judicial appeal and regulatory bodies which regulate a company owned by the same entity which creates the regulatory body are not "appropriate governmental regulatory bodies" for the purposes of this contract.

(End of clause)

252.237-7401 Patent indemnity (communications).

As prescribed at 237.7413(a), insert the following clause:

PATENT INDEMNITY (COMMUNICATIONS) (APR 1971)

The Patent Indemnity clause in this contract shall apply only to individual CSAs over $5,000 issued under this contract and covering those communications services and facilities which normally are or have been sold or offered for sale by the Contractor to the public, or which can be provided over commercially available equipment, or which involve relatively minor modifications thereto.

(End of clause)

252.237-7402 Access.

As prescribed at 237.7413(a), insert the following clause:

ACCESS (APR 1971)

(a) Subject to military security regulations, the Government shall permit the Contractor access at all reasonable times to contractor furnished facilities, provided that if by reason of military necessity the Governmment is unable to permit access, the Government at its own risk, and expense shall maintain these facilities and the Contractor shall not be responsible for the service involving any of these facilities during the period of nonaccess, unless the service failure results from the Contractor's fault or negligence.

(b) During periods when Contractor access is not permitted, cost attributable to loss of or damage to the equipment due to the fault or negligence of the Government shall be reimbursed to the Contractor at mutually acceptable rates. Failure to agree shall be a dispute concerning a question of fact within the meaning of the "Disputes" clause of this contract.

(End of clause)

252.237-7403 Amendment of contract.

As prescribed at 237.7413(a), insert the following clause:

AMENDMENT OF CONTRACT (APR 1971)

Upon thirty (30) days written notice, either party may request reconsideration of this contract for the purpose of revision to conform with requirements of law or to provide for mutually acceptable changes.

(End of clause)

252.237-7404 Obligation of the Government.

As prescribed at 237.7413(a), insert the following clause:

OBLIGATION OF THE GOVERNMENT (APR 1971)

The Government incurs no monetary liability under this instrument. The Government's liability shall arise, if appropriate, upon the issuance of a CSA pursuant to the terms of this instrument.

(End of clause)

252.237-7405 Authorization and Consent—Common Carriers.

As prescribed at 237.7413(b), insert the following clause:

AUTHORIZATION AND CONSENT—COMMON CARRIERS (APR 1971)

The Government hereby gives authorization and consent (without prejudice to its rights of indemnification, if these rights are provided for in this contract) for all use and manufacture, in the performance of any order placed under this contract for communication services and facilities for which rates, charges, and tariffs are not established by a governmental regulatory body, or any part thereof or any amendments thereto or any subcontract thereunder (including any lower tier subcontract), of any United States patented invention (a) embodied in the structure or composition of any article the delivery of which is accepted by the Government under this contract; or (b) utilized in the machinery, tools, or methods

the use of which necessarily results from compliance by the Contractor or the using subcontractor with (1) specifications or written provisions now or hereafter forming a part of the contract, or (2) specific written instructions given by the Contracting Officer directing the manner of performance. The entire liability to the Government for infringement of a patent of the United States shall be determined solely by the provisions of the indemnity clauses, if any, included in this contract or any subcontract hereunder (including any lower-tier subcontract), and the Government assumes liability for all other infringement to the extent of the authorization and consent hereinabove granted.

(End of clause)

252.237-7406 Continuation of orders.

As prescribed at 237.7413(b), insert the following clause:

CONTINUATION OF ORDERS (APR 1971)

All orders heretofore issued by ——— under Contract Number ———, dated ——— are transferred to this contract and shall continue in full force and effect as though placed under this contract. Orders currently in effect which were heretofore issued by the above Department under other contracts of that Department with the Contractor may likewise be transferred to this contract.

(End of clause)

252.237-7407 Facilities and services to be furnished—common carriers.

As prescribed at 237.7413(b), insert the following clause:

FACILITIES AND SERVICES TO BE FURNISHED—COMMON CARRIERS (APR 1971)

(a) The Contractor shall furnish any classes of services or facilities that he offers or furnishes under public tariffs.

(b) When it is mutually agreed that the Contractor shall furnish nontariffed services, such services may be ordered in the manner provided in the clause entitled "Ordering of Facilities and Services." These may include the engineering, installation, alteration or maintenance of facilities owned either by the Contractor or by the Government, and may be located on or off Government premises or at any of its establishments.

(c) The Contractor agrees to interconnect his facilities with any Government-owned or furnishesd communications equipment, facilities or transmission media, in accordance with established technical criteria for assuring continuity of service and/or traffic without damage to or degradation of commercial facilities, upon request of the Contracting Officer.

(End of clause)

252.237-7408 Ordering of facilities and services—common carriers.

As prescribed at 237.7413(b), insert the following clause:

ORDER OF FACILITIES AND SERVICES—COMMON CARRIERS (APR 1971)

All services and facilities furnished, as provided in the clause entitled "Facilities and Services to be Furnished—Common Carriers," shall be ordered by the Contracting Officer on numbered CSAs referring to this contract and specifying the services and facilities desired, the premises involved, the address where bills for service shall be sent, the Disbursing Officer, and any other pertinent details. Acceptance of orders by the Contractor shall be acknowledged by (a) commencing performance or (b) written acceptance by a duly authorized representative. The Contractor shall sign and promptly return the order to the Government when required by the Contracting Officer. Orders pursuant to this clause which are unacceptable to the Contractor shall be returned to the Contracting Officer within ——— days of receipt stating the reasons therefor.

(End of clause)

252.237-7409 Rates, charges, and services—common carriers.

As prescribed at 237.7413(b), insert the following clause:

RATES, CHARGES, AND SERVICES—COMMON CARRIERS (APR 1971)

(a) The services and facilities furnished hereunder shall be in accordance with all applicable tariffs, rates, charges, rules, regulations or requirements (1) lawfully established by an appropriate governmental regulatory body; and (2) applicable to service and facilities furnished or offered by the Contractor to the general public or his subscribers; or at rates, terms and conditions of service and facilities furnished or offered by the Contractor to the general public or his subscribers; or at rates, terms and conditions of service as may be agreed upon, subject, when appropriate, to jurisdiction of an appropriate governmental regulatory body. For nontariffed services which are furnished, the Government shall be charged at the lowest rate and under the most favorable terms and conditions for similar service and facilities offered to any other customer.

(b) Recurring charges for services and facilities furnished under this contract shall, in each case, commence with satisfactory establishment of service or provision of facilities or equipments and are payable monthly in arrears.

(c) Subject to the "Cancellation or Termination of Orders—Common Carriers" clause, the Government may discontinue the use of any service or facilities furnished hereunder at any time. Upon discontinuance, the Government shall pay to the Contractor all charges for services and facilities adjusted to the effective date of discontinuance.

(d) Expediting charges are expenditures necessary to secure services earlier than those services normally would be provided, such as costs of overtime pay, or special shipment. Expediting charges shall be paid only when (1) payment thereof is provided for in the tariff established by an appropriate regulatory authority or (2) such charges are specially authorized in an expediting CSA. When authorized, expediting charges shall be the additional costs incurred by the Contractor and the subcontractor.

(e) When the services normally provided are technically unacceptable and the requirement necessitates the development, fabrication or manufacture of special equipment, the Government may provide such equipment or may direct the Contractor to procure the equipment or facilities upon a competitive basis to the extent practicable.

(f) If any time the Government defers or changes its orders for any of the services hereunder but does not cancel or terminate them, the amount paid or payable to the Contractor for providing the services deferred or modified shall be equitably adjusted in accordance with applicable tariffs filed by the Contractor with the regulatory commission and in effect at the time of the deferral or change, or if no tariffs are in effect, by written agreement between the Government and the Contractor. Failure to agree on any adjustment shall be a dispute concerning a question of fact within the meaning of the "Disputes" clause.

(End of clause)

252.237-7410 Payment—common carrier.

As prescribed at 237.7413(b), insert the following clause:

PAYMENT—COMMON CARRIER (APR 1971)

The Government shall pay the Contractor, in arrears, upon submission of invoices for services and facilities furnished in accordance with the provisions of CSAs issued under this contract, the rates and charges for such services and facilities as set forth in the clause entitled "Rates, Charges and Service."

(End of clause)

252.237-7411 Tariff information.

As prescribed at 237.7413(b), insert the following clause:

TARIFF INFORMATION (APR 1971)

(a) A copy of the Contractor's current existing tariffs (including changes) shall be furnished promptly to the Contracting Officer upon request. As early as possible prior to the filing of any application to a Federal, state or any other regulatory agency seeking the establishment of, or changes in, rates, charges, services, or any other regulations relating to any tariff or any of the facilities or services to be furnished solely or primarily to the Government, the Contractor shall notify the Contracting Officer thereof and shall furnish a copy of the application. Upon request therefor, the Contractor shall furnish a copy of all information, material and data developed or prepared in support of or in connection with such application.

(b) The Contractor also shall notify the Contracting Officer of any such application which may be filed with an appropriate governmental regulatory body by anyone other than the Contractor which affects or will affect the rate or conditions of services rendered or to be rendered promptly after the Contractor himself learns of that application. The foregoing requirements shall apply also to all such applications pending on the effective date of this contract.

(End of clause)

252.237-7412 Cancellation or termination of orders—common carriers.

As prescribed at 237.7413(b), insert the following clause:

CANCELLATION OR TERMINATION OF ORDERS—COMMON CARRIERS (APR 1971)

(a) In the event the Government cancels, in whole or in part, any of the services which the Contractor is requested to provide under this contract, prior to the time such services are made available to the Government, or in the event that the Government terminates any of these services, in whole or in part, after they are made available to the Government, the Government shall reimburse the Contractor for the actual nonrecoverable costs which the Contractor has reasonably incurred in specially providing facilities and equipment the use of which is canceled or terminated and for which the Contractor has no foreseeable reuse. The amount of reimbursement shall be determined in the manner set forth in (b), (c) or (d) below.

(b) The amount of the Government's liability upon cancellation or termination of any of the services ordered under this contract, in whole or in part, shall be determined in accordance with applicable tariffs governing cancellation and termination charges which are filed by the Contractor with an appropriate governmental regulatory body and are in effect on the date of termination, and which provide specific cancellation or termination charges for the facilities and equipment involved or set forth the manner in which such charges will be determined.

(c) The amount of the Government's liability upon cancellation or termination, in whole or in part, of any of the services ordered under this contract, which are not subject to an appropriate governmental regulatory body, shall be determined in accordance with a mutually agreed schedule as contained in the applicable Communication Services Authorization (CSA).

(d) If no such applicable tariffs are in effect on the date of cancellation or termination or set forth in the applicable CSA, the Government's liability shall be determined at the time of cancellation or termination of the facilities and equipment in accordance with the following settlement procedures:

(1) The Contractor agrees to provide the Contracting Officer, in such reasonable detail as he may require, certified inventory schedules covering all items of property or facilities in the Contractor's possession, the cost of which is included in the "Basic Cancellation or Termination Liability" for which the Contractor has no foreseeable reuse.

(2) The Contractor shall use his best efforts to sell such property or facilities when the Contractor has no foreseeable reuse or when the Department has not exercised its option to take title under the clause entitled "Title to Communications Facilities and Equipment." Any proceeds of such sale shall be applied in reduction of any payments to be made by the Government to the Contractor under a cancellation or termination settlement.

(3) Actual nonrecoverable costs shall be recorded in accordance with the established accounting procedures prescribed by the cognizant governmental regulatory authority or, if no such procedures have been prescribed, in accordance with generally accepted accounting procedures applicable to the provision of communication services for public use.

(4) The actual nonrecoverable costs are the installed costs of the facilities and equipment, less cost of reusable materials, and less net salvage. Installed costs shall include the actual cost of equipment and materials specifically provided or used, plus the actual cost of installing (including engineering, labor, supervision, transportation, rights-of-way, and any other items which are chargeable to the capital accounts of the Contractor) except any such costs for which the Government may have directly reimbursed the Contractor under the clause entitled "Special Construction and Equipment Charges." From the Contractor's installed cost, there shall be deducted the net salvage value (salvage value less cost of removal). In determining such net salvage, due consideration shall be given to foreseeable reuse by the Contractor of the facilities and equipment and due allowance shall be made for the cost of dismantling, removal, reconditioning and disposal of the facilities and equipment when necessary either to the sale of facilities or their reuse by the Contractor in another location.

(5) The "Basic Cancellation Liability" is defined as the actual nonrecoverable cost which the Government shall reimburse the Contractor at the time services are canceled. The "Basic Termination Liability" is defined as the nonrecoverable cost amortized in equal monthly increments throughout the liability period. Upon termination of services, the Government shall reimburse the Contractor for the nonrecoverable cost less such costs amortized to the date services are terminated. The liability period shall be established as mutually agreed to but will not exceed ten (10) years.

(6) When the "Basic Cancellation or Termination Liability" established by the CSA is based on estimated costs, the Contractor agrees to settle on the basis of actual cost at the time of termination or cancellation.

(7) The Contractor agrees that, if after settlement but within the termination liability period of the services, should the Contractor make reuse of equipment or facilities which were treated as nonreusable or nonsalvable in the settlement, the Contractor shall reimburse the Government for the value thereof.

(8) The Contractor agrees that in no event shall any costs be included which are not included in determining cancellation and termination charges under the Contractor's standard practices or procedures; and no cancellation or termination charge shall be made if such charge is not ordinarily made by the Contractor with respect to similar facilities or equipment furnished under similar circumstances.

(e) The Government may from time to time, under such terms and conditions as it may prescribe, make partial payments on account against costs incurred by the Contractor in connection with the canceled or termination portion of this contract whenever in the opinion of the Contracting Officer the aggregate of such payments is within the amount to which the Contractor is entitled hereunder. If the total of such payments is in excess of the amount finally agreed or determined to be due under this clause, such excess shall be payable by the Contractor to the Government upon demand, together with interest at the rate of six percent (6%) per annum, for the period from the date such excess payment is received by the Contractor to the date on which such excess is repaid to the Govenment; *provided*, however, that no interest shall be charged with respect to any such excess payment attributable to a reduction in the Contractor's claim by reason of retention or other disposition of the cancellation or termination inventory until ten (10) days after the date of such retention or disposition, or such later date as determined by the Contracting Officer by reason of the circumstances.

(f) Failure to agree shall be a dispute concerning a question of fact within the meaning of the clause entitled "Disputes."

(End of clause)

252.237-7413 Reuse arrangements.

As prescribed at 237.7413(b), insert the following clause:

REUSE ARRANGEMENTS (APR 1971)

(a) When feasible, the Contractor shall reuse canceled or terminated facilities or equipment to minimize the charges to the Government.

(b) If at any time the Government requires that communications facilities or equipment be relocated within the Contractor's service area, the Government shall have the option of paying the costs of relocating the facilities or equipment in lieu of paying any termination or cancellation charge. The "Basic Termination Liability" applicable to the facilities or equipment in their former location shall continue to apply to the facilities and equipment in their new location. Monthly rental charges shall continue to be paid during the period.

(c) When there is another requirement or foreseeable reuse in place of canceled or terminated facilities or equipment, no charge shall apply and the basic cancellation or termination liability shall be appropriately reduced. When feasible, the Contractor shall promptly reuse discontinued channels or facilities, including equipment for which the Govenment is obligated to pay a munimum service charge.

(End of clause)

252.237-7414 Submission of cost or pricing data—common carriers.

As prescribed at 237.7413(b), insert the following clause:

SUBMISSION OF COST OR PRICING DATA—COMMON CARRIERS (APR 1971)

The Contractor agrees to provide certified cost or pricing data, as requested by the Contracting Officer whenever:

(a) the services are nontariffed services;

(b) a tariff, whether filed or contemplated to be filed, is for new services installed or developed primarily for Government use (and the data shall cover special construction charges in connection therewith);

(c) a tariff, whether filed or contemplated to be filed, in which specific rates and charges are not included;

(d) more than one commercial source (one or more of which is a common carrier) can offer the desired service but price competition is not considered adequate;

(e) required to support the reasonableness of special assembly rates and charges;

(f) required to support the reasonableness of special construction and equipment charges;

(g) required to support the reasonableness of those contingent liabilities which are fixed at the outset of the service; or

(h) required to support proposed cancellation and termination charges (pursuant to the clause entitled "Cancellation or Termination Orders") and reuse arrangements (pursuant to the clause entitled "Reuse Arrangements").

(End of clause)

252.237-7415 Audit and records—common carriers.

As prescribed at 237.7413(b), insert the following clause:

AUDIT AND RECORDS—COMMON CARRIERS (APR 1972)

(a) For the purpose of verifying the accuracy of the cost or pricing data submitted pursuant to the clause entitled "provision of Cost or Pricing Data—Common Carrier," the Contracting Officer or his authorized representative shall, (1) until the expiration of three (3) years from the date of the submission of the data which forms the basis for a recurring or nonrecurring charge, or (2) until the expiration of the period of contingent liability with respect to such contingent liability, have the right to examine those books, records, documents, and other supporting data which will permit adequate evaluation of the cost or pricing data submitted, along with the computations and projections used therein, which were available to the Contractor as of the date of the certification of the data.

(b) The Contractor shall maintain such books, records, documents, and other evidence and accounting procedures and practices, sufficient to reflect properly the direct and indirect costs which were the basis for the pricing of the CSA. The foregoing constitute "Records" for the purpose of this clause.

(c) The Contractor shall insert the substance of this clause in subcontracts awarded hereunder which furnish the basis for charges referred to in (a) hereof, unless its omission is authorized by the Contracting Officer.

(End of clause)

252.237-7416 Term and termination of contract—common carriers.

As prescribed at 237.7413(b), insert the following clause:

TERM AND TERMINATION OF CONTRACT—COMMON CARRIERS (JUL 1976)

This contract shall be effective for an initial term commencing—— * and ending September 30, 19—— ** and shall continue in force thereafter from year to year, unless and until terminated by either party at any time upon not less than sixty (60) days' prior written notice to the other. Termination shall be applicable prospectively only and shall not operate as a cancellation of any orders previously issued or outstanding.

(End of clause)

252.237-7417 Special construction and equipment charges.

As prescribed at 237.7413(c), insert the following clause:

SPECIAL CONSTRUCTION AND EQUIPMENT CHARGES (APR 1971)

(a) Except to the extent provided in the clause of this contract entitled "Cancellation or Termination of Orders," the Government shall not directly reimburse the Contractor for charges based on the cost of constructing any facilities or providing any equipment unless such direct reimbursement is specifically authorized by the Contracting Officer. If, at any time, facilities or equipment for which the Government has directly reimbursed the Contractor in whole or in part are discontinued, the Contractor shall allow the Government such credit as may be appropriate for the value of the facilities or equipment attributable to the Government's contribution. The value of the facilities and equipment shall be determined on the basis of the foreseeable reuse of the facilities and equipment by the Contractor at the time their use is discontinued or on the basis of the net salvage value, whichever is greater. The Contractor shall promptly pay the Government the amount of any such credit.

(b) The amount of any direct special construction charge shall not exceed the actual costs to the Contractor, properly allocable to the services to be provided to the Government of specially constructing or providing the facilities or equipment involved. In no event shall the amount of any direct special construction charge include costs incurred by the Contractor which are covered by a cancellation or termination liability or by the Contractor's recurring or other nonrecurring charges. The Contractor represents that in establishing his recurring charges for the services, facilities and equipment involved, he has not included in his rate base any costs for which he has been reimbursed by the Government and that depreciation charges are based only on the cost of facilities and equipment paid by the Contractor and not reimbursed by the Government. If, due to circumstances beyond the control and without the fault of the Contractor, it becomes necessary for the Contractor to incur costs for the replacement of any facilities or equipment for which direct special construction charges were assumed by the Government or for which the Contractor was reimbursed by the Government beyond that provided as a part of the Contractor's recurring charges, the Government shall assume such costs or reimburse the Contractor for such replacement costs at rates mutually acceptable to both the Government and the Contractor. Prior to incurring such costs, the Government shall have the right to terminate such service in accordance with the clause entitled "Cancellation or Termination of Orders."

(End of clause)

252.237-7418 Title to communication facilities and equipment.

As prescribed at 237.7413(c), insert the following clause:

TITLE TO COMMUNICATION FACILITIES AND EQUIPMENT (APR 1971)

Notwithstanding payment by the Government of any of the Contractor's costs of constructing communication facilities and equipment, title to all Contractor furnished facilities and equipment used in providing communication services ordered under this contract shall remain in the Contractor except as may be specifically provided in a CSA issued and accepted hereunder, and the Contractor shall operate and maintain all such communication facilities and equipment.

(End of clause)

252.242-7000 Submission of commercial freight bill to the General Services Administration for audit.

As prescribed at 242.1403-2, insert the following clause:

SUBMISSION OF COMMERCIAL FREIGHT BILLS TO THE GENERAL SERVICES ADMINISTRATION FOR AUDIT (FEB 1976)

When transportation costs are reimbursed to the Contractor, the Contractor is required to furnish to the

General Services Administration—FZATR
Chester A. Arthur Building
Washington, D.C. 20406

(or the ACO if specified) individual commercial freight bills (or equivalent shipment data and evidence of payment) for transportation charges in excess of $500.00.

(End of clause)

252.242-7001 Notice of cost/schedule control systems.

As prescribed at 242.302(S-71), insert the following provision:

NOTICE OF COST/SCHEDULE CONTROL SYSTEMS (APR 1974)

(a) The offeror shall submit a comprehensive plan for compliance with the attached criteria (DoDI 7000.2, Performance Measurement for Selected Acquisitions) for the internal Cost/Schedule Control Systems which are and/or will be operational for any contract resulting from this solicitation, and which includes the C/SCSC clause set forth at 252.242-7001 of the DoD FAR Supplement. The offeror shall identify his existing management systems separately from

* Insert the effective date of the contract.
** Insert the current fiscal year.

proposed modifications to meet the criteria. The plan shall:

(1) describe the management systems and their application in all major functional cost areas such as engineering, manufacturing and tooling, as related to development of the work breakdown structure, planning, budgeting, scheduling, work authorization, cost accumulation, measurement and reporting of cost and schedule performance, variance analysis, and baseline control;

(2) describe compliance with each of the criteria, preferably by cross-referencing appropriate elements in the description of systems with the items in the checklist for C/SCSC contained in AFSCP/AFLCP 173–5, DARCOM–P 715–5, NAVMAT P–5240, Cost/Schedule Control Systems Criteria Joint Implementation Guide;

(3) identify the major subcontractors, or major subcontracted effort in the event major subcontractors have not been selected, planned for application of the criteria;

(4) describe the proposed procedure for administration of the criteria as applied to subcontractors.

(b) If the Contractor is utilizing Cost/Schedule Control Systems which have been previously accepted, or is operating such systems under a current Memorandum of Understanding, evidence of such may be submitted in lieu of the comprehensive plan mentioned above. In such event, the Contracting Officer will determine the extent to which such systems shall be reviewed to assure continued compliance with the criteria.

(c) The offeror shall provide information and assistance as requested by the Contracting Officer for evaluation of compliance with the cited criteria.

(d) The offeror's plan for Cost/Schedule Control Systems will be evaluated prior to contract award. Upon acceptance of the Cost/Schedule Control Systems, a description of the accepted systems will be referenced in the contract.

(e) Subcontractor selection for application of the C/SCSC will be by agreement between the prime contractor and the Government. The prime contractor will contractually require the selected subcontractors to comply with the criteria. However, demonstrations and reviews of these selected subcontractors' management systems may be performed by the procuring authority when requested by either the prime or subcontractor.

(End of provision)

252.242–7002 Cost/schedule control systems.

As prescribed at 242.302(S–71), insert the following clause:

COST/SCHEDULE CONTROL SYSTEMS (MAR 1979)

(a) The Contractor shall establish, maintain and use in the performance of this contract Cost/Schedule Control Systems meeting the attached criteria (DoDI 7000.2, Performance Measurement for Selected Acquisitions). Prior to acceptance by the Contracting Officer and within ninety (90) (or as otherwise agreed to by the parties) calendar days after contract award, the Contractor shall be prepared to demonstrate the operation of his systems to the Government to verify that the proposed systems meet the established criteria set forth above. As a part of the demonstration, review and acceptance procedure, the Contractor shall furnish the Government a description of the Cost/Schedule Control Systems applicable to this contract in such form and detail as indicated by the AFSC/AFLCP 173–5, DARCOM–P 715–5, NAVMAT P–5240 Cost Schedule Control Systems Criteria Joint Implementation Guide, hereinafter referred to as the guide, or required by the Contracting Officer. The Contractor agrees to provide access to all pertinent records, data and plans as requested by representatives of the Government for the conduct of the review.

(b) The description of the management systems accepted by the Contracting Officer, identified by the title and date, shall be referenced in the contract. Such systems shall be maintained and used by the Contractor in the performance of this contract.

(c) Contractor changes to the accepted systems shall be submitted to the Contracting Officer for review and approval. The Contracting Officer shall advise the Contractor of the acceptability of such changes within sixty (60) days after receipt from the Contractor. When systems existing at time of contract award do not comply with the criteria, adjustments necessary to assure compliance will be effected at no change in contract price or fee.

(d) The Contractor agrees to provide access to all pertinent records and data requested by the Contracting Officer or his duly authorized representative for the purpose of permitting Government surveillance to insure continuing application of the accepted systems to this contract. Deviations from accepted systems discovered during contract performance shall be corrected as directed by the Contracting Officer.

(e) The Contractor shall require that each selected subcontractor, as mutually agreed to between the Government and the Contractor and as set forth in the schedule of this contract, shall meet the Cost/Schedule Control Systems criteria as set forth in the guide and shall incorporate in all such subcontracts adequate provisions for demonstration, review, acceptance and surveillance of subcontractors' systems, to be carried out by the Government when requested by either the prime or subcontractor.

(f) If the Contractor or subcontractor is utilizing Cost/Schedule Control Systems which have been previously accepted, or is operating such systems under a current Memorandum of Understanding, the Contracting Officer may waive all or part of the provisions hereof concerning demonstration and review.

(End of clause)

252.243–7000 Engineering change proposals.

As prescribed at 243.205(S–70), insert the following clause:

ENGINEERING CHANGE PROPOSALS (APR 1984)

(a) The Contracting Officer may at any time, in writing, request the Contractor to prepare and submit an Engineering Change Proposal (ECP) as that term is defined in MIL–STD–480, within the scope of this contract, as hereafter set forth. Upon receipt of such request, the Contractor shall submit to the Contracting Officer the information specified by, and in the format required by paragraph 4 of MIL–STD–480.

(b) Any Contractor ECP shall set forth a "not to exceed" price* and delivery adjustment or a "not less than" price* and delivery adjustment, acceptable to the Contractor if the Government subsequently orders such ECP. If ordered, the equitable increase shall not exceed, nor shall the equitable decrease be less than, such "not to exceed" or "not less than" amounts.** This paragraph does not preclude any revision(s) or correction(s) of an ECP in accordance with paragraphs 4.10 and 4.11 of MIL–STD–480. Concurrently with the submission of any ECP under this contract in which the proposed aggregate cost is $500,000 or greater, the Contractor shall submit to the Contracting Officer a completed SF 1411. At the time of agreement upon the price of the ECP, the Contractor shall submit a signed Certificate of Current Cost or Pricing Data.

(End of clause)

ALTERNATE I (APR 1984)

As prescribed at 243.202–70(b), insert the following paragraph:

(c) If the price* adjustment proposed for any Contractor-originated ECP (excluding any Government-requested ECP or Value Engineering Change Proposal) is *** (percent of the contract price*) (or $***) or less, such change shall be made at no adjustment of the contract price*.

252.243–7001 Pricing of adjustments.

As prescribed at 243.205(S–71), insert the following clause:

PRICING OF ADJUSTMENTS (APR 1984)

When costs are a factor in any determination of a contract price adjustment pursuant to the Changes clause or any other clause of this contract, such costs shall be in accordance with Part 31 of the Federal Acquisition Regulation and the DoD FAR Supplement in effect on the date of this contract.

(End of clause)

252.246–7000 Material inspection and receiving report.

As prescribed at 246.370, insert the following clause:

---

* Use term suitable to type of contract.

** In cost-reimbursement type contracts, replace this sentence with the following sentence: "Change orders issued pursuant to the Changes clause of this contract shall not be considered an authorization to the Contractor to exceed the estimated cost set forth in the Schedule in the absence of a statement in the change order, or other contract modification, increasing the estimated cost."

*** To be negotiated.

MATERIAL INSPECTION AND RECEIVING REPORT (DEC 1969)

At the time of each delivery of supplies or services under this contract, the Contractor shall prepare and furnish to the Government a Material Inspection and Receiving Report in the manner and to the extent required by Appendix I, "Material Inspection and Receiving Report" (see DoD FAR Supplement 46.670).

(End of clause)

252.246-7001 Warranty of data.

As prescribed at 246.770, insert the following clause:

WARRANTY OF DATA (NOV 1974)

(a) Technical data means recorded information, regardless of form or characteristic, of a scientific or technical nature. It may, for example, document research, experimental, developmental or engineering work; or be usable or used to define a design or process or to procure, product support, maintain, or operate materiel. The data may be graphic or pictorial delineations in media such as drawings or photographs; text in specification or related performance or design type documents; or computer printouts. Examples of technical data include research and engineering data, engineering drawings and associated lists, specifications, standards, process sheets, manuals, technical reports, catalog item identifications, and related information, and documentation related to computer software. Technical data does not include computer software or financial, administrative, cost and pricing, and management data, or other information incidental to contract administration.

(b) Notwithstanding inspection and acceptance by the Government of technical data furnished under this contract and notwithstanding any provision of this contract concerning the conclusiveness thereof, the Contractor warrants that all technical data delivered under this contract will at the time of delivery conform with the specifications and all other requirements of this contract. The warranty period shall extend for three (3) years after completion of the delivery of the line item of data (as identified in DD Form 1423) of which the data forms a part; or any longer period specified in the contract.

(c) The Contractor agrees to notify the Contracting Officer in writing immediately of any breach of the above warranty which the Contractor discovers within the warranty period.

(d) The following remedies shall apply to all breaches of the above warranty provided that the Government notifies the Contractor of the breach in writing within the warranty period.

(1) Within a reasonable time after the Contracting Officer notifies the Contractor of a breach of warranty, he may:

(i) by written notice, direct the Contractor to correct or replace at his expense the nonconforming technical data promptly; or

(ii) if he determines that the Government no longer has a requirement for correction or replacement of the data, or that the data can be more reasonably corrected by the Government, inform the Contractor by written notice that the Government elects a price or fee adjustment in lieu of correction or replacement.

(2) If the Contractor refuses or fails to comply with a direction under (1)(i) above, the Contracting Officer may, within a reasonable time of such refusal or failure:

(i) by contract or otherwise, correct or replace the nonconforming technical data and charge the Contractor the cost occasioned to the Government thereby; or

(ii) elect a price or fee adjustment in lieu of correction or replacement.

(3) The remedies set forth in this clause represent the exclusive means by which the rights conferred on the Government by this clause may be enforced.

(f) The provisions of this clause apply anew to that portion of any technical data which is corrected or furnished in replacement under (d)(1)(i) above.

(End of clause)

ALTERNATE I (NOV 1974)

As prescribed at 246.770, insert the following paragraph:

(3) In addition to the remedies specified under (d) (1) and (2) above, Contractor shall be liable to the Government for all damages sustained by the Government as a result of breach of the warranty specified in this clause; however, the additional liability under this subparagraph (3) shall not exceed 75% of the target profit. If the breach of the warranty specified in (b) of this clause is with respect to data supplied by an equipment subcontractor, the limit of the prime contractor's liability shall be 10% of the total subcontract price in the case of a firm fixed-price subcontract, 75% of the total subcontract fee in the case of a cost-plus-fixed-fee or cost-plus-award-fee subcontract, or 75% of the total subcontract target profit or fee in the case of a fixed-price or cost-plus-incentive-type contract. Damages due the Government under the provisions of this warranty shall not be considered as an allowable cost. The additional liability specified in this paragraph (3) shall not apply:

(i) with respect to the requirement under Category E or I of MIL-D-1000, provided that the data furnished by the Contractor was current, accurate at time of submission and did not involve a significant omission of data necessary to comply with such requirements; or

(ii) with respect to specific defects as to which the Contractor discovers and gives written notice to the Government before the error is discovered by the Government.

ALTERNATE II (NOV 1974)

As prescribed at 246.770, insert the following paragraph:

(3) In addition to the remedies specified under (1) and (2) above, the Contractor shall be liable to the Government for all damages sustained by the Government as a result of breach of the warranty specified in this clause; however, the additional liability under this subparagraph (3) shall not exceed 10% of the total contract price. If the breach of the warranty specified in (b) of this clause is with respect to data supplied by an equipment subcontractor, the limit of the prime contractor's liability shall be 10% of the total subcontract price in the case of a firm fixed-price subcontract, 75% of the total subcontract fee in the case of a cost-plus-fixed-fee or cost-plus-award-fee subcontract, or 75% of the total subcontract target profit or fee in the case of a fixed-price or cost-plus-incentive-type contract. The additional liability specified in this paragraph (3) shall not apply:

(i) with respect to the requirement under Category E or I of MIL-D-1000, provided that the data furnished by the Contractor was current, accurate at time of submission and did not involve a significant omission of data necessary to comply with such requirements; or

(ii) with respect to specific defects as to which the Contractor discovers and gives written notice to the Government before the error is discovered by the Government.

252.247-7000 Scope of contract.

As prescribed at 247.270-9(a), insert the following clause:

SCOPE OF CONTRACT (AUG 1984)

(a) *General.* The Contractor shall load and discharge cargoes and in connection therewith shall perform all the duties of a stevedore on any vessel which the Contracting Officer may designate at ——— upon the terms and conditions hereinafter set forth for the term of this contract, beginning ——— and ending ———; *Provided*, however, that any work started before and not completed by the expiration of this contract shall be governed by the terms of this contract unless otherwise directed by the Contracting Officer.

(b) *Contractor's Duties.*

(1) *Loading.* In loading vessel, the Contractor shall remove and handle cargo from place of rest on pier or in pier shed or within the cargo assembly area; also from open-top railroad cars, trucks and trailers alongside ship; also from barges, lighters, scows, car floats and open-top railroad cars on car floats alongside ship. The Contractor shall stow said cargo in any space in vessel, including bunker space, holds, 'tween decks, on deck, and deep tanks, in the order directed by and in a manner satisfactory to the Contracting Officer.

(2) *Discharging.* In discharging vessel, the Contractor shall remove and handle cargo from any space in the vessel, including bunker space, holds, 'tween decks, on deck, and deep tanks. The Contractor shall land said cargo at place of rest on pier or in pier shed or within the cargo assembly area; also on open-top railroad cars, trucks and trailers alongside ship; also on barges, lighters, scows, car floats and open-top railroad cars on car floats alongside ship. The Contractor shall perform such discharging in the order directed by and in a manner satisfactory to the Contracting Officer.

(3) *Handling Explosives.* In addition to (1) and (2) above, the following provisions are applicable to the loading and discharging of explosives:

(a) In loading explosives the Contractor shall perform all the stevedoring services

necessary for the breaking-out and discharging from railroad cars, trucks and/or lighters alongside ship or from place of rest on pier, transporting to the vessel, and property loading, stowing and normal securing and chocking in the vessel in a manner directed by applicable U.S. Coast Guard, Army, or Navy regulations.

(b) In discharging explosives the Contractor shall perform all stevedoring services necessary for discharging cargo from the vessel to place of rest on pier or the transporting to and loading into railroad cars, trucks and/or lighters. The Contractor shall also prepare and line the cars for handling the cargo (except the laying of new flooring) and shall brace, secure, cut bands, and lash the cargo in the cars in accordance with applicable regulations and shall place "explosives" placards on the cars prior to release, and shall close and seal all doors.

(c) The furnishing and preparation of gates, studs, new flooring, etc., for blocking railroad cars, as well as prefabrication of blocking in the vessel's hold, will be at the expense of the Government.

(d) The Contractor shall not be compensated for standby time when caused by slow-up or delay of one of his operations, which delay directly affects the other operations, such as delay in loading railroad cars, or in discharging from ship's hatches, unless such slow-up or delay was beyond the control and without the fault or negligence of the Contractor. This does not include the time required for shifting cars. No standby time will be allowed unless previously approved by the Contracting Officer.

(4) *Cargo Assembly Area.* The term "cargo assembly area" as used in this contract, is defined as ——— feet from either extremity of the vessel and for a distance ——— feet from the vessel inboard side.

(c) *Damage Reports.* In all instances where cargo, vessel, vessel equipment or Government equipment sustains damage through handling by the Contractor's employees, a full report of the fact and the extent of such damage shall be submitted by the Contractor to the Contracting Officer within twenty-four (24) hours following the occurrence of such damage.

(d) *Rigging and Unrigging.* When the ship's gear is used for handling cargo, the Contractor, at his own expense, shall rig and unrig all gear, including the rigging and unrigging of heavy-lift gear when the heavy-lift booms are used, and shall hoist, lower and secure hatch tents when necessary; *Provided,* however, that where any one set of gear is rigged for handling less than one hundred (100) payable tons of cargo on a commodity rate basis, the Contractor shall be compensated on an extra-labor basis for the rigging and unrigging of such set of gear. Rigging and unrigging shall include topping, lowering, and trimming of booms. When the Contractor is required to perform any rigging and unrigging services for the purpose of performing extra labor services or performs any such services at the request of the Contracting Officer for any purpose other than loading or discharging cargo on a commodity rate basis, he shall be compensated therefor at extra labor rates. When the Contractor is required to break out booms from collars or boom rest, or to reeve guys on topping lifts through blocks, he shall be compensated therefor on an extra-labor basis.

(e) *Opening and Closing Vessel.* The Contractor shall, at his own expense, remove and replace tarpaulins, battens, hatch covers, and beams with respect to all decks and deep tanks both during loading unloading operations and when necessary because of weather or working conditions, as directed by the Contracting Officer; *Provided,* however, that the opening and closing on any one hatch shall be performed on an extra-labor basis where less than one hundred (100) payable tons are to be loaded and/or discharged at the commodity rate on any hatch so worked, and also where the Contractor is required to open and close the vessel for the purpose of performing extra-labor services. The removing, handling, replacing, or setting of reefer plugs during the handling of cargo in any or all refrigerated or chilled space aboard the vessel is included in the basic commodity rate, except where the complete operation is on an extra-labor basis. When the Contractor is required to open or close reefer plugs more than once in any four (4) hour shift because of a change in orders or type of cargo, he shall be compensated therefor on the basis of fifteen (15) minute detention time for men in gangs, including equipment drivers and gang foremen.

(f) *Docking, Undocking and Shifting of Vessels.* The Contractor shall, when requested by the Contracting Officer, furnish men to handle lines for docking, undocking, and shifting of vessels, and the Government shall compensate the Contractor therefor on an extra-labor basis.

(g) *Shifting Barges, Lighters, Scows, and Car Floats.* Barges, lighters, scows, and car floats will be placed alongside the vessel without cost to the Contractor. When they are shifted from hatch to hatch, the Contractor shall do so at his own expense unless operational conditions make movement by ship's gear impracticable in which event the operation shall be at the expense of the Government.

(h) *Gear Supplied by Government.* The Government, at its own expense, shall furnish and maintain in good working order the following: blocks on booms, booms, heavy lift cranes, wire and rope falls rigged, gant-lines rigged on booms, hatch tents, lighters and floating derricks, lights on wharves and vessels, pallet boards, power and steam necessary, preventers on booms, and winches. Floating derricks and heavy lift dock cranes will not be used when, in the opinion of the Contracting Officer, the ship's equipment can be used satisfactorily.

(i) *Gear Supplied by Contractor.* The Contractor shall perform an efficient stevedoring operation and, except as provided in (h) and (j) of clause, shall at his own expense, furnish all necessary and proper gear, including the following: ammunition gear (when handling ammunition and explosives), roller conveyors, hooks, cargo nets, save-all nets, rollers, skids, chain slings, platform slings, wire and rope slings (except heavy-lift slings used in connection with shore or floating heavy-lift cranes), drag lines, spreaders, hand-trucks, machinery dollies, trailers, lift trucks, tractors, and tractor cranes; *Provided,* however, that the Contractor shall be compensated for furnishing mobile equipment in accordance with the applicable schedule in the "Schedule of Rates" clause of this contract, whenever such equipment is furnished in connection with services performed on an extra-labor basis.

(j) *Rental of Mobile Equipment.*

(1) The Contractor, when directed by the Contracting Officer to supply extra-labor services, shall upon request of the Contracting Officer also supply and maintain the necessary mobile equipment to the extent available, and the Contractor shall be compensated therefor at the rates set forth in the applicable schedule of the "Schedule of Rates" clause of this contract.

(2) Upon request, the Government will supply mobile equipment, if available, to the Contractor, and the Government shall be compensated therefor at the rates set forth in the applicable schedule of the "Schedule of Rates" clause of this contract.

(3) If the Government supplies mobile equipment to the Contractor for use in performing extra-labor services, no charge shall be made by the Government for the use of such mobile equipment.

(k) *Transportation of Gear by Contractor.* The Contractor will transport his own gear and equipment when necessary at his own expense, except transportation of said gear and equipment shall be at Government expense when the vessel is loading and unloading in stream, or at any other location inaccessible to trucks.

(l) *Tiering.* If cargo tiered on the pier or in the cargo assembly area is beyond the reach of the Contractor's equipment, the Government will break it down at the place of tiering so that it can be handled by the Contractor's equipment. No charge will be made by the Contractor for removing cargo from piles within the reach of his equipment. The tiering of cargo above reach of the Contractor's equipment will be at Government expense. When the Contractor is required to break down cargo tiered above the reach of his equipment or to tier cargo beyond the reach of his equipment, the Government will compensate the Contractor therefor on an extra-labor basis.

(m) *Dunnage.* The loading, shifting within the same hatch, and laying of all dunnage (including cordwood, tarpaulins, matting and reefer stripping) necessary to properly stow and secure the vessel's cargo and reverse the operation when discharging the vessel's cargo, is included in the basic commodity rate.

(n) *Other Work.*

(1) *Lashing and Securing.* The Contractor shall, at his own expense, lash and secure all cargo below deck when loaded on a commodity-rate basis, as directed by the Contracting Officer. Lashing and securing of cargo below deck which was loaded in an extra-labor basis and the lashing of all on-deck cargo will be done at extra-labor rates. The Government will supply lumber, wire, turn-buckles, and other equipment as may be required for dunnaging, securing, and shoring cargo in all instances.

(2) *Unlashing and Unsecuring Cargo.* When cargo is discharged on a commodity-rate basis the Contractor shall, at his own expense, unlash all cargo on deck and below deck and shall remove all tomming, chocking tank beds, and all types of double dunnage flooring, except false decks, as directed by the Contracting Officer. The unlashing and unsecuring of cargo on deck and below deck, if discharged on an extra-labor basis, will be done at extra-labor rates.

(3) *Carpenter Work, Welding and Burning.* All necessary carpenter work and welding and burning shall be at the expense of the Government.

(o) *Tonnage Figures and Invoices.* The weight ton referred to in this contract is a ton of two thousand two hundred forty (2,240) pounds, and the measurement ton is a ton of forty (40) cubic feet. Where rates are provided on both a weight and measurement basis, the Contractor shall be paid on the basis of a manifested ton, whichever produces the greater tonnage, the weight ton of two thousand two hundred forty (2,240) pounds or the measurement ton of forty (40) cubic feet. The maximum measurement tonnage upon which compensation is to be computed for any manifested item of cargo for any single lift shall be one hundred fifty (150) tons. The Government will furnish the Contractor a breakdown of cargo loaded or discharged according to the commodity list, or, at the option of the Contracting Officer, manifests will be furnished. Invoices of each vessel loaded or discharged will be submitted by the Contractor not later than ten (10) days after receipt of tonnage figures or manifests. Progress payments for services performed on each vessel may be made upon approval of the Contracting Officer, *Provided*, that such progress payments shall not exceed ninety percent (90%) of the direct labor cost to the Contractor of the services upon which payment is made, which cost shall be determined from evidence submitted by the Contractor and which must be such as to be satisfactory to the Contracting Officer. No services will be paid for by the Government other than those specifically enumerated herein and provided for in the rate schedule of this contract or elsewhere in this contract.

(p) *Hardship (Unusual Conditions).* If the Contracting Officer determines that due to unusual vessel, dock, or cargo conditions, the loading or unloading of any particular cargo at the basic commodity rates will work a hardship upon the Contractor, he may so certify in writing (in advance, if possible) and authorize the compensation to the Contractor for loading or unloading such cargo at the extra-labor rates set forth in the applicable schedule in the "Schedule of Rates" clause of this contract. Unusual conditions will include, but not be limited to, inaccessibility of ship's cargo gear to place of stowage, side port operations, and small quantities of cargo in any one hatch.

(q) *Detentions.*

(1) Detention (sometimes referred to as "stand-by time" or "waiting-time") is time lost as a result of the stoppage, or inability to start, of loading or discharging of cargo due to causes beyond the control and without the fault or negligence of the Contractor, including, but not limited to, a breakdown of the vessel's equipment or Government-furnished gear, bad weather, non-readiness of the vessel, non-arrival of cargo, or non-availability of equipment required to be furnished by the Government.

(2) When cargo is worked on a commodity rate basis the Contractor shall, without limitation, absorb each detention of minutes or less; but the Government shall pay the Contractor at detention rates for men in gangs, including equipment drivers and gang bosses, for each detention in excess of minutes including the first minutes thereof.

(3) When loading or discharging of cargo is performed on an extra-labor basis, the Government will pay the Contractor at extra-labor rates for the first minutes of each detention and will pay the Contractor on a detention rate basis for all time of each detention except the first minutes.

(4) Minimum time is defined as the time in addition to time actually worked for which the Contractor is required to pay his employees to comply with minimum time requirements of labor agreements applicable to the Contractor and his employees. The Government shall pay the Contractor for minimum time at detention rates.

(5) If any detention or minimum time, as defined in (1) and (4) above, is due to the fault of the Contractor or the failure of the Contractor to comply with proper instructions of the Contracting Officer, the entire time resulting therefrom shall be at the expense of the Contractor.

(r) *Extra Labor.* The Contractor shall, when directed by the Contracting Officer, supply extra labor for miscellaneous services when not occasioned by the fault or negligence of the Contractor, and shall be compensated therefor on an extra-labor basis. Among the miscellaneous services for which such extra labor may be required, but not by way of limitations, are the following: ammunition handling (when commodity rate does not apply); cleaning vessel's holds and decks; handling excess dunnage and debris; handling mail and baggage; rehandling, removing or shifting cargo; removing or securing tank lids when secured by more than four (4) bolts for each lid; handling ship's stores and material.

(s) *Overtime Rates.* The Contractor shall order out men for overtime work only with the approval of the Contracting Officer. When approved by the Contracting Officer, and in accordance with such approval, the Contractor shall be paid for all overtime services, in addition to the applicable commodity rates, or man-hour rates, at the overtime differential rates set forth in the applicable schedules of the "Schedule of Rates" clause of this contract. Overtime periods will be determined in accordance with the prevailing collective bargaining agreements applicable to the Contractor and his employees.

(t) *Penalty Rates.* Except where the applicable commodity rates or man-hour rates expressly include cargo penalties, the Contractor shall be compensated for penalties, where payable under applicable collective bargaining agreements, at the rates set out in the penalty rate schedule of the "Schedule of Rates" clause of this contract.

(u) *Traveling Time.* When the Contractor is required to pay traveling time to the men employed, the Contractor shall be compensated therefor at the rates specified in the applicable schedule of the "Schedule of Rates" clause of this contract.

(v) *Transportation of Men and Other Allowances.* When the Contractor is required by applicable collective bargaining agreements to pay allowance for subsistence, quarters, and rail, bus, or boat fares in transporting the men employed, the Contractor shall be compensated therefor at the rates specified in the applicable schedule of the "Schedule of Rates" clause of this contract, or, if the contract contains no such schedule, at the actual out of pocket cost to the Contractor.

(w) *Income for Handling Lighters, Cars, etc.* Any and all income derived from sources other than provided for in this contract for the handling of cargo direct to or from lighters, barges, scows, trucks, and railroad cars, and to or from ships under this contract, will be for the account of the Contractor and shall be collected by the Contractor. Collection of this income by the Contractor is reflected in the commodity rates.

(End of clause)

252.247-7001 Schedule of rates.

As prescribed at 247.270-9(a), insert the following clause:

SCHEDULE OF RATES (AUG 1984)

(a) *Commodity Rates.* The Contractor will be compensated for services, except those specified elsewhere in this contract, at the commodity rates listed herein which are based on straight time rates of pay only. The rates named in Columns A and B are based on normal operations involving use of ship's gear.

SCHEDULE I—COMMODITY TONNAGE RATES

Commodity List	Loading A Ship's Gear 2240# 40c/f	Discharging B Ship's Gear 2240# 40c/f

NOTE: List only commodities justifying a specific rate.

(b) *Miscellaneous Hourly Rate Schedules.*

TABLE OF SCHEDULES (RATE PER HOUR)

Rating	Extra Labor Straight Time Rate—Sched II	Travel Time & Detentions in Non-Explosive Area—Sched III	Overtime Differential—Sched IV	Explosive Straight Time Rate—Sched V	Travel Time & Detentions in Explosive Area—Sched VI	Explosive Overtime Differential—Sched VII	Premium Meal Hour Differential—Sched VIII

Fork-lift trucks	
Cranes up to 10 tons with operator and oiler.	
Cranes from 10 to 20 tons with operator and oiler.	
Ross lumber carriers	
Miscellaneous small gear per gang.	Rates per gang per hour:

*Rates per hour include fuel, lubricants, and maintenance.

252.247-7002 Price escalation.

As prescribed at 247.270-9(b), insert the following clause:

PRICE ESCALATION (AUG 1964)

(a) The Contractor warrants that the prices set forth in this contract are based upon the wage rates, allowances, and conditions as set forth in the collective bargaining agreements between him and his labor employees which are in effect as of and which are generally applicable to the port where work under this contract is performed and are applicable to operations by the Contractor on non-Government work as well as under this contract. The Contractor further warrants that the prices herein do not include any allowance for any increase to his costs to perform the contract that may thereafter become effective pursuant to the terms of said collective bargaining agreements or that may result from the modification(s) of said collective bargaining agreements thereafter made effective.

(b) If, during the performance of this contract, there are from time to time increases or decreases in the wage rates, allowances, fringe benefits and conditions pertaining to its direct labor employees pursuant to the provisions of the aforesaid collective bargaining agreements or as a result of effective modifications thereto which increase or decrease his costs to perform this contract, the Contractor shall notify the Contracting Officer thereof within sixty (60) days of receipt of notice of such increase or decrease. Such notice shall include the Contractor's proposal for an adjustment in the contract commodity, activity, or man-hour prices to be negotiated in accordance with paragraph (c) below, and shall be accompanied by data, in such form as the Contracting Officer may require, explaining (i) the causes, (ii) the effective date, and (iii) the amount of the increase or decrease of the Contractor's proposal for such adjustment.

(c) Promptly upon receipt of any notice and data described in (b) above, the Contractor and the Contracting Officer shall negotiate an adjustment, and the effective date thereof, in the contract commodity, activity, or man-hour prices; provided, however, no adjustment upward in excess of percent per annum of the existing commodity, activity, or man-hour prices will be allowed, except as provided in the "Changes" clause of this contract. Increases or decreases in the contract prices shall reflect, in addition to the direct labor costs and variable indirect labor costs, the concomitant increases or decreases in the following costs: social security and unemployment compensation taxes and workman's compensation insurance. No adjustment may be made to increase the dollar amount allowances of the Contractor's profit. The agreed-upon adjustment, the effective date thereof, and the appropriately revised commodity, activity, or man-hour prices for services set forth in the schedule of rates, shall be set forth in a supplemental agreement to this contract. Failure of the parties to agree to an adjustment under this clause shall be deemed to be a dispute concerning a question of fact within the meaning of the "Disputes" clause of this contract. Pending agreement on, or determination of, any such adjustment and its effective date, the Contractor shall continue performance.

(d) Notwithstanding the foregoing, there shall be no adjustment for any increase or decrease in the quantities of labor that the Contractor contemplated for each specific commodity except as may result from modifications of the collective bargaining agreements. For the purpose of administering this clause, the Contractor shall submit to the Contracting Officer, within five (5) days after award, the accounting data and computations used by the Contractor to determine his estimated efficiency rate in the performance of this contract, to include the Contractor's computation of the costs apportioned for each rate set forth in the schedule of rates.

(e) The final invoice submitted under this contract shall include a certification that the Contractor has not experienced a decrease in rates of pay for labor or that he has given notice of all such decreases in compliance with (b) above.

(End of clause)

252.247-7003 Revision of prices.

As prescribed at 247.270-9(c), insert the following clause:

REVISION OF PRICES (AUG 1964)

(a) *General.* The prices fixed in this contract are based on wages and working conditions established by collective bargaining agreements and on other conditions in effect on the date of this contract. Such prices may be increased or decreased in accordance with this clause.

(b) *Demand for Negotiation.* At any time, and from time to time, subject to the limitations specified in this clause, either the Government or the contractor may deliver to the other a written demand that the parties negotiate to revise the prices under this contract. No such demand shall be made before ninety (90) days after the date of this contract, and thereafter neither party shall make a demand having an effective date within ninety (90) days of the effective date of any prior demand; *Provided, however,* That this limitation shall not be applicable in the event that during any ninety (90) day period there is a "wage adjustment" as hereinafter defined. The term "wage adjustment," as used in this clause, means a change in the wages, salaries, or other terms or conditions of employment which shall

substantially affect the cost of performing this contract and which shall be generally applicable to the port where work under this contract is performed and shall be applicable to operations by the Contractor on non-Government work as well as to work under this contract. Each demand shall specify a date (identical with or subsequent to the date of the delivery of the demand) as to which the revised prices shall be effected as to services performed thereon and thereafter. This date is hereinafter referred to as the "effective date of the price revision." Any demand under this clause, if made by the Contractor shall state briefly the ground or grounds therefor and shall be accompanied by the statements and data referred to in paragraph (c) of this clause. If the demand is made by the Government, such statements and data will be furnished by the Contractor within thirty (30) days of the delivery of the demand.

(c) *Submission of Data.* At the time or each of the times specified or provided for in paragraph (b) of this clause, the Contractor shall submit:

(i) A new estimate and breakdown of the unit cost and the proposed prices for the services to be performed under the contract after the effective date of the price revision, itemized in connection with the original negotiations of the contract;

(ii) An explanation of the difference between the original (or last preceding) estimate and the new estimate;

(iii) Such relevant operating data, cost records, overhead absorption reports, and accounting statements as may be of assistance in determining the accuracy and reliability of the new estimate;

(iv) A statement of the experienced costs of performance hereunder to the extent that they are available at the time or times of the negotiation of the revision of prices hereunder; and

(v) Any other relevant data usually furnished in the case of negotiations of prices under a new contract.

The Government may make such examination of the Contractor's accounts, records, and books as the Contracting Officer may require and may make such audit thereof as the Contracting Officer may deem necessary.

(d) *Negotiations.* (1) Upon the filing of the statements and data required by (c) of this clause, the Contractor and the Contracting Officer will negotiate promptly in good faith to agree upon prices for services to be rendered on and after the effective date of the price revision. Negotiations for price revisions under this clause shall be conducted on the same basis, employing the same types of data, including without limitation, comparative prices, comparative costs, and trends thereof, as in the negotiation of prices under a new contract: *Provided however,* That if the prices in the contract were arrived at as a result of competitive negotiation, the contract prices shall not be revised upward except upon the basis of, and as justified by changes in conditions occurring after the contract was entered into.

(2) After each negotiation the agreement reached will be evidenced by a supplemental agreement stating the revised price to be effective with respect to services rendered on and after the effective date of the price revision (or such other later date as the parties may fix in such supplemental agreement).

(e) *Disagreements.* If, within thirty (30) days after the date on which the statements and data are required pursuant to paragraph (b) of this clause to be filed (or such further period as may be fixed by written agreement), the Contracting Officer and the Contractor fail to agree to revised prices, the failure to agree shall be disposed of in accordance with the "Disputes" clause of this contract, and the prices so fixed shall remain in effect for the balance of the contract notwithstanding any other provision of this clause.

(f) *Payments.* Until new prices shall become effective in accordance with this clause, the prices in force at the effective date of the price revision shall be paid upon all services performed, subject to appropriate later revisions made pursuant to (d) or (e) of this clause.

(g) *Retroactive Changes in Wages or Working Conditions.* In the event of a retroactive wage adjustment the Contractor or the Contracting Officer may request an adjustment in the prices fixed in this contract, and such adjustment will be made to the extent equitable; *Provided, however,* That the prices applicable to services performed subsequent to the date of the request for price adjustment shall not be adjusted under this paragraph, it being the intent that any price adjustment under this paragraph shall cover the period prior to such request. Such request by the Contractor shall be made within thirty (30) days of such retroactive wage adjustment and shall be supported by:

(i) An estimate of the changes in cost occasioned by the retroactive wage adjustment;

(ii) Completed information upon which such estimate is based; and

(iii) A certified copy of the collective bargaining agreement, arbitration award, or other document evidencing the retroactive wage adjustment.

Subject to the foregoing limitation as to the time of making a request hereunder, completion or termination of this contract shall not affect or impair the Contractor's right under this paragraph. Such adjustment shall be by mutual agreement between the Contracting Officer and the Contractor. The adjusted prices, and the manner of making adjustments with respect to services theretofore paid for, shall be incorporated in an amendment to this contract to be executed by the Contractor and the Contracting Officer. In case of disagreement concerning any question of fact including whether any adjustment should be made, or the amount of such adjustment, such disagreement will be resolved in accordance with the "Disputes" clause of this contract. The Contractor shall give written notice to the Contracting Officer of any request by or on behalf of the employees of the Contractor which may result in a retroactive wage adjustment. Such notice shall be given within twenty (20) days after such request, or if request has occurred prior to execution of this contract, at the time of execution of this contract.

(End of clause)

252.247-7004 Changes.

As prescribed at 247.270-9(d), insert the following clause:

CHANGES (AUG 1984)

The Contracting Officer may, at any time by written order, and without notice to the sureties, make changes within the general scope of this contract. If any such change causes an increase or decrease in the cost of the performance of any part of the work under this contract, an equitable adjustment shall be made in the contract price or in the applicable schedule or rates and the contract shall be modified in writing accordingly. Any claims by the Contractor for adjustment under this clause must be asserted within thirty (30) days from the date of receipt by the Contractor of the notification of change; *Provided, however,* That the Contracting Officer, if he decides that the facts justify such action, may receive and act upon any such claim asserted at any time prior to final payment under this contract. Failure to agree to any adjustment shall be a dispute concerning a question of fact within the meaning of the "Disputes" clause of this contract. However, nothing in this clause shall excuse the Contractor from proceeding with the contract as changed.

(End of clause)

252.247-7005 Termination.

As prescribed at 247.270-9(e), insert the following clause:

TERMINATION (SEP 1978)

(a) This contract may be terminated at any time by either party hereto upon sixty (60) days, or such number or days as may be otherwise provided in the Schedule, notice in writing to the other. Termination under this clause shall not affect, or relieve any part of, any obligation or liability that may have accrued prior to such termination.

(b) Upon termination of the contract under (a) above, or as provided in the "Default" clause of this contract, the Contractor shall be paid any sum due the Contractor for services performed under this contract to the date of such termination, and in the event of partial termination shall be paid in accordance with the terms of this contract for any services furnished under the portion of the contract that is not terminated; *Provided, however,* any such payments shall be without prejudice to any claim which the Government may have against the Contractor under the "Default" clause of this contract or otherwise, and the Government shall have the right to offset any such claims against such payment.

(End of clause)

252.247-7006 Indefinite quantities—fixed charges.

As prescribed at 247.270-9(f), insert the following clause:

INDEFINITE QUANTITIES—FIXED CHARGES (AUG 1984)

The amount of work and services which the Contractor may be ordered to furnish and the Government to accept hereunder, shall be

the amount which shall from time to time be ordered hereunder by the Contracting Officer. In any event, however, the Government is obligated to compensate the Contractor the monthly lump sum specified in Schedule entited "Fixed Charges," for each month or portion thereof the contract remains in effect.

(End of clause)

252.247-7007 Indefinite quantities—no fixed charges.

As prescribed at 247.270-9(g), insert the following clause:

INDEFINITE QUANTITIES—NO FIXED CHARGES (AUG 1964)

The amount of work and services which the Contractor may be ordered to furnish and the Government to accept hereunder, shall be the amount which shall from time to time be ordered hereunder by the Contracting Officer. In any event, however, the Government shall order, during the term of this contract, work or services having an aggregate value at the prices listed in the schedules made a part hereof of not less than one hundred dollars ($100.00).

(End of clause)

252.247-7008 Employees of contractor.

As prescribed at 247.270-9(h), insert the following clause:

EMPLOYEES OF CONTRACTOR (AUG 1964)

All employees of the Contractor employed in performance of work under this contract shall be employees of the Contractor at all times and not of the Government. The Contractor shall comply with the Social Security Act, the Longshoremen's and Harbor Worker's Compensation Act, and such Workmen's Compensation Laws and Unemployment Insurance Laws of the state where the work is performed as shall be applicable to work performed hereunder and the Contractor shall comply with all other relevant legislation, state and Federal.

(End of clause)

252.247-7009 Removal of contractor's employees.

As prescribed at 247.270-9(h), insert the following clause:

REMOVAL OF CONTRACTOR'S EMPLOYEES (OCT 1965)

The Contractor agrees to utilize only experienced, responsible and capable people in the performance of the work. The Contracting Officer may require that the Contractor remove from the Government job employees who endanger persons or property, or whose continued employment under this contract is inconsistent with the interests of military security.

(End of clause)

252.247-7010 Liability and insurance.

As prescribed at 247.270-9(h), insert the following clause:

LIABILITY AND INSURANCE (JAN 1977)

(a) The Contractor shall be:

(i) Liable to the Government for loss or damage to property, real and personal, owned by the Government or for which the Government is liable;

(ii) Responsible for, and hold the Government harmless from, loss of or damage to property not included in (i) above; and

(iii) Responsible for, and hold the Government harmless from, bodily injury and death of persons, occasioned either in whole or in part by the negligence or fault of the Contractor, his officers, agents, or employees in the performance of work under this contract. For the purpose of this clause, all cargo loaded or unloaded under this contract is agreed to be property owned by the Government or property for which the Government is liable. The amount of the loss or damage as determined by the Contracting Officer will be withheld from payments otherwise due the Contractor. Determination of liability and responsibility by the Contracting Officer will constitute questions of fact within the meaning of the "Disputes" clause of this contract. The general liability and responsibility of the Contractor under this clause are subject only to the following specific limitations.

(b) The Contractor shall not be responsible to the Government for and does not agree to hold the Government harmless from loss or damage to property or bodily injury to or death of persons if:

(i) The unseaworthiness of the vessel or failure or defect of the gear or equipment furnished by the Government contributed jointly with the fault or negligence of the Contractor in causing such damage, injury or death, and the Contractor, his officers, agents, and employees, by the exercise of due diligence, could not have discovered such unseaworthiness or defect of gear or equipment, or through the exercise of due diligence could not otherwise have avoided such damage, injury, or death;

(ii) The damage, injury or death resulted solely from an act or omission of the Government or its employees or resulted solely from proper compliance by officers, agents, or employees of the Contractor with specific directions of the Contracting Officer.

(c) The Contractor shall at his own expense procure and maintain insurance during the term of this contract, as follows:

(i) Standard Workman's Compensation and Employer's Liability Insurance and Longshoremen's and Harbor Workers' Compensation Insurance, or such of these as may be proper under applicable state or Federal statutes. The Contractor may however, be self-insured against the risk of this subparagraph (i), if he has obtained the prior approval of the Contracting Officer. This approval will be given upon receipt of satisfactory evidence that the Contractor has qualified as such self-insurer under applicable provision of law.

(ii) Bodily Injury Liability Insurance in an amount of not less than $300,000 on account of any one occurrence.

(iii) Property Damage Liability Insurance (which shall include any and all property, whether or not in the care, custody, or control of the Contractor) in an amount of not less than $300,000 on account of any one occurrence.

(d) All policies of insurance required under the terms of this contract shall, by appropriate endorsement or otherwise, provide that no cancellation thereof shall be effective for such period as may be prescribed by the laws of the State in which this contract is to be performed and in no event less than thirty (30) days after written notice thereof has been given to the Contracting Officer.

(e) Satisfactory evidence of the required insurance endorsed as required in (d) above, shall be filed with the Contracting Officer prior to the performance of any work under this contract.

(f) The Contractor shall, at his own cost and expense, defend any suits, demands, claims, or actions, in which the United States might be named as a codefendant of the Contractor, arising out of or as a result of the Contractor's performance of work under this contract, whether or not such suit, demand, claim, or action arose out of or was the result of the Contractor's negligence. This shall not prejudice the right of the Government to appear in such suit, participate in defense, and take such actions as may be necessary to protect the interests of the United States.

(g) It is expressly agreed that the provisions contained in (c) through (f) of this clause shall not in any manner limit the liability or extent of liability of the Contractor as provided in (a) and (b) of this clause.

(h) In the event that the Contractor is indemnified, reimbursed, or relieved for any loss or damage to Government property, he shall equitably reimburse the Government. The Contractor shall do nothing to prevent the Government's right to recover against third parties for any such loss, or damage and, upon the request of the Contracting Officer, shall at the Government's expense, furnish to the Government all reasonable assistance and cooperation (including the prosecution of suit and the execution of instruments of assignment in favor of the Government) in obtaining recovery.

(End of clause)

252.247-7100 Evaluation of bids.

As prescribed at 247.271-4(a)(1), insert the following provision:

EVALUATION OF BIDS (FEB 1983)

(a) Bids will be evaluated on the basis of total aggregate price of all items within an area of performance under a given schedule. A bidder must bid on all items within a specified area of performance for a given schedule. Failure to do so shall be cause for rejection of the bid for that area of performance of that schedule. Any bid which stipulates minimum charges or graduated prices for any or all items shall be rejected for that area of performance within the schedule.

(b) In addition to other factors, bids will be evaluated on the basis of advantages or disadvantages to the Government that might result from making more than one award (multiple awards). For the purpose of making this evaluation, it will be assumed that the sum of $250 would be the administrative cost to the Government for issuing and administering each contract awarded under this invitation, and individual awards will be

for the items and combinations of items which result in the lowest aggregate to the Government, including such administrative costs.

(End of provision)

ALTERNATE I (FEB 1968)

As prescribed at 247.271–4(a)(1), insert the following paragraph:

(c) Notwithstanding (a) above, when "additional services" are added to any schedule, such "additional services" items will not be considered in the evaluation of bids.

252.247–7101 Award.

As prescribed at 247.271–4(a)(2), insert the following provision:

AWARD (APR 1977)

Award shall be made to the qualified low bidder by area under each of the specified schedules to the extent of his stated guaranteed daily capability as provided herein and the clause entitled "Estimated Quantities." The Government reserves the right to make an award of two or more areas to a single bidder if such award will result in an overall lower estimated cost to the Government. The Government also reserves the right to award additional contracts, as a result of this solicitation, to the extent necessary to meet its estimated maximum daily requirements.

(End of provision)

252.247–7102 Estimated quantities.

As prescribed at 247.271–4(a)(3), insert the following provision:

ESTIMATED QUANTITIES (MAY 1970)

(a) The quantities shown by area of performance for each item in this solicitation are the Government's estimates of requirements which may be ordered during the period of the contract.

(b) The Government's estimated maximum daily requirements, excluding Saturday; Sunday; National, State and local holidays are listed below by area of performance within each schedule. Bidders must complete the "Bidder's Guaranteed Daily Capability," which must equal or exceed the Government's minimum acceptable daily capability, for all items within an area of performance for which they submit bids. Failure to do so will render the bid nonresponsive.

	Government's Est Maximum Daily Capability	Government's Minimum Acceptable Daily Capability	Bidder's Guaranteed Daily Capability
Outbound (Schedule I) Area	GCWT.....	GCWT.....	GCWT
Inbound (Schedule II) Area	GCWT.....	GCWT.....	GCWT
Intra-City Area (Schedule III) Area	GCWT.....	GCWT.....	GCWT

(Repeat for each area listed)

(End of provision)

252.247–7103 Schedule formats.

As prescribed at 247.271–4(a)(4), insert the following clause:

SCHEDULE FORMATS (APR 1984)

Schedule I—Outbound Services

Item 1. Complete Service-Outbound (HHGs). Services shall include premove survey, servicing of appliances, disassembly of furniture if required, preliminary packing, inventorying, tagging, wrapping, padding, packing and bracing of household goods in Government owned and furnished shipment containers (Shipping Container FED SPEC PPP–B–580 or Air Cargo) at owner's residence, or at Contractor's facility when ordered by the Contracting Officer, properly securing and sealing for shipment, weighing, obliterating old marking, strapping, and drayage of the container within area of performance. Service shall include loading of shipment on line-haul carrier's equipment at the Contractor's facility. When containers will not accommodate all articles of any lot, loose articles shall be packed in the said containers before any over-packed articles are placed therein. Overflow articles which require packing and containerization shall be paid for under Item 3.

AREA———

	Est Annual Qty	Unit	Unit Price	Total
a. At owner's residence:				
(1) Container, FED SPEC PPP–B–580.	.....	GCWT.....	.....	.....
(2) Air Cargo Container.	.....	GCWT.....	.....	.....
b. At Contractor's Facility:				
(1) Container, FED SPEC PPP–B–580.	.....	GCWT.....	.....	.....
(2) Air Cargo Container.	.....	GCWT.....	.....	.....

(Repeat a. and b. above for additional areas as needed.)

Item 2. Outbound (HHGs From Non-Temporary Storage). Service shall be the same as Item 1 except that: (i) Household goods shall be picked up at a non-temporary storage facility and transported to Contractor's facility; or (ii) household goods shall be delivered to Contractor's facility; and (iii) premove survey, servicing of appliances, preliminary packing and accessorial services shall not be provided. Overflow articles requiring containerization will be paid for under Item 3.

AREA———

	Est Annual Qty	Unit	Unit Price	Total
a. Pickup by Contractor:				
(1) Container, FED SPEC PPP–B–580.	.....	GCWT.....	.....	.....
(2) Air Cargo Container.	.....	GCWT.....	.....	.....

AREA———Continued

	Est Annual Qty	Unit	Unit Price	Total
b. Delivered to Contractor:				
(1) Container, FED SPEC PPP–B–580.	.....	GCWT.....	.....	.....
(2) Air Cargo Container.	.....	GCWT.....	.....	.....

(Repeat a. and b. above for additional areas as needed.)

Item 3. Complete Service-Outbound (HHGs-Overflow Articles and HHGs Shipments Requiring Other Than PPP-B-580 or Air Cargo Containers). Service shall be the same as Item 1 or Item 2 except that the loose articles may be drayed to Contractor's facility when ordered by the Contracting Officer for containerization in Government-approved, Contractor-furnished containers.

AREA———

	Est Annual Qty	Unit	Unit Price	Total
a. Overseas Pack:				
(1) Overflow and Oversize Articles*.	.....	GCWT.....	.....	.....
(2) Other Shipments.	.....	GCWT.....	.....	.....
b. Domestic Pack:				
(1) Overflow and Oversize Articles*.	.....	GCWT.....	.....	.....
(2) Other Shipments.	.....	GCWT.....	.....	.....

(Repeat a. and b. above for additional areas as needed.)

*The overflow box will be of lesser size than specified in FED Spec PPP–B–580 and must be limited to one per shipment. Oversize boxes are limited to use for items which exceed the dimensions of and cannot be accommodated in a household goods shipping container (Fed Spec PPP–B–580), therefore requiring a specially built box. One or more of this type may be required per shipment. These boxes will be constructed in accordance with Military Specification PPP–B–601, Style A or B and, in addition, will be caulked during assembly.

Item 4. Complete Service-Outbound (Unaccompanied Baggage). Service includes inventorying, packing in Government approved containers, weighing, strapping, obliteration of old marking and marking of unaccompanied baggage. Service shall be performed at owner's residence. (Service may be performed at Contractor's facility when ordered by the Contracting Officer.) Drayage, if required, will be ordered by the Contracting Officer.

AREA———

	Est Annual Qty	Unit	Unit Price	Total
a. Government-Furnished Containers:				
(1) Drayage Included.	.....	GCWT.....	.....	.....
(2) Drayage Not Included.	.....	GCWT.....	.....	.....
b. Contractor-Furnished Containers:				
(1) Drayage Included.	.....	GCWT.....	.....	.....
(2) Drayage Not Included.	.....	GCWT.....	.....	.....

Item 5. Outbound Service-Unaccompanied Baggage Packed by Owner. Service shall include weighing, strapping, banding, obliterating old markings, and marking. Service may include (when necessary) containerization in outer shipping containers as ordered by the Contracting Officer. Drayage, if required, will be ordered by the Contracting Officer.

AREA———

	Est Annual Qty	Unit	Unit Price	Total
a. Containerization Not Required:				
(1) Drayage included.		GCWT		
(2) Drayage Not included.		GCWT		
b. Containerization Required:				
(1) Drayage included.		GCWT		
(2) Drayage Not included.		GCWT		

(Repeat a. and b. above for additional areas as needed.)

Item 6. Goods of Extraordinary Value (Hi-Value). Service shall include inventorying (each item), packing in Government-approved, Contractor-furnished container(s), marking, banding, weighing, and cubing at owner's residence. In jurisdictions where local law prohibits the certification of portable scales, a weight certificate will not be required. Drayage, if required, will be ordered by the Contracting Officer.

AREA———

	Est Annual Qty	Unit	Unit Price	Total
a. Drayage Included		GCWT		
b. Drayage Not Included		GCWT		

(Repeat for additional areas as needed.)
See clause entitled "Drayage" for explanation.

Item 7. Storage. Storage of containerized articles shall be furnished when ordered by the Contracting Officer. Charges shall not commence earlier than the sixth (6) workday following date of transportation officer's receipt of notification of completion of containerization service. Storage charges apply for each 30-day period or fraction thereof. Date of release from storage shall not be considered in computation of storage charges.

AREA———

	Est Annual Qty	Unit	Unit Price	Total
		GCWT		

(Repeat for additional areas as needed.)

Item 8. Containers. Under this item, the Contractor shall supply the following types of containers when ordered:

AREA———

	Est Annual Qty	Unit	Unit Price	Total
Container, FED SPEC PPP-B-[illegible].		GCWT		
Air Cargo, FED SPEC PPP-B-500.		GCWT		

(Repeat for additional areas as needed.)

Item 9. Remarking and Coopering Service.

a. *Remarking for Shipments for Reconsignment or Diversion.* Service shall consist of obliteration of all old markings and stenciling of necessary information on loaded shipping containers scheduled for reconsignment or diversion when ordered by the Contracting Officer.

AREA———

	Est Annual Qty	Unit	Unit Price	Total
		ea piece		

(Repeat for additional areas as needed.)

b. *Coopering.* Service shall consist of repair of containers not to exceed 30% of total area of shipping container or cost of repairs will not exceed 50% of the container replacement cost as necessary when ordered by the Contracting Officer. Minor repair, such as replacement of bolts, renailing and rebanding shall be accomplished at no expense to the Government.

AREA ———

	Est Annual Qty	Unit	Unit Price	Total
		ea piece		

(Repeat for additional areas as needed.)

Items 10–14 Reserved (See DoD FAR Supplement 247.271-4(a)(4).)

RECAPITULATION SCHEDULE I

Schedule Total—Area ——— $———
(Repeat for each area listed.)

SCHEDULE II—INBOUND SERVICES

Item 15. Complete Service-Inbound (HHGs). Service shall include drayage to owner's residence, decontainerization and unpacking of loaded containers of household goods and placing goods in appropriate rooms as directed by owner or his designated representative, servicing appliances, assembly of any disassembled articles and removing shipping containers, barrels, boxes/crates and debris from owner's residence and drayage of empty containers to Contractor's or Government facility as directed by Contracting Officer.

AREA ———

	Est Annual Qty	Unit	Unit Price	Total
		GCWT		

(Repeat for additional areas as needed.)

Item 16. Complete Service-Inbound (HHGs). Service shall be same as Item 15 except that drayage of shipment to residence is not required.

AREA ———

	Est Annual Qty	Unit	Unit Price	Total
		GCWT		

(Repeat for additional areas as needed.)

Item 17. Complete Service-Inbound (HHGs). Service shall be same as Item 15 except removal of items from outer container will be at the Contractor's facility and articles will be drayed to owner's residence. This service will be performed only upon order of the Contracting Officer.

AREA ———

	Est Annual Qty	Unit	Unit Price	Total
		GCWT		

(Repeat for additional areas as needed.)

Item 18. Inbound Service-Contractor Facility (HHGs). Service shall include removal of items from outer shipping container(s) at the Contractor's facility and delivery of articles to property owner, motor van carrier or commercial non-temporary storage Contractor at the Contractor's facility.

AREA ———

	Est Annual Qty	Unit	Unit Price	Total
		GCWT		

(Repeat for additional areas as needed.)

Item 19. Complete Service-Extra-ordinary Value Items. Service includes decontainerization and unpacking of containers at owner's residence, and removal of shipping containers and debris from the residence. Drayage, if required, will be ordered by the Contracting Officer.

AREA ———

	Est Annual Qty	Unit	Unit Price	Total
a. Drayage Included		GCWT		
b. Drayage Not Included		GCWT		

(Repeat for additional areas as needed.)

Note: See clause entitled "Drayage" for explanation.

Item 20. Complete Service-Inbound (Unaccompanied Baggage). Service shall include drayage of unaccompanied baggage containers to owner's residence, unpacking of containers and removal of all shipping containers and debris from the residence.

AREA ———

	Est Annual Qty	Unit	Unit Price	Total
.....	.....	GCWT	.....	.....

(Repeat for additional areas as needed.)

Item 21. Complete Service-Inbound (Unaccompanied Baggage). Service shall be same as Item 20 except that drayage to residence is not required.

AREA ———

(Repeat for additional areas as needed.)

Items 25–28 Reserved (See DoD FAR Supplement 247.271–4(a)(4).)

RECAPITULATION SCHEDULE II

Schedule Total—Area ——— $———

SCHEDULE III—INTRA-CITY AND INTRA-AREA MOVERS

Item 29. Complete Service for Intra-City and Intra-Area Moves. Service shall include a premove survey, servicing of appliances, packing at owner's residence to protect household goods properly during transit, tagging of items, inventorying, loading, weighing, drayage, unloading, unpacking, and placing of each article in owner's residence (new) as directed by owner or his designated representative and removal of all empty containers and material from residence. Service shall be in conformance with provisions of MIL–STD–212D, except that all service shall be performed within times stipulated in clause entitled "Time Requirements."

AREA ———

	Est Annual Qty	Unit	Unit Price	Total
.....	.....	NCWT	.....	.....

(Repeat for additional areas as needed.)

Item 30. Storage. Storage of articles shall be furnished incident to services performed under Item 29 when ordered by the Contracting Officer. Storage charges apply for each 30-day period or fraction thereof. Date of release from storage shall not be considered in computation of storage charges.

AREA ———

	Est Annual Qty	Unit	Unit Price	Total
.....	.....	NCWT	.....	.....

(Repeat for additional areas as needed.)
(Insert when required.)

RECAPITULATION SCHEDULE III

Schedule Total-Area ——— $———.
(Repeat for each area listed.)

(End of clause)

252.247–7104 Scope of contract.

As prescribed at 247.271–4(b)(1), insert the following clause:

SCOPE OF CONTRACT (APR 1977)

The Packing and Containerization Contractor, hereafter referred to as Contractor, shall furnish services and materials for the preparation of personal property (including servicing of appliances) for movement or storage, drayage and related services. Unless otherwise indicated in the Schedule, the Contractor shall (i) furnish all materials except Government-owned containers (Container, Federal Specification PPP–B–580 and Air Cargo), all equipment, plant and labor; and (ii) perform all work in accomplishing containerization of personal property for overseas or domestic movement or storage; stenciling; cooperage; drayage of personal property in connection with other services; and decontainerization of inbound shipments of personal property. Excluded from the scope of this contract is the furnishing of like services or materials which are provided incident to complete movement of personal property when purchased by the Through Government Bill of Lading method.

(End of clause)

252.247–7105 Period of contract.

As prescribed at 247.271–4(b)(2), insert the following clause:

PERIOD OF CONTRACT (MAY 1970)

This contract shall begin 1 January 19— and shall end 31 December 19—, both dates inclusive, *Provided,* however, that any work ordered before, and not completed by, the expiration of this contract period shall be governed by the terms of this contract. Orders requiring commencement of performance more than 15 days after the expiration date shall not be placed under this contract.

(End of clause)

252.247–7106 Ordering limitation.

As prescribed at 247.271–4(b)(4), insert the following clause:

ORDERING LIMITATION (MAY 1970)

Ordering for items of supplies or services required will be placed under this contract by the Government and performed by the Contractor holding the initially awarded contract, to the extent of his guaranteed maximum daily capability. However, the Contractor may accept an additional quantity in excess of his capability to accommodate a single order. Orders for additional requirements will be placed with and performed by the next higher Contractor to the extent of his guaranteed maximum daily capability in a like manner. This procedure will be repeated until the Government's total daily requirement is fulfilled. In the event this procedure does not fulfill the Government's total daily requirement, additional orders may be offered under the contract to Contractors without regard to their guaranteed maximum daily capability.

(End of clause)

252.247–7107 Contract areas of performance.

As prescribed at 247.271–4(b)(5), insert the following clause:

CONTRACT AREAS OF PERFORMANCE (MAY 1970)

(a) All areas of performance described in (b) below will be considered to include the Contractor's facility regardless of geographical location.

(b) Service shall be performed within the following defined areas of performance which include terminals identified therein: (Define each area of performance as required; see DoD FAR Supplement 247.271–2(b).

(End of clause)

252.247–7108 Requirements.

As prescribed at 247.271–4(b)(6), insert the following paragraph:

REQUIREMENTS (APR 1984)

(f) Orders issued during the effective period of this contract and not completed within that time shall be completed by the Contractor within the time specified in the order; and the rights and obligations of the Contractor and the Government respecting those orders shall be governed by the terms of this contract to the same extent as if completed during the effective period of this contract.

(End of clause)

252.247–7109 Facilities.

As prescribed at 247.271–4(b)(7), insert the following clause:

FACILITIES (DEC 1982)

(a) As the minimum standard for qualifications of a Contractor's warehouse, it must have either (i) an acceptable automatic sprinkler system; or (ii) a supervised fire detection and reporting system. Installed fire protective systems must be accredited by the cognizant fire insurance rating organization for insurance rate credit. Additionally, the facility will be protected by an adequate water supply for fire fighting and a fire department which is responsive 24 hours a day. Statements from the cognizant fire insurance rating organization, municipal fire department, or local authority, having jurisdiction, will be used as a basis for determining the sufficiency or adequacy of a fire fighting water supply and the responsiveness of a fire department to protect a facility.

(b) The following information shall be furnished by the Contractor upon receipt of award:

Evidence of the following kinds and minimum amounts of insurance covering work herein to be performed by the Contractor. The Contractor shall maintain at least the minimum coverage stated below* throughout the contract period. Each policy shall contain an endorsement that cancellation or material change in the policy shall not be effective until after a 30-day written notice is furnished to the Contracting Officer.

(1) Workmen's Compensation Insurance $*———.

(2) Comprehensive General Liability Insurance $*——.

(3) Automobile Liability Insurance $*———

(End of clause)

*The insurance coverage specified in FAR 28.307–2 is the minimum insurance required. Additional coverage and higher limits may be required by the Contracting Officer.

252.247–7110 Performance.

As prescribed at 247.271–4(b)(8), insert the following clause:

PERFORMANCE (APR 1977)

(a) The services called for hereunder shall be performed in conformance with the latest issue of MIL–STD 212, "Preparation of Household Goods for Shipment or Storage and Related Services," in effect on date of solicitation, for Schedules I and II, unless otherwise directed by the Contracting Officer. The following are desired minimum stowage factor standards in stuffing of shipping containers:

(1) For Federal Specifications PPP–B–580 containers—5.7 net lbs. per gross cubic foot of container cube.

(2) For air cargo containers—8.9 net lbs. per gross cubic foot of container cube. Failure to meet the above standards may be cause for rejection of the service performed unless the Contractor can demonstrate the standards cannot be met. (The term "stuffing" as related to containers means loading of personal property into shipping containers.)

(b) Labor employed to perform pickup and delivery, inventorying, packing, crating, weighing, marking, loading, drayage, unpacking, blocking, bracing, and other services described herein shall be competent in the performance of such services.

(c) Inventory of shipment shall be accomplished pursuant to provisions of the latest issue of MIL–STD 212 in effect on date of solicitation.

(d) All services shall be performed in accordance with the priority order established by the Contracting Officer.

(e) MIL–STD 212, "Military Standard-Preparation of Household Goods for Shipment and Storage and Related Services," and applicable specifications referred to therein are available for reference in the local procurement or transportation offices.

(f) When pickup of shipments is part of line-haul service, the Contractor shall perform loading on freight carrier's equipment at Contractor's facility.

(End of clause)

252.247–7111 Time requirements.

As prescribed at 247.271–4(b)(9), insert the following clause:

TIME REQUIREMENTS (MAY 1970)

(a) The Contractor shall commence containerization of household goods or unaccompanied baggage at owner's residence or Contractor's facility on the date specified by the Contracting Officer. If containerization is ordered at Contractor's facility, the household goods or unaccompanied baggage shall be picked up on the date and within the hours specified. Unless a longer period is authorized by the Contracting Officer, the maximum containerization time allowed at the Contractor's facility shall be three (3) working days following specified pickup date for household goods and two (2) working days following specified pickup date for unaccompanied baggage.

(b) The Contracting Officer or his designated representative shall normally give the Contractor notice to commence containerization or to pick up household goods or baggage shipments at least twenty-four (24) hours prior to the date specified.

(c) Delivery or removal of household goods or unaccompanied baggage to or from owner's residence, or containerization of household goods or unaccompanied baggage at owner's residence, shall commence between the hours of 8:00 a.m.–12m. (noon) or 12m (noon)–5:00 p.m. as specified, Monday through Friday, officially declared National, State or local holidays excluded. The Contracting Officer may authorize performance of services at other times when agreed to by the owner or his authorized agent and the Contractor.

(d) The Contractor shall accept and pick up inbound shipments of household goods, or unaccompanied baggage, effect delivery thereof to the destination, and shall unload and unpack the same on the date and within the hours specified by the Contracting Officer during the working hours set forth above. The Contractor will notify the Contracting Officer upon arrival of a shipment but not later than the morning of the next workday. Delivery shall be effected within two (2) working days following date of receipt or notification of arrival unless otherwise specified.

(End of clause)

252.247–7112 Demurrage.

As prescribed at 247.271–4(b)(10), insert the following clause:

DEMURRAGE (MAY 1970)

The Contractor shall be liable for all demurrage, detention, or other charges accruing as a result of his failure to load or unload trucks, freight cars, freight terminals, vessel piers, or warehouses within the free time allowed under applicable rules and tariffs.

(End of clause)

252.247–7113 Vans.

As prescribed at 247.271–4(b)(11), insert the following clause:

VANS (MAY 1970)

Vans used in transporting unpacked and uncrated furniture shall be of the closed type and shall be supplied with sufficient clean pads, covers, and any other equipment to protect personal property adequately during transit and delivery. Vehicles used in transporting containerized personal property may be the open type; *Provided*, a weatherproof tarpaulin is used to protect the shipment.

(End of clause)

252.247–7114 Drayage.

As prescribed at 247–271–4(b)(12), insert the following clause:

DRAYAGE (APR 1977)

(a) Drayage under the Schedules of Items in this contract shall include all outbound or inbound hauling of loose articles.

containerized shipments and empty Government containers within the area of performance as defined in the clause entitled, "Contract Areas of Performance." Each area includes the Contractor's facility, storage warehouse other than Contractor's facility, frequently used air and surface transportation terminals, military installation shipping offices and ocean or river terminals/piers. The price of each item of service includes drayage within the area awarded, unless otherwise provided in the item.

(b) Repositioning of empty Government containers within the contractual area of performance, shall be as directed by the Contracting Officer or his designated representative at no additional cost to the Government.

(End of clause)

252.247-7115 Liability.

As prescribed at 247-271-4(b)(13), insert the following clause:

LIABILITY (JUL 1980)

(a) "Article" means any shipping piece or package and its contents.

(b) If notified within one (1) year after delivery that the owner has discovered loss or damage to his property, the Contractor agrees to indemnify the owner for loss of or damage to the owner's property which arises from any cause while it is in the Contractor's possession as follows:

(i) Non-negligent Damage. The Contractor shall indemnify owners for any loss of or damage to their property which results from any cause, other than the Contractor's negligence, at a rate not to exceed sixty cents ($.60) per pound per article.

(ii) Negligent Damage. When loss or damage is caused by the negligence of the Contractor, he shall be liable for the full cost of satisfactory repair or for the current replacement value of the article. The Contractor shall make prompt payment to the owner of the property for any loss or damage for which the Contractor is liable.

(c) In the absence of evidence or supporting documentation which places liability on a carrier or another Contractor, the destination Contractor will be presumed to be liable for the loss or damage of which it is timely notified.

(End of clause)

252.247-7116 Erroneous shipments.

As prescribed at 247.271-4(b)(14), insert the following clause:

ERRONEOUS SHIPMENTS (MAY 1977)

(a) It shall be the responsibility of the Contractor at his expense to have articles of personal property which he inadvertently packed with goods of other than the rightful owner forwarded to the rightful owner by the quickest means of transportation, as selected by the Contracting Officer.

(b) Further, it shall be the responsibility of the Contractor to insure that all shipments have been stenciled correctly. When a shipment is forwarded to an incorrect address due to incorrect stenciling by the Contractor or his personnel, the shipment shall be returned with the least possible delay to its rightful owner by a mode of transportation selected by the Contracting Officer. The Contractor shall be liable for all costs incurred including charges for preparation, drayage and transportation.

(c) It shall be the responsibility of the Contractor to deliver to the designated air or surface terminal all pieces of a shipment, in one lot, at the same time. Pieces of one lot not included in delivery and remaining at Contractor's facility after the departure of the original shipment shall be forwarded to the owner with the least possible delay by a mode of transportation selected by the Contracting Officer or his designated representative. The Contractor shall be liable for all additional transportation costs incurred in excess of what it would have cost the Government had the entire lot been shipped at the same time.

(End of clause)

252.247-7117 Additional marking instructions.

As prescribed at 247.271-4(b)(15), insert the following clause:

ADDITIONAL MARKING INSTRUCTIONS (MAY 1970)

(a) All containers of professional books, papers or equipment shall be stenciled "Professional Books, Paper, Equipment" and their weights shall be shown separately on packing lists.

(b) Unaccompanied baggage containers shall be marked as such.

(End of clause)

252.247-7118 Weight certificates.

As prescribed at 247.271-4(b)(16), insert the following clause:

WEIGHT CERTIFICATES (MAY 1970)

A weight certificate, in triplicate, from a certified scale or weightmaster shall be submitted to the transportation officer for all outbound shipments.

(End of clause)

252.247-7119 Report of lost/damaged material.

As prescribed at 247.271-4(b)(17), insert the following clause:

REPORT OF LOST/DAMAGED MATERIAL (APR 1977)

It shall be the responsibility of the Contractor when making delivery to prepare a separate report listing all articles lost or damaged and describing such loss or damage. This report will be forwarded to the transportation officer within seven (7) working days after the delivery of the goods.

(End of clause)

252.247-7120 Subcontracting.

As prescribed at 247.271-4(b)(18), insert the following clause:

SUBCONTRACTING (MAY 1970)

The Contractor shall not subcontract without the prior written approval of the Contracting Officer. The facilities of any approved Subcontractor shall meet the minimum standards required by this contract.

(End of clause)

252.247-7121 Additional services.

As prescribed at 247.271-4(b)(19), insert the following clause:

ADDITIONAL SERVICES (APR 1977)

Additional services not included in the schedule, but required for satisfactory completion of services ordered under this contract shall be provided at a rate not in excess of the rate for like services as contained in applicable Military Rate Tenders or in the absence of a Military Rate Tender, applicable tariff in effect at time of order.

(End of clause)

252.247-7200 Ocean transportation of government-owned supplies.

As prescribed at 247.507(S-70), insert the following clause:

OCEAN TRANSPORTATION OF GOVERNMENT-OWNED SUPPLIES (NOV 1963)

The Contractor shall advise the Contracting Officer of any proposed transportation by ocean vessels of Government-owned property in the possession of the Contractor or his subcontractors (including property under which title will pass to the Government prior to such transportation). Such property shall subsequently be transported only on United States-flag vessels as directed by the Contracting Officer.

(End of clause)

252.249-7000 Special termination costs.

In accordance with 249.7003(a), insert the following clause:

SPECIAL TERMINATION COSTS (FEB 1975)

(a) Notwithstanding the Limitation of Cost/Limitation of Funds clause of this contract, the Contractor shall not include in his estimate of costs incurred or to be incurred, any amount for special termination costs, as herein defined, to which the Contractor may be entitled in the event this contract is terminated for the convenience of the Government. The Contractor agrees to perform this contract in such a manner that his claim for such special termination costs will not exceed $———. The Government shall have no obligation to pay the Contractor any amount for the special termination costs in excess of this amount. Special termination costs are defined as costs only in the following categories:

(1) severance pay as provided in FAR 31.205-6(g);

(2) reasonable costs continuing after termination as provided in FAR 31.205-42(b);

(3) settlement of expenses as provided in FAR 31.205-42(g);

(4) costs of return of field service personnel from sites as provided in FAR 31.205-35 and FAR 31.205-46(c); and

(b) In the event of termination for the convenience of the Government, this clause shall not be construed as affecting the allowability of special termination costs in any manner other than limiting the maximum

amount payable therefore by the Government.

(c) This clause shall remain in full force and effect until this contract is fully funded.

(End of clause)

252.251-7000 Ordering from government supply sources.

As prescribed at 251.107, insert the following clause:

ORDERING FROM GOVERNMENT SUPPLY SOURCES (APR 1984)

(a) Contractors placing orders under Federal Supply Schedules or Personal Property Rehabilitation Price Schedules shall follow the terms of the applicable schedule and authorization and include with each order:

(1) A copy of the authorization (unless a copy was previously furnished to the Federal Supply Schedule or Personal Property Rehabilitation Price Schedule contractor) and

(2) The following statement:

This order is placed under written authorization from ———— dated ————. In the event of any inconsistency between the terms and conditions of this order and those of your Federal Supply Schedule contract or Personal Property Rehabilitation Price Schedule contract, the latter will govern.

(3) The complete address(es) to which the contractor's mail, freight, and billing documents are to be directed.

(b) If a Federal Supply Schedule contractor refuses to honor an order placed by a Government contractor under an agency authorization, the contractor shall report the circumstances to the General Services Administration, FFN, Washington, D.C. 20406, with a copy to the authorizing office.

(c) Contractors placing orders under nonmandatory schedule contracts and requirements contracts issued by GSA, Office of Information Resources Management, for automated data processing equipment, software and maintenance, communications equipment and supplies, and teleprocessing services shall follow the terms of the applicable contract and the procedures in (a)(1), (2), and (3) above.

(d) Contractors placing orders for Government stock shall—

(1) Comply with the requirements of the contracting officer's authorization, using FEDSTRIP or MILSTRIP procedures, as appropriate;

(2) Use only the GSA Form 1948-A, Retail Services Shopping Plate, when ordering from GSA Self-Service Stores;

(3) Order only those items required in the performance of their contracts; and

(4) Pay bills from Government supply sources promptly upon receipt of billings.

(e) Authorizations for subcontractors to utilize Government supply sources shall be requested only by the prime contractor and shall not be granted without approval of the prime contractor.

(End of clause)

252.251-7001 Use of interagency motor pool vehicles and related services.

As prescribed in 251.205, insert the following clause:

USE OF INTERAGENCY MOTOR POOL VEHICLES AND RELATED SERVICES (APR 1984)

(a) Authorized contractors shall submit requests for interagency motor pool vehicles and related services in writing to the appropriate GSA regional Customer Service Bureau, Attention: Motor Equipment Activity; except that requests for more than five vehicles shall be submitted to General Services Administration, FTM, Washington, D.C. 20406, and not to the regions. Each request shall include the following:

(1) Two copies of the agency authorization to obtain vehicles and related services from GSA.

(2) The number of vehicles and related services required and period of use.

(3) A list of the contractor's employees who are authorized to request vehicles and related services.

(4) A listing of the make, model, and serial numbers of contractor-owned or leased equipment authorized to be serviced.

(5) Billing instructions and address.

(b) Contractors requesting unusual quantities of vehicles should do so as far in advance as possible to facilitate availability.

(c) Contractors authorized to use interagency motor pool vehicles and related services shall comply with the requirements of 41 CFR 101-39 and the operator's packet furnished with each vehicle.

(d) Contractors shall establish and enforce suitable penalties for their employees who use or authorize the use of Government vehicles for other than performance of Government contracts.

(e) The contractor shall assume, without the right of the reimbursement from the Government, the cost or expense of any use of motor pool vehicles and services not related to the performance of the contract.

(f) Authorizations for subcontractors to utilize interagency motor pool vehicles and related services shall be requested only by the prime contractor and shall not be granted without the approval of the prime contractor.

(End of clause)

252.270-7000 Warranty exclusion and limitation of damages.

As prescribed at 270.310(a), insert the following clause:

WARRANTY EXCLUSION AND LIMITATION OF DAMAGES (FEB 1983)

Except as expressly set forth in writing in this agreement, or except as provided in the Contractor Representation clause, if applicable, and except for the implied warranty of merchantability, there are no warranties expressed or implied. In no event will the contractor be liable to the Government for consequential damages as defined in the Uniform Commercial Code, Section 2-715, in effect in the District of Columbia as of January 1, 1973; i.e., Consequential damages resulting from the seller's breach include:

(a) Any loss resulting from general or particular requirements and need of which the seller at the time of contracting had reason to know and which could not reasonably be prevented by cover or otherwise; and

(b) Injury to person or property proximately resulting from any breach of warranty.

(End of clause)

252.270-7001 Contractor representation.

As prescribed at 270.310(b), insert the following clause:

CONTRACTOR REPRESENTATION (APR 1984)

Unless the Contractor expressly states otherwise in his proposal, where functional requirements are expressly stated as part of the requirements of this solicitation, the Contractor, by responding, represents that in its opinion the system/item proposed is capable of meeting those requirements. However, once the system/item is accepted by the Government, contractor responsibility under this clause ceases. In the event of any inconsistency between the detailed specification and the functional specification contained in the solicitation, the former will control.

(End of clause)

252.270-7002 Fixed price options.

As prescribed at 270.310(c), insert the following clause:

(The data required for the "fill-ins" should be suitably highlighted, and inapplicable bracketed portions should be deleted.)

FIXED PRICE OPTIONS (APR 1984)

(a) This solicitation is being conducted on the basis that known requirements extend beyond the initial contract period (and exceed the basic quantity*) to be awarded, but due to the unavailability of funds, including statutory limitations on obligations of funds, the options cannot be exercised at the time of award of the initial contract. There is a reasonable certainty that funds will be available thereafter to permit exercise of the options. Because realistic competition for the option periods (and quantity*) is impracticable once the initial contract is awarded, it is in best interest of the Government to evaluate options in order to eliminate the possibility of a "buy-in".

(b) In order to safeguard the integrity of the Government's evaluation and because the Government is required to acquire ADPE and related items on the basis of fulfilling the systems-life requirement at the lowest overall cost, price and other factors considered, requirements for optional periods (and additional quantities*) as well as initial requirements will be evaluated for award on a fixed-price basis. Since the systems or items to be acquired under the solicitation have an expected life of ** months (hereafter referred to as "system life" or "item life", as appropriate), and since lowest system (item) life costs are synonymous with lowest overall costs, the contract resulting from a solicitation will contain options at fixed prices for renewals for subsequent periods based on fiscal years throughout the projected system (item) life (and options at fixed prices for all stated optional quantities of supplies or services not included in the initial requirements*). Despite the foregoing,

offerors are reminded that although the evaluation that will lead to contract award of the initial contract, as well as the exercise of the options, is dependent not only on the continued existence of the requirement and the availability of funds but also on an affirmative determination that each exercise of an option is in the best interest of the Government.

(c) Options included in offers submitted in response to this solicitation will be evaluated as follows:

(1) *Firm Fixed Prices.* To be considered acceptable under the solicitation, offerors must offer (i) fixed prices for the initial contract period for the initial systems or items being acquired, (ii) fixed prices or prices which can be finitely determined for each separate option renewal period, which prices must remain in effect throughout that period, and (iii) fixed prices or prices which can be finitely determined for all required option quantities.*

(2) *Evaluation of Prices.* Offers will be evaluated for purposes of award by adding the total prices of all optional periods (and all stated optional quantities*) to the total price for the initial contract period covering the initial system or items. These prices will be adjusted by the appropriate discount factors shown in *** of the solicitation document. Evaluation of option prices will not obligate the Government to exercise the options. Offers which do not include fixed or determinable system (item) life prices cannot be evaluated for the total systems-life requirement and will be rejected. Offers which meet the mandatory requirements will be evaluated on the basis of lowest overall cost to the Government, price and other factors considered. Evaluated optional features, if any, will also be evaluated.

(3) *Separate Charges.* Separate charges, in any form, are not solicited. Offers containing any charges for failure to exercise any option will be rejected.

(d) Selection of an offer shall be made on the basis of lowest overall cost, price and other factors considered, to the Government provided that the contract price reasonably represents the value of bona fide fiscal year requirements, rather than representing, to any extent, a portion of any other fiscal year's requirements. This determination with respect to the contract price shall be made after consideration of such factors as commercial catalog prices for short-term leases, offeror system startup expenses, multiyear price protection, assured system-life availability of equipment, software, and vendor support. If a determination is made that an offer does not meet these criteria, that offer cannot be accepted for award.

(e) Award of an initial contract will not obligate the Government to exercise any contractual option. Prior to exercising any option, the Government will make a determination that (i) funds are available, (ii) the requirement covered by the option fulfills an existing need of the Government, and (iii) the exercise of the option is the most advantageous method of fulfilling the Government's need, price and other factors considered.

(f) Failure to exercise an option shall not obligate the Government to pay any charges other than the contract price including exercised options.

(End of clause)

* Delete when inapplicable.

** Insert the specific number of months applicable to the solicitation.

*** Insert location in the solicitation where appropriate discount factors and the contemplated payment schedule are specified.

252.270-7003 Option to extend the term of the contract.

As prescribed at 270.310(d), insert the following clause:

OPTION TO EXTEND THE TERM OF THE CONTRACT (APR 1984)

This contract is renewable at the prices stated elsewhere in the contract, at the option of the Government, by the Contracting Officer giving written notice of renewal to the Contractor by the first day of each fiscal year of the Government or within 30 days after funds for that fiscal year become available, whichever date is the later; *provided,* that the Contracting Officer shall have given preliminary notice of the Government's intention to renew at least **** days before this contract is to expire. Such a preliminary notice of intent to renew shall not be deemed to commit the Government to renewals. If the Government exercises this option for renewal, the contract as renewed shall be deemed to include this option provision. However, the total duration of this contract, including the exercise of any options under this clause, shall not exceed ** months.

(End of clause)

** Insert the specific number of months applicable to the solicitation.

**** Insert 30 days unless a longer period is appropriate.

252.270-7004 Option for increased quantities.

As prescribed at 270.310(e), insert the following clause:

OPTION FOR INCREASED QUANTITIES (FEB 1983)

The Government may increase the items called for herein by the quantities stated and at the unit prices specified elsewhere in this contract. The Contracting Officer may exercise this option at any time within the period specified in the contract by giving written notice to the Contractor. Delivery of items added by exercise of this option shall be in accordance with the delivery schedule set forth elsewhere in this contract.

(End of clause)

252.270-7005 Discontinuance repricing.

As prescribed at 270.310(f), insert the following provision:

DISCONTINUANCE REPRICING (APR 1984)

(a) By the incorporation of this solicitation provision, the Government indicates its willingness to incorporate into the resulting contract the clause at 252.270-7006, Discontinuance of Rental and Repricing, which is an alternative to standard termination for convenience procedures in appropriate circumstances.

(b) The following example illustrates the operation of the clause:

—Monthly rental price for the period in which the discontinuance date falls for the discontinued item as stated in the contract. $90

—Monthly rental price for the item effective at the time of initial award of the system contract as stated in the vendor's ADP schedule contract (or the established commercial catalog price at the same time, if lower or if no ADP schedule contract effective. $120

—Months of rental prior to the discontinuance date during the initial or option contract period of performance in which the discontinuance date occurs. $10

—Rental charges earned during the applicable period of performance (10×$90) $900

—Discontinuance charges to be added at discontinuance date ($120−$90×10) $300

—Total rental charges plus discontinuance charges ($900+$300). $1,200

—Ceiling on total of rental changes and discontinuance repricing charges (12×$90). $1,080

—Total price during period for the discontinued item ($1,080 ceiling lower than total rental earned plus discontinuance charges). $1,080

(c) Offeror election. The undersigned offeror ——— agrees to, ——— declines, the incorporation of the Discontinuance of Rental and Repricing clause in any contract which may result from this solicitation.

(End of provision)

252.270-7006 Discontinuance of rental and repricing.

As prescribed at 270.310(g), insert the following clause:

DISCONTINUANCE OF RENTAL AND REPRICING (APR 1984)

(a) The Government may, in lieu of a termination under the Termination for Convenience of the Government clause of this contract, during the initial or any option period of performance of this contract, discontinue rental of any equipment or software on a date specified in a written notice provided to the Contractor not less than 30 days prior to the specified discontinuance date. The Government may discontinue the rental on shorter notice when agreed to by the Contractor.

(b) In the event of discontinuance of rental under (a) above, the Government shall pay termination repricing charges to the Contractor as computed in accordance with this paragraph (b). The charges shall be the remainder obtained by subtracting the contract monthly rental price effective at the discontinuance date for the discontinued equipment or software item from the monthly rental price for the item under the GSA/ADP schedule contract or the established commercial catalog price, whichever is less, effective at the time of award of the contract's initial period of performance, multiplied by the number of months the item was rented during the particular contract period of performance (initial or option) in which the discontinuance was effective.

provided, in no event shall the total of termination repricing charges and the contract rental price for the number of months the item was rented during the period in which discontinuance was effective exceed the contract price for the item for the entire period.

(c) The provisions of this clause shall prevail when notice pursuant to this clause is made.

(End of clause)

252.270–7007 Rights in privacy safeguards.

As prescribed at 270.904, insert the following clause:

RIGHTS IN PRIVACY SAFEGUARDS (APR 1984)

(a) The details of any and all safeguards that the Contractor may design or develop under this contract shall become and remain the property of the Government and shall not be published or disclosed in any manner without the express written consent of the Government.

(b) The details of any and all safeguards that may be revealed to the Contractor by the Government in the course of performing under this contract shall not be published or disclosed in any manner without the express written consent of the Government.

(End of clause)

252.270–7008 Access to contractor facilities and records—privacy safeguards inspection.

As prescribed at 270.904, insert the following clause:

ACCESS TO CONTRACTOR FACILITIES AND RECORDS—PRIVACY SAFEGUARDS INSPECTION (APR 1984)

(a) The Government shall, following presentation of advance written notice of ——— days be afforded full, free, and uninhibited access to all facilities and installations, and to all technical capabilities and operations, and to all documentation, records, and data bases for the purpose of carrying out a program of inspection to ensure continued efficacy and efficiency of safeguards against threats and hazards to data security, integrity, and confidentiality.

(b) In the event that new or unanticipated threats or hazards are discovered by either the Government or the contractor, or that existing safeguards have ceased to function, the discoverer shall immediately bring the situation to the attention of the other party. Mutual agreement shall then be reached on changes or corrections to existing safeguards or institution of new safeguards with final determination of appropriateness being made by the Government. The cost of such changes or corrections shall be a matter of negotiation. The Government's liability is limited to an equitable adjustment of cost for such changes or corrections, and the Government shall not be liable for claims of loss of business, damage to reputation or damages of any other kind arising from discovery of new or unanticipated threats or hazards, or any public or private disclosure thereof.

(End of clause)

252.270–7009 American standard code for information interchange (ASCII) system requirements.

As prescribed at 270.1103(a)(1), insert the following clause:

AMERICAN STANDARD CODE FOR INFORMATION INTERCHANGE (ASCII) SYSTEM REQUIREMENTS (APR 1984)

The system, upon receiving a hardware or software command, shall accept data on magnetic tape, paper tape, or any other input media covered by an approved Federal Information Processing Standards Publication (FIPS PUB) in ACSII code and collating sequence prescribed in FIPS PUB 1–1 and in the format prescribed in FIPS PUBS 2, 3–1, 25, 50, or other applicable FIPS PUBS. Such data may be translated, if necessary, into a form that the proposed equipment can internally process provided that upon receiving a hardware or software command the proposed equipment can produce the processed data on magnetic tape, paper tape, and other output media in the ACSII code and collating sequence prescribed in FIPS PUB 1–1 and in the format prescribed in FIPS PUBS 2, 3–1, 25, 50, or other applicable FIPS PUBS.

(End of clause)

252.270–7010 Punched paper tape readers and punches.

As prescribed at 270.1103(a)(2), insert the following clause:

PUNCHED PAPER TAPE READERS AND PUNCHES (APR 1984)

Punched paper tape equipment shall be capable of reading and punching in the prescribed American Standard Code for Information Interchange (ASCII) code and format specified in FIPS PUBS 1–1 and 2.

(End of clause)

252.270–7011 Recorded magnetic tape for information interchange (800 CPI, NRZI).

As prescribed at 720.1103(a)(3), insert the following clause:

RECORDER MAGNETIC TAPE FOR INFORMATION INTERCHANGE (800 CPI, NRZI) (APR 1984)

All 9-track digital magnetic tape recording and reproducing equipment employing ½-inch wide tape at the recording density of 800 characters per inch (CPI), including associated programs, shall provide the capability to accept and generate recorded tapes in compliance with the requirements set forth in FIPS PUB 3–1.

(End of clause)

252.270–7012 Rectangular holes in 12-row punched cards.

As prescribed at 270.1103(a)(4), insert the following clause:

RECTANGULAR HOLES IN 12-ROW PUNCHED CARDS (FEB 1983)

All punching or reading equipment utilizing 12-row 3¼-inch punched cards used in data processing, communications, and similar operations shall be capable of punching and reading rectangular holes of a size and location specified in FIPS PUB 13.

(End of clause)

252.270–7013 Hollerith punched card code.

As prescribed at 270.1103(a)(5), insert the following clause:

HOLLERITH PUNCH CARD CODE (APR 1984)

All punching or reading equipment utilizing 12-row 3¼-inch wide, rectangular hole punched cards used in data processing, communications, and similar operations shall be capable of punching or reading the Code for Information Interchange, FIPS PUB 1–1, or one of the approved Subsets of the Standard Code for Information.

(End of clause)

252.270–7014 Subsets of the standard code for information interchange.

As prescribed at 270.1103(a)(6), insert the following clause:

SUBSETS OF THE STANDARD CODE FOR INFORMATION INTERCHANGE (APR 1984)

Printers; display devices; data acquisition, preparation, and transcription devices; data communication terminal devices; punched card equipment; and other data processing or communications equipment not requiring the 128-character set of the Federal Code of Information Interchange, FIPS PUB 1–1, shall conform to one of the approved character Subsets of the Standard Code for Information Interchange, FIPS PUB 15. Printers of the "chain" or "train" or other replaceable symbol technology may also be provided with optional subsets having a different number of characters from those specified in FIPS PUB 15 in order to increase the printer's repertoire of symbols or the printer's speed as required for local use, provided the ability to interchange information by the selected character subpart (FIPS PUB 15) is retained in the data processing system.

(End of clause)

252.270–7015 Flowcharts, symbols, and their usage in information processing.

As prescribed at 270.1103(a)(7), insert the following clause:

FLOWCHARTS, SYMBOLS, AND THEIR USAGE IN INFORMATION PROCESSING (FEB 1983)

All new information processing system documentation involving the use of flowcharts that may result from this solicitation shall comply with FIPS PUB 24.

(End of clause)

252.270–7016 Recorded magnetic tape for information interchange (1600 CPI, Phase Code 0).

As prescribed at 270.1103(a)(8), insert the following clause:

RECORDED MAGNETIC TAPE FOR INFORMATION INTERCHANGE (1600 CPI, PHASE CODE O) (APR 1984)

All 9-track digital magnetic tape recording and reproducing equipment and employing

½-inch wide tape at the recording density of 1,600 characters per inch (CPI) phase encoded, including associated programs, shall provide the capability to accept and generate recorded tape in compliance with the requirements set forth in FIPS PUB 25.

(End of clause)

252.270-7017 One-inch perforated paper tape for information interchange.

As prescribed at 270.1103(a)(9), insert the following clause:

ONE-INCH PERFORATED PAPER TAPE FOR INFORMATION INTERCHANGE (APR 1984)

All one-inch wide perforated paper tape and related 8-channel paper tape punch and reading equipment which are utilized in Federal information processing systems, communication systems, and associated terminals employing perforated paper tape equipment, shall provide the capability to accept and generate tape in compliance with the requirements set forth in FIPS PUB 26.

(End of clause)

252.270-7018 Take-up reels for the one-inch perforated tape for information interchange.

As prescribed at 270.1103(a)(10), insert the following clause:

TAKE-UP REELS FOR THE ONE-INCH PERFORATED TAPE FOR INFORMATION INTERCHANGE (APR 1984)

All one-inch perforated tape take-up reels and related devices employing such reels, including paper tape readers, punches, and related tape-handling equipment, which are used in Federal information processing systems and associated equipment employing such devices, shall provide the capability to accept one of the two types of reels specified in FIPS PUB 27.

(End of clause)

252.270-7019 Software summary for describing computer programs and/or automated data systems.

As prescribed at 270.1103(a)(11), insert the following clause:

SOFTWARE SUMMARY FOR DESCRIBING COMPUTER PROGRAMS AND/OR AUTOMATED DATA SYSTEMS (APR 1984)

All documentation of computer programs and/or automated data systems shall include completed Standard Form (SF 185) summaries as described by FIPS PUB 30.

(End of clause)

252.270-7020 Optical character recognition equipment.

As prescribed at 270.1103(a)(12), insert the following:

OPTICAL CHARACTER RECOGNITION EQUIPMENT (APR 1984)

All applicable Optical Character Recognition (OCR) equipment or services shall comply with the provisions of FIPS PUB 32-1. Applicable OCR equipment also includes data input devices such as typewriters, line printers, and CRT displays. Applicable services include date preparation and processing information represented in OCR form.

(End of clause)

252.270-7021 Character set for handprinting.

As prescribed at 270.1103(a)(13), insert the following clause:

CHARACTER SET FOR HANDPRINTING (APR 1984)

All applicable Optical Character Recognition (OCR) equipment or services which are capable of reading handprinted material shall comply with FIPS PUB 33. The applicable services include data preparation and processing of information represented in OCR form.

(End of clause)

252.270-7022 Code extension technique in 7 or 8 bits.

As prescribed at 270.1103(a)(14), insert the following clause:

CODE EXTENSION TECHNIQUE IN 7 OR 8 BITS (APR 1984)

All coded character sets which require control function and/or graphic symbols that are not included in the 128 characters of ASCII shall be implemented through the use of the code extension methods and techniques as described in FIPS PUB 35.

(End of clause)

252.270-7023 Graphic representation of the control characters of ASCII (FIPS PUB 1-1).

As prescribed in 270.1103(a)(15), insert the following clause:

GRAPHIC REPRESENTATION OF THE CONTROL CHARACTERS OF ASCII (FIPS PUB 1-1) (APR 1984)

All applicable equipment that prints or displays graphic representations of any or all the control characters of ASCII (FIPS PUB 1-1) or of the characters "space" or "delete" shall comply with the requirements set forth in FIPS PUB 36. This standard also applies to equipment that prints these graphic representations on media such as perforated tape, punched cards, or listings.

(End of clause)

252.270-7024 Data Encryption Standards (DES).

As prescribed at 270.1103(a)(16), insert the following clause:

DATA ENCRYPTION STANDARDS (DES) (APR 1984)

In the event that a data encryption requirement is specified, such encryption shall be accomplished in accordance with FIPS PUB 46. Implementations of the Standard embodied in products or services offered, that are asserted to have an encryption capability in conformance with FIPS PUB 46, shall have the capability validated by the National Bureau of Standards prior to being proposed. Arrangements for validation may be made with the Systems and Software Division, National Bureau of Standards, Washington, DC 20234.

(End of clause)

252.270-7025 Recorded magnetic tape for information interchange, 6250 characters per inch (CPI) (246 CPMM), group coded recording.

As prescribed in 270.1103(a)(17), insert the following clause:

RECORDED MAGNETIC TAPE FOR INFORMATION INTERCHANGE, 6250 CHARACTERS PER INCH (CPI) (246 CPMM), GROUP CODED RECORDING (APR 1984)

All applicable digital magnetic tape recording and reproducing equipment which employs ½-inch wide (12.7mm) magnetic computer tape at the recording density of 6250 characters per inch (246 characters per millimeter) group coded recording, including associated programs, shall provide the capability to accept and generate recorded tapes in compliance with the requirements set forth in FIPS PUB 50.

(End of clause)

252.270-7026 Magnetic tape cassettes for information interchange (3.810mm (0.150 inch) tape at 32 BPMM (800 BPI, PE).

As prescribed at 270.1103(a)(18), insert the following clause:

MAGNETIC TAPE CASSETTES FOR INFORMATION INTERCHANGE (3.810MM (0.150 INCH) TAPE AT 32 BPMM (800 BPI, PE) (APR 1984)

All magnetic tape cassette recording and reproducing equipment which employs 3.810mm (0.150 inch) wide magnetic tape at the recording density of 32 bits per millimeter (800 bits per inch) using phase encoding techniques, including associated programs, shall provide the capability to accept and generate recorded tapes in compliance with the requirements set forth in FIPS PUB 51.

(End of clause)

252.270-7027 Recorded magnetic tape cartridge for information interchange, 4-track, 6.30mm (0.25 inch), 63 BPMM (1600 BPI) phase encoded.

As prescribed at 270.1103(a)(19), insert the following clause:

RECORDED MAGNETIC TAPE CARTRIDGE FOR INFORMATION INTERCHANGE, 4-TRACK, 6.30MM (0.25 INCH) 63 BPMM (1600 BPI) PHASE ENCODED (APR 1984)

All magnetic tape cartridge recording and reproducing equipment which employs 6.30 millimeter (0.25 inch) wide magnetic tape with one, two, or four independent serial data tracks at recording densities of 63 bits per millimeter (1600 bits per inch) using phase encoding techniques, including associated software, shall provide the capability to accept and generate recorded magnetic tape cartridges in the code and format as specified in FIPS PUBS 1-1 and 52.

(End of clause)

252.270-7028 Description of computer magnetic tape file properties.

As prescribed at 270.1130(a)(20), insert the following clause:

DESCRIPTION OF COMPUTER MAGNETIC TAPE FILE PROPERTIES (APR 1984)

All magnetic tape used to transmit coded information to the Federal Government shall include completed Standard Form 277 describing magnetic tape file properties as set forth in FIPS PUB 53.

(End of clause)

252.270-7029 Computer output microform (COM) formats and reduction ratios, 16mm and 105mm.

As prescribed at 270.1103(a)(21), insert the following clause:

COMPTUTER OUTPUT MICROFORM (COM) FORMATS AND REDUCTION RATIOS, 16MM and 105MM (FEB 1983)

All applicable equipment or services that may result from this solicitation that produce computer generated microforms using plain-type faces shall be in compliance with FIPS PUB 54.

(End of clause)

252.270-7030 Input/output (I/O) channel interface.

As prescribed at 270.1103(a)(22), insert the following clause:

INPUT/OUTPUT (I/O) CHANNEL INTERFACE (APR 1984)

Unless otherwise excluded, as specified in FIPS PUB 60-1, or unless a waiver is granted following the waiver procedures specified in FIPS PUB 60-1, ADP systems and peripheral subsystems that may result from this solicitation, and for which operational specifications FIPS PUBS (such as FIPS PUBS 62 and 63) have been issued and are in effect, shall conform to FIPS PUB 60-1. The correct operation of these systems' conforming interfaces shall be verified before the acceptance of all applicable ADP equipment. The Government may, at its option, apply instrumentation and test equipment at any interface required to conform with the FIPS PUB 60-1 before the acceptance of these ADP systems to ensure conformance with FIPS PUB 60-1. Waivers applicable to the requirements of this solicitation are identified elsewhere in this solicitation document.

(End of clause)

252.270-7031 Channel level power control interface.

As prescribed at 270.1103(a)(23), insert the following clause:

CHANNEL LEVEL POWER CONTROL INTERFACE (APR 1984)

Unless otherwise excluded as specified in FIPS PUB 61-1 by reference to FIPS PUB 60-1 or unless a waiver is granted following the waiver procedures specified in FIPS PUB 60-1, ADP systems and peripheral subsystems that may result from this solicitation, and for which operational specifications FIPS PUBS (such as FIPS PUB 62 and 63) have been issued and are in effect, shall conform to FIPS PUB 61-1. The correct operation of these systems' conforming interfaces shall be verified before the acceptance of all applicable ADP equipment. The Government may, at its option, apply instrumentation and test equipment at any interface required to conform to FIPS PUB 61-1 before the acceptance of these ADP systems to ensure conformance with FIPS PUB 61-1. Waivers applicable to the requirements of this solicitation are identified elsewhere in this solicitation document.

(End of clause)

252.270-7032 Operational specification for magnetic tape subsystems.

As prescribed at 270.1103(a)(24), insert the following clause:

OPERATIONAL SPECIFICATION FOR MAGNETIC TAPE SUBSYSTEMS (APR 1984)

Unless otherwise excluded, as specified in FIPS PUB 62 by reference to FIPS PUB 60-1 or unless a waiver is granted following the procedures specified in FIPS PUB 62, ADP systems and magnetic tape subsystems that may result from this solicitation shall conform to FIPS PUB 62. The correct operation of these systems' conforming interfaces shall be verified before the acceptance of all applicable ADP equipment. The Government may, at its option, apply instrumentation test equipment at any interface required to conform to FIPS PUB 61-1 before the acceptance of these ADP systems to ensure conformance with FIPS PUB 62. Waivers applicable to the requirements of this solicitation are identified elsewhere in this solicitation document.

(End of clause)

252.270-7033 Operational specifications for rotating mass storage subsystems.

As prescribed at 270.1103(a)(25), insert the following clause:

OPERATIONAL SPECIFICATIONS FOR ROTATING MASS STORAGE SUBSYSTEMS (APR 1984)

Unless otherwise excluded, as specified in FIPS PUB 63 by reference to FIPS PUB 60-1, or unless a waiver is granted following the waiver procedures specified in FIPS PUB 63, ADP systems and rotating mass storage subsystems that may result from this solicitation must conform to FIPS PUB 63. The correct operation of these systems' conforming interfaces must be verified before the acceptance of all applicable ADP equipment. The Government may, at its option, apply instrumentation and test equipment at any interface required to conform to FIPS PUB 63 before the acceptance of these ADP systems to ensure conformance with FIPS PUB 63. Waivers applicable to the requirements of this solicitation are identified elsewhere in this solicitation document.

(End of clause)

252.270-7034 BASIC language compilers.

As prescribed at 270.1103(a)(26), insert the following clause:

BASIC LANGUAGE COMPILERS (APR 1984)

BASIC compilers offered as a result of this solicitation shall implement Federal Standard Minimal BASIC, as well as any additional language elements as specified elsewhere in the requirements document (insert reference here).

(End of clause)

252.270-7035 FORTRAN language compilers.

As prescribed at 270.1103(a)(27), insert the following clause:

FORTRAN LANGUAGE COMPILERS (APR 1984)

FORTRAN compilers offered as a result of this solicitation shall implement all of the language elements of the level of Federal Standard FORTRAN specified elsewhere in this requirements document (insert reference here), as well as any additional language elements as specified elsewhere in this document (insert reference here). The compiler shall enable the user to monitor any statement appearing in the source program that does not conform syntactically to the specifications of Federal Standard full FORTRAN.

(End of clause)

252.270-7036 Magnetic tape labels and file structure information interchange.

As prescribed at 270.1103(a)(28), insert the following clause:

MAGNETIC TAPE LABELS AND FILE STRUCTURE INFORMATION INTERCHANGE (FEB 1983)

Information processing systems using 9-track tape drives and new tape label processing facilities that will be part of an information processing system shall be capable of generating and processing tape labels and file structures that conform to one of the four levels of FIPS PUB 79 if the information processing system either generates or accepts magnetic tapes for information interchange. Offerors shall specify the level of conformance and certify that a copy of the current users manual is on file with the National Bureau of Standards as required by FIPS PUB 79.

(End of clause)

252.270-7037 Data Encryption Standard (DES) modes of operation.

As prescribed at 270.1103(a)(29), insert the following clause:

DATA ENCRYPTION STANDARD (DES) MODES OF OPERATION (APR 1984)

Equipment and services that implement the Data Encryption Standard and are intended for use in the cryptographic protection of sensitive but unclassified computer data, shall use one or more of the modes of operation specified in FIPS PUB 81.

(End of clause)

252.270-7038 Microform readers.

As prescribed at 270.1103(a)(30), insert the following clause:

MICROFORM READERS (FEB 1983)

Microform readers offered as a result of this solicitation that display computer-generated microforms conforming to FIPS PUB 4 shall comply with the provisions of FIPS PUB 84.

(End of clause)

252.270-7039 Optical character recognition (OCR) inks.

As prescribed at 270.1103(a)(31), insert the following clause:

OPTICAL CHARACTER RECOGNITION (OCR) INKS (APR 1984)

Inks and preprinted forms shall be required to conform to the provisions of FIPS PUB 85 if they will be read by OCR techniques and if the interchange of machine-readable information between different systems may be required.

(End of clause)

252.270-7040 Optical character recognition (OCR) printers, readers and printed forms.

As prescribed at 270.1103(a)(32), insert the following clause:

OPTICAL CHARACTER RECOGNITION (OCR) PRINTERS, READERS AND PRINTED FORMS (APR 1984)

OCR printers, readers and printed forms shall conform to the provisions of FIPS PUB 89, when the interchange of machine sensible information between different systems is required as specified elsewhere herein.

(End of clause)

252.270-7041 Digital magnetic tape cassette equipment and associated programs.

As prescribed at 270.1103(a)(33), insert the following clause:

DIGITAL MAGNETIC TAPE CASSETTE EQUIPMENT AND ASSOCIATED PROGRAMS (APR 1984)

All digital magnetic data cassette recording and reproducing equipment which employ dual track, complementary return-to-bias (CRB), four-states recording techniques on 3.81mm (0.150 in) tape, including associated programs, shall provide the capability to accept and generate recorded tape cassettes in compliance with the requirements set forth in the Federal Standard as stated in FIPS PUB 91 and as may be specified elsewhere herein.

(End of clause)

252.270-7042 Acquisition and validation of COBOL compilers.

As prescribed at 270.1103(a)(34), insert the following clause:

ACQUISITION AND VALIDATION OF COBOL COMPILERS (APR 1984)

(a) COBOL compilers offered as a result of the requirements set forth in this solicitation shall be identified as implementing all of the language elements of at least one of the levels of Federal Standard COBOL as specified in FIPS PUB 21-1. Implementation must provide a facility for the user to optionally specify a level of Federal Standard COBOL for monitoring the source program at compile time. Monitoring may be specified for any level at or below the highest level for which a compiler is implemented and shall consist of an analysis of the syntax used in a source program against the syntax included in the level specified for monitoring. Any syntax not conforming to the specified level will be identified through a diagnostic message in the source program listing. The diagnostic message will contain at least the identification of the source program line number for each nonconforming syntax and identify the level of Federal Standard COBOL that supports the syntax or indicates that the syntax is nonstandard COBOL.

(b)(1) In addition to the specified mandatory COBOL compiler requirements stated in the specification portion of this solicitation, all COBOL compilers brought into the Federal inventory as a result of this solicitation, the most recent release of which has not been previously tested, shall be tested using the official COBOL Compiler Validation System (CCVS). The results of the validation shall be used to confirm that the compiler meets the specified requirements of the designated level of FIPS PUB 21-1, Federal Standard COBOL. To be considered responsive, the vendor shall:

(i) Certify in the proposal that all COBOL compilers offered in response to this solicitation have been submitted for validation; and

(ii) Agree to correct all deviations from the standard reflected in the Validation Summary Report (VSR) not previously covered by a waiver. All deviations shall be corrected within 12 months from the date of contract award unless a shorter period is specified elsewhere in the solicitation. If an interpretation of the standard is required that will invoke the procedures set forth in FIPS PUB 29, such requests for interpretation shall be made within 30 calendar days after contract award.

(2) Any corrections that are required as a result of decisions made under the procedures of FIPS PUB 29 shall be completed within 12 months of the date of formal notification of the interpretation to the contractor. Failure to make required corrections within the time provisions set forth above shall be deemed a failure to deliver required software. The liquidated damages as specified for failure to delivery either operating system or other software shall apply. In addition, such failure falls within the purview of the default clause. If the required corrections are not made within the time provisions specified above, subsequent proposals submitted to the Government offering the deficient COBOL compilers or subsequent uncorrected versions thereto shall be considered nonresponsive.

(End of clause)

252.270-7043 Acquisition of COBOL programs and/or programming services.

As prescribed at 270.1103(a)(35), insert the following clause:

ACQUISITION OF COBOL PROGRAMS AND/OR PROGRAMMING SERVICES (APR 1984)

Business-oriented computer application programs (i.e., those applications or programs that emphasize the manipulation of characters, files, and input/output as contrasted with those concerned primarily with computation of numeric values) offered or prepared as a result of the requirements set forth in this solicitation shall be written using one of the levels of Federal Standard COBOL as defined in FIPS PUB 21-1, including optional language elements, if any, as specified herein. If services provided include compilation(s), compilers used to perform these services shall be validated.

(End of clause)

252.270-7044 Delayed validation of compilers.

As prescribed at 270.1103(a)(36), insert the following clause:

DELAYED VALIDATION OF COMPILERS (APR 1984)

In addition to the compiler requirements specified elsewhere in this document, all compilers for Federal Standard programming languages brought into the Federal inventory as a result of this document and those compilers used by vendors to develop programs or provide services shall be tested using the official Compiler Validation System (CVS).

The results of the validation shall be used to confirm that the compiler meets the requirements of the applicable Federal Standard specified elsewhere in this document. To be considered responsive, the vendor shall:

(1) Certify in the proposal that all Federal Standard programming language compilers offered in response to this document have been submitted for validation or have been previously validated and listed in the latest Federal Software Testing Center (FSTC) Certified Compiler List. Proof of current validation will be provided in the form of a Certificate of Validation from the FSTC. Unless specified elsewhere in the requirements document, proof of submission for validation will be in the form of a letter from the FSTC scheduling the validation.

(2) Agree to correct all deviations from the applicable Federal Standard reflected in the Validation Summary Report (VSR) not previously covered by a waiver. All deviations must be corrected within 12 months from the date of contract award unless otherwise specified elsewhere in this document. If an interpretation of the Federal Standard is required that will invoke the procedures set forth in FIPS PUB 29-1, such a request for interpretation shall be made within 30 calendar days after contract award. Any corrections that are required as a result of decisions made under the procedures of FIPS PUB 29-1 shall be completed within 12 months of the date of formal notification to the contractor of the approval of the interpretation. Proof of correction in either case will be in the form of a Certificate of Validation from the FSTC for the corrected compiler. Failure to make required corrections within the time limits set forth above shall be deemed a failure to deliver required software. Any liquidated damages as specified for failure to deliver the

operating system or other software shall apply.

(End of clause)

252.270–7045. Interchange of machine processable data between and among agencies.

As prescribed at 270.1103(a)(37), insert the following clause:

INTERCHANGE OF MACHINE PROCESSABLE DATA BETWEEN AND AMONG AGENCIES (FEB 1983)

All application programs resulting from this solicitation that have been identified as those that will be interchanged, or that will record data that will be interchanged with Federal Agencies, state and local governments, industry, and the public, shall implement the following applicable approved Federal Information Processing Standards (FIPS):

FIPS PUB 4 Calendar Date.
FIPS PUB 5–1 States and Outlying Areas of the United States.
FIPS PUB 6–3 Counties and County Equivalents of the States of the United States and the District of Columbia.
FIPS PUB 8–4 Standard Metropolitan Statistical Areas.
FIPS PUB 9 Congressional Districts of the United States.
FIPS PUB 10–2 Countries, Dependencies, and Areas of Special Sovereignty.
FIPS PUB 58 Representations of Local Time of the Day for Information Interchange.
FIPS PUB 59 Representations of Universal Time, Local Time Differentials, and United States Time Zone References for Information Interchange.
FIPS PUB 66 Standard Industrial Classification (SIC) Codes.
FIPS PUB 70 Representation of Geographic Point Locations for Information Exchange.

(End of clause)

252.270–7046 Synchronous high speed data signaling rates between data terminal equipment and data communication equipment.

As prescribed at 270.1103(b)(1), insert the following clause:

SYNCHRONOUS HIGH SPEED DATA SIGNALING RATES BETWEEN DATA TERMINAL EQUIPMENT AND DATA COMMUNICATION EQUIPMENT (FEB. 1983)

All applicable equipment or services resulting from the solicitation that are employed with synchronous data communication equipment designed to operate on binary coded information over wideband communication channels shall comply with FIPS PUB 47/FED–STD 1001.

(End of clause)

252.270–7047 Bit sequencing of the code of information interchange in serial-by-bit data transmission.

As prescribed at 270.1103(b)(2), insert the following clause:

BIT SEQUENCING OF THE CODE OF INFORMATION INTERCHANGE IN SERIAL-BY-BIT DATA TRANSMISSION (FEB 1983)

All applicable equipment or services that may result from this solicitation, transmitting in a serial-by-bit, serial-by-character mode, shall be capable of bit sequencing as prescribed in FIPS PUB 16–1/FED–STD 1010 for the transmission of the Standard Code for Information Interchange, and FIPS PUB 1–1 at the interface between data terminal equipment and data communication equipment.

(End of clause)

252.270–7048 Character structure and character parity sense for serial-by-bit data communication in the code for information interchange.

As prescribed at 270.1103(b)(3), insert the following clause:

CHARACTER STRUCTURE AND CHARACTER PARITY SENSE FOR SERIAL-BY-BIT DATA COMMUNICATION IN THE CODE FOR INFORMATION INTERCHANGE (FEB 1983)

All applicable equipment that may result from this solicitation, transmitting in a serial-by-bit, serial-by-character mode synchronous or asynchronous mode, shall be capable of transmitting the character structure and sense of character partially prescribed in FIPS PUB 17–1/FEB-STD 1012 for the transmission of the Standard Code for Information Interchange, FIPS PUB 1–1 at the interface between data terminal equipment and data communications equipment.

(End of clause)

252.270–7049 Character structure and character parity sense for parallel-by-bit data communications.

As prescribed at 270.1103(b)(4), insert the following clause:

CHARACTER STRUCTURE AND CHARACTER PARITY SENSE FOR PARALLEL-BY-BIT DATA COMMUNICATION (FEB 1983)

All applicable equipment or services that may result from this solicitation, transmitting in a parallel-by-bit, serial-by-character mode, shall be capable of transmitting the character structure and sense of character parity prescribed in FIPS PUB 18–1/FED–STD 1012, when transmitting the Standard Code for Information Interchange, FIPS PUB 1–1, or an approved Federal subset (FIPS PUB 15) at the interface between data terminal equipment and data communication equipment.

(End of clause)

252.270–7050 Synchronous signaling rates between data terminal and data communication equipment.

As prescribed at 270.1130(b)(5), insert the following clause:

SYNCHRONOUS SIGNALING RATES BETWEEN DATA TERMINAL AND DATA COMMUNICATION EQUIPMENT (FEB 1983)

All applicable equipment or services resulting from this solicitation that are employed in conjunction with synchronous data communication equipment designed to operate on binary encoded information in either serial or parallel fashion over voice grade communication channels of nominal 4kHz bandwidth shall comply with FIPS PUB 22–1/FEB-STD 1013.

(End of clause)

252.270–7051 Data link control-synchronous bit-oriented data.

As prescribed at 270.1103(b)(6), insert the following clause:

DATA LINK CONTROL-SYNCHRONOUS BIT-ORIENTED DATA (APR 1984)

All equipment or services using synchronous, bit-oriented data communications offered as a result of this solicitation shall implement the class of procedures specified in FIPS PUB 71/FED–STD 1003A.

(End of clause)

252.270–7052 Time and frequency reference information in telecommunications systems.

As prescribed at 270.1103(c)(1), insert the following clause:

TIME AND FREQUENCY REFERENCE INFORMATION IN TELECOMMUNICATIONS SYSTEMS (FEB 1983)

All applicable telecommunications facilities and systems that are offered or used as a result of this solicitation shall be referenced to the time and frequency standard specified in FED–STD 1002.

(End of clause)

252.270–7053 Coding and modulation requirements for nondiversity 2400 bit/second modems.

As prescribed at 270.1103(c)(2), insert the following clause:

CODING AND MODULATION REQUIREMENTS FOR NONDIVERSITY 2400 BIT/SECOND MODEMS (FEB 1983)

All nondiversity 2400 bits per second modems offered as a result of this solicitation for use with 4kHz channels derived from either switched networks or dedicated lines shall comply with FED–STD 1005.

(End of clause)

252.270–7054 Coding and modulation requirements for 4800 bit/second modems.

As prescribed at 270.1103(c)(3), insert the following clause:

CODING AND MODULATION REQUIREMENTS FOR 4800 BIT/SECOND MODEMS (FEB 1983)

All 4800 bits per second modems (and equipment containing the 4800 bits per second modems) offered as a result of this solicitation for use with nominal 4kHz analog channels shall comply with FED–STD 1006.

(End of clause)

252.270–7055 Coding and modulation requirements for duplex 9600 bit/second modems.

As prescribed at 270.1103(c)(4), insert the following clause:

CODING AND MODULATION REQUIREMENTS FOR DUPLEX 9600 BIT/SECOND MODEMS (FEB 1983)

All duplex 9600 bits per second modems offered as a result of this solicitation for use by nominal 4kHz analog transmission channels shall comply with FED–STD 1007.

(End of clause)

252.270–7056 Coding and modulation requirements for duplex 600 and/or 1200 bit/second modems.

As prescribed at 270.1103(c)(5), insert the following clause:

CODING AND MODULATION REQUIREMENTS FOR DUPLEX 600 AND/OR 1200 BIT/SECOND MODEMS (FEB. 1983)

All two-wire duplex 600 bits per second and/or 1200 bits per second modems (except those to be acoustically coupled to telephone instruments) offered as a result of this solicitation for use with nominal 4kHz analog channels shall comply with FED–STD 1008.

(End of clause)

252.270–7057 Electrical characteristics of balanced voltage digital interface circuits.

As prescribed at 270.1103(c)(6), insert the following clause:

ELECTRICAL CHARACTERISTICS OF BALANCED VOLTAGE DIGITAL INTERFACE CIRCUITS (FEB. 1983)

All equipment using balanced voltage digital interface circuits that is offered as a result of this solicitation shall comply with the electrical characteristics addressed by FED–STD 1020A.

(End of clause)

252.270–7058 Electrical characteristics of unbalanced voltage digital interface circuits.

As prescribed at 270.1103(c)(7), insert the following clause:

ELECTRICAL CHARACTERISTICS OF UNBALANCED VOLTAGE DIGITAL INTERFACE CIRCUITS (FEB. 1983)

All equipment using unbalanced voltage digital interface circuits that is offered as a result of this solicitation shall comply with the electrical characteristics addressed by FED–STD 1030A.

(End of clause)

252.270–7059 Group 2 facsimile apparatus for document transmission.

As prescribed at 270.1103(c)(8), insert the following clause:

GROUP 2 FACSIMILE APPARATUS FOR DOCUMENT TRANSMISSION (FEB. 1983)

All Group 2 facsimile apparatus offered as a result of this solicitation for use with voice-band analog circuits shall comply with FED–STD 1061.

(End of clause)

252.270–7060 Protection against compromising emanations.

As prescribed at 270.1003(c), insert the following clause:

PROTECTION AGAINST COMPROMISING EMANATIONS (APR. 1984)

The Contractor shall certify in his bid/proposal that computer equipment, as specified by the Government, to be provided or used under this contract has been accredited to meet the appropriate security requirements of the National Communications Security Subcommittee on Compromising Emanations (SOCCE) National TEMPEST standards (NACSEM No. 5100 or NACSIM No. 5100A, "Compromising Enamations Laboratory Test Standard, Electromagnetics (U)") or other specified standard and, upon request of the contracting officer, shall provide documentation supporting this accreditation. Notwithstanding the existence of valid accreditations of equipment(s) prior to award of contract, the Government may, as part of its inspection and acceptance, conduct such additional tests at the installation site or contractor's facility to ensure that equipment/systems delivered or used under the contract satisfy the security standards of NACSEM 5100, NACSIM 5100A, or other approved standards as specified elsewhere in this solicitation/contract. Unless otherwise provided in this contract under the Warranty of Supplies or Warranty of Systems and Equipment clauses, the contractor shall correct or replace, at no cost to the Government, accepted equipment/systems found to be deficient within one year after proper installation. This applies regardless of f.o.b. point or the point of acceptance of the deficient equipment/systems. Should a modification to the delivered equipment be made by the contractor, the one-year period is applied to the modification upon its proper installation.

(End of clause)

PART 253—FORMS

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 253.1—General

253.170 Forms for use in DoD acquisition.

This part contains illustrations of Department of Defense Acquisition Forms. The DoD Forms illustrated in this Part are presented in numerical order to provide a ready source of reference. Some DD Forms that were previously illustrated in the DAR have been converted to Standard Forms and are published in the FAR or are published in the FAR as DD Forms. A few have been deleted. The Table of Contents of this Part has been annotated with the status of all DD Forms previously published in the DAR. Except as may be otherwise indicated in this DoD FAR Supplement, all DD Forms illustrated in this Part may be continued on (a) bond paper, or (b) specially constructed continuation sheets (e.g., DD Form 250c). Continuation sheets shall be annotated in the upper right-hand corner with the number of the form being continued and the serial page number of the total pages being prepared (e.g. page 5 of 15).

Editorial Note: Department of Defense Acquisition Forms are not published in the **Federal Register** or the Code of Federal Regulations. A list containing DoD Form numbers and titles follows 253.270.

Subpart 253.2—Use of Forms

253.270 Use of Forms.

Pending final reorganization of the material that was in DAR Section XVI, that material shall be retained as is and used to the extent that it is not inconsistent with explicit instructions of the FAR or this Supplement.

Editorial Note: Department of Defense Acquisition Forms are not published in the **Federal Register** or the Code of Federal Regulations. For the convenience of the user, the list set forth below includes section numbers, form numbers and titles.

53.303–70–DD–250 DD Form 250: Material Inspection and Receiving Report.
53.303–70–DD–250c DD Form 250c: Material Inspection and Receiving Report—Continuation Sheet.
53.303–70–DD–250–1 DD Form 250–1: Tanker/Barge Material Inspection and Receiving Report.
53.303–70–DD–346 DD Form 346: Raw (Basic Processed) and Semi-Fabricated Stock Form.
53.303–70–DD–347 DD Form 347: Bill of Materials for—Sub-Contracted Parts—Purchased Parts—Government-Furnished Property.
53.303–70–DD–350 DD Form 350: Individual Procurement Action Report.
53.303–70–DD–375 DD Form 375: Production Progress Report.
53.303–70–DD–375c DD Form 375c: Production Progress Report (Continuation).
53.303–70–DD–375–2 DD Form 375–2: Delay in Delivery (Flash Notice).
53.303–70–DD–416 DD Form 416: Purchase Request for Coal, Coke or Briquettes.
53.303–70–DD–428 DD Form 428: Communication Service Authorization.
53.303–70–DD–448 DD Form 448: Military Interdepartmental Purchase Request.
53.303–70–DD–448–2 DD Form 448–2: Acceptance of MIPR.
53.303–70–DD–558–1 DD Form 558–1: Bidder's Mailing List Application Supplement.
53.303–70–DD–879 DD Form 879: Statement of Compliance.
53.303–70–DD–882 DD Form 882: Report of Inventions and Subcontracts (Pursuant to "Patent Rights" Contract Clause).
53.303–70–DD–1057 DD Form 1057: Monthly Procurement Summary of Actions $25,000 or Less.

53.303–70–DD–1114 DD Form 1114: Instructions for Use of Contract Termination Settlement and Inventory Schedule Forms.
53.303–70–DD–1131 DD Form 1131: Cash Collection Voucher.
53.303–70–DD–1149 DD Form 1149: Requisition and Invoice/Shipping Document.
53.303–70–DD–1155 DD Form 1155: Order for Supplies or Services/Request for Quotations.
53.303–70–DD–1155r DD Form 1155r: General Provisions.
53.303–70–DD–1155r–1 DD Form 1155r–1: Reverse of Order for Supplies or Services/Request for Quotations—Foreign.
53.303–70–DD–1155c–1 DD Form 1155c–1: Order for Supplies or Services (Commissary Continuation Sheet).
53.303–70–DD–1342 DD Form 1342: DoD Property Record.
53.303–70–DD–1348 DD Form 1348: DoD Single Line Item Requisition System Document (Manual).
53.303–70–DD–1348m DD Form 1348m: DoD Single Line Item Requisition System Document (Mechanical).
53.303–70–DD–1348–1 DD Form 1348–1: DoD Single Line Item Release/Receipt Document.
53.303–70–DD–1384 DD Form 1384: Transportation Control and Movement Document.
53.303–70–DD–1419 DD Form 1419: DoD Industrial Plant Equipment Requisition.
53.303–70–DD–1423 DD Form 1423: Contract Data Requirement List.
53.303–70–DD–1425 DD Form 1425: Specifications and Standards Requisition.
53.303–70–DD–1473 DD Form 1473: Report Documentation Page.
53.303–70–DD–1484 DD Form 1484: Post-Award Conference Record.
53.303–70–DD–1499 DD Form 1499: Report of Individual Contract Profit Plan.
53.303–70–DD–1507 DD Form 1507: Department of Defense Work Stoppage Report.
53.303–70–DD–1524–5 DD Form 1524–5: Pre-Award Survey of Offeror Part V—Monitor Report.
53.303–70–DD–1535 DD Form 1535: Request/Approval for Authority To Advertise.
53.303–70–DD–1547 DD Form 1547: Weighted Guidelines Profit/Fee Objective.
53.303–70–DD–1564 DD Form 1564: Pre-Award Patent Rights Documentation.
53.303–70–DD–1565 DD Form 1565: Request for Authorization of Additional Classification and Rate.
53.303–70–DD–1566 DD Form 1566: Statement and Acknowledgment.
53.303–70–DD–1567 DD Form 1567: Labor Standards Interview.
53.303–70–DD–1568 DD Form 1568: Labor Standards Investigation Summary Sheet.
53.303–70–DD–1592 DD Form 1592: Contract Cross Reference Data.
53.303–70–DD–1593 DD Form 1593: Contract Administration Completion Record.
53.303–70–DD–1594 DD Form 1594: Contract Completion Statement.
53.303–70–DD–1597 DD Form 1597: Contract Closeout Check-List.
53.303–70–DD–1598 DD Form 1598: Contract Termination Status Report.
53.303–70–DD–1635 DD Form 1635: Plant Clearance Case Register.
53.303–70–DD–1637 DD Form 1637: Notice of Acceptance of Inventory.
53.303–70–DD–1638 DD Form 1638: Report of Excess and Surplus Contractor Inventory.
53.303–70–DD–1639 DD Form 1639: Scrap Warranty.
53.303–70–DD–1640 DD Form 1640: Request for Plant Clearance.
53.303–70–DD–1641 DD Form 1641: Disposal Determination/Approval.
53.303–70–DD–1651 DD Form 1651: Industrial Equipment Modernization Program—Post Analysis Report.
53.303–70–DD–1653 DD Form 1653: Transportation Data for IFBs and RFPs.
53.303–70–DD–1654 DD Form 1654: Evaluation of Transportation Cost Factors.
53.303–70–DD–1659 DD Form 1659: Application for U.S. Government Bill(s) of Lading/Export Traffic Release.
53.303–70–DD–1660 DD Form 1660: Management Control Systems Summary List.
53.303–70–DD–1662 DD Form 1662: Report of Government (DOD) Facilities.
53.303–70–DD–1664 DD Form 1664: Data Item Description.
53.303–70–DD–1665 DD Form 1665: Solicitation, Offer, and Award (Overseas).
53.303–70–DD–1707 DD Form 1707: Information to Offerors or Quoters.
53.303–70–DD–1784 DD Form 1784: Small Purchase Pricing Memorandum.
53.303–70–DD–1861 DD Form 1861: Contract Facilities Capital and Cost of Money.
53.303–70–DD–2025 DD Form 2025: Packaging Change Recommendation/Approval.

SUBCHAPTER I—AGENCY SUPPLEMENTARY REGULATIONS

PART 270—ACQUISITION OF COMPUTER RESOURCES

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 270.1—General

270.101 Procurement authorities.

(a) *General Services Administration.* Pub. L. 89–306, 40 U.S.C. 759, authorizes and directs the Administrator of the General Services Administration to provide for the economic and efficient purchase, lease, and maintenance of automatic data processing equipment (ADPE) (see Subpart 270.2) by Federal agencies, subject to the fiscal and policy control of the Office of Management and Budget (OMB). Policies and procedures for acquisitions for which procurement authority is vested in GSA are contained in Subpart 270.3.

(b) *10 U.S.C. 2315.* Section 908 of the DoD Authorization Act, 1982 (Pub. L. 97–86) added Section 2315 to Title 10, United States Code which provides that the provisions of 40 U S.C. 759 are not applicable to DoD procurements of ADPE systems, components, and services if the function, operation or use:

(1) Involves intelligence activities;

(2) Involves cryptologic activities related to national security;

(3) Involves the command and control of military forces;

(4) Involves equipment that is an integral part of a weapon or weapon system; or

(5) Is critical to the direct fulfillment of military or intelligence missions, excluding routine administrative and business applications (including payroll, finance, logistics, and personnel management applications). Policies and procedures for acquisitions under 10 U.S.C. 2315 are contained in Subpart 270.4.

(c) *Other acquisitions of computer resources.* Certain acquisitions do not fall within the scope of either (a) or (b) above. Such acquisitions include computer systems and components, including computer items modified to Government specifications at the time of production, which are specially designed (not configured) to the extent that:

(1) They cannot be used to process a variety of problems or applications; or

(2) They can only be used as an integral part of a non-computer system. In addition, acquisitions by DoD contractors, acquisition of printing services utilizing computer technology, acquisition of computers as an integral part of a non-computer system, and acquisition of computer support services fall within the scope of these "other acquisitions." Policies and procedures for these "other acquisitions" are contained in Subpart 270.6, FAR Part 8.8, or Subpart 270.5.

270.000 Scope.

This Part prescribes the policies and procedures for Department of Defense (DoD) and its contractors' acquisition of computers, computer components, software, maintenance services, certain other services, and computer supplies. Separate subparts address acquisition when the procurement authority is vested in the General Services Administration, or is within the provisions of 10 U.S.C. 2315, or when the acquisition does not fall within the scope of either General Services Administration or 10 U.S.C. 2315 authority.

(d) *Software.* The authority to acquire commercially available software (see 270.200) is vested in the General Services Administration and shall be acquired in accordance with Subpart 270.3 unless within the scope of 10 U.S.C. 2315, in which case the commercially available software shall be acquired in accordance with Subpart 270.4. Acquisitions of all other software shall be in accordance with Subpart 270.5.

Subpart 270.2—Definitions

270.200 Scope of subpart.

The definitions in this subpart apply only to acquisition within the scope of Part 270.

"Automatic Data Processing Equipment (ADPE)" means general purpose, automatic data processing components and the equipment systems created from them, regardless of use, size, capacity or price, that are designed to be applied to the solution or processing of a variety of problems or applications and are not specially designed (rather than configured) for any specific application.

"ADP Fund" means a financing mechanism administered by GSA and which, subject to GSA approval, is available without fiscal year limitation for financing the acquisition of ADPE and related items by lease, purchase, transfer, or otherwise.

"Agency Procurement Request (APR)" means a request by a DoD component for GSA to contract for ADPE, commercially available software, or maintenance services or for GSA to delegate the authority to contract for these items.

"Benchmark" means a problem or series of problems used to evaluate the performance of computers and/or software relative to the contract specifications.

"Computer Equipment" means electronic devices which perform logical, arithmetic, or storage functions through the use of software.

"Commercially Available Software" means software developed at private expense and available in the commercial market through lease or purchase (including licensing arrangements) from a concern representing itself to have ownership and/or marketing rights in the software. Software which is furnished as part of the computer but, is separately priced from the computer, is included in this category.

"Conversion Costs" means those costs that are directly related to the conversion from installed computer resources to replacement computer resources. In addition to project management costs, conversion costs shall include, but are not limited to:

(a) Conversion of the following software by reprogramming, recoding, or translation:

(1) Existing software written in Federal standard or other ANSI standard higher-level language;

(2) Application software written in assembly or other nonstandard languages that will continue to meet essential agency mission needs without redesign, provided that continued use of the nonstandard software can be justified and the file is documented with the justification prior to incorporation into the software conversion study;

(3) Mission-essential application software to be developed for operational use before the replacement is installed (or before commercial computer services are procured), provided the software is written in Federal standard or other ANSI standard languages;

(b) Conversion of data bases, data base design changes, and data base management systems to the extent necessary to permit the continued use of existing application software;

(c) Firmware required solely to permit the continued use of application software;

(d) Site preparation and modifications to installed environmental controls;

(e) Parallel operation of the old system during the conversion process, including offsite data processing support;

(f) Travel and training expenses, including pay and fringe benefits of Government employees during attendance at formal classroom training courses; and

(g) Other general and user expenses directly related to the conversion effort; e.g., conversion planning, preparation and management, additional supplies, and any additional general-purpose software required to support the conversion.

"Delegation of Procurement Authority (DPA)" means a written notification from GSA to a DoD component in response to an APR, granting contracting authority to the DoD component.

"Equipment Technology Update" means an acquisition resulting from an obsolescence review of an ADPE system which establishes that it would be more economic and efficient over the remaining systems life to replace some or all components of that system. This type of acquisition does not necessarily require a current requirements analysis or software conversion study.

"Evaluated Optional Features" means those contractual conditions and technical requirements which are established in the solicitation but which do not have to be bid (offered) in order to be responsive (acceptable). Each evaluated optional feature in the solicitation must reflect its relative value to the Government.

"Maintenance Services" means those examinations, testing, repair, or part replacement functions performed to:

(a) Reduce the possibility of malfunction (preventive maintenance);

(b) Correct a malfunction (remedial maintenance); or

(c) Modify in a minor way (field engineering change or field modification).

"Noncompetitive Procurement" means a procurement for which the minimum needs are so restrictive that there is only one known manufacturer capable of satisfying the minimum needs. Included in this type of procurement are:

(a) Sole source procurements; and,

(b) Specific make and model procurements (notwithstanding the fact that there may be more than one bid (offer) thus creating price competition).

"Obsolescence Review" means a review to determine whether existing computer resources are economically or technically obsolete. Indications of economic and technical obsolescence include:

(a) Maintenance service or parts are becoming unavailable or are no longer being provided by the original equipment manufacturer (OEM);

(b) An operating system is or will no longer be supported by the OEM;

(c) Degradation in equipment reliability;

(d) Maintenance costs are accounting for an increasingly greater portion of operating costs;

(e) Energy consumption, including necessary environmental control, is relatively high;

(f) System throughput and processing turn-around are too slow, and flexibility is limited for the mission requirement;

(g) The equipment is two or more production cycles behind the present product line.

"Remote Terminal Emulation" means a means of evaluating the teleprocessing performance of an ADPE system by use of components external to the ADPE system under evaluation. Workload is introduced to the ADPE system by components external to the ADPE system and the performance of the ADPE system is recorded for evaluation to determine the teleprocessing performance of the ADPE system.

"Software" means a series of instructions, in a form acceptable to a

computer, which causes a computer to perform specified operations.

"Software Conversion Study" means a study of the effort and costs required to convert software from the existing computer system to the replacement computer system.

"Specifications" means specifications for the acquisition of computer resources. Such specifications may consist of one or more of the following types:

(a) *Brand-name or equal.* The purchase description refers to one or more specific commercial products identified by brand name and make or model number or other appropriate nomenclature by which such products are offered for sale to the public by the particular manufacturer, producer, or distributor. These purchase descriptions should set forth those salient physical, functional, or other characteristics of the brand name product(s) which are essential to meet the needs of the Government. Prospective contractors must be given the opportunity to offer products other than those specifically referenced by brand name if such other products will meet the needs of the Government in essentially the same manner as those referenced.

(b) *Equipment performance requirements.* A statement of those minimum use output requirements such as the amount of data that needs to be stored or processed within a given time and operational reliability, supplemented to the extent necessary with hardware factors (devoid of as much specific vendor orientation as possible) such as, cycle time, computing speed, tape read and/or write speed, printer speed, size of memory, expandibility (modularity), and related software which are a measure of the operating capability of equipment and which, when applied to the functional specifications, provided a quantitative measure of the operating time and capacity required to process the applications involved on that equipment.

(c) *Functional specifications.* The delineation of the objectives which the system is intended to accomplish and the data processing requirements underlying that accomplishment. A description of the data processing requirements should include a description of the data output and its intended uses, the data input, the data files and record content, the volumes of data, the processing frequencies, timing, and such other factors as may be necessary to provide a full description of the system.

(d) *Plug compatible.* A plug (plug-to-plug) compatible purchase description is similar to a brand name or equal purchase description. The purchase description refers to one or more specific commercial products identified by brand name and make or model number or other appropriate nomenclature and sets forth those salient physical, functional, or other characteristics of the brand name product(s) which are essential to meet the needs of the Government. Unlike an item offered under a brand name or equal purchase description, a plug compatible item need not perform its functions in essentially the same manner as the referenced product; however, it must perform the same functions as the referenced product.

(e) *Specific make and model.* A purchase description under which only a specific manufacturer's make and model (or other appropriate nomenclature by which such products are offered for sale to the public by the particular manufacturer, producer, or distributor) is acceptable.

"Systems or Items Life" means a forecast or projection of the period of time that begins with the installation of the systems or items and ends when the need for such systems or items has terminated. Systems or items life is established by the Government on the basis of requirements and is usually set forth in the solicitation. Systems or items life is not necessarily synonymous with the actual life of the systems or items.

Subpart 270.3—Acquisitions Under General Services Administration (GSA) Authority

270.300 Scope of Subpart.

This Subpart sets forth policies and procedures for contracting by the Department of Defense for automatic data processing equipment, commercially available software, maintenance services, and certain other services and supplies, when procurement authority is vested in the General Services Administration (GSA).

270.301 Policy.

(a) Pub. L. 89–306, 40 U.S.C. 759, authorizes and directs the Administrator of the General Services Administration to provide for the economic and efficient purchase, lease, and maintenance of automatic data processing equipment (ADPE) by Federal agencies, subject to the fiscal and policy control of the Office of Management and Budget (OMB). The statute specifically provides that the authority conferred upon the Administrator of the General Services Administration shall not be construed as to impair or interfere with the determination by agencies of their individual requirements or the use made of ADPE or components thereof by an agency.

(b) The authority cited in (a) above does not extend to those acquisitions described in 270.101 (b) and (c). These acquisitions shall be accomplished in accordance with 270.4 and 270.5.

270.302 Procurement authority.

This Section prescribes the applicable procedures when procurement authority is vested in the General Services Administration.

270.302–1 Application.

When a requirement exists for ADPE, commercially available software, or maintenance services, as defined in 270.2, an Agency Procurement Request (APR) must be submitted to the GSA prior to the initiation of any contract action, unless the requirement meets an exception set forth below. In response to an APR, the GSA may contract or issue a Delegation of Procurement Authority (DPA). For the procedures to be followed in submitting the APR, see 270.303–1. At the option of the DoD Component, abbreviated procedures promulgated by GSA may be substituted for those described herein.

270.303–2 Exceptions.

Contracts may be made without the prior approval of the GSA under the following conditions:

(a) *Automatic data processing equipment.* Except for contracts involving the GSA ADP Fund (see 270.321), excess leased ADPE (see 270.14), or the acquisition of hardware monitors for measuring computer system performance, DoD may contract for ADPE without prior approval of GSA, provided that at least one of the following conditions is met:

(1) The contract will occur by placing a delivery order against an applicable GSA requirements contract;

(2) The contract will occur by placing a delivery order against a GSA Schedule contract, provided that:

(i) The order is placed under the terms and conditions of the contract;

(ii) The order is within the maximum order limitation (MOL) of the applicable contract;

(iii) The total purchase price of the item(s) covered by the order does not exceed $300,000.

(Note: Even though the item(s) are to be rented or leased, the purchase price shall be used to determine if the dollar value of the order falls within the $300,000 threshold); and

(iv) The requirements set forth in 270.314 on the use of GSA Schedule contracts for ADP are met; or

(3) The value of the contract does not exceed:

(i) $2,500,000 purchase price, or $1,000,000 annual rental charge (including attendant maintenance costs) for a competitive procurement;

(ii) $250,000 purchase price, or $100,000 annual rental charge (including attendant maintenance costs) for a noncompetitive procurement.

(4) The acquisition is an "equipment technology update" (see 270.2) action resulting from a comparative cost analysis made in connection with an obsolescence review (see 270.2) if:

(i) The situation reviewed was limited to processing existing workload on installed old technology equipment;

(ii) The resulting technology update capability will not exceed the reviewed old technology capability by more than 50 percent;

(iii) An immediate increase in economy and efficiency can be realized without significant disruption in the continuing satisfaction of the need; and

(iv) Either (A) no new, replacement, or augmented equipment system is known or planned beyond the existing system life for the reviewed ADP equipment system or (B) a new, replacement, or augmented equipment system has been identified and is definitively planned for acquisition action on a competitive basis, but the contract award will be far enough in the future to allow significant economy and efficiency to be realized in the interim period.

(b) *Software.* After compliance with 270.1304, DoD may contract for commercially available software, including software performance monitoring packages, for use with ADPE without approval of GSA or the Federal Computer Performance Evaluation and Simulation Center (FEDSIM), provided that at least one of the following conditions is met:

(1) The contract will occur by placing a delivery order against an applicable GSA requirements contract;

(2) The contract will occur by placing a delivery order against an applicable nonmandatory GSA Schedule contract under the terms and conditions of that contract;

(3) The procurement is to be made by normal solicitation procedures and the total value of the procurement, for the specific software package(s), does not exceed:

(i) $1,000,000 for competitive acquisitions; or

(ii) $100,000 for noncompetitive acquisitions; or

(4) The software is provided with and is not separately priced from the ADPE.

(c) *Maintenance services.* The DoD may contract for maintenance services without approval of GSA when:

(1) Such services are available under the terms and conditions of an applicable GSA Schedule contract; or

(2) The maintenance charges do not exceed $1,000,000 annually for a competitive procurement, or $100,000 annually for a noncompetitive procurement.

(d) *Services.* GSA approval is not required for other services.

270.303 Contracting procedures.

This section sets forth the procedures for performing contracting when procurement authority is vested in the GSA. Prior to issuance of the solicitation, the contracting officer shall insure that a DPA has been obtained, or that the acquisition falls within one of the exceptions.

270.303-1 Submission(s) of agency procurement requests (APR).

If it is determined that the conditions of the contemplated contracting action are not covered by the blanket delegation of contracting authority provisions of 270.302, or if the conditions of the action change during the contracting process so that those provisions become inapplicable, two copies of the APR and other applicable documents shall be forwarded to the General Services Administration (KMA), Washington, DC 20405. The APR shall be signed by an official who has been authorized to initiate the acquisition action. In addition, the APR shall contain the name and telephone number of an individual within the DoD Component who shall act as the point of contact for GSA. The APR shall include, as applicable:

(a) *DoD component information.* DoD Component name, address, names and telephone numbers of appropriate officials.

(b) *Project title and description.*

(1) Name or designation of the ADPE system.

(2) Description of the requirement. Indicate whether it is a new, an addition to, or a modification of a current ADPE system.

(3) Estimated system/item life.

(4) Estimated system/item life cost.

(5) Locations (city and state) which require user access to the ADPE system or where the equipment is to be installed, if appropriate.

(6) Fiscal year and quarter during which the solicitation is expected to be released.

(7) Expected contract award date.

(c) *Contracting action planning.*

(1) Budgeted value of the acquisition in the request to OMB, indicating whether implicitly or explicitly described, including fiscal year involved.

(2) A summary of the alternatives considered to meet the requirement, the related costs and the basis for the alternative(s) selected.

(3) If the GSA Teleprocessing Services Program (TSP) is used as the source of supply, indicate the contracting arrangement contemplated (Multiple Award Schedule (MAS) or Basic Agreement (B/A), and type (full, interactive, or remote batch)).

(4) Conclusions of the performance evaluation for the currently installed ADPE system, when applicable.

(5) A statement that available resources have been screened and none are available to satisfy the requirement.

(6) Documentation regarding telecommunications, when applicable.

(7) Conclusions of the software conversion study, when applicable.

(8) Unique software, maintenance, and support requirements, if any.

(9) Evidence that site construction/modification by GSA is or is not required. One of the following statements shall be used for this purpose:

(i) The acquisition of this equipment will not require site construction or modification by GSA; or

(ii) The acquisition of this equipment will require site construction/modification by GSA which must be completed by (*date*) and notification and information, as applicable, has been/will be submitted to GSA on (*date*).

(10) One of the following statements regarding the Privacy Act of 1974:

(i) Equipment or services identified by this request will not be used to operate a system of records on individuals to accomplish an agency function.

(ii) Equipment or services identified by this request will be used to operate a system of records on individuals to accomplish an agency function and all applicable provisions of the Privacy Act have been complied with.

(11) A brief description of the primary agency programs that the equipment or services will support.

(12) Computer security requirements, where applicable, as certified by the responsible official.

(d) *Acquisition strategy.*

(1) Description of conversion management planning actions.

(2) Type of specification.

(3) The basis and documentation to support the use of brand name or equal, plug compatible, or specific make and

model specification, when applicable (see 270.2).

(4) The basis and documentation to support a contemplated noncompetitive action, when applicable. Specifically, the justification must address:

(i) The critical service, unique features, or mandatory requirements dictated by the intended use that limits the acquisition to a noncompetitive procurement (the overriding necessity of these competition-limiting requirements shall be clearly identified);

(ii) The steps taken which led to the conclusion that no other known or probable source of supply exists; and

(iii) The factors which preclude the development of specifications or the determination of the requirement in a form suitable for competition.

(5) The documentation to support a dedicated teleprocessing system strategy, when applicable.

(6) If the GSA TSP is used as the source of supply, source selection information, as follows:

(i) List of requirements (mandatory and evaluated optional features, if any);

(ii) Other elements to be evaluated;

(iii) Summary description of any benchmark and the method for developing cost information from the benchmark results, or a description of how cost information will be determined if a benchmark is not used; and

(iv) The method to be used for combining all cost elements to determine the lowest overall system-life cost.

(7) If remote terminal emulation is to be used, provide justification as set forth in 270.320.

(e) *Exceptions or deviations.* Provide a statement that all applicable regulations have been reviewed and complied with, or identify and justify deviations.

(f) *Remarks.* Provide additional information concerning any of the above items or other special conditions associated with the action deemed necessary for understanding of the APR.

(g) *References.* Provide references to relevant past GSA authorizations, meetings, telephone discussions, etc.

(h) *Supplemental submissions.* If, prior to award, the requirement or any of the contract planning or strategy elements of an APR change materially from data submitted in the APR, irrespective of whether before or after authorization is received from GSA to proceed, promptly provide a supplementary APR submission to GSA containing pertinent information and referencing the basic APR.

270.303-2 GSA action on APR.

(a) After review of the APR and the documentation submitted, and subject to the right of the DoD Component to determine its individual ADPE, commercially available software, and maintenance requirements, including the development of specifications for and the selection of the types and configurations of equipment needed, the Assistant Administrator for Information Resources Management, GSA or his designee, will:

(1) Delegate to the DoD Component authority to contract;

(2) Delegate to the DoD Component the authority to contract and provide for GSA participation in the contracting to the extent deemed necessary under the circumstances; or

(3) Provide for the contracting by GSA, or otherwise obtain the requirement on behalf of the DoD Component.

(b) A copy of the APR and the GSA response and other related documentation prescribed by the DoD Component shall be made a part of the contract file. Action will be taken by GSA within 20 workdays after receipt of full information contained in an APR or supplement thereto. Upon expiration of this 20-workday period, plus 5 calendar days for mail lag, the DoD Component may proceed with the acquisition as if a DPA had, in fact, been granted. This 20-workday period is subject to written modification by GSA in the event that, after review of the APR data, it is found not to contain the full information required. To establish a common understanding of the 20-workday period, GSA will provide written vertification within this period that identifies the date of receipt of the APR or supplemental data. In the event that unusual circumstances surrounding the acquisition dictate that a longer period of time is required for GSA to complete its appraisal, it will so notify the DoD Component and, under these circumstances, the automatic DPA rule shall not apply.

(c) APR submissions to GSA are not required to exercise a renewal option within the systems life of a previous authorization.

(d) Changes within the scope of a change provision in the contract do not require an additional DPA (including purchase orders under the Multiple Award Schedule (MAS) or contracts using the Basic Agreement (B/A) in the TSP). Any changes shall be within the systems life of the requirement as specified in the APR. A new DPA is required when requirements exceed the contract quantities (including options) by more than 25 percent.

270.303-3 GSA contracting for DoD.

When GSA acquires ADPE or related items for DoD, the contracting is a joint endeavor. In this case the DoD Component shall:

(a) Submit documentation to GSA including the requirement, systems or items life, the technical specification, and justification to support negotiated contracting;

(b) Prepare the technical portion of the solicitation and define any unique requirements;

(c) Provide necessary technical personnel (and contracting personnel, if desired) as members of the contract negotiating team;

(d) Prepare a selection plan and submit it to the GSA contracting officer prior to issuance of the solicitation;

(e) Evaluate proposals from a technical point of view and arrange for offerors' oral presentations, when appropriate;

(f) Provide copies of correspondence to the GSA contracting officer when authorized to communicate directly with offerors;

(g) Determine the technical capability of the items offered to meet the requiring activity's requirements, technical specifications, and systems or items life. This responsibility shall include the determination of whether the proposals are technically acceptable or unacceptable. The results of these determinations shall be transmitted to the GSA contracting officer to enable the contracting officer to take appropriate action with the offerors;

(h) Select the lowest overall cost item(s) and transmit this information with the necessary supporting documentation to the GSA contracting officer. In the event a conclusive judgment cannot be made on the basis of lowest overall cost, a determination and findings to this effect shall be prepared before any other factors are used as a basis for selection;

(i) Provide the following administrative information to the GSA contracting officer along with the data required in (h) above:

(1) Finance data (e.g., paying office, and fund citation);

(2) Contract distribution list and addresses; and

(3) Identity of the successor contracting office.

(j) Assist the GSA contracting officer in debriefing offerors, when debriefings are requested;

(k) If required, place the delivery order(s);

(l) Accomplish any other task not included above which will further the joint contracting objective or expedite

completion of the contract action at the DoD Component's discretion and with GSA concurrence; and

(m) Administer the contract in accordance with the terms and conditions thereof.

270.304 Small purchases.

The provisions of Part 213 apply when the aggregate amount of any one requirement for ADPE, commercially available software, or maintenance services does not exceed $25,000 annually. ADP schedule contracts may be used to procure FSC Group 70 items.

270.305 Restrictions on the use of simulation in the ADPE contracting process.

(a) Data structured for simulation purposes shall not be the only means of describing data processing requirements in solicitation documents. Simulation data shall be accompanied by a narrative description of the objectives, workload, and any available application logic diagrams.

(b) Solicitation documents should not be structured in such a way as to require offerors to use a specific computer system simulator in order to submit their offers. When offerors submit computer simulation as part of their offers, they shall be required to describe clearly the simulation use and the make and model of the computer on which the simulation was run.

(c) Offers should not be considered nonresponsive or unacceptable solely on the basis of simulation results.

(d) Procedures for simulation and computer performance evaluation services are prescribed in Departmental procedures.

270.306 Publicizing contract actions.

(a) To ensure that appropriate competition is obtained, synopses of proposed contracts for ADPE, commercially available software, and maintenance services shall be publicized in the Commerce Business Daily (CBD) in accordance with the provisions of FAR Part 5. Notwithstanding the exception under FAR 5.202, a requirement which may result in an order against a GSA ADP Schedule contract shall be synopsized in accordance with 270.314 and 270.315.

(b) The GSA centralized Bidders Mailing List (BML) for Federal Supply Classification (FSC) Group 70 may be used for competitive ADPE and commercially available software and maintenance service acquisitions. DoD Components may obtain the GSA BML by a written request to the General Services Administration (8BR), Building 41, Denver Federal Center, Denver, Colorado 80225. The request shall include the applicable class and BML code number(s), listed below:

7010–0001	ADPE Configuration
7020–0001	ADP Central Processing Unit (CPU, Computer), Analog
7021–0001	ADP Central Processing Unit (CPU, Computer), Digital
7022–0001	ADP Central Processing Unit (CPU, Computer), Hybrid
7025–0001	Memory-Magnetic Storage
7025–0002	Magnetic Tape Subsystems
7025–0003	Magnetic Disk Subsystems
7025–0004	Printers, High Speed (ADP)
7025–0005	Paper Tape Devices
7025–0007	Interactive Display
7025–0008	Interactive Graphics
7025–0009	Interactive Hard Copy
7025–0010	Other ADP Input/Output and Storage Devices
7030–0001	ADP Software—Operating System
7030–0002	ADP Software—Application Programs
7030–0003	ADP Software—Data Base Management Programs
7030–0004	Other ADP Software
7035–0001	ADP Accessorial Equipment
7040–0001	Punched Card Equipment
7045–0002	ADP Support Equipment
7050–0001	ADP Components

The GSA BML may be used for subsequent contracting for items in the class and BML code, provided the solicitation is released to industry within 90 days following receipt of the BML in question.

(c) 41 CFR 150 shall be cited as the authority for the request. For further information concerning the above classes, DoD Components should contact General Services Administration (KEC), Washington, DC 20405.

(d) To contract for ADP maintenance services, agencies may obtain the GSA BML for Standard Industrial Group 0739, BML Code 4, by written request to the addressee indicated in (b) above. 41 CFR 150 shall be cited as the authority for requesting the BML.

(e) Maximum advantages shall be taken of the latest technological advances in the ADPE field to ensure that the Government's needs are met at the lowest overall cost. To encourage industry to offer proposals which permit the Government to take full advantage of technology and to ensure that specifications are clear and complete, DoD Components may provide proposed specifications to industry for comment prior to formal solicitation. A copy should be furnished to all prospective offerors scheduled to receive the solicitation. Industry should be given a minimum of 30 calendar days to submit written comments and at least 60 days for complex acquisitions. Comments and the disposition thereof shall be retained in the contract file.

270.307 Evaluation factors.

(a) Solicitations shall identify all factors, including conversion costs, that will be considered in the evaluation of offers. The evaluation factors shall be applied to the mandatory technical requirements and the evaluated optional features (e.g., specific software packages, compatible input-output devices), where applicable. Where evaluated optional features are included in a solicitation, their value to the Government shall be expressed in dollars, points, or any other reasonable indicator as an evaluation factor.

(b) While acquisition price is usually considered to be the most significant factor, the circumstances of a particular acquisition may require that other additional factors be taken into consideration. These include, but are not limited to:

(1) Technical approach;

(2) Previous experience in complex acquisitions;

(3) Management organization;

(4) Prior success at satisfying technical and delivery requirements;

(5) Post-award support capability;

(6) Ability to deliver technologically current software; and

(7) Maintenance costs.

Contracting officers shall ensure that these and all other relevant factors, as required by other parts of this Subpart, are expressly stated in the solicitation.

(c) Unless waived in accordance with Departmental procedures and subject to the type of funds available (e.g., O&M, Procurement, etc.), the contracting officer shall solicit and evaluate, over the projected systems life, all forms of financing an acquisition. These include:

(1) Purchase.

(2) Lease: vendor retains title to the items throughout system's life.

(3) Lease With Option to Purchase (LWOP): the Government leases items with options to purchase at a later date.

(4) Lease to Ownership Plan: the Government leases items for a specified period in accordance with applicable funding statutes after which lease payments cease and title is transferred to the Government. When solicitation of these various financing methods is appropriate, offerors may submit any or all of them. The contract file shall be documented with the results of the analysis performed on the financing methods received.

(d) Other factors to be considered in evaluating proposals include:

(1) Residual value of purchased ADPE at the conclusion of systems life.

(2) Present value of money (discounted for the systems life) in

accordance with procedures established by the DoD Components.

270.308 Commercially available software contracts.

When acquiring commercially available software, contracting officers should have the following objectives:

(a) Avoid restrictive clauses that limit the use of the software to a specific system, installation, or organization;

(b) Incorporate a clause that will permit other Government agencies to obtain the software under the contract being negotiated;

(c) Obtain additional quantity discounts should any other Government agency acquire the same software under the contract; and

(d) Ensure that the contractor is contractually obligated to support and maintain the software in subsequent years.

270.309 Determination of selection factors.

The prices offered for the systems or items life and conversion costs, whether based on prices offered or a Government estimate, shall be included in determining the lowest overall cost. The following are examples of other factors to be considered:

(a) Economic benefits clearly attributable to increased productivity.

(b) Direct savings that would accrue from the release of rented ADPE, discontinuance of services, or reduction in energy or telecommunications costs.

(c) Indirect savings derived from reductions in other than ADPE or services cost, such as space and/or personnel support expenses.

(d) Benefits from implementing new applications which otherwise would have to be deferred.

(e) Economic advantages resulting from providing the capability to accommodate projected increases in workload without contracting for further augmentation, replacement of the ADPE, or acquisition services.

(f) Potential savings due to the availability of software already developed and available from the Federal inventory or commercial marketplace that could be used to meet additional requirements.

(g) Proven reliability of the equipment and operating system software in similar operating environments.

(h) The continued availability of operating system software support and maintenance services beyond the initial system/item life that would enhance the probability of reutilization of the ADPE within the Government.

(i) The potential for supporting other agencies through the ADP sharing program.

270.310 Contract clauses.

In addition to the other clauses required by the FAR on the DoD FAR Supplement, the clauses prescribed below shall be used in all solicitations and contracts for ADP equipment, software and maintenance services and certain other services for which GSA has delegated procurement authority either by DPA or by regulation.

(a) *Warranty exclusion and limitation of damages.*

The contracting officer shall insert the clause at 252.270–7000, Warranty Exclusion and Limitation of Damages, in solicitations and contracts for ADP equipment, commercially available software, maintenance, and related supplies, unless the contracting officer determines that a higher degree of protection is in the best interest of the Government.

(b) *Contractor representation.*

The contracting officer shall insert the clause at 252.270–7001, Contractor Representation, in solicitations and contracts for ADP equipment items or systems when the Government's requirement is set forth in whole or part by functional specifications and the contract amount is expected to exceed $100,000.

(c) *Fixed-price options.*

(1) The use of option(s) to extend the contract period and/or to acquire additional quantities may be in the best interest of the Government when the conditions of FAR 17.206 are met. The evaluation of options motivates price competition on a system/item life basis and eliminates the long-term effects of a buy-in. One-time charges (startup and other nonrecurring costs), such as documentation, manuals, initial training requirements, etc., may be significant for a particular solicitation. An offeror may intend to absorb some portion of these costs or may plan to recover (amortize) them in possible "follow-on" awards. Incumbent offerors could enjoy a competitive advantage since it may not be necessary to recover them in a single contract. In addition, offerors with relatively broader markets and/or stronger financial resources tend to have greater flexibility with respect to any one individual procurement action. The evaluation of system/item life prices promotes greater competition by evening out these advantages and encourages lower system/item life pricing.

(2) *Separate charges.*

(i) When considering options, care should be exercised in making the distinction between: (A) Discontinuance charges (i.e., termination settlement compensation including negotiated contractual payment provisions) for discontinuance during the initial contract period or during an exercised option period, (B) separate charges for the Government's failure to exercise an option to extend the contract term or to acquire additional quantities, and (C) contracting for evaluated optional features, which is outside the scope of this subsection.

(ii) A payment that reflects the addition of a separate charge to a contract price is illegal if the charge, when added to the contract price, exceeds the amount that reasonably represents the value of bona fide fiscal year requirements. (See 31 U.S.C. 665a, 31 U.S.C. 712a, and 41 U.S.C. 11.) To preclude the payment of these illegal charges (because of the nonexercise of options), when options are to be incorporated into a contract, separate charges in any form shall not be solicited and offers containing any charges for the Government's failure to exercise any option will be rejected as provided by the clause entitled "Fixed-Price Options" prescribed below.

(3) *Discontinuance of lease/rental of equipment or software.* When the Fixed-Price Options clause is used, the Government and the contractor may find it mutually advantageous to incorporate a special provision containing specific notice and settlement terms to cover discontinuance of rental of equipment or software during the contract period. The clause entitled "Discontinuance of Rental and Repricing" (see example at 252.270–7006) may be used for this purpose. The special "Discontinuance of Rental and Repricing" clause provides notice of discontinuance and settlement payment terms. A means is provided to determine those charges within a ceiling that ensures that the value of the discontinued requirement and the contract value of the requirement for the revised contract period are reasonable. It provides the opportunity for a lower price by covering the risk of discontinuance with specified repricing provisions. Neither the incorporation of this clause in the contract nor the calculation and comparison of potential discontinuance charges shall be considered an evaluation factor.

(4) The contracting officer shall insert the clause at 252.270–7002, Fixed-Price Options, in solicitations and contracts when a fixed-price contract is contemplated; the solicitation is for ADP equipment, commercially available software, or maintenance services

requirements that will extend beyond the initial fiscal year; and an option to extend the contract period and/or to acquire additional quantities may be in the best interests of the Government. When the Fixed-Price Options clause is used, the solicitation shall also specify:

(i) The system/item life;

(ii) The present-value methodology, including payment schedule, that will be used for purposes of award evaluation; and

(iii) The option periods of performance and option quantities, as appropriate.

(d) *Options to extend the term of the contract.* The contracting officer shall insert the clause at 252.270–7003, Option to Extend the Term of the Contract, in solicitations and contracts when the clause at 252.270–7002, Fixed-Price Options, is used.

(f) *Options for increased quantities.* The contracting officer shall insert the clause at 252.270–7004, Option for Increased Quantities, in solicitations and contracts when the solicitation includes the provision at 252.270–7002, Fixed-Price Options, and the known requirements exceed the basic quantity to be awarded (also see FAR 17.2).

(g) *Discontinuance repricing.* The contracting officer may insert the provision at 252.270–7005, Discontinuance Repricing, in solicitations when a fixed-price contract is contemplated and conditions in 270.310(c)(3) are applicable. The provision contains boxes that provide the offeror an election to agree to or decline the inclusion of the clause at 252.270–7006, Discontinuance of Rental and Repricing.

(h) *Discontinuance of rental and repricing.* The contracting officer shall insert the clause at 252.270–7006, Discontinuance of Rental and Repricing, when the solicitation includes the provision at 252.270–7005, Discontinuance Repricing (also see 270.310(c)(3)).

270.311 Use of GSA regional support services contracts.

GSA establishes and makes available for the use of other agencies a variety of regional ADP support services contracts. These contracts may include such areas as software development and programming, production of computer-output microfilm, and data entry. DoD Components should consult with their GSA/OIRM regional office to determine the scope and availability of these contracts. These sources of supply should be used if it is determined that they will meet the user's need at the lowest overall cost, price and other factors considered. The following information is generally descriptive of these contracts:

(a) These regional requirements contracts are mandatory for the GSA and the contractor. They are optional for use by DoD Components whose requirements fall within the scope of these contracts.

(b) DoD Components that wish to use these contracts have the responsibility to develop, jointly with GSA regional personnel, a statement of their work and deliverables. The GSA regional personnel serve as contract administrators on the contracts.

(c) Task orders are negotiated by GSA and the Component with vendors based upon services and deliverables specified by the requesting component. GSA contract administrators ensure that contract provisions are met and services are delivered as negotiated.

(d) DoD Components reimburse GSA through the ADP Fund for services received under the requirements contracts.

270.312 Contracting for ADP supplies.

ADP supplies shall be contracted for in accordance with the following procedures:

(a) EDP tape and instrumentation tape—the provisions of FAR 8.404 apply.

(b) Tabulating machine cards—the provisions of FAR 8.404 apply.

(c) Marginally punched continuous forms—the provisions of FAR 8.802 apply.

(d) Other ADP supplies—the provisions of FAR 8.404 apply in the event the supplies are included in either mandatory or nonmandatory Federal Supply Schedules.

270.313 Use of GSA schedule contracts for certain ADP related equipment.

Certain specific key-strike function-limited office information resources equipment, not defined as ADPE, is available under GSA nonmandatory ADP schedule contracts. The provisions of 270.314 apply to these equipment items classified under Federal Supply Classification (FSC) 7435, except that a DAP is not required.

270.314 GSA nonmandatory schedule contracts.

A large number of items of ADPE, commercially available software, and maintenance service are available under nonmandatory GSA Schedule contracts, subject to the following:

(a) *General.* When a nonmandatory schedule contract is used, a specific Delegation of Procurement Authority from GSA is not required even though the order may be for a noncompetitive requirement; however, the existence of nonmandatory ADP Schedule contracts shall not eliminate the requirement for maximum practicable competition in acquiring ADPE, commercially available software or maintenance services. Requirements shall be synopsized in accordance with 270.315 (also see FAR part 5). Also, the availability of items under ADP Schedule contracts shall not detract from acquiring the items, including peripheral equipment or items for augmenting an existing system, from a number of different sources if this action is in the best interest of the Government. Suitable equipment must be considered whether or not this equipment is on an ADP Schedule contract. All schedule contracts that might satisfy the requirement shall be considered; or, the acquiring activity may choose to prepare a solicitation to secure goods or services at lower overall costs to the Government. Costs of the contracting process should be considered. If ADPE, commercially available software or maintenance services are acquired under an ADP Schedule at other than the lowest delivered price available for identical or similar items under any other ADP Schedule contract, DoD Components shall justify the action and retain the justification and supporting data in the contract file. The following are examples of factors that may be used in support of such justifications:

(1) Special features of one item, not provided by comparable items, are required for effective program performance.

(2) An actual need exists for special characteristics to accomplish identified tasks.

(3) It is essential that the item selected be compatible with items or systems already being used.

(4) Time of delivery in terms of actual need cannot be met by a contractor offering a lower price.

(5) Greater maintenance availability, lower overall maintenance costs, or the elimination of problems anticipated with respect to machines or systems, especially at isolated use points, will produce savings in the long run which are greater than the difference in prices.

(b) *Initial acquisition of ADPE.* Whether for purchase, lease or rental, orders for ADPE may be placed under ADP Schedule contracts, provided that:

(1) The purchase price of the items covered (even though they are rented or leased) does not exceed $300,000; and

(2) The intent to place an order with a purchase value in excess of $50,000, excluding maintenance, is synopsized in the CBD at least 15 calendar days before placing the order and the contract file is

documented with the results of the synopsis. If a written response is received from responsible sources that desire to compete on the requirement, the file also shall be documented with evidence that use of the selected ADP Schedule contract, including the method of financing (e.g., purchase, lease) is the lowest overall cost alternative, price and other factors considered. This process may require the issuance of a formal solicitation.

(c) *Continued lease or rental of installed ADPE and software.* GSA Schedule contracts may be used for the continued lease or rental of installed equipment and software, provided that:

(1) A DPA is obtained before issuing the annual renewal if the ADP Schedule purchase price exceeds $300,000 and the synopsis results indicate that equipment is available from a source other than the schedule contract. If the original requirement was evaluated and priced on a systems life basis (i.e., if the price of successive renewals was considered as an evaluated cost in the original acquisition selection), then renewals of installed equipment under an extended rental plan during the originally planned systems life do not require synopsizing or a DPA from GSA.

(d) *Conversion from lease to purchase of installed ADPE.* A specific delegation of procurement authority must be obtained from GSA before issuing an order to purchase ADPE with a net purchase order price of more than $300,000 when identical, i.e., specific make and model, or suitable substitute equipment is available from a source other than the schedule contractor. Requirements shall be synopsized for a least 15 calender days if the net value of the purchase option exceeds $50,000.

(e) *Acquisition of commercially available software and maintenance services.* Orders may be issued for these services, provided that the contract file supports use of the Schedule contract as being in the best of interest of the Government. Requirements shall be synopsized when the annual charges exceed $50,000.

270.315 Synopsis of GSA schedule actions.

(a) As a minimum, the synopsis shall include the description of the item(s) required, quantity, delivery date and location, period of lease/rental, if applicable, and any other information to assist vendors in responding to the synopsis. The synopsis shall indicate that no contract award will be made on the basis of quotation/proposals or other information received in response to the notice since the synopsis of intent to place a delivery order against a schedule contract cannot be considered a request for quotations/proposals. If, however, the only responses to a CBD notice of intent to place such an order are from vendors offering use of their schedule contracts, and technical acceptability can be established by examination of contractor literature, then the contracting officer may place a delivery order in accordance with 270.314.

(b) the schedule order synopsis technique provides DoD Components with both the GSA negotiated schedule prices (derived from discounting prices in the competitive commercial marketplace) and additional product and cost information as might be submitted by offerors in response to the CBD notification. It is critical that the synopsis process, if used to determine the feasibility of placing a delivery order against an ADP Schedule contract, elicit sufficient information for the contracting officer to determine the need to prepare a formal solicitation. If responses indicate that soliciting is desirable or required, the contracting officer:

(i) If solicitation is for the purpose of comparing proposals with ADP Schedule contracts, *shall ensure* that terms and conditions of the solicitation are substantially the same as those contained in the Schedule contract(s) contemplated for use. The vendor(s) having the ADP Schedule contract(s) shall be included as an addressee(s) of the solicitation since it often is interested in furnishing required items by use of locally awarded contracts. This procedure will permit the vendor(s) to further discount Schedule prices since GSA does not consider this to be a price reduction requiring subsequent adjustment of prices listed in the Schedule contract(s) for all future users.

(ii) *Shall evaluate* offers and ADP Schedule contracts equally. Some offerors may not accept solicitation terms and conditions similar to those that schedule vendors have incorporated into their GSA contracts. The contracting officer shall act in a manner most advantageous to the Government by either awarding a contract or placing an order against a GSA ADP Schedule contract. The contract file shall be documented to justify the action taken.

270.316 Use of GSA ADP requirements contracts.

GSA makes selected ADPE and commercially available software available through requirements contracts. When ADPE and software which satisfy requirements are available from GSA requirements contracts, this source shall be the primary source of supply in accordance with the provisions of the contract. Copies of the contracts are distributed to recipients of the GSA ADP Schedule for FSC Group 70, Part 1. Additional copies are available from the General Services Administration (8BR), Building 41, Denver Federal Center, Denver, Colorado 80225. Some of these requirements contracts specify that GSA is responsible for the allocation of ADPE or software. In these cases, authorization shall be obtained from GSA (KED), Washington, DC 20405, before placing an order. ADPE or commercially available software which is functionally similar to that on a requirements contract shall not be acquired from another source until the activity (a) documents the contract file as to why the requirements contract could not be used, and (b) obtains a delegation of procurement authority from GSA, unless the contract is within the exceptions noted.

270.317 Compatibility-limited requirements.

(a) Unless demonstrated by other circumstances, a requirement for an augmentation or replacement acquisition that is limited to ADPE and/or software compatible with the installed system shall be:

(1) Supported by a software conversion study (see 270.318), as applicable;

(2) Justified on the basis of mission-essential data processing requirements, and economy and efficiency; and

(3) Acquired in accordance with the requirements of this subpart.

(b) Compatibility-limited requirements tend to restrict competition and, therefore, shall not be made mandatory solely for reasons of economy or efficiency. When conversion and other costs associated with acquiring noncompatible offers from responsible offerors that will meet the requirement at the lowest overall cost, price and other factors considered, the evaluation shall determine if acquisition of compatible systems is most advantageous to the Government. Solicitation of noncompatible offers can be restricted under an equipment technology update justified by an obsolescence review (see 270.2).

(c) The following factors shall be considered in determining whether the incorporation of compatibility-limited requirements is justified for the replacement acquisition:

(1) The essentiality of existing software, without redesign, to meet critical mission needs. For example, the continuity of operations may be so

critical that conversion is not a viable alternative.

(2) The additional risk associated with conversion if compatibility-limited specifications are not used and the extent to which the Government would be injured, financially or otherwise, if the conversion to the new ADP system fails.

(3) The additional adverse impact of factors such as delay, lost economic opportunity, and less than optimum utilization of skilled professionals if compatibility-limited specifications are not used.

(4) The steps being taken to foster competitive conditions on the augmentation or replacement acquisition.

(5) The off-loading of selected applications programs to commercial data processing service facilities as an alternative to conversion.

(6) The extent of essential parallel operations, i.e., need to continue operations of the old system in parallel with the new system until it can fully support the mission needs.

(7) The continuation of ADP services for selected application programs with the present commercial ADP services contractor as an alternative to conversion of all programs in the present ADPE resource system.

(8) The feasibility of competing conversion requirements to be performed on a guaranteed basis under a competitive solicitation that couples the conversion effort and ADP services in a single contract, including consideration of the basis for and calculation of liquidated damages provisions for conversion performance failure.

(d) The justification that supports the use of compatibility-limited specifications (i.e., plug-compatible or brand name or equal purchase descriptions) shall be submitted with the APR in accordance with 270.303–1 when the use of these specifications is contemplated.

270.318 Software conversion studies.

(a) Software conversion studies are performed to ensure that the user's needs are met at the lowest overall cost, price and other factors considered. This includes cost and other factors associated with conversion activities. A software conversion study is not required when one of the following conditions exists:

(1) Initial acquisition where no software currently exists;

(2) Acquisition of computer peripherals only;

(3) Exercise of a purchase option under a lease; or

(4) Acquisition of a compatibility-limited replacement system as the result of a comparative cost analysis made in connection with an obsolescence review.

(b) A software conversion study shall be made for each augmentation or replacement ADPE acquisition when either one of the two following conditions exists:

(1) The estimated purchase price of the equipment system or the estimated system life cost is expected to exceed $2,500,000; or

(2) The cost of conversion is to be used as the primary justificaton for a noncompetitive requirement when the estimated value of the acquisition exceeds $300,000.

(c) A DoD component may elect to conduct its own comprehensive software conversion study, use contractual sources to accomplish the study, or request the GSA Federal Conversion Support Center (FCSC) to perform the study.

(d) The software conversion study shall be included in the contract file and shall be submitted with the APR to GSA.

(e) When contracting for a software conversion study, the statement of work shall provide the following as a minimum:

(1) Problem definition;

(2) Inventory of current system components;

(3) Description of the operating system environment;

(4) Inventory of application programs and data files to be converted;

(5) Feasible equipment contracting approaches (including acquiring plug-compatible or noncompatible equipment, as appropriate) with schedules for both the acquisition and conversion effort;

(6) General description of the target environment, including system hardware and software, performance requirements, and any constraints on the functional definition of the requirement;

(7) If applicable, approach to accomplish any eventual conversion; and

(8) A requirement for the contractor to recommend actions to be taken to reduce cost and risk in any future conversions.

(f) Studies for acquisitions below the thresholds stated in 270.318(b) above shall be based on Government estimates determined in accordance with Departmental procedures. The contract file shall be documented to record the estimates and the method of computation.

(g) Costs directly related to the conversion of the installed ADPE, software, data bases, files, and telecommunications software to the replacement system, and project management costs, shall include, but are not limited to:

(1) Conversion of the following software by reprogramming, recoding or translation:

(i) Existing software written in Federal standard or other ANSI standard higher-level language;

(ii) Application software written in assembly or other nonstandard languages that will continue to meet essential mission needs without redesign, provided that continued use of the nonstandard software can be justified and the file documented with the justification prior to incorporation into the software conversion study;

(iii) Mission-essential application software to be developed for operational use before the replacement is installed (or before commercial ADP services are procured), provided that the software is written in Federal standard or other ANSI standard language.

(2) Conversion of data bases, data base design changes, and data base management systems to the extent necessary to permit the continued use of existing application software;

(3) Firmware required solely to permit the continued use of application software;

(4) Site preparation and modifications to installed environmental controls;

(5) Parallel operation of the old system during the conversion process, including off-site data processing support;

(6) Travel and training expenses, including pay and fringe benefits of Government employees during attendance at formal classroom training courses; and

(7) Other general and user expenses directly related to the conversion effort; e.g., conversion planning, preparation and management supplies, and any additional general-purpose software required to support the conversion.

(h) The useful life of application software is limited by changes in data processing requirements, operating system software, and equipment technology. Generally, the life expectancy of this software, without redesign or reprogramming, is in the range of 5 to 10 years. Accordingly, the updating of application software for these reasons must be considered regardless of whether these programs are converted from one ADPE system architecture to another. The costs incurred for the redesign of application software in technology updating are not bona fide conversion costs and they

shall not be evaluated as such. These technology updating costs include:

(1) The conversion of existing software, data bases which are to be redesigned;

(2) Purging duplicate or obsolete software, data bases, and files;

(3) Development of documentation for existing application software; and

(4) Improvements in management and operating procedures.

(i) Standard cost factors, such as those contained in the OMB Cost Comparison Handbook (Supplement No. 1 to OMB Circular A-76), shall be used to the maximum practicable extent in preparing conversion cost studies and estimates. These cost factors may be supplemented by industry or Component-developed cost factors, as necessary.

270.319 Use of benchmarks in low-dollar ADPE systems acquisitions.

(a) Mandatory benchmarks shall not be used in solicitations for ADPE systems with a purchase value of less than $300,000 unless there is no other acceptable means of validation. When the use of benchmarks is necessary, solicitations shall not require the running of "worst case" benchmark programs (e.g., programs that require extensive reprogramming or conversion) unless these programs are representative of the using activity's actual or anticipated data processing needs.

(b) For ADPE systems with a purchase value of $300,000 or less, the following validating methods shall be considered:

(1) Validation of performance by the technical evaluation of proposed ADPE and software; or

(2) Evaluation of an operational ADPE installation processing a similar workload on comparable equipment.

270.320 Use of remote terminal emulation in ADPE systems acquisitions.

(a) Each Component shall determine whether or not to authorize use of remote terminal emulation during each ADPE system procurement and should use the GSA Handbook, "Use and Specifications of Remote Terminal Emulation in ADP System Acquistions," before making its determination.

(b) When remote terminal emulation is authorized in an ADPE system acquisition, the DoD Component:

(1) Shall follow all mandatory procedures contained in the GSA Handbook (the handbook may be obtained from the General Services Administration (KEC), Washington, DC 20405);

(2) Shall not require remote terminal emulation capabilities that are not explicitly defined in the GSA Handbook;

(3) May declare an offer unacceptable in an negotiated procurement if the offeror fails to provide the remote terminal emulation capabilities required by the solicitation; and

(4) Shall not require an offeror to conduct a bench mark test using remote terminal emulation at the component's site.

(c) Components shall not authorize the use of remote terminal emulation in ADP service contracting actions, except for:

(1) Dedicated teleprocessing requirements; and

(2) Unusually large and complex share-teleprocessing requirements.

(d) Authority to deviate from the requirements of (b) above shall be obtained prior to synopsis or release of the solicitation, in accordance with Departmental procedures.

(1) To request a deviation, requiring activities shall provide a detailed technical description and justification for each specific deviation desired.

(2) If authority to deviate is granted, the contracting officer shall promptly provide to potential offerors detailed instructions specifying all mandatory remote terminal emulation capabilities not defined in the GSA Handbook and the exact manner in which each emulation benchmark test must be conducted. A notice indicating the availability of these materials shall be published in the Commerce Business Daily (CBD) at least 60 calendar days before the release of the solicitation document.

270.321 ADP fund.

(a) The GSA ADP Fund is a revolving fund available for financing the purchase and, under certain circumstances, lease and maintenance of ADP equipment and/or commercially available software. When approved by GSA, the ADP Fund may be used to obtain maintenance services for ADPE leased from GSA through the ADP Fund.

(b) When an evaluation of offers indicates purchase as the lowest overall cost alternative, but the funds committed to the purchase are inadequate or are not of the proper type. The contracting officer shall notify the requiring or other Department-designated activity of the savings to be realized if items are purchased rather than leased. This activity, upon ensuring that funds are not available, shall make an inquiry to GSA for the use of the ADP Fund. If the ADP Fund is not available, the activity shall notify the contracting officer that the ADP Fund is not available and that the next lowest overall cost alternative should be selected.

(c) If the GSA ADP Fund is used, the activity shall negotiate and execute a payback arrangement with the GSA.

270.322 Exchange/"Sale" of ADPE.

(a) When it is determined that Government-owned ADPE should be replaced, exchange/"sale" should be considered. Exchange/"sale" is a means of transferring the equipment to be replaced to another Government agency, with reimbursement, or to the supplier of the replacement ADPE for a trade-in allowance on the contract price so that the proceeds can be applied in whole or in part payment for the replacement ADPE. "Sale" relates to the proceeds obtained from another Government agency whereas "exchange" relates to the trade-in allowance offered by contractors. The proceeds of "sale" or the exchange allowance shall be applied toward the acquisition of replacement ADPE. In addition to the requirements in this subpart, compliance with Subpart 217.70 and DOD Manual 7950.1–M is required.

(b) The contracting officer, working with the reutilization activity, is responsible for complying with the following conditions in completing an exchange/"sale" transaction.

(1) The ADPE system/item to be "sold" or exchanged must be similar to the ADPE system/item to be acquired;

(2) The ADPE system/item must be needed in the continuing satisfaction of the ADP requirement;

(3) One system/item must be acquired to replace another similar system/item, except in situations where lesser or greater number of systems/items must be acquired to perform all or substantially all of the functions which the trade-in system/item would otherwise perform; and

(4) A written administrative determination must be made by the requiring activity that the exchange allowance or the proceeds of the "sale" will be applied in acquiring the replacement ADPE and that the exchange/"sale" transaction will foster the economic and efficient accomplishment of a continuing requirement.

(c) The normal steps in the execution of an acquisition authorizing an exchange transaction are specified herein.

(1) Offers shall be solicited both on an exchange (trade-in for allowance) or no exchange (no trade-in) basis. The Government shall retain the option to

exercise any exchange offer at the time of award.

(2) The exchange ADPE shall be listed and described in the solicitation document with the following information included as a minimum: a brief description of each item of ADPE, name of manufacturer, equipment type, model number, and the appropriate condition code and a translation of that condition code. The contracting schedule must allow sufficient time for the screening of the exchange ADPE within the Government prior to contract award.

(3) Immediately upon receipt of offers, the highest exchange offer (if any) shall be determined and used to initiate screening pursuant to 270.14. Notification shall be given to the Defense Automation Resources Office (DARO) on SF 120, Report of Excess Personal Property. The following notation shall be displayed prominently on the original and 5 copies of the SF 120.

Exchange/"Sale" Property

A written administrative determination has been (will be) made to apply the exchange allowance or proceeds of sale to the acquisition of similar items.

The following additional information shall be submitted with the SF 120:

(i) The identity of the offeror of the exchange;

(ii) The type of replacement equipment;

(iii) The method of acquisition for the replacement equipment;

(iv) The anticipated purchase price for the replacement equipment;

(v) The DPA number assigned by GSA for the replacement equipment, if applicable; and

(vi) The name and telephone number of the contracting officer.

(4) Offers shall be evaluated using the solicitation criteria, including consideration of any exchange allowance offers. Award can be made irrespective of whether the replaced ADPE is exchanged.

(5) Before an award is made, the results of screening shall be considered. If another Government agency wishes to acquire the replaced equipment, the exchange shall not be made. In this event, the contract price will not include the exchange allowance since this amount will be realized by the sale of the equipment to the requesting agency. The actual sale price to the requesting agency will equal the exchange allowance (if any) of the successful offeror.

(6) If no Government agency wishes to acquire the replaced equipment, the contract price will include the exchange allowance (if any). If no exchange allowance was offered by the successful contractor, the replaced equipment shall be handled in accordance with 270.14.

270.323 Conflicts between this subpart and the DPA.

When contracting for ADPE, commercially available software, maintenance services, supplies, and certain other services under a DPA from the GSA, the provisions of the delegation shall take precedence over any conflicting provisions of this subpart and need not be processed as a deviation.

270.324 Acquisition assistance.

Assistance in any phase of the contracting process covered by this subpart may be obtained by contacting:

Army

U.S. Army Computer Systems Selection and Acquisition Agency, Alexandria, VA 22331

HQDA (DAMO–C4Z–K), The Pentagon, Washington, DC 20310

Navy

ADP Selection Office, Washington, DC 20374

Naval Data Automation Command, Code 11, Washington, DC 20374

Air Force

Air Force Computer Acquisition Center, Hanscom AFB, MA 01731

HQ USAF (AF/RDC), Washington, DC 20330

Defense Logistics Agency

Defense Logistics Agency, ADP/T (DARO), Cameron Station, Alexandria, VA 22314

Subpart 270.4—Acquisitions Under 10 U.S.C. 2315 Authority

270.400 Scope of subpart.

This subpart is applicable to acquisition of automatic data processing equipment or services if the function, operation, or use involves, as its primary purpose, one or more the following:

(a) *Intelligence systems.* Computer resources for the intelligence community for the research and development of, or use in, its intelligence activities.

(b) *Cryptologic systems related to national security.* Computer resources for the research and development of, or use in, cryptologic activities authorized by the National Security Agency.

(c) *Command and control of military forces.* Computer resources for research and development of, or use in:

(1) The National Military Command System;

(2) Worldwide Military Command and Control System;

(3) DoD Component Command and Control Systems.

(d) *Integral part of a weapons system.* Computer Resources:

(1) Physically a part of, dedicated to, or essential in real time to, performance of the mission of weapon systems;

(2) Used for specialized training, diagnostic testing and maintenance, simulation, or calibration of weapons systems;

(3) Used for research and development of weapons systems.

(e) *Critical to the direct fulfillment of military or intelligence missions.* Computer resources in, or used in the research and development of:

(1) Systems that will deploy as mission support in a combat environment;

(2) War planning systems;

(3) Environmental systems supporting military missions, e.g., weather, oceanographic, or satellite systems;

(4) Projects the existence of which are classified;

(5) Warning, surveillance, reconnaissance and electronic warfare systems;

(6) Mapping, charting, and geodesy systems;

(7) Airlift, sealift, and port facilities systems;

(8) Military communication systems; or

(9) Logistics systems which provide direct support to operating forces or provide direct support to maintenance of weapons systems (e.g., organic supply, software support facilities for weapon systems, contracting, accounting, disbursement and budgeting, etc.).

270.401 Determination of applicability.

Determinations as to the applicability of this subpart shall be made in accordance with DoD Component procedures.

Subpart 270.5—Acquisition Under Other Authorities [Reserved]

Subpart 270.6—Acquisition of ADPE by DoD Contractors

270.600 Scope of subpart.

(a) This subpart is applicable to contractor acquired ADPE as defined in FAR 31.001, except as components of end items delivered to the Government.

(b) If a contractor acquires ADPE for the account of the Government or if title to the equipment will pass to the Government, the acquisition must be approved as provided in 270.601 and FAR Part 45.

(c) If a contractor leases ADPE, and the lease will not be for the account of the Government or title will not pass to the Government, and the total cost is to be allocated to one or more Government contracts requiring the determination or negotiation of costs, the acquisition must be approved in accordance with the procedures of 270.601 and FAR Part 45.

(d) If a contractor leases ADPE (see 270.2) with an annual cost in excess of $500,000 and more than 50 percent of the cost is allocated to Government contracts requiring the negotiation or determination of costs, the acquisition must be approved in accordance with the procedures of 270.603.

(e) The provisions of 270.602 relating to providing reused equipment to DoD Contractors are applicable regardless of the manner of acquisition or dollar amount.

270.601 DoD component approvals.

(a) Requests for approval of acquisitions of the types outlined in 270.600 (b) and (c) must be submitted through the administrative contracting officer (ACO) to the procuring contracting officer (PCO) who awarded the contract that gave rise to the need for the computer equipment. Prior to the submission to the PCO, the ACO shall comply with 270.602. The PCO will obtain any approvals required by DoD Component procedures.

(b) The supporting documentation for these acquisitions should clearly indicate the best method of financing the acquisition which is in the Government's best interests, that is:

(1) Leasing, either operating or capital, or

(2) Purchase.

(c) The PCO shall consider providing the computer equipment to the contractor as Government-furnished equipment. Factors to be considered include:

(1) Increased ability to realize economies, efficiencies, and to obtain greater competition;

(2) Timeliness;

(3) Impact upon the contractor's ability to perform his contract responsibilities, and

(4) Type of funds available.

The determination shall be made part of the contract file or, if required by DoD Component procedures, transmitted to the appropriate official for approval.

(d) Upon approval of the contractor's requirement, written confirmation shall be provided through the ACO to the contractor.

270.602 Providing reused computer equipment to DoD contractors.

(a) When DoD contractor has a requirement for computer equipment exclusively for use as facilities, special test equipment, plant equipment or material, under one or more Government contracts, the contractor shall submit a DD Form 1419 with documentation attached as required by 270.604 to the ACO.

(b) The ACO shall forward the approved requirements to the Defense Logistics Agency, Defense Automation Resources Office (DARO), Cameron Station, Alexandria, VA 22314 in accordance with DOD 7950.1–M. The DARO response shall be provided to the PCO.

270.603 Review and approval of contractor-acquired computer equipment used for commercial and government contracts.

(a) In accordance with FAR 31.205–2, if the total cost of leasing computer equipment at a contractor's plant, division, or cost center is expected to exceed $500,000 in any 12-month period and more than 50 percent is to be allocated to Government contracts requiring the negotiation or determination of costs, the ACO shall, prior to approving lease costs:

(1) Conduct an initial and an annual review thereafter of the contractor's system(s) for the purpose of evaluating:

(i) The reasonableness, from the technical standpoint, of the contractor's configuration;

(ii) The existing capability and need to continue leasing, regardless of whether the term of the lease was renewed or otherwise extended by the contractor (see 270.604 for documentation required); and

(2) Arrange for submission by the contractor to the ACO of any proposed lease of a new system and any proposed major change to an existing system, for advance determination of the reasonableness of the resulting cost (see 270.604 for documentation required). A "major change" is any addition or substitution of computer equipment which will result in a net annual cost increase in excess of $50,000.

(b) After the initial review of any proposed lease of a new system or major change, and after each annual review, the ACO shall either enter into an advance agreement with the contractor pursuant to FAR 31.109 to provide a basis for concurrence in the proposed lease, or, in the alternative, notify the contractor of the Government's nonconcurrence and of any consequent cost disallowance contemplated.

270.604 Contractor documentation.

This subsection specifies the documentation DoD contractors shall submit to support acquisitions of computer equipment. When the documentation has previously been submitted to DCAA, a copy of that submission may be used or, if voluminous, reference to it is acceptable. Documentation previously submitted does not have to be resubmitted; only updated as necessary. The ACO may waive specific documentation requirements below when they are not considered relevant to the acquisition.

(a) *Inventory and analysis of utilization of existing installed computer equipment.*

(1) List each component by manufacturer, type, and model number.

(2) Location(s).

(3) Furnish installation date(s) by component.

(4) Give type of acquisition, i.e., operating lease, capital lease, purchase, Government-furnished, or lease back.

(5) Furnish component reliability data for the past 12 calendar months. Indicate hours each component was available for use versus hours unavailable for use. Indicate preventive and remedial maintenance hours.

(6) Identify and describe each data system supported; indicate computer time for each system and the related contract(s) or task(s) involved.

(7) Identify any system which has been acquired to comply with a contract requirement. The contract number, clause identification and extract of wording requiring a specially configured or specific computer shall be available for Government review.

(b) *Documentation supporting and justifing need for and benefits to be derived from new system(s) or major change(s) to existing systems.*

(1) Furnish advance planning documentation covering useful life of these systems. This documentation shall provide information to support useful life decisions and also provide a basis for entering into advance understandings as provided at FAR 31.109.

(2) List specific objectives or requirements (generally in the form of a functional specification).

(3) At the option of the Government furnish functional block diagrams of the present and proposed configuration.

(4) Briefly describe the major applications to be processed and appropriate background information to explain the need.

(5) If applicable, list or summarize projects by short title and Research and Development (R&D) project number.

(6) Indicate estimated monthly main frame use hours for each major application or project for the expected retention period.

(7) Indicate software requirements.

(8) Indicate telecommunications requirements.

(c) *Competitive selection of computer equipment.* The following shall be submitted for new requirements which will be competitively acquired. It shall be made available for annual reviews.

(1) Show names and addresses of sources solicited, indicate those submitting proposals.

(2) Indicate which, if any, proposals were not acceptable and explain why.

(3) Show cost comparisons for operating lease, capital lease, lease-with-option-to-purchase, and purchase, for all acceptable proposals.

(4) Attach a copy of the solicitation, a copy of each acceptable proposal, a copy of each proposal's evaluation, and a copy of the selection report. When proposals are voluminous, a summary may be submitted to the Government; actual proposals will be kept on file and be available to the Government.

(5) State whether the selected computer equipment will provide the lowest overall cost to the Government over the useful life. If not, explain the rationale for its selection over that which would have provided the least cost.

(d) *Noncompetitive selection of computers.* Include alternatives considered or state why none are feasible. Show the equipment configuration selected including manufacturer, type, and model number of each component, feature, and device. Show cost comparisons for operating lease, capital lease, or purchase for the equipment configuration selected.

(e) *Cost.* State the resulting increase or decrease in monthly costs to the Government.

(f) *Lease versus purchase analysis.*

(1) Pursuant to FAR 31.205–2, provide a lease/purchase analysis by component for the selected computer equipment when an operating lease is the selected method of acquisition. A suggested format for this analysis is shown at the end of this subpart.

(2) The use of a realistic, Useful Life, Present Value and Residual Value analysis for each component is critical.

270.605 Contractor use of computers for non-government purposes.

The prior written permission of the contracting officer (or, the official prescribed in procedures of the DoD Components, if the expected cost is in excess of $500,000 for any 12-month period) is required for any non-Government use of computer equipment provided to the contractor which was acquired under one or more Government contracts negotiated on the basis of cost data. This approval may be granted if FAR 45.407(b) is satisfied and no additional costs are incurred by the Government.

270.606 Purchase option credits for contractor-acquired computers.

(a) When leased ADPE is used on a Government contract(s) and the total cost is charged to the Government under a cost-reimbursement contract(s), the contracting officer shall require the contractor to include a provision in the rental contract stating that the Government shall have the initial option to utilize any purchase credits or other benefits earned through rental payments. This applies regardless of whether the acquisition qualifies as an operating lease or capital lease.

(b) When leased ADPE is used on a cost-reimbursement type Government contract(s) requiring the determination or negotiation of costs, and less than 100 percent of the cost of the equipment is charged to the Government, the contracting officer should obtain for the Government at the time that the initial annual review is conducted, the right to accrued purchase credits if the contractor elects not to exercise its purchase option. Accordingly, negotiation objectives shall include the following when less than 100 percent of the cost of the equipment is absorbed by the Government:

(1) The contractor should be encouraged to incorporate in its equipment lease the right to assign accrued purchase credits to the Government;

(2) The contracting officer should obtain for the Government, if possible, the right of first refusal on accrued purchase credits if the contractor elects not to exercise its purchase option; and

(3) A 120-day advance notice should be provided to the ACO when the contractor intends to terminate its equipment lease if the Government has rights in accrued purchase credits.

(c) The ACO shall report the availability of such credits in accordance with the procedures for the reuse of computer equipment as prescribed by DoD Manual 7950.1–M and the respective DoD component implementations thereof.

(d) If the Government decides to take advantage of the benefits, the provisions of 270.1401(c) apply.

270.607 Reuse of computers, software, and associated spare parts.

Excess computers, software, and associated spare parts in the possession of contractors, whether leased or Government-owned, will be reported in accordance with Part 245 and DoD Manual 7950.1–M. Computers, software, and associated spare parts with an initial acquisition cost below $1,500 are subject to special procedures in DoD Manual 7950.1–M.

270.608 Technical assistance.

Technical assistance in implementing this subpart shall be provided as necessary to the contracting officer by the DoD component having CAS cognizance for the contractor.

Subpart 270.7—Telecommunications Resources

270.701 General.

Acquisitions of telecommunications resources by the DoD are governed by the Statement of Areas of Understanding Between the Department of Defense and the General Services Administration, dated November 27, 1950 which appears at 15 FR 8226, December 1, 1950. The text of that agreement is as follows:

Statement Of Areas Of Understanding Betweeen Department Of Defense and General Services Administration

(1) The areas of understanding herein set forth were worked out pursuant to order of the President of July 1, 1949, directed to the Secretary of Defense, the Director, Bureau of the Budget, and the Administrator of the General Services Administration.

(2) The areas of understanding with respect to communications services are:

(a)(1) As used in this statement, with respect to comunications services: "Area contracts" are contracts providing for the furnishing of a communication service to all, or substantially all, activities of the Government located within a specified area, executed by GSA or by another agency designated by GSA.

(a)(2) As appropriate for contractual and operational matters: "Department of Defense" means one or more of the military departments.

(b) The basic principle in the procurement of communications services is that all such services shall be procured or provided at the minimum total cost of the Government consistent with requirements for capacity, efficiency of operation, reliability of service, security, and programmed activities. These requirements must be determined by the using agency.

(c) Close coordination and cooperation between the GSA and the Department of Defense shall be maintained to obtain the maximum economy consistent with the requirements for service.

(d) Communications services for activities of the Department of Defense occupying properly controlled or operated by another Federal agency will be procured or provided by the General Services Administration or by the operating agency unless, in the opinion of the Department of Defense, the procurement or provision thereof by the Department of Defense is necessary in the interest of military operations, exercise of command and/or National Security.

(e) Communications services for the Department of Defense, in localities within an area where these services are or may become available under a General Services Administration contract, will be procured under a General Services Administration area contract when such a procedure is of benefit to the Government as a whole and does not adversely affect Military operations, exercise of command and/or National Security. In all other instances, communication services required by the Department of Defense will continue to be procured under a standardized National Defense contract. Copies of or data on contracts executed by the Department of Defense for communications facilities and services will be furnished to the GSA upon request unless distribution is inadvisable for reasons of security.

(f) Except as provided in paragraphs 2 (d) and (e) above, all communication facilities and services for activities of the Department of Defense will be provided or procured by the Department of Defense.

(g) The Department of Defense will provide for complete coordination of all communication services procured or provided by it for all activities of the Department of the Army, Navy (including Marine Corps) and Air Force, and for maximum economy consistent with requirements.

(h) Joint use of telephone facilities such as private branch exchanges is to be encouraged whenever such use will result in efficient and economical service: provided that, in the opinion of the Department of Defense, no interference with military operations or violations of military security will result.

(i) It is recognized that rapid written communications for the Government as a whole can best be obtained by independent military and civilian agency systems, with these systems cooperating with each other. These systems, however, may interchange traffic where such interchange is efficient, and economical and practicable, provided that in the opinion of the Department of Defense there is no interference with movement of military traffic, and the handling of civilian traffic does not necessitate the utilization of additional facilities and personnel by the Department of Defense.

(j) Except as otherwise provided herein, the GSA will represent Executive Agencies, including the Department of Defense, in proceedings involving communications before municipal, State and Federal regulatory bodies in all rate cases and matters associated therewith.

Exceptions

(1) In those instances where the Department of Defense has the sole Government interest in a proceeding involving communications before a regulatory body, the Department of Defense will conduct the representation on behalf of all Executive Agencies of the United States Government. The Department of Defense and the General Services Administration in pending or proposed proceedings will advise each other of action taken or to be taken that may have effect upon or be of interest or assistance to each other. Such representations conducted by the Department of Defense shall be subject to overall coordination by General Services Administration. This shall not preclude representation for the Department of Defense by the General Services Administration when such representation is requested by the Department of Defense and is mutually agreeable.

(2) In those instances where the Department of Defense does not have sole Government interest in a proceeding involving communications before a regulatory body, the Department of Defense will conduct the representation on behalf of all Executive Agencies whenever representatives of the Department of Defense and the General Services Administration agree that conduct of the representation by the Department of Defense is in the best interest of the Government. Such representation conducted by the Department of Defense shall be subject to overall coordination by the General Services Administration.

(3) Except as pertains to the applications of pertinent provisions of section 5, Pub. L. 211, 81st Congress.

(k) Liaison between the Department of Defense and the General Services Administration for all matters involving representation of Executive Agencies in proceedings involving communications before regulatory bodies shall be maintained between the Office of General Counsel, General Services Administration and the Office of General Counsel, Department of Defense.

(l) Liaison with respect to policy matters concerning this arrangement and matters pertinent thereto except as provided in paragraph k, will be maintained between the Chief, Public Utilities Branch, Public Building Service, General Services Administration and Chief, Electronics Division, Munitions Board of the Department of Defense and for operational and contractual matters between designated representatives of the General Services Administration and of the Department of Defense.

(m) This area of understanding is applicable to communications services within the Continental United States, Hawaii, Puerto Rico and the Virgin Islands. The Department of Defense shall be exempt from action taken by the Administrator with respect to communications services under Section 201(a) of Pub. L. 152 in other geographic areas.

270.702 Policy.

Acquisitions of telecommunications resources shall be accomplished in accordance with the Statement of Understanding set forth in 270.701.

Subpart 270.8—Use of the GSA Teleprocessing Service Program (TSP)

270.800 Scope.

The TSP is a GSA program that DoD Components may use to acquire remote data processing services through use of Multiple Award Schedules (MAS) (see 270.802–1) and Basic Agreements (BA) (see 270.802–2).

270.801 Applicability.

(a) When a requirement analysis indicates that remote data processing services are available in the commercial market to satisfy a requirement, the DoD Component should consider the TSP as a source of supply.

(b) DoD contractors or subcontractors may use the TSP.

(c) Covered TSP services include interactive, remote batch processing, and a combination of these (full services), as well as related support services incidental to the teleprocessing performed by commercial firms. These include:

(1) Training services that are limited to the unique features of a particular teleprocessing service;

(2) Technical Assistance/Analyst Services (TA/AS) specifically related to the firm providing teleprocessing services. Such services are limited to assisting users on network operations, special features that may influence application system design, communication interfaces with contractor networks, or other areas incidental to the use of the firm's software packages;

(3) Use of the TSP firm's premium (extra charge) software packages related to a teleprocessing requirement as limited in paragraph (e);

(4) Use of the TSP firm's data bases related to a teleprocessing requirement;

(5) Furnishing network documentation;

(6) Conversion of Government-controlled files and application programs when initiating performance or changing firms under a TSP contracting arrangement as provided in paragraph (g).

(d) *Excluded services.* Facilities management, the lease or purchase of ADPE and predominantly local batch processing services are excluded.

(e) *Limitations on TA/AS and premium software packages.* Technical assistance/analyst services and use of premium software packages (paragraphs (c) (2) and (3) above) have dollar limitations that are reflected in both the MAS and BA. Acquisition of these types of services, that exceed the established limitations, should be on a competitive

basis. The dollar limitations for each teleprocessing requirement are 10 percent of the total value of the requirement per fiscal year, not to exceed $100,000 per year for TA/AS and $25,000 per year per premium software package. The DoD Component shall obtain authorization from the GSA TSP contracting officer before placing a purchase order under a MAS or awarding a contract under a BA which includes requirements that exceed the above limitations.

(f) *Conversion under TSP.* Services associated with conversion of files and application programs may be included in a MAS purchase order or BA contract at the option of the DoD Component, provided that:

(1) A determination is made, when the conversion requirement is estimated to exceed $75,000, that more extensive competition is not practicable,

(2) Each participating firm, when the MAS method is selected and the teleprocessing requirement includes conversion services, is required to propose the conversion portion of the requirement or be eliminated from consideration.

(3) The description of an individual TSP conversion requirement identifies, as a minimum, the number of programs to be converted, source computer system, the number of lines of code to be converted by language, the number of files to be converted by organizational type (e.g., index sequential, sequential, random, DBMS), a description of the complexity and level of documentation of the files and programs, redocumentation requirements, training requirements, and specific testing and acceptance criteria for the converted programs and files.

(4) Offerors are provided an opportunity to inspect the available documentation of all programs and files pertinent to the conversion effort, subject to necessary limitations for the protection of personal, proprietary, or other sensitive data.

(5) Offers for conversion services are solicited and awarded on a separate line item, firm fixed-price basis. Under the MAS method, participating firms do not quote conversion services rates in their schedule pricelist; rather, a firm offer is made for each particular requirement.

(6) Order placements or contract awards, when teleprocessing requirements include conversion services, are based on lowest overall costs, price and other factors considered.

(g) *Software redesign or programming.* Software redesign or programming services are not always available in the MAS and BA. Programming of linkage or bridge routines between multiple software packages under $5,000 annually per requirement are generally available. Other application programming can be included in a TSP BA contract provided the DoD Component requests and receives specific authorization from the GSA contracting officer.

270.802 Methods of acquiring GSA TSP services.

The GSA TSP includes two methods of acquiring services, either of which may be used as appropriate. Neither of these methods allows cost-reimbursement contracting.

270.802-1 Multiple award schedule (MAS).

GSA periodically establishes a multiple award schedule which includes firm rates for services. The MAS provides for incremental discounts based on each firm's total MAS dollar volume of services delivered Government-wide. The MAS terms and conditions can only be modified by GSA. Under the provisions of the schedule, a firm may modify the services offered through a MAS amendment. The MAS may be used for justified noncompetitive requirements. Policies and procedures for using the GSA MAS are contained in the GSA TSP Handbook (see 270.802-4).

270.802-2 Basic agreement (BA).

(a) GSA periodically establishes a BA under which GSA negotiated terms and conditions are made available for use in soliciting proposals and awarding contracts for TSP services. The BA terms and conditions can be submitted only by GSA. Properly justified noncompetitive contracting actions may be conducted under the BA when a requirement within the TSP scope cannot be justified under the MAS.

(b) Dedicated teleprocessing systems requirements may be included in a BA solicitation under the TSP provided:

(1) The APR includes appropriate documentation to support a system requirement configuration, or a specific part thereof, which is to be solicited solely on a dedicated-system basis. This provision does not apply when a DoD Component expresses willingness to evaluate a dedicated-system alternative proposal to a proposal priced on a resources-used (unit rate) basis.

(2) When dedicated-system proposals are to be solicited and evaluated as an alternative to resources-used type proposals, evaluation criteria shall be sufficient to adequately compare a dedicated system pricing offer with resources-used (unit rates) offers. The solicitation documentation shall provide that an offeror submitting a dedicated-system proposal may submit a resources-used proposal. Contract awards made on a system-life basis shall provide for an annual Government review of workload and usage and reserve the right to select on a prospective basis the more favorable of the contractor's dedicated-system or resources-used pricing modes.

270.802-3 GSA TSP guidance.

(a) Guidance concerning the GSA TSP may be obtained from the General Services Administration (KED), Washington, DC 20405 or from any GSA regional office.

(b) The Teleprocessing Services Program (TSP) Handbook provides procedures to be followed by Federal agencies in acquiring services within the TSP scope. The handbook is not a regulation. A limited number of copies of the handbook are available without charge to all Federal agencies by written request to GSA (KED), Washington, DC 20405 or any GSA regional office. Major revisions or new editions of the handbook are announced in GSA bulletins.

270.803 Procedures for acquiring GSA TSP services.

(a) *Agency procurement requests.* DoD Components shall submit an APR to GSA to acquire GSA TSP services unless the acquisition is below $2,000,000 competitive, or $200,000 noncompetitive, annually.

(b) *Evaluation and source selection.* Source selection shall be based on a technical and a system-life cost evaluation.

(1) Technical evaluation factors shall be limited to mandatory service requirements and those evaluated optional features that have been assigned relative values (expressed in dollars, points, or any other reasonable indicators). Evaluated optional features should not exceed 20 percent weighting value in the total evaluation.

(2) The lowest overall cost shall be used in evaluation and source selection, price and other factors considered. Conversion cost shall be included in system-life evaluations. Contractor prices instead of Government estimates shall be used in the Government's overall estimate of conversion in computing the system-life costs.

(3) For requirements over $300,000 annually, benchmark results shall be used to determine costs for all technically qualified firms. The benchmark package should be available to offerors at least 45 calendar days before benchmark performance. The use

of benchmarks may be considered in selections under $300,000 annually because different amounts of connect, input/output and CPU time, for example, will be required by different contractor systems to accomplish the same work load. The selection of the benchmark work-load is critical to the source selection because it will evaluate the contractor's billing algorithm, a significant factor in cost determination. Under either the MAS or BA, a copy of the benchmark used for cost evaluation in the selection process shall be retained for periodic performance evaluation purposes over the system life of the requirement. If a benchmark is not used, the cost shall be derived by a calculation of the various categories of the work-load estimate or other adequate techniques. FEDSIM has developed a synthetic benchmark for remote batch applications called the "Resource Driver Program" which can be considered (see 270.12).

(4) Prices, rates, and discounts for MAS selections shall be obtained by contacting any GSA/OIRM regional office. Other costs for selections under the MAS shall be derived directly from the pricelists.

(c) *Low cost acquisition.* When the system-life estimated cost does not exceed $10,000 annually, the MAS method provides a simplified procedure that agencies use for selecting teleprocessing services.

270.804 GSA review of selections under the GSA TSP.

GSA reserves the right to review any TSP selection action under the MAS or BA, either before or after award. Consequently, contractor selection and contracting documentation shall be retained for a period of two years after selection.

Subpart 270.9—Privacy for Computer Systems

270.901 Applicability.

This subpart applies to computer systems acquired by a DoD Component or Government contractor.

270.902 Requirements.

FAR Part 24 prescribes policies and procedures for complying with the Privacy Act of 1974 (5 U.S.C. 552a).

270.903 DoD component responsibilities.

In addition to the requirements of FAR 24.103, contracting officers shall ensure that contracts subject to the Privacy Act require the submission of necessary reports and notices required by DoD Component implementation of OMB Circular A–108.

270.904 Contract clauses.

In addition to the clause at FAR 52.224–2, contracting officers may insert the clauses at 252.270–7007, Rights in Privacy Safeguards, and 252.270–7008, Access to Contractor Facilities and Records—Privacy Safeguards Inspection, in solicitations and contracts when acquiring equipment, software, or services subject to the Privacy Act.

Subpart 270.10—Security for Computer Systems

270.1000 Scope of subpart.

This subpart applies to all computer acquisitions regardless of the authority under which acquired.

270.1001 Policy.

(a) Specifications for the acquisition of ADPE, software, maintenance services, and supplies are required to be certified by the requiring agency as meeting the agency security needs in accordance with Departmental regulations. These requirements are in addition to provisions concerning protection of the privacy of individuals (see 270.9 and FAR 24.1).

(b) Specifications or other requirements statements for solicitations shall include, when applicable:

(1) DoD Component rules of conduct that a contractor and the contractor's employees shall be required to follow;

(2) A list of the anticipated threats and hazards that have been determined by risk analysis that the contractor must guard against;

(3) A description of the safeguards that the contractor is required to provide;

(4) The standard applicable to the contractual requirement (see 270.11);

(5) The test methods, procedures, criteria, and inspection system (or the requirement to submit proposals therefore) necessary to verify and monitor the operation of the safeguards during contract performance and acceptance and to discover and counter any new threats or hazards;

(6) The requirement for periodically assessing the security risks involved and advising potential users of the level of security provided;

(7) Proposed contractual clauses or provisions, as necessary, to provide for the foregoing; and

(8) A description of the personnel security requirements.

270.1002 Security program for automatic data processing facilities.

(a) DoD Components are required to organize and maintain an ADP system security program to ensure the protection, confidentiality, and integrity of the Government's investment in the ADP system, including associated ADPE, data, computer media, and software. This program should be applied to contractors as appropriate. DoD Components' internal directives and procedures for the physical security of computer facilities should consider the standards and guidelines that appear in the following Department of Commerce publications:

(1) FIPS PUB 31, Guidelines for Automatic Data Processing Physical Security and Risk Management;

(2) FIPS PUB 29, Glossary for Computer Systems Security;

(3) FIPS PUB 41, Computer Security Guidelines for Implementing the Privacy Act of 1974;

(4) FIPS PUB 46, Data Encryption Standard;

(5) FIPS PUB 48, Guidelines on Evaluation of Techniques for Automated Personnel Identification; and

(6) FIPS PUB 65, Guideline for Automatic Data Processing Risk Analyses.

(b) NBS Publications List 91 outlines a number of additional NBS computer security publications.

270.1003 Security against compromising emanations.

(a) If computer equipment to be acquired is to be used to process classified information, a determination as to whether or not the equipment is required to provide protection against compromising emanations, as required by Departmental procedures, shall be provided to the contracting officer by the requiring activity. If such protection is required, the contracting officer shall require that equipment delivered under the contract shall comply with an established National TEMPEST standard (e.g., NACSEM 5100, NACSIM 5100A) or a standard used by other authority, as identified by the requiring activity.

(b) If contracts are to be awarded which require the performance of ADP services involving classified data, programs, etc., the requiring activity shall advise the contracting officer on whether or not to require Defense contractors performing these services to use equipment meeting the requirements specified in (a) above. The requiring activity shall also provide information concerning any requirement for marking of TEMPEST-certified equipment (especially if to be reused), and the means of validating TEMPEST equipment compliance with required standards.

(c) *Contract clause.* The contracting officer shall insert a clause similar to the clause at 252.270–7060, Protection Against Compromising Emanations, in solicitations and contracts when acquiring computer equipment or systems to be used to process, transmit, store, retrieve or display information requiring protection under the National Security or Atomic Energy Acts, as amended. Other necessary material developed by DoD Components may be invoked in the clause as appropriate when a contractor is to perform automated services involving material requiring protection against compromise.

(d) The contracting officer shall insure that Section E of the contract (Inspection and Acceptance) requires validation of the equipment's TEMPEST compliance with the established standard. This is accomplished by one of three methods:

(1) Determining that the equipment is listed or certified for listing on the Preferred Products List (PPL) published quarterly by the Subcommittee on Compromising Emanations (SCOCE). This list is available from the local TEMPEST official;

(2) If compliance with a TEMPEST standard other than NACSEM 5100 or NACSIM 5100A is required, the requiring activity's cognizant TEMPEST official shall determine the compliance of the delivered equipment with the standard; or

(3) Actual testing and certification by the DoD Component's cognizant TEMPEST activity.

(e) In addition to the local TEMPEST official, information on the TEMPEST program, equipment qualification, etc., may be obtained from the following:

For the Army: TEMPEST Coordination Officer, Major Command Headquarters, or Commander, U.S. Army Intelligence and Security Command, ATTN: IAOPS–OP–P, Arlington Hall Station, Arlington, VA 22212.

For the Navy: Commander, Naval Security Group Command, ATTN: Code G65, 3801 Nebraska Avenue, N.W., Washington, DC 20390.

For the Air Force: TEMPEST Officer, Major Command Headquarters, or AFCSC/EPV, San Antonio, TX 78243.

For the Marine Corps: Commandant of the Marine Corps, Headquarters, Marine Corps, ATTN: Code CCTS, Washington, DC 20380.

For the office, Secretary of Defense and Defense Agencies not listed below: Office of the Joint Chiefs of Staff, ATTN: TC3S–JTR, The Pentagon, Washington, DC 20301.

For the Defense Intelligence Agency: Director, Defense Intelligence Agency ATTN: OS–2, Washington, DC 20301.

For the Defense Communications Agency: Mr. Wheeler W. Hatch, Defense Communications Agency, ATTN: B315, Washington, DC 20305.

For the Defense Logistics Agency: Director, Defense Logistics Agency, ATTN: Command Security Office (DLA–T1), Cameron Station, Alexandria, VA 22314.

For the Defense Nuclear Agency: Director, Defense Nuclear Agency, ATTN: ISSO, Washington, DC 20305.

For the Defense Investigative Service: Defense Investigate Service, Directorate for Industrial Security, ATTN: V0410, 1900 Half Street, N.W., Washington, DC 20324.

For the Defense Mapping Agency: Defense Mapping Agency, Building 56, USNOBS, Washington, DC 20305.

Subpart 270.11—Standards

270.1100 Scope of subpart.

This subpart provides for implementation of Federal Information Processing Standards (FIPS), Federal Telecommunications Standards (FED–STD) and Joint FIPS/FED–STD for computer equipment subject to Subpart 270.3. These standards may also be used for computer equipment subject to Subparts 270.4 and 270.5.

270.1101 Policy.

(a) Under the provisions of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 759(f) and Executive Order 11717), the Secretary of Commerce is authorized to establish uniform Federal Information Processing Standard Publications (FIPS PUB) to be met by Federal agencies, including the Department of Defense, in acquiring ADP equipment and software as defined in 270.2. Prior to the award of any contract for these items, contracting officers shall assure that the otherwise successful offeror satisfies the applicable FIPS PUB requirements specified in the solicitations.

(b) The Defense Communications Agency and the U.S. Army Communications-Electronics Command (CECOM) are responsible for developing and/or promulgating all guidance on communications standards, regardless of source or origin, applicable to DoD that Defense communications systems must meet when being acquired. These include NATO, international and national standards, industry, Federal and military standards. Acquisition shall be made only from those sources that comply with the communications standards contained in the solicitations.

(c) In order to maximize competition by promoting standardization and compatibility among vendors of commercially available automatic data processing equipment (ADPE), the National Bureau of Standards (NBS), Department of Commerce, has established and maintains listings of equipment that it has verified as having conformed to, or having been excluded from, certain FIPS. These standards apply to the acquisitions of:

(i) All new and replacement ADP systems not otherwise excluded in FIPS PUBS 60–1, 61, 62, and 63;

(ii) Computer peripheral equipment acquired to replace existing peripheral equipment or to augment ADP systems that employ interfaces conforming to the Input/Output Channel Interface Standards (FIPS PUBS 60–1, 61, 62, and 63); and

(iii) Peripheral equipment acquired to replace existing peripheral equipment or to augment ADP systems that do not conform to FIPS PUBS 60–1, 61, 62, and 63, but for which the hardware and software necessary to conform to these standards are commercially available.

(d) Though the NBS qualification procedures occur in advance and independent of any specific action, maximum practicable opportunity shall be given to prospective contractors to qualify products during the preaward process. Contracting officers may obtain both the lists of equipment which qualify as satisfying the NBS standards and those excluded from this verification procedure by writing the Director, Center for Computer System Engineering, Institute for Computer Science and Technology, National Bureau of Standards, Washington, DC 20234. Offerors may obtain verification procedures for compliance testing from this address, Attention: Verification of I/O Channel Level Interface Standards.

270.1102 Waivers.

(a) The waiver procedure for FIPS for computer equipment subject to 270.3 is set forth in the particular FIPS PUB. For some standards, a waiver approval is required from the Secretary of Commerce prior to issuance of solicitations.

(b) The waiver provisions of FAR 9.206–1(c)(3) do not apply to those items subject to (a) above. Waiver procedures are specified by the DoD components. Communication standards in the MIL STD 188-series are mandatory for use within DoD.

270.1103 Solicitation provisions and contract clauses.

(a) *Federal information processing standards.* The contracting officer shall insert the following provisions and clauses, as applicable (see 270.1101 above), in solicitations and contracts for automatic data processing equipment, software and supplies, unless a waiver has been obtained in accordance with DoD Component procedures (see 270.1102 above):

(1) 252.270–7009, American Standard Code for Information Interchange (ASCII) System Requirements; to specify the code and character set for use in information processing systems and associated communications and related equipment.

(2) 252.270–7010, Punched Paper Tape Readers and Punches; when acquiring equipment which punches or reads perforated tape.

(3) 252.270–7011, Recorded Magnetic Tape for Information Interchange (800 CPI, NRZI); when acquiring 9-track ½-inch wide, 800 characters-per-inch magnetic tape equipment.

(4) 252.270–7012, Rectangular Holes in 12-Row Punched Cards; when acquiring equipment or services involving the reading or punching of 3¼-inch cards.

(5) 252.270–7013, Hollerith Punched Card; when acquiring punched card machines (PCM) used to punch or read 12-row 3¼-inch wide cards utilizing rectangular holes.

(6) 252.270–7014, Subsets of the Standard Code for Information Interchange; when acquiring ADPE which does not require the full 128-character set required by FIPS PUB 1–1.

(7) 252.270–7015, Flowcharts, Symbols, and Their Usage in Information Processing; when flowcharts of information processing systems are part of the documentation to be delivered to the Government.

(8) 252.270–7016, Recorded Magnetic Tape for Information Interchange (1600 CPI, Phase Code 0); when acquiring tape drives as described in the clause.

(9) 252.270–7017, One-inch Perforated Paper Tape for Information Interchange; when acquiring one-inch paper tape or associated equipment.

(10) 252.270–7018, Take-up Reels for the One-inch Perforated Tape for Information Interchange; when acquiring one-inch perforated tape take-up reels or related equipment.

(11) 252.270–7019, Software Summary for Describing Computer Programs and/or Automated Data Systems; when the ADP acquisition involves documentation of computer programs and/or automated data systems.

(12) 252.270–7020, Optical Character Recognition Equipment; when acquiring Optical Character Recognition (OCR) equipment, or services relating thereto, except as described in 270.1103(a)(13) below.

(13) 252.270–7021, Character Set for Handprinting; when acquiring Optical Character Recognition (OCR) equipment requiring data entry of handprinted material.

(14) 252.270–7022, Code Extension Technique in 7 or 8 Bits; when the acquisition allows for the submission of coded character sets that are not included in the standard 128 characters of the American Standard Code for Information Interchange (ASCII).

(15) 252.270–7023, Graphic Representation of the Control Characters of ASCII (FIPS PUB 1–1); when acquiring equipment that prints or displays any of the control characters of the ASCII.

(16) 252.270–7024, Data Encryption Standard (DES); when (i) there is a requirement for data encryption, (ii) a DoD component decides that cryptographic protection is required, and (iii) the data are not classified according to either the National Security Act or the Atomic Energy Act.

(17) 252.270–7025, Recorded Magnetic Tape for Information Interchange, 6250 Characters Per Inch (CPI) (246 CPMM, Group Coded Recording); when acquiring tape drives as described in the clause.

(18) 252.270–7026, Magnetic Tape Cassettes for Information Interchange (3.810MM (0.150 Inch) Tape at 32BPMM (800 BPI), PE); when acquiring magnetic tape cassette equipment as described in the clause.

(19) 252.270–7027, Recorded Magnetic Tape Cartridge for Information Interchange, 4-Track, 6.30MM (0.25 Inch), 63 BPMM (1600 BPI) Phase Encoded; when acquiring magnetic tape cartridge equipment as described in the clause.

(20) 252.270–7028, Description of Computer Magentic Tape File Properties; when the acquisition involves delivery of coded information on magnetic tape.

(21) 252.270–7029, Computer Output Microform (COM) Formats and Reduction Ratios, 16MM and 105MM; when the acquisition involves computer generated microforms.

(22) 252.270–7030, Input/Output (I/O) Channel Interface; when an acquisition conforming to 270.1101(c) is effected, and FIPS PUB 60–1 controls.

(23) 252.270–7031, Channel Level Power Control Interface; when an acquisition conforming to 270.1101(c) is effected, and FIPS PUB 61–1 controls.

(24) 252.270–7032, Operational Specification for Magnetic Tape Subsystems; when an acquisition conforming to 270.1101(c) is effected, and FIPS PUB 62 controls.

(25) 252.270–7033, Operational Specifications for Rotating Mass Storage Systems; when an acquisition conforming to 270.1101(c) is effected, and FIPS PUB 63 controls.

(26) 252.270–7034, BASIC Language Compilers; when an acquisition includes a BASIC compiler.

(27) 252.270–7035, FORTRAN Language Compilers; when an acquisition includes a FORTRAN compiler.

(28) 252.270–7036, Magnetic Tape Labels and File Structure Information Interchange; when acquiring information processing systems that will either generate or accept magnetic tapes for information interchange.

(29) 252.270–7037, Data Encryption Standard (DES) Modes of Operation; when acquiring ADPE and ADP services subject to the GSA approval requirements contained in Subpart 270.3, and the Data Encryption Standard (DES) described at 270.1103(a)(16) above.

(30) 252.270–7038, Microform Readers; when acquiring microform readers to be used in conjunction with computer-generated microform conforming to the clause at 252.270–7029.

(31) 252.270–7039, Optical Character Recognition (OCR) Inks; when local purchase is authorized for optical character recognition (OCR) ink and preprinted forms that will be read by OCR techniques when the interchange of machine readable information between different systems will be required.

(32) 252.270–7040, Optical Character Recognition (OCR) Printers, Readers and Printed Forms; when acquiring optical character recognition (OCR) printers, readers and printed forms subject to the clause at 252.270–7020.

(33) 252.270–7041, Digital Magnetic Tape Cassette Equipment and Associated Programs; when acquiring magnetic tape casset equipment or associated programs specified in the clause.

(34) 252.270–7042, Acquisition and Validation of COBOL Compilers; when the acquisition includes a COBOL compiler.

(35) 252.270–7043, Acquisition of COBOL Programs and/or Programming Services; when the acquisition involves delivery of a program written in COBOL.

(36) 252.270–7044, Delayed Validation of Compilers; when delayed validation of compilers is necessary or advantageous.

(37) 252.270–7045, Interchange of Machine Processable Data Between and Among Agencies; when a contract will involve the acquisition of programs to be interchanged with state and local governments, industry and the public.

(b) *Joint Federal Information Processing/Federal Telecommunications Standards (FIPS–FED/STD).* The contracting officer shall insert the following clauses, as applicable, in solicitations and contracts for automatic data processing equipment

(ADPE), software and services subject to Subpart 270.3, *provided* that the requiring activity determines that no other standards apply to the telecommunication aspects of the requirements, and compliance with FIPS PUB 1–1 is required:

(1) 252.270–7046, Synchronous High Speed Data Signaling Rates Between Data Terminal Equipment and Data Communications Equipment; when an acquisition involves data terminal and ADPE which is (i) employed with synchronous data communication equipment, and (ii) designed to operate on binary encoded information over wideband communication channels having greater band width than the normal 4kHz commonly used in analog voice transmission.

(2) 252.270–7047, Bit Sequencing of the Code of Information Interchange in Serial-by-Bit Data Transmission; when acquiring equipment or services requiring the transmission of data in a serial-by-bit, serial-by-character mode.

(3) 252.270–7048, Character Structure and Character Parity Sense for Serial-by-Bit Data Communication in the Code for Information Interchange; when acquiring equipment where transmission of data is a serial-by-bit, serial-by-character synchronous or asynchronous mode is to occur.

(4) 252.270–7049, Character Structure and Character Parity Sense for Parallel-by-Bit Data Communication; when acquiring equipment or services for the transmission of data in a parallel-by-bit, serial-by-bit mode, in order to prescribe the character structure and sense of character requirements.

(5) 252.270–7050, Synchronous Signaling Rates Between Data Terminal and Data Communication Equipment; when acquiring equipment or services that are to employ voice communication facilities, in order to prescribe the transfer rate for binary coded information in synchronous serial or parallel form.

(6) 252.270–7051, Data Link Control-Synchronous Bit-Oriented Data; when acquiring equipment or services using synchronous, bit-oriented data communications, in order to prescribe data link control procedures.

(c) *Federal Telecommunications Standard.* The contracting officer shall insert the following clauses, as applicable, in solicitations and contracts involving acquisition of ADP and telecommunications equipment and software subject to Subpart 270.3, unless it is determined by the requiring activity that other standards are appropriate;

(1) 252.270–7052, Time and Frequency Reference Information in Telecommunications Systems; when acquiring telecommunications systems or facilities which are totally funded by one or more Government contracts.

(2) 252.270–7053, Coding and Modulation Requirements for Nondiversity 2400 Bit/Second Modems; when acquiring, by lease or purchase, 2400 bits per second (bps) modems for use over analog transmission channels other than those derived from high-frequency radio facilities.

(3) 252.270–7054, Coding and Modulation Requirements for 4800 Bit/Second Modems; when acquiring 4800 bits per second (bps) modems to be used with nominal 4kHz analog channels.

(4) 252.270–7055, Coding and Modulation Requirements for Duplex 9600 Bit/Second Modems; when acquiring duplex 9600 bits per second (bps) modems for use with "four-wire" nominal 4kHz analog transmission channels.

(5) 252.270–7056, Coding and Modulation Requirements for Duplex 600 and/or 1200 Bits/Second Modems; when acquiring duplex 600 and/or 1200 bits per second (bps) modems to be used with 4kHz analog transmission channels terminated by "two-wire" circuits.

(6) 252.270–7057, Electrical Characteristics of Balanced Voltage Digital Interface Circuits; when there is a requirement to acquire equipment which must satisfy the electrical characteristics of balanced voltage digital interface circuits employed for the interchange of serial binary information which is conveyed at the direct current (DC) baseband level at signaling rates of up to 10 megabits per second.

(7) 252.270–7058, Electrical Characteristics of Unbalanced Voltage Digital Interface Circuits; when there is a requirement to acquire equipment which must satisfy the electrical characteristics of unbalanced voltage digital interface circuits employed for the interchange of serial binary information conveyed at the direct current (DC) baseband level of signaling rates of up to 100 kilobits per second.

(8) 252.270–7059, Group 2 Facsimile Apparatus for Document Transmission; when acquiring Group 2 facsimile equipment.

Subpart 270.12—The Federal Computer Performance Evaluation and Simulation Center

270.1201 The Federal Computer Performance Evaluation and Simulation Center.

(a) *General.* The Federal Computer Performance Evaluation and Simulation Center (FEDSIM) is operated by the Department of the Air Force under a delegation of authority from the Administrator of the General Services Administration. It provides technical assistance, support, and services on a reimbursable basis for simulation, analysis, and performance evaluation of automatic data processing systems and is the primary source for those services.

(b) *Services available.*

(1) Services available nationally are comprised of FEDSIM resources and FEDSIM-monitored contractual services for computer services simulation and preformance evaluation. These services include simulation languages and packages for computer system simulations, software and hardware monitors for computer system performance evaluation, and special software programs designed to support computer system simulation and performance evaluation efforts, such an accounting systems analysis and workload modeling. The Center's services also include ADP support services such as those provided by simulation analysts.

(2) The services that the Center provides are intended to be temporary in nature and in response to specific questions or problems. A continuous simulation and performance evaluation program in support of individual user operations is not intended.

(c) *Policy for obtaining FEDSIM services.*

(1) FEDSIM shall be considered as the primary source of supply for ADP simulation and computer performance evaluation requirements, services, and products, including but not limited to, computer systems simulators and hardware and software monitors.

(2) The Center advises agencies whether (i) FEDSIM resources or FEDSIM contracts are available; (ii) and ADP schedule is available as a source of supply; or (iii) a new acquisition action is necessary.

(3) If the Center is unable to fulfill the requirement or if the requirement can be more economically fulfilled through commercial sources, the agency may acquire the services.

(d) *Procedures for obtaining FEDSIM services.*

(1) DoD components requiring ADP simulation, computer performance evaluation assistance, hardware performance monitors, software performance monitoring packages, or other computer performance evaluation products or services, shall contact the Center. The mailing address is: Department of the Air Force, Federal Computer Performance Evaluation and Simulation Center (FEDSIM), Washington, DC 20330.

(2) The Center, consistent with the lowest cost alternative or combination of alternatives, will take one of the following four actions:

(i) Provide services from its own resources on a reimbursable basis to the requesting agency.

(ii) Acquire, on a reimbursable basis, the necessary support from commercial sources for the requesting agency.

(iii) Advise the requesting agency's acquisition activity how to acquire necessary support from the ADP schedule or other existing contractual instruments or how to initiate an acquisition action for the services.

(iv) Recommend to GSA that GSA acquire required resources for the requesting agency (where unusual legal or acquisition policy issues so dictate).

(3) If no action involving a request for services is taken by the Center within 20 workdays after acknowledgment of receipt of full information from an agency, the agency may proceed without further references to the Center.

Subpart 270.13—Sharing of Computer Resources

270.1300 Scope of subpart.

This subpart provides direction relating to use of existing resources as an alternative to the acquisition of additional resources.

270.1301 Policy.

DoD Components are required to consider sharing and use of existing resources in accordance with DoD Manual 7950.1–M, Departmental procedures, and OMB Circular A–121 as an economical and efficient means of meeting their needs.

270.1302 Government-wide sharing procedures.

(a) DoD Components shall not initiate the process of selection and acquiring resources unless it has first made a reasonable effort to determine that the required capability cannot be met economically and efficiently by using existing resources on a shared basis. If the result of screening is unsuccessful, the basis for this determination shall be documented in the contract file.

(b) DoD Components are required to include a statement relative to this screening procedure when submitting agency procurement requests (APRs).

270.1303 Federal Data Processing Centers (FDPCs).

(a) *Services available from FDPCs.* FDPCs provide many ADP services and ADP support services. GSA, through informational bulletins, will announce the availability of specific services and associated costs.

(b) *Point of contact.* Activities that require any FDPC services that have not been provided through the procedures set forth in 270.1302 may contact General Services Administration (KMA), Washington, DC 20405, or the appropriate FDPC.

270.1304 Federal Software Exchange Program.

The Federal Software Exchange Program is operated by GSA or its authorized representative pursuant to the overall policy guidance and direction of GSA. The program applies to common-use software developed or revised by either Government or contractor personnel. It is not applicable to software that is classified, developed at private expense, or developed with revolving funds where reimbursement of all costs is required. It is not applicable to software to which the Government does not possess full rights of ownership. For the purpose of this subpart, common-use software is that which:

(a) Deals with problems common to many agencies, that would be useful to other agencies, and is written in such a way that minor variations in requirements can be accommodated without significant programming effort. Examples of such software are: management business applications, computer systems support and utility programs, simulators, scientific or engineering applications, programming aids which are application-independent, and bibliographic or textual programs;

(b) Has been tested and proven operational for at least 90 days and is maintained by or for a Federal agency; and

(c) Is composed of stand-alone subroutines, programs, or subsystems; i.e., not dependent on special or unique hardware options or software features unless such options or features can be readily translated or simulated for hardware other than the original and can be similarly useful on different hardware.

270.1304–1 Procedures.

(a) DoD Components having requirements for software that they plan to acquire from commercial sources shall screen existing Federal ADP software resources by reviewing the Federal Software Exchange Catalog or by obtaining assistance from the Federal Software Exchange Center (FSEC) to meet its software requirements.

(b) Programs or systems listed in the Federal Software Exchange Catalog are available through the FSEC, which will contact the contributing agency for the requested documentation and/or programs.

(c) The FSEC will make a copy of both the documentation and the program to be kept on file for future requests. The FSEC will provide the software package to the requesting agency at the published price.

270.1304–2 Federal Software Exchange Center.

The functions of the Federal Software Exchange Center (FSEC) include:

(a) Maintaining a central library of summary descriptions of common-use programs and systems, including a complete index of this inventory and master copies of requested programs, systems and documentation.

(b) Editing, screening, and compiling agency abstracts of common-use programs or systems submitted for exchange by Federal agencies.

(c) Functioning as a central point of contact with agencies for information and dissemination of available software.

(d) Publishing and distributing the basic Federal Software Exchange Catalog with periodic updates.

(e) Assisting Federal agencies in identifying currently available software to satisfy their requirements.

(f) Assisting agencies in obtaining information concerning technical problems with software released through FSEC.

(g) Notifying agencies of changes to software obtained through FSEC.

270.1304–3 DoD Components requirement.

DoD components are required to:

(a) Continually review software within the agency to identify programs or systems which would be of use to other agencies meeting the criteria set forth in 270.1304 and notify FSEC of changes and programs no longer maintained.

(b) Submit abstracts of programs meeting the criteria in 270.1304 to FSEC, National Technical Information Service, Springfield, VA 22151, on Standard Form SF 185, Federal Information Processing Standard Software Summary. Common-use programs and systems meeting the specified criteria will be described and reported to FSEC on a continuing basis.

(c) Notify FSEC, using SF 185, of changes to software previously reported. Such changes should have been adequately tested to ensure the effective performance of the software.

(d) Notify FSEC, using SF 185, of previously reported programs that the agency no longer maintains. (Reports shall be made within 30 days after terminating maintenance.)

270.1304–5 Federal Software Exchange Catalog availability.

The Federal Software Exchange Catalog of common-use programs and systems may be obtained from the National Technical Information Service, Springfield, VA 22151. Revisions of the catalog are published quarterly.

Subpart 270.13—Reuse of Equipment

270.1400 Scope of subpart.

This subpart sets forth policies and procedures regarding the reuse of computer equipment.

270.1401 Reassignment of computer equipment within DoD.

(a) The policies and procedures relating to the reassignment of computer equipment within the Department of Defense is contained in DoD Manual 7950.1–M, Defense Automation Resources Management Program.

(b) Installed Government-leased computer equipment need not be physically replaced by reassigned Government-owned computer equipment if retention of the leased computer equipment is more economical. In these circumstances, the agency should initiate action to return Government-owned computer equipment to the manufacturer/supplier in exchange for the title to the leased computer equipment.

(c) The reassignment of Government-leased computer equipment that is no longer required for the purpose and use for which it was originally acquired is a sole-source contracting action and, therefore, must be accomplished as such.

(d) The use of computer equipment for cannibalization for a parts source of supply shall not be made until excess reutilization requirements of other agencies are determined.

270.1402 Excess or exchange/"sale" computer equipment.

Each DoD component shall report Government-owned or -leased computer equipment that is excess to its needs or Government-owned computer equipment that is contemplated to be replaced pursuant to the exchange/"sale" authority in accordance with DoD 7950.1–M. Policies and procedures for reporting exchange/"sale" of computer equipment are contained in DoD 7950.1–M.

270.1403 Reutilization of excess and exchange/"sale" computer equipment.

(a) DoD components shall be responsible for determining whether their ADP requirements can be efficiently and economically satisfied by using excess ADP equipment. To obtain maximum reutilization and to minimize the acquisition of the new computer equipment, excess and exchange/"sale" computer equipment shall be made available for transfer to other Federal agencies in accordance with DoD 7950.1–M.

(b) Excess auxiliary or accessorial computer equipment with an original acquisition cost (OAC) of $1,500 or less shall be made available for transfer to other Federal agencies.

(c) Any need for excess (but not obsolescent-excess) computer equipment expressed by a Federal agency shall take precedence over surplus disposal, provided such need is made known prior to shipment, or delivery in case of donation, or prior to contract award in case of "sale".

(d) Without exception, holding agencies shall solicit both requesting agency "sale" and vendor exchange (trade-in) offers when using exchange/"sale" authority (see 270.322).

270.1404 Considerations for use of excess Government-owned or leased computer equipment.

(a) *Government-owned excess computer equipment.* DoD components shall consider excess Government-owned computer equipment as a replacement for installed leased computer equipment or in meeting new requirements if the excess Government-owned computer equipment has the capability to fulfill the requirement and represents the lowest overall cost to the Government. The reutilization of excess Government-owned computer equipment is not a contracting action.

(b) *Government-leased excess computer equipment.*

(1) The reutilization of excess leased computer equipment is an acquisition and requires that a sole-source justification be prepared or the equipment be selected as a result of a competitive solicitation.

(2) Since excess leased computer equipment accrues substantial purchase option credits, agencies shall consider this equipment as replacement for installed leased computer equipment which has accrued fewer credits to the Government. This type of replacement shall not be considered a contracting action.

270.1405 Use of the ADP fund.

(a) Government-owned excess ADPE systems or items with a GSA estimated fair market value of at least $250,000 will be screened by GSA for possible reutilization. GSA will incorporate appropriate systems or items in the availability list. These systems or items will be leased to agencies by the ADP Fund at 50 percent of the fair market value determined by GSA. Ownership of the equipment will remain with the GSA ADP Fund.

(b) When leased excess ADPE with purchase option credits can satisfy agency data processing requirements, GSA will consider using the ADP Fund to purchase the equipment for the requesting agency when purchase is in the best economic interest of the Government and the agency does not have purchase funds available.

(c) DoD components may seek use of the ADP Fund for acquisition of exchange/"sale" ADPE if it is determined that the acquisition is economically advisable, the following requirements are met, and the DoD component can certify that:

(1) It has complied with applicable provisions of 270.302;

(2) It does not have funds programmed, nor can it reprogram funds for this purpose; and

(3) It cannot divert funds planned for other ADPE acquisitions with lesser rates of return, if any, for this purpose.

(d) When a DoD component proposes to request transfer of exchange/"sale" ADPE which it desires to acquire through the ADP Fund, the requesting activity shall submit a letter of intent to the General Services Administration (KXM), Washington, DC 20405. This letter shall include the projected period of equipment use; the requested terms of reimbursement, e.g., quarterly reimbursement for 3 years; the agency point of contact (with address and telephone number); and the shipping address, instructions, and fund citations for transportation and ADP Fund reimbursement. In addition, the requestor shall submit certifications that demonstrate the agency's compliance with the conditions listed in paragraph (c) of this section.

(e) The use of the ADP Fund for acquisitions of exchange/"sale" ADPE must be approved by GSA before a holding agency may honor the requesting agency's hold.

Regional Educational Laboratories and Research and Development Centers Program; Proposed Rulemaking

DEPARTMENT OF EDUCATION

34 CFR Parts 706, 707, and 708

Regional Educational Laboratories and Research and Development Centers Program

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes regulations for the implementation of Section 405(f) of the General Education Provisions Act (GEPA), as amended. Under the proposed regulations, the National Institute of Education could make awards for planning and institutional operations of regional educational laboratories and research and development centers.

DATE: Comments must be received on or before April 25, 1984.

ADDRESS: Comments should be addressed to Mr. Donald R. Fischer, National Institute of Education, Department of Education, 1200 19th St., NW., Washington, DC 20208.

FOR FURTHER INFORMATION CONTACT: Mr. Donald R. Fischer, (202) 254–7180.

SUPPLEMENTARY INFORMATION:

Background

The National Institute of Education (NIE) currently supports seven regional educational laboratories and ten research and development (R&D) centers located throughout the country, in accordance with section 405(f) of the General Education Provisions Act (GEPA), as amended, 20 U.S.C. 1221 *et seq.* With the exception of the Educational Technology Center, which was established in 1983, the existing laboratories and centers are the remaining organizations of a nationwide network of twenty laboraories and ten centers established by the U.S. Office of Education in the mid-1960's. Over the years, some of the original institutions closed as a result of evaluations of their work, increasing competition for available funds, changes in federal policy, and other circumstances.

The current awards for the existing laboratories and centers, excepting the Education Technology Center, are scheduled to expire during 1985. Through committee report language, the Congress has recently indicated its desire that NIE conduct an open competition for future laboratory and center awards. See the Conference Report accompanying the Omnibus Budget Reconciliation Act of 1981, Pub. L. 97–35 (H.R. Rep. No. 208, 97th Cong., 1st Sess. at pp. 729–730 (1981)) and the Senate Report accompanying the Urgent Supplemental Appropriations Act of 1982, Pub. L. 97–216 (S. Rep. No. 402, 97th Cong., 2d Sess. at p. 58 (1982)). This will be the first open competition for multiple institutional awards since the regional educational laboratories and research and development centers were established almost twenty years ago. To help insure that laboratories and centers continue to serve the public needs, in June 1983, NIE held eleven public meetings to allow the public to express their views on educational research, issues, problems, needs, and priorities of each region of the country as part of NIE's planning for future support of the regional educational laboratories and R&D centers. Additional comments came from selected NIE sponsored planning activities, including a study group on laboratory issues, four study groups on center issues, a national panel on the upcoming laboratory and center competitions, and technical advisors. These comments were helpful to NIE in developing proposed regulations to govern competitions for laboratory and center awards.

Regional Educational Laboratories

Regional educational laboratories are intended to help improve education by identifying and helping to meet educational research and development needs in specified regions of the country and by promoting the use in the regions of research and development results from all sources.

The current seven laboratories sponsored by NIE are governed by boards of directors that reflect the many interests of educational groups in the regions. Although the specific activities of individual laboratories may vary considerably, they generally—

- Identify concerns and priorities through regionally representative governance and advisory structures;
- Conduct applied research and development in pursuit of those priorities;
- Provide technical assistance to the region;
- Facilitate communication among educational agencies and individuals in the region;
- Promote the regional use of R&D results from all sources; and
- Disseminate nationally the results of their own activities. Current laboratories, their locations, and the composition of the region served by each are as follows:
- Appalachia Educational Laboratory, Inc. (AEL), Charleston, WV (AL, KY, OH, PA, TN, VA, WV).
- Far West Laboratory for Educational Research and Development (FWL), San Francisco, CA (CA, NV, UT).
- Mid-continent Regional Educational Laboratory (McREL), Kansas City, MO (CO, KS, MO, NE, ND, SD, WY).
- Northwest Regional Educational Laboratory (NWREL), Portland, OR (AK, HI, ID, MT, OR, WA, American Samoa, Guam, Micronesia, Northern Marianas).
- Research for Better Schools, Inc. (RBS), Philadelphia, PA (DE, NJ, PA).
- Southwest Educational Development Laboratory (SEDL), Austin, TX (AR, LA, MS, NM, OK, TX).
- Southwest Educational Laboratory (SWRL), Los Alamitos, CA (AZ, CA, NV).

Note.—As alternatives to full laboratory services following the discontinuance of funding to CEMREL, McREL and AEL provide interim services to IL, IN, IA, KY, MI, MN, MO, OH, TN, and WI. AEL also provides limited services to FL, GA, NC, and SC. RBS provides limited services to MD. The following States do not receive any services from a laboratory: CT, DC, ME, MA, NH, NY, PR, RI, VT, and VI.

Research and Development Centers

Research and development centers provide national research leadership in educational problem areas that are of national importance. An R&D center is responsible for establishing strategies and programs in pursuit of its mission through consultation with scholars and practitioners in its field and in collaboration with NIE staff. The current ten centers sponsored by NIE focus their resources on particular priorities or problem areas over the long term. These priorities include evaluation, educational finance and governance, the social organization of schools, educational policy and management, higher education management systems, learning research and development, education and work, teacher education, and student diversity in schooling.

Center research is typically long-term and multi-disciplinary, costituting an integrated program of complementary activities. Each center works actively with a national advisory panel of scholars, educators, and policymakers to guide and review its direction and performance. Implied in the notion of leadership are key responsibilities that each center strives to carry out: (1) Encouraging excellence in research and related activities, (2) breaking new ground in areas where progress in education is needed, (3) participating in national networks of scholars and practitioners working on similar problems, and (4) making the results of research available in forms that are most useful to practitioners and policymakers.

Current R&D centers and their locations are as follows:

- Center for Educational Policy and Management (CEPM), University of Oregon, Eugene, OR.
- Center for Social Organization of Schools (CSOS), The Johns Hopkins University, Baltimore, MD.
- Center for the Study of Evaluation (CSE), University of California, Los Angeles, CA.
- Educational Technology Center, Harvard University, Cambridge, MA.
- Institute for Research on Educational Finance and Governance (IFG), Stanford University, Stanford, CA.
- Learning Research and Development Center (LRDC), University of Pittsburgh, Pittsburgh, PA.
- National Center for Higher Education Management Systems (NCHEMS), Boulder, CO.
- National Center for Research in Vocational Education (NCRVE), Ohio State University, Columbus, OH.
- Research and Development Center for Teacher Education (RDCTE), University of Texas, Austin, TX.
- Wisconsin Center for Education Research (WCER), University of Wisconsin, Madison, WI.

Proposed Rules

The proposed rules would permit awards for planning or institutional operations of laboratories and centers. These rules are organized in three parts. Part 706 describes general provisions applying to both laboratory and center awards. Part 707 decribes specific provisions applying only to laboratories. Part 708 describes specific provisions applying only to centers.

Subpart C of Part 707 and Subparts B and C of Part 708 are designated as reserved. These subpart headings are standard in EDGAR and are included only to avoid a break in sequence. The Secretary does not contemplate at this time adding any provisions to these three subparts. Any provisions added in the future would constitute a revision of these proposed regulations.

Part 706 (Regional Educational Laboratories and Research and Development Centers: General Provisions) includes:

(a) *Subpart A—General*

The purpose of the program is described in the proposed regulations under § 706.1.

Section 706.2 in the proposed regulations identifies those agencies, institutions, and individuals eligible for awards under the Regional Educational Laboratories and Research and Development Centers Program.

Section 706.3 identifies the two (2) types of awards that the Secretary may make under this program: grants and contracts.

Section 706.4 identifies the regulations—in addition to Parts 706, 707, and 708—that apply to awards under this program. For grants, these include the Education Department General Administration Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, and 78. For contracts, these include Federal procurement regulations in 41 CFR Chapters 1 and 34.

EDGAR definitions and other definitions that apply to the program are listed in § 706.5

(b) *Subpart B—What Kinds of Projects Does the Secretary Fund Under This Program?*

Section 706.11 in the proposed regulations establishes the two (2) purposes for which the Secretary may fund awards under this program: planning and institutional operations.

For each competition, the Secretary may select one or more funding priorities by choosing priorities or combinations of priorities from those listed in § 706.12. The mission of a center in each competition for a center award must embody the priorities selected by the Secretary for that competition. This list includes the following twenty-six (26) priorities: learning; teaching; educational technology; instructional processes and materials, including textbooks and computer software for instruction; preparation and training of educational personnel; organization and management of schools, including effective school administration and leadership; evaluation and school indicators, including testing and measurement; governance of education, including school board policies and practices; educational finance; dissemination and knowledge utilization in education; change and improvement processes in education; student achievement and educational standards, including students' motivation to learn, their failure to learn, and their failure to attend school and graduate; home, family, and community influences in education; education, work, and careers; desegregation, busing, and their impact on educational equity and excellence; English literacy, including reading, writing, and language skills; mathematics; science; foreign languages; preschool education; elementary education; secondary education; adolescent education; postsecondary education; adult and continuing education; and education of special populations, including the educationally disadvantaged, the handicapped, and the academically gifted and talented. See § 75.1095 of EDGAR for a discussion of priorities.

In the case of competitions for center awards, the Secretary selects from the 26 priorities listed in § 706.12 the specific priorities or combinations of priorities that will be used to compete R&D centers. For example, one competition could be limited to teaching and the preparation and training of educational personnel in English literacy, mathematics, and science. Another competition could have as its priority the learning and teaching of mathematics and science at the elementary education level. Section 706.12, however, does not specify which of the 26 priorities will be used in formulating the missions for center competitions. The Secretary intends to make fewer center awards than the number of priorities listed in these regulations. The Secretary intends to annouce the specific priorities upon which the missions of individual centers are based and upon which center awards will be competed in a notice published in the **Federal Register**.

In the case of competitions for laboratory awards, the majority of activities described in an application or proposal will constitute a reponse to regionally defined needs. The Secretary may also encourage or require an applicant or offeror to describe in its application or proposal specific activities based on one or more priorities or combinations of priorities of national significance. The Secretary intends to encourage, rather than require, specific priorities of this kind. The Secretary announces, in a notice published in the **Federal Register**, the specific priorities that an applicant or offeror is encouraged or required to address.

(c) *subpart C—How Does One Apply for An Award?*

Section 706.21 describes the assurances that an applicant or offeror for an award for institutional operations must make.

Information needed for a multi-year project for institutional operations is described in § 706.22.

(d) *Subpart D—How Does the Secretary Make an Award?*

Section 706.31 establishes the general process for evaluating an application using the selection criteria. The Secretary announces, for each competition, the applicable selection criteria, listed in §§ 707.31, 707.32, 708.31, and 708.32. The maximum score possible for the selection criteria in each section is 100 points, including 15 reserved points. The Secretary announces how these reserved points

will be distributed for each competition through publication of a notice in the Federal Register. The criterion on budget and cost effectiveness carries no points in the proposed regulations. If the competition is for grants for planning or institutional operations, the Secretary distributes a minimum of 5 of the 15 reserved points for the criterion on budget and cost effectiveness. If the competition is for contracts for planning or institutional operations, technical evaluators do not evaluate the business portion of proposals. For this reason, no points are assigned to the criterion on budget and cost effectiveness if contracts are used.

Section 706.32 describes the standards and procedures, in addition to those in 34 CFR 75.217, which the Secretary may use to determine which applications for grants for institutional operations will be selected for funding. (Proposals for contracts will receive awards based on the procedures described in 41 CFR 34–3.51.)

In any competition for laboratory and center grants, the Secretary intends, although he is not required, to select groups of experts that will consist of three or more peers of the applicants and that will have a majority of peers who are not employees of the Federal Government. See 34 CFR 75.217(a). (The Secretary indends to use peers as technical evaluators to the same extent in reviewing proposals for laboratory and center contracts.)

(1) Groups of experts use the selection criteria for laboratories in § 707.32 or the selection criteria for centers in § 706.32 to evaluate applications. See 34 CFR 75.217(b).

(2) After applications are evaluated by the groups of experts, the Secretary prepares a rank ordering of the applications based solely on the evaluations of the groups of experts. See 34 CFR 75.217(c). Under § 706.32 of the proposed regulations, the Secretary plans to select the best of these applications for further consideration rather than simply determining at that time the order in which applications will be funded. See 34 CFR 75.217(d). In determining which applications will receive further consideration, the Secretary uses the standards and information described in 34 CFR 75.217(d). In any competition for awards for institutional operations, the Secretary in most cases intends to select no more than the top three applications for further consideration. Under § 706.32(a)(1), applications not selected for further consideration are returned to applicants with an explanation of why they were not selected.

(3) The Secretary may conduct site visits, under § 706.32(a)(2), to all applicants whose applications were selected for further consideration in order to get additional information on both the activities described in the applications and the capability of applicants to conduct the activities. After site visits are completed, § 706.32(a)(3) permits the Secretary to conduct written or oral discussions about the activities proposed, their associated costs, and other relevant topics with all applicants whose applications have been selected for further consideration. These discussions may focus on ambiguities, uncertainties, and deficiencies in the application. The Secretary does not reveal to the applicant information about other applications or information that could give the applicant a competitive advantage over another. Those applicants receiving further consideration are then informed that discussions are underway and that a final application is required by a deadline date applying to all applicants.

(4) The Secretary may review all final applications using the same procedures that were used earlier to review initial applications. The Secretary makes the final selection of awards in accordance with 34 CFR 75.217(d). Proposed § 706.32(b) permits the Secretary to consider the relationship between the technical merit of an application and its cost in comparison to other applications in making the final selection of applications for funding.

If one or more planning grants are to be made, the Secretary follows the procedures for selecting new grants described in 34 CFR 75.217. Section 706.33 describes the additional factors that the Secretary may consider in selecting an application for a planning grant: (1) the relationship between the technical merit of an application and its cost in comparison to other applications, and (2) the extent to which funding an application would contribute to a collection of laboratory and center planning awards that is both diverse and balanced and that addresses the most significant problems of American education.

If one or more planning contracts are to be awarded, the Secretary follows the procedures in 41 CFR 34–3.511. to select the proposal(s) offering the greatest advantage to the Government, price and other factors considered. In addition, under § 706.33(b), the Secretary may take into account the extent to which funding a proposal contributes to a collection of laboratory and center planning awards that is both diverse and balanced and addresses the most significant problems of American education.

(e) *Subpart E—What Conditions Must Be Met by a Grantee or Contractor?*

Section 706.41 states that a grantee or contractor receiving a laboratory award for institutional operations must meet the post-award requirements for laboratories described in § 707.41, and that a grantee or contractor receiving a center award for institutional operations must meet the post-award requirements for centers described in § 706.41. An applicant or offeror is not required to meet these requirements at the time that it submits an application or proposal. After receiving an award for institutional operations, however, the grantee or contractor must immediately take the necessary steps to bring itself into compliance with the provisions of all requirements.

Part 707 (Regional Educational Laboratories) includes:

(a) *Subpart A—General*

Section 707.1 states that the regulations in this part and the regulations in Part 706 apply to laboratory awards.

(b) *Subpart B—What Kinds of Activities Does the Secretary Fund under This Program?*

Section 707.11 describes the regions for laboratories and how the Secretary determines and announces regions. Three alternatives for laboratory regions are presented for public comment in the Special Issues section at the end of this preamble. If funding to a particular laboratory is discontinued, § 707.11 permits the Secretary to arrange for the continuation of laboratory services to all States.

(c) *Subpart C—How Does One Apply for an award?* [Reserved]

(d) *Subpart D—How Does the Secretary Make an Award?*

For laboratory awards for planning, the Secretary uses the selection criteria in § 707.31. For laboratory awards for institutional operations, the Secretary uses the selection criteria in § 707.32.

(e) Subpart E—What Conditions Must Be Met by a Grantee or Contractor?

The six (6) post-award requirements that must be met by a grantee or contractor receiving a laboratory grant or contract for institutional operations are described in § 707.41. The grantee or contractor is required to (1) be incorporated as a non-profit organization, (2) establish and maintain a board of directors subject to no higher governing board and representing the varied educational constituencies of the region, (3) facilitate communication in the region, (4) identify concerns and

priorities through governing and advisory structures representing the region and help regional clients do the same, (5) conduct research and development on regional needs, and (6) promote the use of research and development results from all sources, both inside and outside the region.

In the case of requirements (1) and (2), an institution of higher education with its own board of trustees could not meet this post-award requirement without taking steps to establish an independent, non-profit organization over which the board of trustees has no ultimate authority. A similar action would be required in the case of a consortium of chief State school officers. The consortium would have to establish an independent, non-profit organization with a regionally representative board of directors in order to meet these requirements.

Part 708 (Research and Development Centers) includes:

(a) *Subpart A—General*

Section 708.1 states that the regulations in this part and the regulations in Part 706 apply to center awards.

(b) *Subpart B—What Kinds of Activities Does the Secretary Fund under This Program?* [Reserved]

(c) *Subpart C—How Does One Apply for an Award? [Reserved]*

(d) *Subpart D—How Does the Secretary Make an Award?*

For center awards for planning, the Secretary uses the selection criteria in § 708.31. For center awards for institutional operations, the Secretary uses the selection criteria in § 708.32.

(e) *Subpart E—What Conditions Must Be Met by a Grantee or Contractor?*

The two (2) post-award requirements that must be met by a grantee or contractor receiving a center grant or contract for institutional operations are described in § 708.41. The requirements are to (1) provide national research leadership according to the mission of the center and (2) establish and maintain an advisory panel representing the nation as a whole.

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291.

They are classified as non-major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these regulations will not have a significant economic impact on a substantial number of small entities. The regulations do not impose requirements that will have a significant economic impact on the limited number of small entities that may participate in this program.

Invitation To Comment

General Comments

Interested persons are invited to submit comments and recommendations regarding the proposed regulations. Written comments and recommendations may be sent to the address given at the beginning of this document. All comments received by the end of the comment period will be considered in the drafting of final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 645, Brown Building, 1200 19th Street, NW, Washington, D.C. between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

Special Issues

The Secretary particularly invites comments on three alternatives regarding the designation of geographic regions to be served by laboratories under this program. All alternatives provide coverage to the entire country and assign each State to only one region.

The first alternative for the most part designates regions as they are currently composed. In addition, it adds four regions that encompass (a) the States in the Northeast that are not currently served by a laboratory, (b) a group of States in the Southeast, most of which are not currently served by a laboratory, (c) a group of States in the Great Lakes area, and (d) a group of States in the Rocky Mountain and Southwest areas of the country. Under this first alternative the regions are designated as follows:

(1) Connecticut, Maine, Massachusetts, New Hampshire, New York, Puerto Rico, Rhode Island, Vermont, Virgin Islands.

(2) Delaware, District of Columbia, Maryland, New Jersey, Pennsylvania.

(3) Kentucky, Tennessee, Virginia, West Virginia.

(4) Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina.

(5) Illinois, Indiana, Michigan, Ohio, Wisconsin.

(6) Arkansas, Louisiana, Oklahoma, Texas.

(7) Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota.

(8) Arizona, Colorado, New Mexico, Utah, Wyoming.

(9) California, Nevada.

(10) Alaska, American Samoa, Guam, Hawaii, Idaho, Montana, Northern Marianas, Oregon, Trust Territory of the Pacific Islands, Washington.

The second alternative also groups States in clusters similar to those of the currently served regions. Major differences include (a) a larger region in the West and (b) a separate region in the Pacific Basin. Under this second alternative the regions are designated as follows:

(1) Connecticut, Maine, Massachusetts, New Hampshire, New York, Rhode Island, Vermont.

(2) Delaware, District of Columbia, Maryland, New Jersey, Pennsylvania.

(3) Kentucky, Ohio, Tennessee, Virginia, West Virginia.

(4) Alabama, Florida, Georgia, Louisiana, Mississippi, North Carolina, Puerto Rico, South Carolina, Virgin Islands.

(5) Illinois, Indiana, Iowa, Michigan, Minnesota, Wisconsin.

(6) Arkansas, New Mexico, Oklahoma, Texas.

(7) Colorado, Kansas, Missouri, Nebraska, North Dakota, South Dakota, Wyoming.

(8) Arizona, California, Nevada, Utah.

(9) Alaska, Idaho, Montana, Oregon, Washington.

(10) American Samoa, Guam, Hawaii, Trust Territory of the Pacific Islands.

The third alternative being considered is to create a significantly larger number of regions (approximately 14 to 16 regions) than currently exist, with each new region composed of three to four States. Under this alternative the regions are not designated at this time, but the Secretary requests comments on both the notion of more regions of smaller size and the composition of these regions.

The Secretary invites comments on other appropriate designations of laboratory regions in addition to the three alternatives presented in this preamble.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the proposed regulations in this document would require transmission of information that is already being gathered by or is available from any other agency or authority of the United States.

Paperwork Reduction Act of 1980

The information collection requirements contained in these proposed rules, including § 706.22, will

be sent to OMB for review under the provisions of Section 3504(h) of the Paperwork Reduction Act of 1980 (Pub. L. 96-511).

Comments concerning information requirements *only* should be addressed to the Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, 17th and Pennsylvania Avenue, NW., Washington, D.C. 20503. Attention: Desk Officer for the U.S. Department of Education.

All other comments regarding these proposed regulations should be sent to the Department of Education at the address given at the beginning of this preamble.

List of Subjects in 34 CFR Parts 706, 707, and 708

Colleges and universities, Education, Educational research, Grant programs—education, Local education agencies, Nonprofit organizations, State education agencies.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these proposed regulations.

Dated: March 21, 1984.

T. H. Bell,

Secretary of Education.

(Catalog of Federal Domestic Assistance Number 84.117, Educational Research and Development)

The Secretary proposes to revise Title 34 of the Code of Federal Regulations by adding new Parts 706, 707, and 708:

1. The Secretary proposes to add a new Part 706 to read as follows:

PART 706—REGIONAL EDUCATIONAL LABORATORIES AND RESEARCH AND DEVELOPMENT CENTERS PROGRAM: GENERAL PROVISIONS

Subpart A—General

Sec.

706.1 What is the Regional Educational Laboratories and Research and Development Centers Program?
706.2 What parties are eligible to apply for an award under this program?
706.3 What types of awards does the Secretary make under this program?
706.4 What regulations apply to this program?
706.5 What definitions apply to this program?

Subpart B—What Kinds of Activities Does the Secretary Fund Under This Program?

706.11 For what purposes does the Secretary make an award under this program?
706.12 What priorities does the Secretary establish for this program?

Subpart C—How Does One Apply for an Award?

706.21 What assurances must an applicant or offeror make?
706.22 What information is needed for a multi-year project for institutional operations?

Subpart D—How Does the Secretary Make an Award?

706.31 How does the Secretary evaluate an application or a proposal?
706.32 What procedures and standards may the Secretary use to determine which applications for grants for institutional operations will be selected for funding?
706.33 What additional standards may the Secretary use to select an application or a proposal for a planning award?

Subpart E—What Conditions Must Be Met by a Grantee or Contractor?

706.41 What requirements must be met by a grantee or contractor?

Authority: Sec. 405 (e) and (f) of the General Education Provisions Act, as amended (20 U.S.C. 1221e (e) and (f)).

Subpart A—General

§ 706.1 What is the Regional Educational Laboratories and Research and Development Centers Program?

This program establishes regional educational laboratories and research and development centers to plan or conduct educational research and development, and related activities.

(20 U.S.C. 1221e (e) and (f))

§ 706.2 What parties are eligible to apply for an award under this program?

(a) The Secretary may make awards for institutional operations to—

(1) Regional educational laboratories established by public agencies or private nonprofit organizations; and

(2) Research and development centers established by institutions of higher education or by interstate agencies established by compact which operate subsidiary bodies established to conduct postsecondary educational research and development.

(20 U.S.C. 1221e(f))

(b) The Secretary may make awards for the planning of a laboratory or center to public or private organizations, institutions, agencies or individuals.

(20 U.S.C. 1221e(e))

§ 706.3 What types of awards does the Secretary make under this program?

The Secretary may award grants and contracts under this program.

(20 U.S.C. 1221e (e) and (f); 3474; 31 U.S.C. 9005)

§ 706.4 What regulations apply to this program?

(a) *Grants.* The following regulations apply to grants under this program:

(1) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 74 (Administration of Grants), Part 75 (Direct Grant Programs), Part 77 (Definitions), and Part 78 (Education Appeal Board).

(2) The regulations in this Part 706 and in 34 CFR Parts 707 and 708.

(b) *Contracts.* The following regulations apply to contracts under this program:

(1) Chapters 1 and 34 of Title 41 of the Code of Federal Regulations.

(2) The regulations in this Part 706 and in 34 CFR Parts 707 and 708.

(20 U.S.C. 1221e (e) and (f); 3474)

§ 706.5 What definitions apply to this program?

(a) *Definitions in EDGAR.* The following terms used in these regulations are defined in 34 CFR Part 77:

Applicant
Application
Award
Contract
Department
EDGAR
GEPA
Grant
Nonprofit
Private
Public
Secretary
State

(b) *Definitions that apply to this part.* The following definitions apply to this part:

"Center" means an educational research and development center funded under Section 405(f) of GEPA.

"Educational research and development" means all research and related functions, including, but not limited to, basic and applied research, development, demonstration, dissemination, evaluation, policy studies, implementation, and technical assistance.

"Institute" means the National Institute of Education.

"Institution of higher education" means a college or university, located in any State, which conducts research and training in fields related to the mission of a research and development center.

"Institutional operations" means the activities of a laboratory or center conducted under a long-term plan approved by the Institute.

"Laboratory" means a regional educational laboratory funded under this program.

"Mission" means the long-range goal or goals of a laboratory or center.

"Planning" means activities related to the planting of a laboratory or center.

(20 U.S.C. 1221e (e) and (f); 3474)

Subpart B—What Kinds of Activities Does the Secretary Fund Under This Program?

§ 706.11 What purposes does the Secretary make an award under this program?

The Secretary makes awards under this program for the purpose of planning or institutional operations or both.

(20 U.S.C. 1221e (e) and (f))

§ 706.12 What priorities does the Secretary establish for this program?

For each competition, the Secretary may select one or more funding priorities by choosing from the following individual priorities or combinations of these:

(a) Learning.

(b) Teaching.

(c) Educational technology.

(d) Instructional processes and materials, including textbooks and computer software for instruction.

(e) Preparation and training of educational personnel.

(f) Organization and management of schools, including effective school administration and leadership.

(g) Evaluation and school indicators, including testing and measurement.

(h) Governance of education, including school board policies and practices.

(i) Educational finance.

(j) Dissemination and knowledge utilization in education.

(k) Change and improvement processes in education.

(l) Student achievement and educational standards, including students' motivation to learn, their failure to learn, and their failure of attend school and graduate.

(m) Home, family, and community influences in education.

(n) Education, work, and careers.

(o) Desegregation, busing, and their impact on educational equity and excellence.

(p) English literacy, including reading, writing, and language skills.

(q) Mathematics.

(r) Science.

(s) Foreign languages.

(t) Preschool education.

(u) Elementary education.

(v) Secondary education.

(w) Abolescent education.

(x) Postsecondary education.

(y) Adult and continuing education.

(z) Education of special populations, including the educationally disadvantaged, the handicapped, and the academically gifted and talented.

Note.—EDGAR establishes the method for applying priority. See 34 CFR 75.105 (annual priorities).

(20 U.S.C. 1221e(e) and (f); 3474

Subpart C—How Does One Apply for an Award?

§ 706.21 What assurances must an applicant or offeror make?

In its application or proposal, an applicant or offeror for an award for institutional operations shall make assurances that the laboratory or center involved will—

(a) Be responsible for the conduct of research and development activities;

(b) Prepare a long-range plan relating to the conduct of such research and development activites;

(c) Disseminate information developed as a result of such research and development activities, including new educational methods, practices, techniques, and products;

(d) Provide technical assistance to appropriate educational agencies and institutions; and

(e) Provide training for individuals, emphasizing training opportunities for women and members of minority groups, in the use of new educational methods, practices, techniques, and products developed in connection with those activities.

(20 U.S.C. 1221e(f))

§ 706.22 What information is needed for a multi-year project for institutional operations?

In addition to the information required in 34 CFR 75.117, an application or proposal for a multi-year project for institutional operations must contain a mission statement for the proposed institution as a whole. The mission statement must describe goals and objectives and discuss how they relate to the specific activities described in the application or proposal.

(20 U.S.C. 1221e(f); 3474)

Subpart D—How Does the Secretary Make an Award?

§ 706.31 How does the Secretary evaluate an application or a proposal?

(a) For each competition the Secretary uses the applicable selection criteria in §§ 707.31, 707.32, 708.31, or 708.32 to evaluate applications and proposals for new awards under this program.

(b) The maximum score for all the criteria in each section is 100 points, including 15 points to be distributed in accordance with paragraph (d) of this section.

(c) Subject to paragraph (d) of this section, the maximum possible score for each criterion is indicated in parentheses with the criterion.

(d) For any competition the Secretary distributes 15 points among the criteria listed in the applicable section.

(20 U.S.C. 1221e(e) and (f); 3474)

§ 706.32 What procedures and standards may the Secretary use to determine which applications for grants for institutional operations will be selected for funding?

(a) To determine which applications will be selected for funding for grants for institutional operations, the Secretary may use the following procedures:

(1) After following the procedures in 34 CFR 75.216 and 75.217(a) through (c), the Secretary uses the standards in 34 CFR 75.217(d) to select applications for further consideration. The Secretary returns an application not selected to the applicant with an explanation of why that application was not selected for further consideration.

(2) The Secretary may conduct site visits to all of the applicants selected for further consideration. The Secretary conducts these site visits to obtain further information on both the activities described in the applications and the capability of the applicants to perform the work.

(3)(i) After site visits are completed, the Secretary conducts written or oral discussions on the work to be performed, the cost of the work, and other relevant topics with all applicants selected for further consideration.

(ii) The Secretary discusses with each applicant the ambiguities, uncertainties, or deficiencies, if any, in its application. The Secretary gives each applicant a reasonable opportunity to support, clarify, correct, improve, or otherwise revise its application. In discussions with an applicant, the Secretary does not identify areas in which another applicant has apparently received a higher evaluation, or otherwise provide information which could give the applicant a competitive advantage over other applicants. The Secretary may require more than one round of discussions with all the applicants. In deciding on the type, duration, and extent of the discussions, the Secretary considers the time available, the expense and administrative limitations, and the size and significance of the grants to be awarded.

(iii) The Secretary advises each applicant that—

(A) Discussions are being conducted;

(B) Applicants are required to submit a final application; and

(C) The final application, including any revisions, must be submitted by a deadline that applies to all of the applicants.

(4) The Secretary may, in accordance with the procedures in 34 CFR 75.217(a) through (c), conduct a review of all final applications submitted under paragraph (a)(3) of this section.

(b) In making grants under this section, the Secretary may consider the relationship between the technical merit of an application and its cost in comparison to other applications.

(20 U.S.C. 1221e(f); 3474)

§ 706.33 What additional standards may the Secretary use to select an application or a proposal for a planning award?

(a) *Grants.* In making grants for planning, the Secretary may consider—

(1) The relationship between the technical merit of an application and its cost in comparison to other applications; and

(2) The extent to which funding an application would contribute to a collection of laboratory and center planning awards that is both diverse and balanced and that addresses the most significant problem of American education.

(b) *Contracts.* In awarding contracts for planning, the Secretary may consider the extent to which a proposal contributes to a collection of laboratory and center planning awards that is diverse and balanced and that addresses the most significant problems of American education.

(20 U.S.C. 1221e(e); 3474)

Subpart E—What Conditions Must Be Met by a Grantee or Contractor?

§ 706.41 What requirements must be met by a grantee or contractor?

A grantee or contractor receiving a laboratory award for institutional operations shall meet the post-award requirements described in § 707.41; a grantee or contractor holding a center award for institutional operations shall meet the post-award requirements described in § 708.41.

(20 U.S.C. 1221e(f); 3474)

2. The Secretary proposes to add a new Part 707 to read as follows:

PART 707—REGIONAL EDUCATIONAL LABORATORIES

Subpart A—General

Sec.

707.1 What regulations apply to this program?

Subpart B—What Kinds of Activities Does the Secretary Fund under This Program?

Sec.

707.11 What geographic regions do the laboratories serve?

Subpart C—How Does One Apply for an Award? [Reserved]

Subpart D—How Does the Secretary Make an Award?

707.31 What are the selection criteria for laboratory awards for planning?

707.32 What are the selection criteria for laboratory awards for institutional operations?

Subpart E—What Conditions Must Be Met by a Grantee or Contractor?

707.41 What requirements must be met by a grantee or contractor?

Authority: Sec. 405 (e) and (f) of the General Education Provisions Act, as amended (20 U.S.C. 1221e (e) and (f)).

Subpart A—General

§ 707.1 What regulations apply to this program?

The regulations in this part and the regulations in 34 CFR Part 706 apply to awards for regional educational laboratories.

(20 U.S.C. 3474)

Subpart B—What Kinds of Activities Does the Secretary Fund under This Program?

§ 707.11 What geographic regions do the laboratories serve?

(a) The laboratories established under this program serve the following geographic regions:

[Reserved]

Note.—Three alternatives for geographic regions are presented for public comment in the preamble to these regulations.

(b) For each competition for laboratory awards, the Secretary announces which one or more of the geographic regions designated in § 707.13(a) will be served.

(c) In the event that funding of a particular laboratory under this program is discontinued, the Secretary may arrange for the continuation of laboratory services to all States.

(20 U.S.C. 1221e(e) and (f); 3474)

Subpart C—How Does One Apply for an Award? [Reserved]

Subpart D—How Does the Secretary Make an Award?

§ 707.31 What are the selection criteria for laboratory awards for planning?

The Secretary uses the following criteria to evaluate applications and proposals for laboratory awards for planning:

(a) *Understanding of the educational settings and issues in the region.* (25 points)

(1) The Secretary reviews each application or proposal for information that shows the extent to which the applicant or offeror understands the educational settings and issues in the region.

(2) The Secretary looks for information that shows—

(i) Knowledge of the strengths and needs of the educational systems—public and private, elementary, secondary, and postsecondary—in the region;

(ii) An understanding of significant trends expected to influence education in the region over the next half decade;

(iii) Knowledge of the capabilities of existing organizations that provide research, dissemination, training, and assistance to educational agencies in the region and how a laboratory can complement their work; and

(iv) An understanding of the barriers and challenges facing a laboratory in the region and ways of overcoming them.

(b) *Organizational ability to conduct planning and design tasks.* (20 points)

(1) The Secretary reviews each application or proposal for information that shows the organizational ability of the applicant or offeror to conduct the required planning and design tasks.

(2) The Secretary looks for information that shows—

(i) Successful experience in planning or conducting multi-state activities related to educational research and development; and

(ii) Existing relationships in the region giving the applicant or offeror access to important regional groups of clients and contributing to cooperative planning activities.

(c) *Plan of operation.* (20 points)

(1) The Secretary reviews each application or proposal for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows—

(i) High quality in the design of the project;

(ii) An effective plan of management that insures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant or offeror plans to use its resources and personnel to achieve each objective; and

(v) A clear description of how the applicant or offeror will address the problems of groups that have been

traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(d) *Quality of key personnel.* (10 points)

(1) The Secretary reviews each application or proposal for information that shows the qualifications of the key personnel the applicant or offeror plans to use on the project.

(2) The Secretary looks for information that shows—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (d)(2)(i) and (ii) of this section will commit to the project; and

(iv) The extent to which the applicant or offeror, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(3) To determine personnel qualifications, the Secretary considers experience and training, in fields related to the objectives of the project, as well as other information that the applicant or offeror provides.

(e) *Budget and cost effectiveness.* (0 points)

(1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows—

(i) The budget for the project is adequate to support the project activities; and

(ii) Costs are reasonable in relation to the objectives of the project.

(3) In a grant competition, this criterion is assigned at least 5 points.

(f) *Evaluation plan.* (5 points)

(1) The Secretary reviews each application or proposal for information that shows the quality of the evaluation plan for the project.

Cross-Reference. See EDGAR, § 75.590 Evaluation by the grantee.

(2) The Secretary looks for information that shows methods of evaluation that are appropriate for the project and, to the extent possible, are objective and produce data that are quantifiable.

(g) *Adequacy of resources.* (5 points)

(1) The Secretary reviews each application or proposal for information that shows that the applicant or offeror plans to devote adequate resources to the project.

(2) The Secretary looks for information that shows—

(i) The facilities that the applicant or offeror plans to use are adequate; and

(ii) The equipment and supplies that the applicant or offeror plans to use are adequate.

(20 U.S.C. 1221e(e) and (f); 3474)

§ 707.32 What are the selection criteria for laboratory awards for institutional operations?

The Secretary uses the following criteria to evaluate applications and proposals for laboratory awards for institutional operations

(a) *Understanding of and responsiveness to regional needs.* (10 points)

(1) The Secretary reviews each application or proposal for information that shows the applicant's or offeror's understanding of and responsiveness to the needs of the region.

(2) The Secretary looks for information that shows—

(i) An understanding of current and projected educational conditions and needs in the regions;

(ii) Adequate mechanisms and procedures for assessing the educational research and development needs and capabilities of the region and for determining laboratory priorities; and

(iii) An analysis of strategic options and a plan for responding to regional needs.

(b) *Strength of relationships with the region.* (15 points)

(1) The Secretary reviews each application or proposal for information that shows the strength of the applicant's or offeror's relationships with the region to be served.

(2) The Secretary looks for information that shows—

(i) A governing board whose composition reflects regional interests and constituencies;

(ii) A governing board designed to take an active role in setting policy;

(iii) A governance structure that provides the organizational autonomy necessary for neutrality, balance, and equity in the selection of clients and the delivery of services;

(iv) The quality, extent, and feasibility of proposed collaborative relationships with appropriate organizations, such as—

(A) Public education agencies at State, intermediate, and local levels;

(B) Educational research and development agencies;

(C) Organizations providing assistance in the use of research outcomes;

(D) Clearinghouses;

(E) Professional associations;

(F) Institutions of higher education;

(G) Community-based organizations;

(H) Business and industry; and

(v) Successful prior work and commitments for future work with such organizations.

(c) *Institutional capacity.* (15 points)

(1) The Secretary reviews each application or proposal for information that shows the qualifications of the applicant or offeror to sustain a long-term, high-quality, and coherent program of research and services.

(2) The Secretary looks for information that shows—

(i) Adequate organizational mechanisms and procedures for managing work internally and in collaboration with other institutions;

(ii) Adequate procedures for quality control and self-evaluation; and

(iii) Adequate plans for effecting improvement in organizational performance and staff development during the project period.

(d) *Plan of operation.* (20 points)

(1) The Secretary reviews each application or proposal for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows—

(i) High quality in the design of the project;

(ii) An effective plan of management that insures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant or offeror plans to use its resources and personnel to achieve each objective;

(v) A clear description of how the applicant or offeror will address the problems of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly;

(vi) A logical relationship between proposed activities and statements of regional needs and priorities;

(vii) Coherence of work within and among program activities;

(viii) The extent of which the proposed activities complement related efforts inside and outside the region;

(ix) The anticipated contribution of the work to educational improvement; and

(x) Appropriate provisions for sequencing and pacing work activities.

(e) *Quality of key personnel.* (15 points)

(1) The Secretary reviews each application or proposal for information that shows the qualifications of the key personnel the applicant or offeror plans to use on the project.

(2) The Secretary looks for information that shows—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (e)(2)(i) and (ii) of this section will commit to the project; and

(iv) The extent to which the applicant or offeror, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(3) To determine personnel qualifications, the Secretary considers experience and training, in fields related to the objectives of the project, as well as other information that the applicant or offeror provides.

(f) *Budget and cost effectiveness.* (0 points)

(1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows—

(i) The budget for the project is adequate to support the project activities; and

(ii) Costs are reasonable in relation to the objectives of the project.

(3) In a grant competition, this criterion is assigned at least 5 points.

(g) *Evaluation plan.* (5 points)

(1) The Secretary reviews each application or proposal for information that shows the quality of the evaluation plan for the project.

Cross-Reference. See EDGAR, § 75.590 Evaluation by the grantee.

(2) The Secretary looks for information that shows methods of evaluation that are appropriate for the project and, to the extent possible, are objective and produce data that are quantifiable.

(h) *Adequacy of resources.* (5 points)

(1) The Secretary reviews each applicant or proposal for information that shows that the applicant or offeror plans to devote adequate resources to the project.

(2) The Secretary looks for information that shows—

(i) The facilities that the applicant or offeror plans to use are adequate; and

(ii) The equipment and supplies that the applicant or offeror plans to use are adequate.

(20 U.S.C. 1221e (e) and (f); 3474)

Subpart E—What Conditions Must Be Met by a Grantee or Contractor?

§ 707.41 What requirements must be met by a grantee or contractor?

A grantee or contractor receiving a laboratory grant or contract for institutional operations shall meet the following post-award requirements. The grantee or contractor—

(a) Must be incorporated as a non-profit organization;

(b) Shall establish and maintain a board of directors that is subject to no higher governing board and that represents the varied educational constituencies of the region;

(c) Shall facilitate communication among educational agencies and individuals in the region;

(d) Shall identify concerns and priorities through regionally representative governing and advisory structures and activities that help regional clients define their needs;

(e) Shall conduct applied research, development, and related activities to address regional needs; and

(f) Shall promote the use in the region of research and development results from all sources inside and outside the region, including the laboratory.

(20 U.S.C. 1221e(f))

3. The Secretary proposes to add a new Part 708 to read as follows:

PART 708—RESEARCH AND DEVELOPMENT CENTERS

Subpart A—General

Sec.

708.1 What regulations apply to this program?

Subpart B—What Kinds of Activities Does the Secretary Fund Under This Program? [Reserved]

Subpart C—How Does One Apply for an Award? [Reserved]

Subpart D—How Does the Secretary Make an Award?

Sec.

708.31 What are the selection criteria for center awards for planning?

708.32 What are the selection criteria for center awards for institutional operations?

Subpart E—What Conditions Must Be Met by a Grantee or Contractor?

708.41 What requirements must be met by a grantee or contractor?

Authority: Sec. 405 (e) and (f) of the General Education Provisions Act, as amended (20 U.S.C. 1221e (e) and (f)).

Subpart A—General

§ 708.1 What regulations apply to this program?

The regulations in this part and the regulations in 34 CFR Part 706 apply to awards for research and development centers.

(20 U.S.C. 3474)

Subpart B—What Kinds of Activities Does the Secretary Fund under This Program? [Reserved]

Subpart C—How Does One Apply for an Award? [Reserved]

Subpart D—How Does the Secretary Make an Award?

§ 708.31 What are the selection criteria for center awards for planning?

The Secretary uses the following criteria to evaluate applications and proposals for center awards for planning:

(a) *Mission and strategy.* (25 points)

(1) The Secretary reviews each application or proposal for information that shows the extent to which the applicant or offeror understands the state of knowledge and practice with respect to the problem area and priorities of the center for which the applicant is applying or the offeror is proposing.

(2) The Secretary looks for information that shows—

(i) Understanding of the mission of the proposed center;

(ii) Knowledge of relevant research and theory;

(iii) Knowledge of relevant problems in educational practice;

(iv) Familiarity with relevant strategies of research, development, and dissemination; and

(v) Familiarity with strategies for relating to other organizations in educational research, development, and practice.

(b) *Institutional capacity.* (20 points)

(1) The Secretary reviews each application or proposal for information that shows the qualifications of the applicant or offeror to sustain a long-term, high-quality, and coherent program of research, development, and dissemination.

(2) The Secretary looks for information that shows—

(i) Strong support from the applicant or offeror, demonstrating the existence of appropriate organizational structures and a commitment to provide the services of appropriate faculty or staff members from the applicant's or offeror's organization;

(ii) Inclusion of an appropriate mixture of scholarly and practitioner backgrounds in the project staff of the applicant or offeror; and

(iii) The past successes of the applicant or offeror in collaborating with other individuals and organizations to conduct educational research and development.

(c) *Plan of operation.* (20 points)

(1) The Secretary reviews each application or proposal for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows—

(i) High quality in the design of the project;

(ii) An effective plan of management that insures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant or offeror plans to use its resources and personnel to achieve each objective; and

(iv) A clear description of how the applicant or offeror will address the problems of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(d) *Quality of key personnel.* (10 points)

(1) The Secretary reviews each application or proposal for information that shows the qualifications of the key personnel the applicant or offeror plans to use on the project.

(2) The Secretary looks for information that shows—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (d)(2)(i) and (ii) of this section will commit to the project; and

(iv) The extent to which the applicant or offeror, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(3) To determine personnel qualifications, the Secretary considers experience and training, in fields related to the objectives of the project, as well as other information that the applicant or offeror provides.

(e) *Budget and cost effectiveness.* (0 points)

(1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows—

(i) The budget for the project is adequate to support the project activities; and

(ii) Costs are reasonable in relation to the objectives of the project.

(3) In a grant competition, this criterion is assigned at least 5 points.

(f) *Evaluation plan.* (5 points)

(1) The Secretary reviews each application or proposal for information that shows the quality of the evaluation plan for the project.

Cross-Reference. See EDGAR, § 75.590 Evaluation by the grantee.

(2) The Secretary looks for information that shows methods of evaluation that are appropriate for the project and, to the extent possible, are objective and produce data that are quantifiable.

(g) *Adequacy of resources.* (5 points)

(1) The Secretary reviews each application or proposal for information that shows that the applicant or offeror plans to devote adequate resources to the project.

(2) The Secretary looks for information that shows—

(i) The facilities that the applicant or offeror plans to use are adequate; and

(ii) The equipment and supplies that the applicant or offeror plans to use are adequate.

(20 U.S.C. 1221e(e) and (f); 3474)

§ 708.32 What are the selection criteria for center awards for institutional operations?

The Secretary uses the following criteria to evaluate applications and proposals for center awards for institutional operations:

(a) *Mission and strategy.* (15 points)

(1) The Secretary reviews each application or proposal for information that shows the extent to which the applicant's or offeror understands the state of knowledge and practice in the problem area of the center's mission.

(2) The Secretary looks for information that shows—

(i) Understanding of the mission of the proposed center;

(ii) A program of work that will contribute to the development of relevant theory;

(iii) Potential of the proposed project to advance practice in significant ways;

(iv) The applicant's or offeror's awareness of the problems of special populations with respect to the mission of the proposed center;

(v) A selection of strategies of research, development, and dissemination that are likely to be effective;

(vi) Establishment of effective working relations with other organizations in educational research, development, and practice; and

(vii) Promising long-range plans for developing an appropriate and coherent program of educational research, development, and dissemination.

(b) *Institutional capacity.* (25 points)

(1) The Secretary reviews each application or proposal for information that shows the qualifications of the applicant or offeror to sustain a long-term, high-quality, and coherent program of research, development, and dissemination.

(2) The Secretary looks for information that shows—

(i) Strong support from the applicant or offeror, demonstrating the existence of appropriate organizational structures and a commitment to provide the services of appropriate faculty or staff members from the applicant's or offeror's organization;

(ii) Inclusion of an appropriate mixture of scholarly and practitioner backgrounds in the project staff of the applicant or offeror;

(iii) the past successes of the applicant or offeror in collaborating with other individuals and organizations to conduct educational research and development.

(iv) Structure and governance arrangements likely to provide appropriate direction, quality control, and cost-effective management; and

(v) Plans for effecting improvement in organizational performance and staff development during the period of award.

(c) *Plan of operation.* (20 points)

(1) The Secretary reviews each application or proposal for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows—

(i) High quality in the design of the project;

(ii) An effective plan of management that insures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project related to the purpose of the program;

(iv) The way the applicant or offeror plans to use its resources and personnel to achieve each objective; and

(v) A clear description of how the applicant or offeror will address the problems of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(d) *Quality of key personnel.* (15 points)

(1) The Secretary reviews each application or proposal for information that shows the qualifications of the key personnel the applicant or offeror plans to use on the project.

(2) The Secretary looks for information that shows—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (d)(2)(i) and (ii) of this section will commit to the project; and

(iv) The extent to which the applicant or offeror, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(3) To determine personnel qualifications, the Secretary considers experience and training, in fields related to the objectives of the project, as well as other information that the applicant or offeror provides.

(e) *Budget and cost effectiveness.* (0 points)

(1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows—

(i) The budget for the project is adquate to support the project activities; and

(ii) Costs are reasonable in relation to the objectives of the project.

(3) In a grant competition, this criterion is assigned at least 5 points.

(f) *Evaluation plan.* (5 points)

(1) The Secretary reviews each application or proposal for information that shows the quality of the evaluation plan for the project.

Cross-Reference. See EDGAR, § 75.590 Evaluation by the grantee.

(2) The Secretary looks for information that shows methods of evaluation that are appropriate for the project and, to the extent possible, are objective and produce data that are quantifiable.

(g) *Adequacy of resources.* (5 points)

(1) The Secretary reviews each application or proposal for information that shows that the applicant or offeror plans to devote adequate resources to the project.

(2) The Secretary looks for information that shows—

(i) The facilities that the applicant or offeror plans to use are adequate; and

(ii) The equipment and supplies that the applicant or offeror plans to use are adequate.

(20 U.S.C. 1221e(e) and (f); 3474)

Subpart E—What Conditions Must Be Met by a Grantee or Contractor?

§ 708.41 What requirements must be met by a grantee or contractor?

A grantee or contractor receiving a center grant or contract for institutional operations shall meet the following post-award requirements. The grantee or contractor shall—

(a) Provide national research leadership with respect to the mission of its center; and

(b) Establish and maintain a nationally representative advisory panel.

(20 U.S.C. 1221e(f))

March 26, 1984

Part IV

Department of Health and Human Services

Public Health Service

42 CFR Part 57

Grants for Predoctoral, Graduate, and Faculty Development Education Programs in Family Medicine; Final Rule

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Part 57

Grants for Predoctoral, Graduate, and Faculty Development Education Programs in Family Medicine

AGENCY: Public Health Service, HHS.

ACTION: Amendments to Final Regulations.

SUMMARY: This rule amends the regulations implementing grants for predoctoral, graduate, and faculty development education programs in family medicine to conform with definitional changes made by the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35) and the Commonwealth Covenant to Establish Northern Mariana Islands (Pub. L. 94–241). An amendment to remove a reference to a health systems agency review is also included. Additional changes are made for clarification purposes. These amendments are technical and nondiscretionary in nature.

EFFECTIVE DATE: These amendments are effective March 26, 1984.

FOR FURTHER INFORMATION CONTACT: Daniel N. Masica, M.D., Acting Director, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 4C–25, 5600 Fishers Lane, Rockville, Maryland 20857; 301 443–6190.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Health, with the approval of the Secretary, Department of Health and Human Services, is amending Subpart Q to Part 57 of Title 42 of the Code of Federal Regulations which was published in the **Federal Register** on October 16, 1980 (45 FR 68890). These regulations implement section 786(a) of the Public Health Service Act.

This rule amends the regulations to:

—Clarify the definition of family medicine by specifying that osteopathic general practice is included. Also, the misspelling of "provided" is changed to "provides."

—Clarify the definition of "Osteopathic internship program" by changing the current wording of "intern" to "internship."

—Correct the definition of "Residency training program" by substituting the new name of the accrediting body for allopathic graduate medical programs from "Liaison Committee on Graduate Medical Education" to the "Accreditation Council for Graduate Medical Education."

—Revise the definition of "School of medicine or osteopathy" to reflect a reference change from "section 772(b)" to "section 701 (4) and (5)" in accordance with Pub. L. 97–35.

—Revise the definition of "State" to comply with Pub. L. 94–241, which changed the status of the Northern Mariana Islands from "territory" to "a Commonwealth."

—Add clarifying language in the project requirements section to:

(1) In paragraph (a)(3), correct an earlier omission to include trainees and faculty as components for evaluation.

(2) In paragraph (a)(4), correct the misspelling of the word "ambulatory," improve the diction by deleting "when an" and substituting "in which," and changing the word "portion" to read "portions."

(3) In paragraph (b)(4)(iii)(C), change the references from "preceptorship" to "assistantship" in each place the word "preceptorship" is mentioned.

(4) In paragraph (c)(7), delete reference to "resident" and substitute the word "trainee" in order to reflect the more accurate meaning of the graduate trainee involved.

—Correct language in the evaluation section by changing in paragraph (1) the reference to the section of the regulations on project requirements from § 57.1605 to § 57.1604.

—Delete the section on what health planning requirements must be met since the health system agency review for training grant programs is no longer required.

—Renumber the three sections immediately following the deleted § 57.1608.

—Cite the Office of Management and Budget (OMB) numbers in those sections which contain recordkeeping and reporting requirements.

Paperwork Reduction Act

Section 57.1604 of the final regulations and the application forms and instructions for these grant programs have been approved by the OMB under the Paperwork Reduction Act of 1980 (OMB Approval Numbers are 0915–0060 for the competing application form and 0915–0061 for the continuation application form).

Regulatory Flexibility Act and Executive Order 12291

The Department of Health and Human Services has determined that these technical amendments will not significantly impact on small business and, therefore, do not require preparation of Regulatory Flexibility Analysis under the Regulatory Flexibility Act, Pub. L. 96–354.

These changes amend final regulations which govern a financial assistance program in which participation is voluntary and Federal support is provided to enable grantees to meet the regulatory project requirements. A regulatory impact analysis is not warranted because any costs will not approach the threshold criteria for major rules under Executive Order 12291. That is, they will not:

(1) Have an annual effect on the economy of $100 million or more;

(2) Impose a major increase in cost or prices for consumers, individual industries, Federal, State or local government agencies or geographic regions; or

(3) Result in significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Justification for Omitting Notice of Proposed Rulemaking

These amendments conform these regulations to Pub. L. 97–35 and 94–241 and make minor nonsubstantive changes to sections 57.1602, 57.1604, 57.1605, 57.1608, 57.1609, and 57.1610. The Secretary has therefore determined, according to 5 U.S.C. 553 and Department policy, that it would be unnecessary to follow proposed rulemaking procedures or to delay the effective date of these regulations.

List of Subjects in 42 CFR Part 57

Dental health, Education of the disadvantaged, Education facilities, Educational study program, Emergency medical services, Grant programs-education, Grant programs-health, Health facilities, Health professions, Loan programs-health, Medical and dental schools, Scholarships and fellowships, Student aid.

Accordingly, Subpart Q is revised and adopted as set forth below.

Dated: December 8, 1983.

Edward N. Brandt, Jr.,

Assistant Secretary for Health.

Approved: March 2, 1984.

Margaret M. Heckler,

Secretary.

(Catalog of Federal Domestic Assistance, No. 13.379, Grants for Graduate Training in Family Medicine, No. 13.896, Grants for

Predoctoral Training in Family Medicine and No. 13.895, Grants for Faculty Development in Family Medicine—

* * * * *

Subpart Q—Grants for Predoctoral Graduate, and Faculty Development Education Programs in Family Medicine

Authority: Sec. 215, Public Health Service Act, 58 Stat. 690, 67 Stat. 631 (42 U.S.C. 216); sec. 786(a) of the Public Health Service Act, 90 Stat. 2316 (42 U.S.C. 295g-6(a)).

1. Section 57.1602 is amended by revising the following definitions to read as follows:

§ 57.1602 Definitions.

* * * * *

"Family medicine" means the field of medicine, including osteopathic general practice, in which the physician:

(a) Serves as a physician of first contact with families and with patients of all ages and provides a means of entry into the health care system;

* * * * *

"Osteopathic internship program" means an internship which emphasizes family medicine and is approved by the American Osteopathic Association.

* * * * *

"Residency training program" means:

(a) A residency program in family practice which is fully or provisionally Accredited by the accreditation Council for Graduate Medical Education; or

* * * * *

"School of medicine or osteopathy" means a public or private nonprofit school which provides training leading respectively to a degree of doctor of medicine or to a degree of doctor of osteopathy and which is accredited as provided in section 701 (4) and (5) of the Act.

* * * * *

"State" means any one of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Virgin Islands, Guam, American Samoa, or the Trust Territory of the Pacific Islands.

* * * * *

2. In § 57.1604, paragraphs (a)(3), (a)(4), (b)(4)(iii)(C) and (c)(7) are revised and a parenthetical statement concerning the Office of Management and Budget approval is added at end of the section.

§ 57.1604 What requirements must a project meet?

(a) * * *

(3) Each project must systematically evaluate the educational program including trainees and faculty preceptors, the administration of the program and the degree to which program and educational objectives are met.

(4) Each project, other than a faculty development project, must use ambulatory care settings where family medicine is practiced and in which an adequate portion of the clinical training is conducted.

* * * * *

(b) * * *

(4) * * *

(iii) * * *

(C) engage in the assistantship full time for at least eight consecutive weeks. Stipend support from grant funds may be given to trainees who are receiving academic credit for the assistantship only when the three conditions above are met and, additionally, when the trainees incurs extraordinary living expenses, due to participation in the assistantship.

* * * * *

(c) * * *

(7) Each intern or resident must serve a sufficient number of families and individual patients with a variety of health care needs to provide the trainee with a broad clinical experience.

* * * * *

(Approved by the Office of Management and Budget under control numbers 0915–0060 and 0915–0061)

3. Section 57.1605 is amended by revising (a)(1) as follows:

§ 57.1605 How will applications be evaluated?

(a) * * *

(1) The degree to which the proposed project provides for the project requirements in § 57.1604;

* * * * *

§ 57.1606 [Removed]

4. Section 57.1606 *What health planning requirements must benefit?* is removed in its entirety.

5. Section 57.1609 is renumbered as § 57.1606 *What additional Department regulations apply to grantees?*

6. Section 57.1610 is renumbered as § 57.1609 *What other audit and inspection requirements apply to grantees?*

7. Section 57.1611 is renumbered as § 57.1610 *Additional conditions.*

List of Public Laws

Last List March 23, 1984

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (phone 202-275-3030).

H.J. Res. 200 / Pub. L. 98-240

Designating March 21, 1984, as "National Single Parent Day". (Mar. 21, 1984; 98 Stat. 94) Price: $1.50

VOL 49 ISS 59 MR 26 1984 UMI

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

New units issued during the week are announced on the back cover of the daily **Federal Register** as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $550 domestic, $137.50 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Charge orders (VISA, MasterCard, or GPO Deposit Account) may be telephoned to the GPO order desk at **(202) 783-3238** from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Proclamation 5169 of March 22, 1984

Loyalty Day, 1984

By the President of the United States of America

A Proclamation

As Americans, we enjoy a rich heritage of freedom. How fortunate we are that the founders of this great country were committed to the ideal that all people share inalienable rights to life, liberty, and the pursuit of happiness. This ideal has been the inspiration for many generations of Americans in the building of what is today the greatest and most prosperous Nation in the world.

The people of the United States cherish their liberties and recognize that our freedoms of conscience and action are at the heart of the unique American tradition. To preserve this great tradition, it is important for us all to pause from time to time to rededicate ourselves to the democratic ideals which have served us so well.

For this purpose, the Congress, by joint resolution approved July 18, 1958 (72 Stat. 369, 36 U.S.C. 162), has designated May 1 of each year as Loyalty Day, a day for the reaffirmation of loyalty to the United States of America and for the recognition of the heritage of American freedom.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim May 1, 1984, as Loyalty Day and call upon all Americans and patriotic, civic, and educational organizations to observe that day with appropriate ceremonies. I also call upon all government officials to display the flag of the United States on all government buildings and grounds on that day.

IN WITNESS WHEREOF, I have hereunto set my hand this 22nd day of March, in the year of our Lord nineteen hundred and eighty-four, and of the Independence of the United States of America the two hundred and eighth.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 49, No. 60
Tuesday, March 27, 1984

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 2

Revision of Delegations of Authority; Procurement Executive

AGENCY: Office of the Secretary, USDA.

ACTION: Final rule.

SUMMARY: This document revises the delegations of authority of the Department of Agriculture to designate a Procurement Executive.

EFFECTIVE DATE: March 27, 1984.

FOR FURTHER INFORMATION CONTACT: Anthony E. Cooch, Procurement Analyst, Procurement Division, Office of Operations, U.S. Department of Agriculture, Washington, DC 20250, Telephone: (202) 447–6864.

SUPPLEMENTARY INFORMATION: On March 17, 1982, the President issued Executive Order 12352 calling for significant Federal procurement reforms. The Executive Order mandated that the heads of Executive Agencies buying products and services from the private sector designate a Procurement Executive. This document makes that designation within the Department of Agriculture to the Director of the Office of Operations.

This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, it is found upon good cause that notice and other public rulemaking procedures with respect thereto are impractical and contrary to the public interest, and good cause is found for making this rule effective less than 30 days after publication in the **Federal Register**. Further, since this rule relates to internal agency management, it is exempt from the provisions of Executive Order 12291. Finally, this action is not a rule as defined by the Regulatory Flexibility Act, and thus is exempt from the provisons of that Act.

List of Subjects in 7 CFR Part 2

Authority delegations (Government agencies).

PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

Accordingly, Part 2, Title 7, Code of Federal Regulations is amended as follows:

1. The authority citation for Part 2 reads as follows:

Authority: 5 U.S.C. 301 and Reorganization Plan No. 2 of 1953, except as otherwise stated.

Subpart C—Delegations of Authority to the Deputy Secretary, the Under Secretary for International Affairs and Commodity Programs, the Under Secretary for Small Community and Rural Development, and Assistant Secretaries

2. Section 2.25 is amended by adding paragraph (c)(8) to read as follows:

§ 2.25 Delegations of authority to the Assistant Secretary for Administration.

* * * * *

(c) * * *

(8) Pursuant to Executive Order 12352, designate a Procurement Executive for the Department and delegate responsibility for the following:

(i) Prescribing and publishing Departmental procurement policies, regulations, and procedures.

(ii) Taking any necessary actions consistent with policies, regulations, and procedures with respect to purchases, contracts, leases, and other transactions.

(iii) Designating contracting officers.

(iv) Establishing clear lines of contracting authority.

(v) Evaluating and monitoring the performance of the Department's procurement system.

(vi) Managing and enhancing career development of the procurement work force.

(vii) Participating in the development of Government-wide procurement policies, regulations, and standards and determining specific areas where Government-wide performance standards should be established and applied.

(viii) Determining areas of Department-unique standards and developing unique Department-wide standards.

(ix) Acting as the advocate for competition.

(x) Certifying to the Secretary that the procurement system meets approved standards.

(xi) Prescribing standards for agency Procurement Executives and designating agency Procurement Executives when these standards are met.

(xii) Redelegating, as appropriate, the authority in § 2.25(c)(8)(i) to USDA agency Procurement Executives or other qualified agency officials with no power of further redelegation.

(xiii) Redelegating the authorities in § 2.25(c)(8) (ii), (iii), (iv), (vi), (vii), and (ix) to USDA agency Procurement Executives or other qualified agency officials with the power of further redelegation.

* * * * *

Subpart J—Delegations of Authority by the Assistant Secretary for Administration

3. Section 2.76 is amended by adding paragraph (a)(10) to read as follows:

§ 2.76 Director, Office of Operations.

(a) * * *

(10) Pursuant to Executive Order 12352, the Director, Office of Operations, is designated as Procurement Executive for the Department with responsibility for the following:

(i) Prescribing and publishing Departmental procurement policies, regulations, and procedures.

(ii) Taking any necessary actions consistent with policies, regulations, and procedures with respect to purchases, contracts, leases, and other transactions.

(iii) Designating contracting officers.

(iv) Establishing clear lines of contracting authority.

(v) Evaluating and monitoring the performance of the Department's procurement system.

(vi) Managing and enhancing career development of the procurement work force.

(vii) Participating in the development of Government-wide procurement policies, regulations, and standards and

determining specific areas where Government-wide performance standards should be established and applied.

(viii) Determining areas of Department-unique standards and developing unique Department-wide standards.

(ix) Acting as the advocate for competition.

(x) Certifying to the Secretary that the procurement system meets approved standards.

(xi) Prescribing standards for agency Procurement Executives and designating agency Procurement Executives when these standards are met.

(xii) Redelegating, as appropriate, the authority in § 2.76(a)(10)(i) to USDA agency Procurement Executives or other qualified agency officials with no power of further redelegation.

(xiii) Redelegating the authorities in § 2.76(a)(10) (ii), (iii), (iv), (vi), (vii), and (ix) to USDA agency Procurement Executives or other qualified agency officials with the power of further redelegation.

Dated: March 21, 1984.

For Subpart C:

John R. Block,

Secretary of Agriculture.

Date: March 21, 1984.

For Subpart J:

John J. Franke, Jr.,

Assistant Secretary for Administration.

7 CFR Parts 911 and 915

Limes Grown in Florida; Avocados Grown in South Florida; Amendment of Subparts—Rules and Regulations

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim rule with request for comments.

SUMMARY: This interim rule amends the rules and regulations issued under these marketing orders to require that handlers provide adequate facilities for the grading and preparation of limes and avocados for market as a condition for registration with the committees. The rule is designed to facilitate proper inspection and certification procedures under these orders and improve administrative operations.

DATES: Effective date: April 1, 1984. Comments due: April 26, 1984.

ADDRESS: Send two copies of comments to the Hearing Clerk, U.S. Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This interim rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291, and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities.

This interim rule is issued under the marketing agreement, as amended, and Order No. 911, as amended (7 CFR Part 911), regulating the handling of limes grown in Florida, and under the marketing agreement, as amended, and Order No. 915, as amended (7 CFR Part 915), regulating the handling of avocados grown in South Florida. These agreements and orders are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). This action is based upon the recommendations and information submitted by the Florida Lime Administrative Committee, and the Avocado Administrative Committee and upon other available information. It is hereby found that this action would tend to effectuate the declared policy of the Act.

This interim rule would require any person applying to either committee for certification as a registered handler to agree to provide facilities which the committees determine to be adequate for the grading and preparation of limes and avocados for market. In addition, handlers currently certified by the committees desiring to maintain their registered handler status would also be required to agree to provide such facilities. Under the marketing orders, inspection and certification of limes and avocados by Federal-State inspectors is mandatory whenever grade, size, and other requirements are in effect. The rule is designed to assure the adequacy of facilities for grading and preparing fruit for market and thereby facilitate the required inspection.

Under § 911.10 and § 915.10 of the orders, the sale or delivery of limes and avocados to handlers for preparation of the fruit for market is exempt from regulations if such handlers are registered with the committees. The purpose of registration is to aid the committees in the effective administration of the provisions of these orders. The rule requiring handlers to maintain adequate facilities for grading and preparing fruit for market is consistent with that purpose.

The Secretary finds that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date of this interim rule until 30 days after publication in the **Federal Register** (5 U.S.C. 553) because of insufficient time between the date when information became available upon which this rule is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the modification of handler registration requirements at an open meeting, at which the committees, without opposition, recommended issuance of the requirements specified in the interim rule to become effective April 1, 1984. Handlers have been apprised of this rule's provisions and the effective date. To effectuate the declared purposes of the Act it is necessary to make the interim rule effective as specified. The interim rule provides a 30-day comment period. A longer comment period would be contrary to the public interest, as any comments on the effect of the rule need to be received within 30 days, so that any necessary changes can be made promptly in the handler registration requirements. All comments received will be considered prior to finalization of this interim rule.

List of Subjects

7 CFR Part 911

Marketing agreements and orders, Limes, Florida.

7 CFR Part 915

Marketing Agreements and orders, Avocados, Florida.

PART 911—[AMENDED]

PART 915—[AMENDED]

The interim rule amends § 911.120 by revising paragraphs (a)(10), (b), and (e); and amends § 915.120 by revising paragraphs (a)(11), (b), and (e), to read as follows:

§ 911.120 Handler registration.

(a) * * *

(10) An agreement to provide adequate facilities for the grading and preparation of limes for market, and to comply with all other requirements of this part, including rules and regulations issued thereunder.

(b) Upon receipt of an application for registration, the Florida Lime

Administrative Committee shall make such investigation as may be appropriate, and shall issue the applicant a certificate of registration, if the applicant has facilities determined by the committee to be adequate for the grading and preparation of limes for market, and if it appears that the applicant may reasonably be expected to handle limes in accordance with the requirements of this part, including all rules and regulations issued thereunder.

* * * * *

(e) The committee shall suspend the certificate of registration issued pursuant to this section of any handler who (1) fails to provide facilities determined by the committee to be adequate for the grading and preparation of limes for market, (2) fails to pay assessments as required under the provisions of this part, or (3) fails to render reports as prescribed pursuant to the provisions of this part. The committee shall advise the handler in writing of the pending suspension and shall specify the time such suspension shall become effective. Upon determination by the committee that the handler has satisfied the requirements with respect to providing adequate facilities, paying assessments, and filing reports, and it appears to the committee that the handler may reasonably be expected thereafter to handle limes in accordance with the provisions of this part, including all rules and regulations thereunder, the committee shall lift such suspension.

§ 915.120 Handler registration.

(a) * * *

(11) An agreement to provide adequate facilities for the grading and preparation of avocados for market, and to comply with all other requirements of this part, including rules and regulations issued thereunder.

(b) Upon receipt of an application for registration, the Avocado Administrative Committee shall make such investigation as may be appropriate, and shall issue the applicant a certificate of registration, if the applicant has facilities determined by the committee to be adequate for the grading and preparation of avocados for market, and if it appears that the applicant may reasonably be expected to handle avocados in accordance with the requirements of this part, including all rules and regulations issued thereunder.

* * * * *

(e) The committee shall suspend the certificate of registration issued pursuant to this section of any handler who (1) fails to provide facilities determined by the committee to be adequate for the grading and preparation of avocados for market, (2) fails to pay assessments as required under the provisions of this part, or (3) fails to render reports as prescribed pursuant to the provisions of this part. The committee shall advise the handler in writing of the pending suspension and shall specify the time such suspension shall become effective. Upon determination by the committee that the handler has satisfied the requirements with respect to providing adequate facilities, paying assessments, and filing reports, and it appears to the committee that the handler may reasonably be expected thereafter to handle avocados in accordance with the provisions of this part, including all rules and regulations thereunder, the committee shall lift such suspension.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: March 22, 1984.

Russell L. Hawes,

Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410–02–M

Rural Electrification Administration

7 CFR Part 1729

Electric System Planning and Design

AGENCY: Rural Electrification Administration.

ACTION: Final rule.

SUMMARY: This rule amends 7 CFR Chapter XVII, Rural Electrification Administration (REA) Regulations, Electric System Design and Construction, by adding Part 1729, Electric System Planning and Design. Sections 1729.6, Compliance with National Electrical Safety Code, and 1729.10, Permitted Deviations from REA Construction Standards, are covered by this action.

This action is part of REA's ongoing effort to codify all of the agency's regulations into the Code of Federal Regulations. Sections 1729.6 and 1729.10 contain rules which are presently contained in REA Bulletin 40–7, National Electrical Safety Code—ANSI C2, 1981 Edition, and REA Bulletin 61–10, Powerline Contacts by Eagles and Other Large Birds. This action will consolidate REA's rules on electric system planning and design into a single, more usable document. This action will reduce the paperwork burden on REA borrowers and consulting engineering firms. This will be accomplished by eliminating the requirement for REA to grant specific approval for deviations by borrowers from REA construction standards under two specific circumstances.

REA Bulletin 40–7 and REA Bulletin 61–10 are rescinded by this action.

EFFECTIVE DATE: March 24, 1984—The incorporation by reference of the publication mentioned in this rule has been approved by the Director, Office of the Federal Register, effective March 24, 1984.

FOR FURTHER INFORMATION CONTACT: Mr. James C. Dedman, Engineering Standards Division, Rural Electrification Administration, Room 1263–S, U.S. Department of Agriculture, Washington, D.C. 20250, telephone (202) 382–9086. The Final Impact Statement describing the options considered in developing this rule and the impact of implementing the chosen option is available on request from Mr. Dedman at the above address.

SUPPLEMENTARY INFORMATION: Pursuant to the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.), the Rural Electrification Administration (REA) is amending 7 CFR Chapter XVII, REA Regulations, Electric System Design and Construction, by adding Part 1729, Electric System Planning and Design. This action has been reviewed in accordance with Executive Order 12291, Federal Regulation. The action will not (1) have an annual effect on the economy of $100 million or more; (2) result in a major increase in costs or prices for consumers, individual industries, Federal, state or local government agencies; or (3) result in significant adverse effects on competition, employment, investment or productivity, and, therefore, has been determined to be "not major." This action does not fall within the scope of the Regulatory Flexibility Act. This program is listed in the Catalog of Federal Domestic Assistance as 10.850, Rural Electrification Loans and Loan Guarantees.

Background

The Rural Electrification Administration (REA) maintains regulations pertaining to system design and construction for REA electric borrowers. These regulations are contained in 7 CFR Chapter XVII. Part 1729, Electric System Planning and Design, contains rules, policies, requirements and procedures to be followed in the planning and design of electric distribution, transmission, and generation systems or facilities financed with assistance from REA.

Section 1729.6, Compliance with National Electrical Safety Code, requires REA borrowers to construct their electric systems in accordance with the *latest effective edition* of the National Electrical Safety Code (NESC). REA rules concerning the NESC have been contained in REA Bulletin 40–7, National Electrical Safety Code. Bulletin 40–7 historically has been revised, upon the publication of each new edition of the NESC, to require REA borrowers to construct and operate their systems in accordance with that individual edition of the NESC. This rule rescinds Bulletin 40–7.

Section 1729.10, Permitted Deviations from REA Construction Standards, sets out two specific circumstances under which REA borrowers may deviate from REA construction standards without being required to seek specific approval from REA. When required by REA or other authorities, borrowers may make specific modifications to distribution line structures to protect raptors from contact with energized wires. REA Bulletin 61–10, Powerline Contacts by Eagles and Other Large Birds, presently contains REA rules on raptor protection. This rule rescinds REA Bulletin 61–10. Also, when necessary, borrowers may modify the REA standard transformer connections in accordance with Rule 97D2 of the NESC.

Interested parties were given sixty (60) days in which to express their views on the proposed rule. The December 16, 1983, notice in the **Federal Register** elicited one comment on the proposed rule.

An REA electric borrower commented that, "Part 1729.10(a) has the potential to cause undue costs to the borrower when it appears that Federal, state and local authorities would have the veto power over any project unless built to raptor specifications. I feel a more realistic approach would be to have REA create a rule which would define 'areas frequented by eagles' to take care of any problem in this area."

In § 1729.10, REA is not defining environmental policy or requirements. REA's environmental regulations are proposed for codification in 7 CFR Part 1794, Environmental Policies and Procedures. Section 1729.10 merely relieves borrowers from seeking REA approval for the use of nonstandard structures for raptor protection when such protection is required by other agencies having permit or license authority over the proposed construction. An appropriate change is being made in § 1729.10(a) to clarify this point.

In view of the above, Part 1729 is added to 7 CFR Chapter XVII to read as follows:

PART 1729—ELECTRIC SYSTEM PLANNING AND DESIGN

Subparts A–B [Reserved]

Subpart C—Electric System Design

Sec.
1729.6 Compliance with National Electrical Safety Code.
1729.7–9 [Reserved]
1729.10 Permitted Deviations from REA Construction Standards.

Authority: 7 U.S.C. 901 et seq. and 7 U.S.C. 1921 et seq.

Subparts A–B [Reserved]

Subpart C—Electric System Design

§ 1729.6 Compliance with National Electrical Safety Code.

(a) All borrowers' new lines and substations shall be constructed and operated in accordance with the requirements of the National Electrical Safety Code (NESC). The applicable edition of the NESC to be followed shall be the latest edition which is effective in accordance with the provisions of that edition. Where local regulations or other REA requirements are more stringent, those requirements shall govern.

(b) The Administrator of REA will consider specific requests to approve construction which is not in accordance with the NESC if the borrower provides evidence satisfactory to the Administrator that an exception is necessary or desirable and in the interests of the Government and the borrower.

(c) Overhead distribution circuits shall be constructed with not less than the Grade C strength requirements as described in Section 26, Strength Requirements, of the NESC when subjected to the loads specified in NESC Section 25, Loadings for Grades B, C, and D. Overhead transmission circuits shall be constructed with not less than the Grade B strength requirements as described in NESC Section 26.

§§ 1729.7–9 [Reserved]

§ 1729.10 Permitted deviations from REA construction standards.

(a) *Structures for Raptor Protection.* Standard distribution line structures may not have the extra measure of protection needed in areas frequented by eagles and other large birds (raptors) to protect such birds from electric shock due to physical contact with energized wires. Borrowers are allowed to deviate from REA construction standards to provide for raptor protection in the design of overhead line structures in those cases where such protection is required by (1) REA of (2) a Federal, state or local authority with permit or license authority over the proposed construction. Structures which are designed for raptor protection shall be in accordance with *Suggested Practices for Raptor Protection on Powerlines—The State of the Art in 1981*, published by the Raptor Research Foundation, Inc., provided, however, that such structures shall be in accordance with the National Electrical Safety Code unless a specific waiver has been granted by the REA Administrator. Copies of this publication may be purchased from the Raptor Research Foundation, Inc., c/o Department of Veterinary Biology, University of Minnesota, St. Paul, Minnesota 55101. It is also available for inspection at the Office of the Federal Register Information Center, Room 8401, 1100 L Street, NW., Washington, D.C. 20408. This incorporation by reference has been approved by the Director of the Office of the Federal Register. Any deviation from the REA construction standards for the purpose of raptor protection, which is not in accordance with the above report, must be approved by REA prior to construction.

(b) *Transformer neutral connections.* Where it is necessary to separate the primary and secondary neutrals to provide the required electric service to a consumer, the REA standard transformer connections may be modified in accordance with Rule 97D2 of the National Electrical Safety Code.

BILLING CODE 3410–15–M

FEDERAL RESERVE SYSTEM

12 CFR Part 217

Interest on Deposits; Advertising of Multiple Rate Accounts

[Docket No. R–0513]

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Policy statement.

SUMMARY: The Board of Governors has issued a policy statement concerning potentially misleading advertising practices for time deposits used as investments for Individual Retirement

Accounts. The Board believes that advertisements for time deposits that state in large type an initial rate that is effective for a period of a few months and then state in smaller type a lower rate that will be effective for the remaining term of the time deposit can be misleading to consumers. Such advertisements should state both rates in type of equal size in order not to be regarded as misleading, and include a conspicuous statement of the average effective annual yield. In addition, advertisements for deposits to be used in connection with Individual Retirement Accounts should not refer to contributions to such accounts as "tax-free" or "tax-exempt." This action was taken to assure that depository institutions provide meaningful and accurate information and to assist consumers to make comparisons of interest rates being offered on time deposits.

EFFECTIVE DATE: March 22, 1984.

FOR FURTHER INFORMATION CONTACT: Gilbert T. Schwartz, Associate General Counsel (202–452–3625), or Paul S. Pilecki, Senior Counsel (202–452–3281), Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: The Federal Reserve Board has issued the following policy statement concerning advertisements for time deposits that have split, fixed interest rates and for accounts to be used as investments for Individual Retirement Accounts.

Advertising of Multiple Rate Time Deposits and Individual Retirement Accounts

(a) The following advertising practice for deposits or accounts to be used as investments for Individual Retirement Accounts (IRAs) has come to the attention of the federal financial institution regulatory agencies with specific statutory authority to regulate advertising for deposits or other accounts. The advertisements display a rate of, perhaps, 15 percent in two to three inch type. In smaller, usually standard size, type, the advertisements state that the rate is paid only through a fixed date two or three months hence or for the first two or three months of the term of the account. For the remaining term of the account, which typically will be two to three years, the rate to be paid will be much lower, for example, 10.5 or 11 percent. In some cases, the maturity of the account is stated in bold type of a size similar to the higher interest rate.

(b) The Board believes that such advertisements are misleading and are in violation of § 217.6(g) of Regulation Q (12 CFR 217.6(g)), which states that a member bank shall not make any advertisement related to interest paid on deposits that is inaccurate or misleading or that misrepresents its deposit contracts. In this regard, the display of a rate in substantially larger type than the rate that will apply for the predominant part of the term of the account is confusing to depositors and misrepresentative of the deposit contract. Moreover, such advertisements do not give meaningful information to consumers because the annual average effective yield over the life of the instrument will differ from the rates stated. (The staff of the Board has previously advised member banks that it regards any advertisement for a time deposit that states an annual rate of simple interest in excess of the average effective annual yield as inaccurate, misleading, and misrepresentative of their deposit contracts. ¶ 2–411.1 *Federal Reserve Regulatory Services.*)

(c)(1) Advertisements for time deposits where more than one rate is paid would not be regarded as misleading if each rate to be paid on the account is stated in the advertisement in type of equal size together with a conspicuous statement as to the length of time for which each rate is effective. This applies to accounts where: (i) It is known in advance what the rates to be paid throughout the life of the account will be; and (ii) the initial rate to be paid is higher than subsequent rates. In addition, such advertisements must include a conspicuous statement of the average effective annual yield for the deposit which assumes compounding of interest at least annually.

(2) For accounts subject to a variable interest rate that is determined by an index, the initial interest rate may be advertised; however, the advertisement must also include a conspicuous statement as to: (i) The time period for which such rate applies; and (ii) the method by which the rates will be determined for future periods and the time period for which such rates will apply.

(3) For accounts that offer an initial fixed rate to be followed by a variable rate determined by an index during the remainder of the term of the account, the method of determining the variable rate shall be stated in type of the same size as the fixed rate. In addition, the time periods for which the initial fixed rate and subsequent rates apply must be conspicuously stated.

(d) It is also misleading and inaccurate for advertisements to refer to an IRA as a tax-free investment. Contributions to, and earnings on, IRAs are deferred from federal income taxes rather than exempt from taxes. Accordingly, such advertisements should not use the terms "tax-free" or "tax-exempt," or other similar language.

By order of the Board of Governors, March 22, 1984.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 83-ASW-56; Amdt. 39-4826; Predecessor Docket No. 69-EA-151]

Airworthiness Directive; Sikorsky S-61 Series Helicopters Certificated in All Categories

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the Federal Register and makes effective to all known persons a new airworthiness directive (AD), which was previously made effective to all known operators of the Sikorsky S-61 series helicopters, by individual telegrams. This AD supersedes an existing airworthiness directive, AD 69-25-05, Amendment 39-889, effective December 10, 1969. This new AD incorporates the requirements of the original AD and adds requirements. The AD is needed because of a recent report from a user of this type helicopter that a rotary wing head shaft nut was found cracked during a routine inspection and was not within the approved Rockwell hardness range. Also, investigation revealed that one vendor failed to properly stress relieve bake the nuts after cadmium plating.

DATES: Effective March 27, 1984, to all persons except those persons to whom it was made immediately effective by telegram dated December 30, 1983.

Compliance schedule—As prescribed in body of AD.

Incorporation by reference of certain publications in 14 CFR 39.13 approved by the Director of the Federal Register on March 19, 1984.

ADDRESSES: The applicable service bulletin may be obtained from United Technologies Corporation, (Sikorsky Aircraft), North Main Street, Stratford, Connecticut 06602, ATTN: S-61

Commercial Product Support Department.

Copies of the service bulletin are contained in the Rules Docket at the Office of the Regional Counsel, Federal Aviation Administration, Southwest Region, 4400 Blue Mound Road, Fort Worth, Texas 76106.

FOR FURTHER INFORMATION CONTACT: Cheryl McCabe, Airframe Section, Boston Aircraft Certification Branch, Aircraft Certification Division, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617) 273–7335.

SUPPLEMENTARY INFORMATION: On December 30, 1983, telegraphic AD T–84–01–51 was issued and made effective immediately upon receipt to all known operators of the Sikorsky S–61 series helicopters certificated in all categories. This AD was issued because of a recent report received from a military user of this type helicopter that a Sikorsky rotary wing head shaft nut was found cracked during a routine inspection and was not within the approved Rockwell hardness range. Also, investigation revealed that one vendor failed to properly stress relieve bake the nuts after cadmium plating. This AD supersedes an existing airworthiness directive, AD 69–25–05, Amendment 39–869 (34 FR 19545), effective December 10, 1969. AD 69–25–05 was issued to inspect nuts for cracks and for proper hardness on Sikorsky Model S–61 helicopters. This new AD incorporates the requirements of the original AD and adds a requirement to bake certain nuts at 375°F±25° for a minimum of 3 hours, provided no cracks are found during an inspection and a proper Rockwell hardness is found. Failure of the nut due to cracks may eventually lead to loss of the main rotor head.

Since it was found that immediate corrective action was required, notice and public procedure thereon were impracticable and contrary to the public interest, good cause existed for making the AD effective immediately to all known U.S. operators of Sikorsky Model S–61 series helicopters by individual telegrams dated December 30, 1983.

Since the situation still exists, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days, and the AD is hereby published in the **Federal Register** as an amendment to Section 39.13 of Part 39 of the Federal Aviation Regulations.

Approximately 12 U.S. aircraft could be affected by the requirements of this AD for an estimated one-time cost impact of $1,550 per aircraft.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new AD:

Sikorsky Aircraft: Applies to Model S–61 series aircraft certificated in all categories.

Compliance required within the next 25 hours' time in service after the effective date of this AD, unless already accomplished.

As a result of finding a crack in a rotary wing head shaft nut and finding the nut had improper Rockwell hardness and because of possible incomplete processing of these nuts, P/N S6110–21082–0, accomplish the following:

(a) Fluorescent magnetic particle inspect and Rockwell hardness test the rotary wing head shaft nut, in accordance with Section B of Sikorsky Service Bulletin No. 61B10–14, dated November 3, 1969, as revised by Sikorsky Message Number CST–P–83–171, Revision 2, dated December 5, 1983. Visible magnetic particle inspection and Rockwell hardness test in accordance with Section B of the service bulletin may be used as an alternate to fluorescent magnetic particle inspection and Rockwell hardness test.

(b) Any nut with cracks or not within the proper hardness range specified in Sikorsky service documents specified in paragraph (a) of this AD must be replaced before further flight with a nut that has been inspected in accordance with paragraph (a) of this AD and baked and marked in accordance with paragraph (c) of this AD, or with a Sikorsky provided nut inspected and marked in accordance with this AD.

(c) Any nut not cracked and with proper hardness as specified in the Sikorsky service documents must be baked at 375° F ± 25° F for a minimum of 3 hours and marked in accordance with the Sikorsky service documents specified in paragraph (a) of this AD.

(d) Alternate inspections, processes, or other means of compliance which provide an equivalent level of safety to this AD must be approved by the Manager, Boston Aircraft Certification Branch, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 08103. In accordance with FAR 21.197, flight is permitted to a base where the requirements of this AD may be accomplished.

Sikorsky Service Bulletin No. 61B10–14, dated November 3, 1969, and Sikorsky message Number CST–P–83–171, Revision 2, dated December 5, 1983, identified and described in this directive are incorporated herein and made a part hereof pursant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to United Technologies Corporation, Sikorsky Aircraft, North Main Street, Stratford, Connecticut 06602, ATTN: S–61 Commercial Product Support Department. These documents also may be examined in the Office of the Regional Counsel, Federal Aviation Administration, Southwest Region, 4400 Blue Mound Road, Fort Worth, Texas 76106.

This amendment becomes effective Mar. 27, 1984 as to all persons except those persons to whom it was made immediately effective by the telegram dated December 30, 1983, which contained this amendment.

This amendment supersedes Amendment 39–889 (34 FR 19545), AD 69–25–05, which became effective December 10, 1969.

(Sec. 313(a), 601 and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); 49 U.S.C. 106(g) [Revised, Pub. L. 97–449, January 12, 1983]; and 14 CFR 11.89.)

Note.—The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 20, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "**FOR FURTHER INFORMATION CONTACT.**"

Note.—The incorporation by reference provisions of this document were approved by the Director of the Federal Register on Mar. 19, 1984. The referenced documents are available at the Federal Register.

Issued in Fort Worth, Texas, on March 1, 1984.

C. R. Melugin, Jr.

Director, Southwest Region.

BILLING CODE 4910–13–M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 4

[T.D. 84–63]

Adding St. Vincent and The Grenadines to the List of Nations Entitled to Special Tonnage Tax Exemption

AGENCY: U.S. Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This rule amends the Customs Regulations by adding St. Vincent and The Grenadines to the list of nations whose vessels are exempted from the payment of any higher tonnage duties than are applicable to vessels of the U.S. and from the payment of light money. The Department of State informed Customs that there is satisfactory evidence that no discriminatory duties of tonnage or imposts are being imposed in ports of St. Vincent and The Grenadines upon vessels belonging to citizens of the U.S. Or on their cargoes. Therefore, privileges regarding exemption from the payment of discriminatory duties upon vessels registered in St. Vincent and The Grenadines which enter U.S. ports are granted by the U.S. to take effect retroactively to October 27, 1979, the date that St. Vincent and The Grenadines became independent.

EFFECTIVE DATE: October 27, 1979.

FOR FURTHER INFORMATION CONTACT: Donald H. Reusch, Carriers, Drawback and Bonds Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202–566–5706).

SUPPLEMENTARY INFORMATION:

Background

Generally, the United States imposes regular and special tonnage taxes, and a duty of a specified amount per ton, known as "light money", on all foreign vessels which enter United States ports (46 U.S.C. 121, 128). However, vessels of a foreign nation may be exempted from the payment of special tonnage taxes and light money upon presentation of proof satisfactory to the President that no discriminatory duties of tonnage or imposts are imposed by that foreign nation on U.S. vessels or their cargoes (46 U.S.C. 141). Section 4.22, Customs Regulations (19 CFR 4.22), lists those nations whose vessels have been exempted from the payment of any higher tonnage duties than are applicable to vessels of the U.S. and from the payment of light money.

By letters dated September 23, and December 7, 1983, the Department of State informed the Customs Service that the Government of St. Vincent and The Grenadines has not imposed any discriminatory duties or imposts on either U.S. vessels or their cargoes since that nation gained independence on October 27, 1979. The Department of State is of the opinion that satisfactory evidence has been furnished to establish the reciprocity required in § 4.22, Customs Regulations. Therefore, the State Department recommended that St. Vincent and The Grenadines be added, effective retroactively to October 27, 1979, to the list of nations whose vessels are exempted from the payment of the special tonnage tax and the payment of light money. On January 10, 1984, the Director, Carriers, Drawback and Bonds Division, determined that, effective October 27, 1979, St. Vincent and The Grenadines should be added to the list in § 4.22.

By virtue of the authority vested in the President by section 4228 of the Revised Statutes, as amended (46 U.S.C. 141), the President has delegated the authority to grant this exemption to the Secretary of the Treasury by E.O. 10289, September 17, 1951, as amended by E.O. No. 10882, July 18, 1960 (3 CFR, 1959–1963 Comp., Ch. II). By Treasury Department Order 165–25, the Secretary of the Treasury delegated authority to the Commissioner of Customs to prescribe regulations relating to sections 4.22 and other sections of the Customs Regulations relating to lists of nations entitled to preferential treatment in Customs matters because of reciprocal privileges accorded to vessels and aircraft of the U.S. Subsequently, by Customs Delegation Order No. 66 (T.D. 82–201), dated October 13, 1982, the Commissioner delegated authority to grant this exemption and to amend these sections to the Assistant Commissioner (Commercial Operations), who redelegated this authority to the Director, Office of Regulations and Rulings, who then redelegated it to the Director, Regulations Control and Disclosure Law Division.

Finding

On the basis of the information received from the Secretary of State, as described above, it has been determined that the United States is in possession of satisfactory evidence regarding the absence of discriminatory duties of tonnage or imposts imposed on U.S. vessels in ports of St. Vincent and The Grenadines. Therefore, St. Vincent and The Grenadines is added to the list of nations whose vessels are exempted from the payment of the special tonnage tax and the payment of light money as of October 27, 1979.

List of Subjects in 19 CFR Part 4

Customs duties and inspection, cargo vessels, maritime carriers, vessels.

Regulations Amendment

To reflect this change, § 4.22, Customs Regulations (19 CFR 4.22), is amended by inserting, in alphabetical order between "Sri Lanka" and "Surinam, Republic of", the words "St. Vincent and The Grenadines." To the list of nations entitled to exemptions from special tonnage taxes.

(R.S. 251, as amended, 4219, as amended, 4228, as amended, 4255, as amended, sec. 3, 23 Stat. 119, as amended, sec. 624, 46 Stat. 759, (19 U.S.C. 66, 1624, 46 U.S.C. 5, 121, 128, 141))

Inapplicability of Public Notice and Delayed Effective Date Requirements

Because this amendment merely implements a statutory requirement and involves a matter in which the public is not particularly interested, pursuant to 5 U.S.C. 553(b)(B), notice and public procedure thereon are unnecessary. Further, for the same reasons good cause exists for dispensing with a delayed effective date under 5 U.S.C. 553(d)(1).

Inapplicability of the Regulatory Flexibility Act

This document is not subject to the provisions of section 603 and 604 of Title 5, United States Code, as added by section 3 of Pub. L. 96–354, the "Regulatory Flexibility Act." That Act does not apply to any regulation such as this for which a notice of proposed rulemaking is not required by the Administrative Procedure Act (5 U.S.C. 551 *et seq.*) or any other statute.

Executive Order 12291

This amendment does not meet the criteria for a major regulation as defined in section 1(b) of E.O. 12291. Accordingly, a major impact analysis is not required.

Drafting Information

The principal author of this document was James S. Demb, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Dated: March 19, 1984.

B. James Fritz,

Director, Regulations Control and Disclosure Law Division.

BILLING CODE 4820-02-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing-Federal Housing Commissioner

24 CFR Part 235

[Docket No. R-84-1160; FR-1969]

Mortgage Insurance; Changes in Interest Rates

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This change in the regulations increases the maximum allowable interest rate on Section 235 insured loans for lower income families. This final rule is designed to bring the maximum permissible financing charges in this program into line with other competitive market rates and help assure an adequate supply of and demand for FHA financing.

EFFECTIVE DATE: March 21, 1984.

FOR FURTHER INFORMATION CONTACT: John N. Dickie, Chief, Mortgage and Capital Market Analysis Branch, Office of Financial Management, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410. Telephone (202) 755-7270). This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The following amendment to 24 CFR Chapter II has been made to increase the maximum interest rate which may be charged on loans insured by this Department under section 235 of the National Housing Act. The maximum interest rate on the HUD/FHA section 235 home mortgage insurance program has been raised from 12.50 percent to 13.00 percent.

The amendment is reflected in the addition of a new section under Part 235—24 CFR 235.9. Section 203.20, which was incorporated by reference in Part 235, is no longer included in that Part because the interest rate under 24 CFR 203.20 is now agreed upon by the mortgagor and mortgagee, in accordance with section 404 of the Housing and Urban-Rural Recovery Act of 1983, Pub. L. 98-181, approved November 30, 1983 (1983 Act). The 1983 Act provided, however, at section 404(b)(12)(C), that a mortgage to be insured under section 235 of the National Housing Act shall "bear interest at a rate not to exceed such percent per annum * * * as the Secretary finds necessary to meet the mortgage market, * * *" The Secretary has determined that this change is immediately necessary to meet the needs of the market and to prevent speculation in anticipation of a change, in accordance with his authority contained in 12 U.S.C. 1709-1.

As a matter of policy, the Department submits most of its rulemaking to public comment, either before or after effectiveness of the action. In this instance, however, the Secretary has determined that advance notice and public comment procedures are unnecessary and that good cause exists for making this final rule effective immediately.

HUD regulations published at 47 FR 56266 (December 15, 1982), amending 24 CFR Part 50, which implements section 102(2)(C) of the National Environmental Policy Act of 1969, contain categorical exclusions from their requirements for the actions, activities and programs specified in § 50.20. Since the amendment made by this rule falls within the categorical exclusion set forth in paragraph (*1*) of § 50.20, the preparation of an Environmental Impact Statement or Finding of No Significant Impact is not required for this rule.

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation issued on February 17, 1981. Analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local governmental agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in doemestic or export markets.

In accordance with the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. The rule provides for small increase in the mortgage interest rate in a program of limited applicability, and thus of minimal effect on small entities.

This rule was not listed in the Department's Semiannual Agenda of Regulations published on October 17, 1983 (48 FR 47418) pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

The Catalog of Federal Domestic Assistance program numbers are 14.108, 14.117, and 14.120.

List of Subjects in 24 CFR Part 235

Condominiums, Cooperatives, Low and moderate income housing, Mortgage insurance, Homeownership, Grant programs—housing and community development.

PART 235—MORTGAGE INSURANCE AND ASSISTANCE PAYMENTS FOR HOME OWNERSHIP AND PROJECT REHABILITATION

Accordingly, the Department amends 24 CFR Part 235 as follows:

1. In Part 235, add a new § 235.9 to read as follows:

§ 235.9 Maximum interest rate.

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 13.00 percent per annum with respect to mortgages insured on or after March 21, 1984.

(b) Interest shall be payable in monthly installments on the principal amount of the mortgage outstanding on the date of each installment.

Authority: (Section 3(a), 82 Stat. 113; 12 U.S.C. 1709-1; Section 7 of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d)).

Dated: March 20, 1984.

Shirley M. Wiseman,

General Deputy Assistant Secretary for Housing Federal Housing Commissioner.

BILLING CODE 4210-27-M

DEPARTMENT OF JUSTICE

Executive Office for United States Attorneys

28 CFR Part 16

Production or Disclosure of Material or Information

AGENCY: Executive Office for United States Attorneys, Justice.

ACTION: Final rule.

SUMMARY: These directives delegate authority to respond to requests pursuant to the Freedom of Information Act and the Privacy Act of 1974 to the United States Attorney for District of Columbia, from the Director, Executive Office for United States Attorneys, for those records in the custody and control of the United States Attorney for the District of Columbia.

EFFECTIVE DATE: March 27, 1984.

FOR FURTHER INFORMATION CONTACT: Susan A. Nellor, Assistant Director, Legal Services, Executive Office for United States Attorneys, Room 1627,

Department of Justice, 10th Street and Constitution Avenue, N.W., Washington, D.C. 20530 (202–633–4024).

List of Subjects in 28 CFR Part 16

Administrative practice and procedure; Freedom of information.

PART 16—[AMENDED]

1. Part 16, Subpart A, Title 28 of the Code of Federal Regulations is amended by designating the title to the existing Appendix to Subpart A as Appendix A, and by adding an additional Appendix to Subpart A to read as follows:

Appendix B to Subpart A—Delegation of Authority

(a) By virtue of the authority vested in me by Section 16.5(b) of Title 28 of the Code of Federal Regulations, I hereby delegate authority to the United States Attorney for the District of Columbia to:

(1) Respond initially to requests;

(2) Grant and deny access to records;

(3) Communicate directly with the Office of Information and Privacy concerning administrative appeals; and

(4) Prepare affidavits, litigation reports, and other necessary documents in preparation for civil litigation in suits pursuant to 5 U.S.C. 552(4)(B).

(b) This authority is limited to those records which are under the custody and control of the United States Attorney for the District of Columbia. The authority delegated herein may be redelegated.

(c) This directive is effective immediately.

2. Part 16, Subpart D, Title 28 of the Code of Federal Regulations is amended by designating the title to the existing Appendix to Subpart D as Appendix A, and adding an additional Appendix to Subpart D to read as follows:

Appendix B to Subpart D—Delegation of Authority

(a) By virtue of the authority vested in me by Section 16.45(a) of Title 28 of the Code of Federal Regulations, I hereby delegate authority to the United States Attorney for the District of Columbia to:

(1) Respond initially to requests;

(2) Grant and deny access to records;

(3) Communicate directly with the Office of Information and Privacy concerning administrative appeals; and

(4) Prepare affidavits, litigation reports, and other necessary documents in preparation for civil litigation in suits pursuant to 5 U.S.C. 552a(g)(1)(B).

(b) This authority is limited to those records which are in the systems of records under the custody and control of the United States Attorney for the District of Columbia. The authority delegated herein may be redelegated.

(c) This directive is effective immediately.

Dated: March 8, 1984.

William P. Tyson,

Director, Executive Office for United States Attorneys.

BILLING CODE 4410–01–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A–V–FRL 2553–3]

Approval and Promulgation of Implementation Plans; Illinois

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: As required by Section 110(a) of the Clean Air Act and the October 5, 1978, promulgation of National Ambient Air Quality Standards (NAAQS) for lead (43 FR 46258) the State of Illinois has submitted the State ambient lead standard as a revision to the State Implementation Plan.

The purpose of this notice is to announce receipt of the State lead standard and take final rulemaking action.

DATE: This action is effective May 29, 1984, unless notice is received within 30 days that someone wishes to submit adverse or critical comments.

ADDRESSES: Copies of this revision to the Illinois SIP are available for inspection at: The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C. 20408.

Copies of the SIP revision and other materials relating to this rulemaking are available for inspection at the following addresses: (It is recommended that you telephone Maggie J. Greene, at (312) 886–6029, before visiting the Region V Office).

U.S. Environmental Protection Agency, Air and Radiation Branch, Region V, 230 South Dearborn Street, Chicago, Illinois 60604

U.S. Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, D.C. 20460

Illinois Environmental Protection Agency, Division of Air Pollution Control, 2200 Churchill Road, Springfield, Illinois 62706

Written comments should be sent to: Gary Gulezian, Chief, Regulatory Analysis Section, Air Programs Branch (5AP–26), Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604

FOR FURTHER INFORMATION CONTACT: Maggie J. Greene, Air Programs Branch, EPA, Region V, Chicago, Illinois 60604, (312) 886–6029

SUPPLEMENTARY INFORMATION: On October 5, 1978, National Ambient Air Quality Standard (NAAQS) for lead were promulgated by the U.S. Environmental Protection Agency (USEPA) (43 FR 46258). Both the primary and secondary standards were set at a level of 1.5 micrograms lead per cubic meter of air (μg lead/m^3) maximum arithmetic mean as averaged over a calendar quarter. Section 110(a)(1) of the Clean Air Act (the Act), requires each States to submit a SIP which provides for the attainment and maintenance of the primary and secondary NAAQS.

The State of Illinois submitted the State ambient lead standard as a proposed revision to the State Implementation Plan on August 19, 1983. In so doing, the State has treated lead consistently with other criteria pollutants that are subject to enforceable state regulations. EPA published final rulemaking on the Illinois lead SIP except for the Granite City area on March 22, 1982 (47 FR 12164) and proposed approval of the lead SIP for the Granite City area on December 29, 1983 (48 FR 57324). Further, such rulemaking is required for approval of the Illinois lead SIP for the entire State including the Granite City area which does not yet have a fully approved lead SIP.

The ambient lead standard was adopted as Illinois Pollution Control Board (IPCB) Rule 313 in a July 26, 1983, Opinion and Order of the Board. Rule 313 provides as follows:

(a) *Standard.* The ambient air quality standards for lead and its compounds are 1.5 micrograms per cubic meter, maximum arithmetic mean averaged over a calendar quarter.

(b) *Measurement Method.* For determining conformance with the ambient air quality standards for lead and its compounds, lead and its compounds shall be measured by the atomic absorption spectrometry or equivalent method as described in 40 CFR Part 50, Appendix G (1982).

The State lead air quality standard is as stringent as the Federal standard and the measurement method to determine compliance with the standard is equivalent to the Federal method described in 40 CFR Part 50, Appendix G, for the determination of lead in suspended particulates matter collected from ambient air. USEPA, therefore, approves it for incorporation in the Illinois SIP.

Because USEPA considers today's action noncontroversial and routine, we are approving it today without prior proposal. The action will become effective on May 29, 1984. However, if we receive notice by April 26, 1984 that someone wishes to submit critical comments, *then* USEPA will publish: (1) A notice that withdraws the action, and (2) a notice that begins a new

rulemaking by proposing the action and establishing a comment period.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from today). This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations, Incorporation by reference.

Note.—Incorporation by reference of the State Implementation Plan for the State of Illinois was approved by the Director of the Federal Register on July 1, 1983.

This notice is issued under authority of Sections 110 and 172 of the Clean Air Act, as amended (42 U.S.C. 7410 and 7502).

Dated: March 21, 1984.

William D. Ruckelshaus,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Title 40 of the Code of Federal Regulations, Chapter I, Part 52 is amended as follows:

Subpart O—Illinois

1. Section 52.720 is amended by adding subparagraph (c)(45) as follows:

§ 52.720 Identification of plan.

* * * * *

(c) * * *

(45) On August 19, 1983, the State of Illinois submitted a revision to the Illinois State Implementation Plan in the form of a July 26, 1983, Order of the Illinois Pollution Control Board (R82–12). This Order creates Rule 313 which establishes 1.5 micrograms per cubic meter, maximum arithmetic mean, averaged over a calendar quarter as the State's ambient air quality standard for lead. The Board also adopted, as part of Rule 313, a measurement method for determining compliance with the standard.

BILLING CODE 6560–50–M

---

40 CFR Part 52

[A–IX–FRL 2553–5]

Approval and Promulgation of Implementation Plans; Nevada State Implementation Plan Revision

AGENCY: Environmental Protection Agency.

ACTION: Notice of final rulemaking.

SUMMARY: The Environmental Protection Agency (EPA) takes final action to approve changes to the State of Nevada Department of Conservation and Natural Resources (NDCNR) rules and regulations for air pollution control submitted by the Governor of Nevada as revisions to the Nevada State Implementation Plan (SIP). These revisions are administrative and retain the previous emission control requirements. EPA reviewed these rules with respect to the Clean Air Act and determined that they should be approved.

DATE: This action is effective May 29, 1984.

ADDRESSES: A copy of the revisions is available for public inspection during normal business hours at the EPA Region 9 office and at the following locations:

Public Information Reference Unit, Environmental Protection Agency, Library, 401 "M" Street, S.W., Room 2404, Washington, D.C. 20460

Library, Office of the Federal Register, 1100 "L" Street, N.W., Room 8401, Washington, D.C. 20460

FOR FURTHER INFORMATION CONTACT: Thomas Rarick, Chief, State Implementation Plan Section, Air Programs Branch, Air Management Division, Environmental Protection Agency, Region 9, 215 Fremont Street, San Francisco, CA 94105, (415) 974–7641.

SUPPLEMENTARY INFORMATION: On October 26, 1982 and September 14, 1983, the NDCNR submitted the Nevada Administrative Code "Air Pollution Control" to EPA as a SIP revision. The revision submitted on October 26, 1982 represents a codification of the previously approved "Nevada Air Quality Regulations." The revised rules are as follows and were submitted on the indicated dates:

445.651 "Waste".
445.652 "Weak nitric acid".
445.653 "Wet garbage".
445.654 "Wet-process phosphoric acid plant".
445.655 "Abbreviations".
445.660 Severability.
445.662 Confidential information.
445.663 Concealment of emissions prohibited.
445.664 Pollution control equipment: Operation; modification; removal.
445.665 Hazardous emissions: Order for reduction or discontinuance.
445.666 Plan for reduction of emissions.
445.667 Excess emissions: Scheduled maintenance; testing; malfunctions.
445.682 Testing and sampling.
445.685 Monitoring systems: Verification of operation status.
445.686 Monitoring systems: Performance evaluations.
445.687 Monitoring systems: Components contracted for before September 11, 1979.
445.688 Monitoring systems: Adjustments.
445.689 Monitoring systems: Measurement of opacity.
445.690 Monitoring systems: Frequency of operation.
445.691 Monitoring systems: Recordation of data.
445.692 Monitoring systems: Records; reports.
445.693 Alternative monitoring procedures.
445.694 Emission discharge information.
445.695 Schedules for Compliance.
445.696 Notice of violations; appearance before commission.
445.697 Stop orders.
445.698 Appeal of director's decision: Application forms.
445.699 Violations: Administrative fines.
445.700 Violations: Manner of paying fines.

Registration Certificates and Operating Permits

445.704 Registration certificates and operating permits required.
445.705 Exemptions.
445.706 Application date; payment of fees.
445.707 Registration certificates: Prerequisite; application; fee; issuance, denial; expiration.
445.712 Operating permits: Prerequisite; application; fee; issuance, denial; posting.
445.713 Operating permits: Renewal.
445.714 Operating permits: Replacement of lost or damaged permits.
445.715 Operating permits: Revocation.
445.716 Operating permits: Change of location.

Visible Emissions

445.721 Maximum opacity of emissions.
445.723 Existing copper smelter.

Emissions of Particulate Matter

445.729 Process weight rate for calculating emission rates.
445.730 Colemanite flotation processing plants.
445.731 Fuel-burning equipment using indirect heat transfer.
445.732 Industrial sources.
445.734 Fugitive dust.

Sulfur Emissions

445.742 Sulfur emission.
445.743 Calculation of total feed sulfur.
445.746 Other sulfur emitting processes.

Open and Incinerator Burning

445.753 Open burning.
445.754 Incinerator burning.

Supplementary Control Systems

445.764 Reduction of employees' pay because of use of system prohibited.

Miscellaneous Provisions

445.844 Odors.
445.845 Reduction of animal matter.

September 14, 1983

445.732 Industrial sources.
445.808 Barite grinding mills.
445.815 Molybdenum processing plants.
445.816 Processing plants for precious metal.
445.843 Standards of quality for ambient air.
445.846 Organic solvents and other volatile compounds.

These rules revisions are administrative and do not affect current emission control requirements. The above mentioned rules reflect (1) a renumbering change, (2) expanded procedures for the issuance of a notice of violation, (3) maximum visible emission limits at 20% opacity not to exceed three minutes in any one hour, (4) process weight rates, (5) emission limits for particulate matter and sulfur compounds, and (6) guidelines for the prevention and control of fugitive dust and for open and incinerator burning.

Under Section 110 of the Clean Air Act as amended, and 40 CFR Part 51, EPA is required to approve or disapprove these regulations as SIP revisions. All rules submitted have been evaluated and found to be in accordance with EPA policy and 40 CFR Part 51. EPA's detailed evaluation of the submitted rules is available at the Region 9 office.

It is the purpose of this notice to approve all the rule revisions listed above and to incorporate them into the Nevada SIP. This is being done without prior proposal because the revisions are noncontroversial, have limited impact, and no comments are anticipated. The public should be advised that this action will be effective 60 days from the date of this **Federal Register** notice. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments, the approval will be withdrawn and a subsequent notice will be published before the effective date. The subsequent notice will indefinitely postpone the effective date, modify the final action to a proposed action, and establish a comment period.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under Section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from today). This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

Incorporation by reference of the State Implementation Plan for the State of Nevada was approved by the Director of the **Federal Register** on July 1, 1982.

Authority: Sections 110 and 301(a) of the Clean Air Act, as amended (42 U.S.C. 7410, 7502 and 7601(a)).

List of Subjects in 40 CFR Part 52

Intergovernmental relations, Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Incorporation by Reference.

Dated: March 21, 1984.

William D. Ruckelshaus,

Administrator.

PART 52—[AMENDED]

Supart DD of Part 52, Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart DD—Nevada

1. Section 52.1470 is amended by adding paragraphs (c)(25) and (c)(26) to read as follows:

§ 52.1470 Identification of plan.

* * * * *

(c)* * *

(25) The following amendments to the plan were submitted on October 26, 1982, by the Governor.

(i) Amendments of Chapter 445 of the Nevada Administrative Code.

(A) New or amended Sections 445.430–445.437, 445.439–445.447, 445.451, 445.453–445.472, 445.474–445.477, 445.480–445.504, 445.509–445.519, 445.522–445.537, 445.539, 445.542–445.544, 445.546–445.549, 445.551, 445.552, 445.554–445.568, 445.570, 445.572–445.587, 445.589–445.605, 445.608–445.612, 445.614–445.622, 445.624, 445.626, 445.627, 445.629–445.655, 445.660, 445.662–445.667, 445.682, 445.685–445.700, 445.704–445.707, 445.712–445.716, 445.721, 445.723, 445.729–445.732, 445.734, 445.742, 445.743, 445.746, 445.753, 445.754, 445.764, 445.844, and 445.845.

(26) The following amendments to the plan were submitted on September 14, 1983, by the Governor.

(i) Amendements to Chapter 445 of the Nevada Administrative Code.

(A) New or amended Sections 445.732, 445.808 (paragraphs (1), (2) (a–c), and (3)–(5)), 445.815 (paragraphs (1), (2) (a) (1 & 2), and (3)–(5)), 445.816 (paragraphs (1), (2) (a–i), and (3)–(5)), 445.843, and 445.846 (paragraphs (1), (3), and (4)).

BILLING CODE 6560–50–M

---

40 CFR Parts 264 and 265

[SWH–FRL–2552–5]

Hazardous Waste Disposal Facilities; Availability of Information

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability of information and request for comments.

SUMMARY: The Environmental Protection Agency today notices the availability of two draft Technical Resource Documents for public comment. The documents are (1) *Solid Waste Leaching Procedural Manual* (SW–924), and (2) *Soil Properties, Classification, and Hydraulic Conductivity Testing* (SW–925). Technical Resource Documents provide state-of-the-art summaries of technologies and evaluation techniques determined by the Agency to constitute acceptance engineering designs, practices, and procedures. The documents may be used for information and guidance by owners and operators of facilities that treat, store, and dispose of hazardous and non-hazardous waste in landfills, surface impoundments waste piles, and land treatment facilities. These Technical Resource Documents will therefore assist in the implementation of 40 CFR Parts 264 and 265 hazardous waste management regulations by helping owner/operators and permit officials to identify and evaluate technologies that can be used to prevent potential harm to human health and the environment and to comply with the regulations.

DATES: Comments on the draft Technical Resource Documents must be submitted on or before June 25, 1984.

ADDRESS: Comments should be addressed to Docket Clerk, Office of Solid Waste (WH–562), U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460. All communications should identify the document title and SW number, (e.g., *Solid Waste Leaching Procedure Manual* (SW–924)).

Copies of the draft reports are available for reading at the EPA Library Public Information Reference Unit (Room 2904) and Subtitle C Docket Room (Room S212), both located at 401 M Street, S.W., Washington, D.C. 20460, as well as at all Regional Office Libraries, Monday through Friday during the hours of 9:00 a.m. to 4:30 p.m. A limited number of personal copies of the documents may be obtained by calling the RCRA Hotline, at (800) 424–9346 (toll free) or at (202) 382–3000.

FOR FURTHER INFORMATION CONTACT: Arthur Day, Office of Solid Waste (WH–565E), U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460 (202) 382–4680.

SUPPLEMENTARY INFORMATION: Subtitle C of the Resource Conservation and Recovery Act (RCRA), Section 3004, required the Environmental Protection Agency (EPA) to promulgate regulations

setting performance standards for owners and operators of facilities that treat, store, and dispose of hazardous wastes. 40 CFR Part 265 addresses the standards applicable to owners and operators of interim status facilities, while 40 CFR Part 264 regulates new and existing facilities.

Both 40 CFR Parts 264 and 265 prescribe performance standards with which owners and operators must comply. In order to facilitate implementation of these standards, the EPA has developed a series of guidance documents. There are three types of documents including Technical Guidance Documents, Permit Guidance Manuals, and Technical Resource Documents. The latter present technologies and evaluation techniques which the EPA staff views as good engineering designs, practices, and procedures. Their focus is broad in scope, as they do not specifically interpret the design requirements as set forth in the regulations. The engineering techniques presented are merely suggestions.

Availability announcements of eight Technical Resources Documents were made in the May 6, 1983 **Federal Register** (40 FR 20440). Today's notice announces the availability of two additional Technical Resource Documents for public comment.

A *Solid Waste Leaching Procedure Manual* is a technical guide analyzing a batch leaching procedure for laboratory use with various kinds of waste that will help to predict the quality and composition of leachate from certain wastes under field conditions. *Soil Properties, Classification and Hydraulic Conductivity Testing* is a compilation of 16 available laboratory and field testing methods for the measurement of hydraulic conductivity (permeability) of both saturated and unsaturated soils and includes background information on soil classification, soil water, and soil compaction. The Technical Resource Document is intended to supplement Method 9100. The Agency requests comment on the accuracy and completeness of the information presented and encourages commenters to suggest remedies and alternatives should inaccuracy or incompleteness be identified.

Dated: February 22, 1984.

Jack McGraw,

Deputy Assistant Administrator for Solid Waste and Emergency Response.

BILLING CODE 6560-50-M

40 CFR Part 467

[WH-FRL-2539-7]

Aluminum Forming Point Source Category, Effluent Limitations Guidelines, Pretreatment Standards and New Source Performance Standards; Correction

AGENCY: Enviornmental Protection Agency (EPA).

ACTION: Final rule; correction.

SUMMARY: EPA is correcting several errors in the effluent limitations guidelines, pretreatment standards and new source performance standards for the aluminum forming point source category which appeared in the **Federal Register** on October 24, 1983 (48 FR 49126). This document corrects errors in both the preamble and 40 CFR part 467 including the compliance date for pretreatment standards for existing sources.

EFFECTIVE DATE: March 27, 1984.

FOR FURTHER INFORMATION CONTACT: Ms. Janet K. Goodwin at (202) 382-7126.

SUPPLEMENTARY INFORMATION: On October 24, 1983, EPA published final effluent limitations guidelines and standards for the aluminum forming point source category (40 CFR Part 467; 48 FR 49126). Both the preamble and regulation contained several errors. These errors are discussed briefly below and are corrected by this notice.

A typographical error was made in the compliance date for Pretreatment Standards for Existing Sources (PSES): the correct compliance date is October 24, 1986. Both the "**DATES**" section of the preamble and 40 CFR 467.04 are corrected by this notice.

An omission was made in the "Applicability" section of the final rule, 40 CFR 467.01(a) which states, in pertinent part, that surface treatment of aluminum is excluded from regulation under the metal finishing guidelines in 40 CFR Part 433 when performed as an integral part of aluminum forming. This sentence should indicate that surface treatment of aluminum is also excluded from the electroplating regulations at 40 CFR Part 413. Although the proposed rule specifically stated that these operations were excluded from 40 CFR Part 413 (see 47 FR 52648; November 22, 1982), the reference to 40 CFR part 413 was inadvertently dropped in the final aluminum forming regulation at 40 CFR 467.01(a). This error is corrected by this notice. Thus, the EPA has excluded from Part 413 and included under Part 467 any surface treatment of aluminum if performed as an integral part of the aluminum forming process.

This notice adds a new section, 40 CFR 467.05, that states that removal allowances pursuant to 40 CFR 403.7(a) may be granted for toxic metals limited in 40 CFR 467 when used as indicator pollutants. The Agency's intent regarding the granting of such removal allowances was explicitly stated in the preamble to the final rule (see, 48 FR 49133; October 24, 1984); however, regulatory language to this effect was inadvertently omitted from the final rule. This omission is corrected by this notice.

The Best Practicable Technology (BPT) and Best Available Technology (BAT) monthly average limitations for the pollutant aluminum are incorrect in some subparts. Shortly before promulgation a correction was made in the calculation of the treatment effectiveness concentration value used to determine the maximum for monthly average limitations for the pollutant aluminum. It in no way affects the technology basis of the regulations and only slightly affects the stringency of the regulation. This correction was reflected in some but not all of the limitations before promulgation. This notice corrects the maximum for monthly average values for the pollutant aluminum for BPT and BAT.

The core allowances for the Rolling with Neat Oils Subcategory were improperly identified. The limitations and standards for the *Core With an Annealing Furnace Scrubber* were listed as the limitations and standards for the *Core Without an Annealing Furnace Scrubber*. Likewise, the limitations and standards for the *Core Without an Annealing Furnace Scrubber* were listed as the limitations and standards for the *Core With an Annealing Furnace Scrubber*. This notice corrects the error.

Appendices B, C, D, E, and F which list pollutants excluded from regulation for specific reasons contained several errors; in many instances, the errors consist of misspelled pollutant listings or inaccurate numerical identifications. In a few cases, pollutants were properly listed as excluded from regulation but were improperly listed in a particular Appendix or were listed twice. These errors are corrected by this notice.

Also, the pollutant "vinyl chloride" was inadvertantly included in the list of organic pollutants considered for regulation and in the definition of Total Toxic Organics (TTO) at 40 CFR § 467.02(p). This pollutant was not detected in any wastewater sample and is thus excluded from regulation pursuant to Paragraph 8(a)(iii) of the Settlement Agreement in *NRDC* v. *Train*, 8 ERC 2120 (D.D.C. 1976).

modified, 12 ERC 1833 (D.D.C. 1979). By the notice, the pollutant is deleted from the definition of TTO and listed in Appendix B as excluded from regulation because it was not detected. This correction in no way affects the mass standards for TTO because vinyl chloride was not detected and thus not included in the data used to calculate TTO.

A typographical error caused the units in the regulation to be printed as Mg/off-kg with a capital letter m rather than mg/off-kg with a lower case letter m. Similarly a typographical error caused the use of a number one instead of lower case letter l in many cases where the expression l/kkg was used. This notice corrects these typographical errors.

Dated: February 29, 1984.

Jack E. Ravan,

Assistant Administrator for Water.

The following corrections are made to FR Doc 83–28157, the Aluminum Forming Point Source Category; Effluent Limitations Guidelines; Pretreatment Standards and New Source Performance Standards published in the **Federal Register** on October 24, 1983 (48 FR 49126).

1. On page 49126, column one, the second paragraph under **DATES**, in the last sentence, "The compliance date for pretreatment standards for existing sources (PSES) is October 24, 1983" is corrected to read, "The compliance date for pretreatment standards for existing sources (PSES) is October 24, 1986".

2. On page 49128, column two, in the second complete paragraph, the ninth line, "(47 FR 34079, July 27, 1983)" is corrected to read, "(48 FR 34079, July 27, 1983)".

3. On page 49130, column three, the first complete paragraph, the first sentence, "porcelain enameling" is corrected to read, "porcelain enameling wastewaters".

4. On page 49131, column one, the second complete paragraph, the first sentence, "BTP" is corrected to read, "BPT".

5. On page 49131, column one, in the third complete paragraph, the last sentence, "The limitation" is corrected to read, "The limitations".

6. On page 49131, column two, on the sixth line from the top, "the available data including data including the preproposal data and is 179 1/kkg (43 gal/ton)" is corrected to read, "the available data including the preproposal data and is 179 l/kkg (43 gal/ton)".

7. On page 49131, column two, in the first complete paragraph, the last sentence, "13,912 1/kkg" is corrected to read, "13,912 l/kkg".

8. On page 49131, column two, in the second complete paragraph, the second sentence, "15,900 1/kkg" is corrected to read, "15,900 l/kkg".

9. On page 49131, column two, in the third complete paragraph, on line sixteen, "The BPT regulatory flow of 1,478 1/kkg" is corrected to read, "The BPT regulatory flow of 1,478 l/kkg".

10. On page 49131, column two, in the fourth complete paragraph, on line five, "45 1/kkg" is corrected to read, "45 l/kkg".

11. On page 49131, column three, in the first complete paragraph, the last sentence, "5.5 1/kkg" is corrected to read, "5.5 l/kkg".

12. On page 49131, column three, in the second complete paragraph, the first sentence, "1.964 1/kkg" is corrected to read, "1.964 l/kkg".

13. On page 49131, column three, in the third complete paragraph, last sentence, "1,555 1/kkg" is corrected to read, "1,555 l/kkg".

14. On page 49131, column three, in the fourth complete paragraph, first sentence, "1,329 1/kkg (298 gal/ton)" is corrected to read, "1,329 l/kkg (319 gal/ton)".

15. On page 49131, column three, in the fourth complete paragraph, on line thirteen, "1329 1/kkg (319 gal/ton)" is corrected to read, "2,609 l/kkg (626 gal/ton)".

16. On page 49132, column one, the second line, "$84.4 million" is corrected to read, "$48.4 million".

17. On page 49132, column one, in the second complete paragraph, the last sentence, "179 1/kkg" is corrected to read, "179 l/kkg".

18. On page 49132, column one, in the third complete paragraph, the last sentence, "1,391 1/kkg" is corrected to read, "1,391 l/kkg".

19. On page 49132, column one, in the fourth complete paragraph, the last sentence, "193.9 1/kkg" is corrected to read, "193.9 l/kkg".

20. On page 49132, column two, in the fourth line, "45 1/kkg (11 gal/ton), 1,230 1/kkg (295 gal/ton), 1,964 1/kkg (0.471 gal/ton) and 5.5 1/kkg (1.3 gal/ton)" is corrected to read, "45 l/kkg (11 gal/ton), 1,478 l/kkg (355 gal/ton), 1.964 l/kkg (0.471 gal/ton) and 5.5 l/kkg (1.3 gal/ton)".

21. On page 49132, column three, paragraph two, on line four "29.000 kg/yr" is corrected to read, "29,000 kg/yr".

22. On page 49132, column three, in the second complete paragraph, on line fifteen, "pollutants discharged after BPT" is corrected to read, "pollutants discharged after BAT". On line twenty of the same paragraph, "removal of approximately 1 kg (2.2 lb)" is corrected to read, "removal of approximately 0.3 kg (0.6 lb)".

23. On page 49133, column one, on line six, "298 1/kkg" is corrected to read, "298 l/kkg". In the same paragraph, on line twenty-seven, the last sentence, "allow installation of small end-of-pipe" is corrected to read, "allow installation of smaller end-of-pipe".

24. On page 49133, column two, line one, "109 kg per year lb/yr) of aluminum" is corrected to read, "109 kg per year (240 lb/yr) of aluminum".

25. On page 49133, column two, in the first complete paragraph, line five, "POTW The" is corrected to read, "POTW. The".

26. On page 49133, column three, in the first complete paragraph, line seven, "0.01 mg/1" is corrected to read, "0.01 mg/l".

27. On page 49134, column one, on line twenty-eight, "drawing with emulsions or soaps subcategory less than" is corrected to read, "drawing with emulsions or soaps subcategory that manufacture less than".

28. On page 49134, column two, in the second complete paragraph, line ten, "$1.039 million for PSNS" is corrected to read, "$1.039 million for PSES". In the same paragraph, last sentence, "Since PSES costs are approximately the same as the PSES costs" is corrected to read, "Since PSNS costs are approximately the same as the PSES costs".

29. On page 49134, column two, in the fourth complete paragraph, last sentence, "There are" is removed.

30. On page 49135, column three, on the fifth line, "that NSPS and PSNS will continue a barrier" is corrected to read, "that NSPS and PSNS will constitute a barrier".

31. On page 49137, column two, in the third complete paragraph, last sentence, "not" is corrected to read, "no".

32. On page 49138, column one, on line three, "(1) The data is too small" is corrected to read, "(1) The data base is too small".

33. On page 49140, column one, in the fourth complete paragraph, first sentence, "plans" is corrected to read, "plants".

34. On page 49140, column two, in the fourth complete paragraph, last sentence, "4.45 μg/l to 6.43 μg/l" is corrected to read, "4.5 mg/l to 6.43 mg/l".

35. On page 49141, column three, in the first complete paragraph, line eighteen, "$284,200 per year" is corrected to read, "$283,200 per year".

36. In Appendix B which begins on page 49145, "088 vinyl chloride" is inserted to follow, "063 N-nitrosodi-n-propylamine" in the lists for Subparts A

and B in column one, Subpart D in column two, Subpart E in column three, and Subpart F in column one, page 49146.

37. On page 49145, column one, Appendix B, in the list for Subpart A, "041 -bromophenyl phenyl ether" is corrected to read "041 4-bromophenyl phenyl ether".

38. On page 49145, column two, Appendix B, in the list for Subpart C, "036 2,6-dinitrotolune" is corrected to read, "036 2,6-dinitrotoluene".

39. On page 49145, column two, Appendix B, in the list for Subpart D, "006 carbon tetrachloride" is removed.

40. On page 49145, column two, Appendix B, in the list for Subpart D, "028 3,3'-dichlorobenzene" is corrected to read, "028 3,3'-dichlorobenzidine".

41. On page 49145, column two, Appendix B, in the list for Subpart D, "033 1,3-dichloropropoylene" is corrected to read, "033 1,3-dichloropropylene".

42. On page 49146, column one, Appendix C, in the list for Subpart C, "037 1,2-diphenylhydrazine" is removed.

43. On page 49146, column two, Appendix C, in the list for Subpart C, "072 benzo(a)anthracene (1,2-benzanthracene)" is inserted to follow, "057 2-nitrophenol".

44. On page 49146, column two, Appendix C, in the list for Subpart D, "072 benzo(a)anthracene (1,2-benzanthracene)" is inserted to follow, "057 2-nitrophenol".

45. On page 49146, column two, Appendix C, in the list for Subpart E, "015 1,1,2,2-trichloroethane", is corrected to read, "015 1,1,2,2-tetrachloroethane".

46. On page 49146, column two, Appendix C, in the list for Subpart E, "029 1,-dichloroethylene" is corrected to read, "029 1,1-dichloroethylene".

47. On page 49146, column two, Appendix C, in the list for Subpart E, "037 1,2-diphenylhydrazine" is removed.

48. Appendix D which begins on page 49146, in the list for Subpart F on page 49147 column two, "067 butyl benzyl phtholate" is corrected to read, "067 butyl benzyl phthalate".

49. On page 49147, column two, Appendix E, in the list for Subpart E, "004 benzene" is removed.

50. On page 49147, column two, Appendix E, in the list for Subpart E, "034 2,4-dimethylephenol" is corrected to read "034 2,4-dimethylphenol".

51. On page 49147, column three, Appendix E, in the list for Subpart F, "051 chlofodibromomethane" is corrected to read, "051 chlorodibromomethane".

52. In Appendix G which begins on page 49148 "088 vinyl chloride" is removed from the following lists: Subparts A and B in column one and two respectively, Subparts C and D in column two and three respectively, and Subpart E in column three.

53. On page 49148, Appendix G, "072 benzo(a)pyrene" is corrected to read "073 benzo(a)pyrene" in the following lists: Subparts A and B in column one, Subparts C and D in column two and three respectively, and Subpart E in column three.

54. Also in Appendix G, on page 49149, column one, in the list for Subpart F, "037 1,2-diphenylhydrazine" is inserted to follow, "035 2,4-dinitrotoluene".

55. On page 49149, column one, Appendix G, in the list for Subpart F, "073 benzo(a)pyrene" is inserted to follow, "070 diethyl phthalate", and "088 vinyl chloride" is removed.

PART 467—[CORRECTED]

56. In 40 CFR 467.01(a) on page 49150, column one, line 13, "under the Metal Finishing provisions of 40 CFR Part 433" is corrected to read, "under the Electroplating and Metal Finishing provisions of 40 CFR Parts 413 and 433".

57. In 40 CFR 467.01, the note which follows paragraph c in the first column of page 49150, "This paragraph is promulgated as an Interim Rule" is corrected to read, "This paragraph is promulgated as an Interim Final Rule".

58. In 40 CFR 467.02, on page 49150, column three, paragraph (p) is corrected with the removal of "vinyl chloride" from the list of organic pollutants.

59. In 40 CFR 467.03(a)(2), on page 49151, column one, "will not be used in the aluminum process" is corrected to read, "will not be used in the aluminum forming process".

60. In 40 CFR 467.03(b), on page 49151, column one, "As an alternative to monitoring" is corrected to read, "As an alternative monitoring".

61. In 40 CFR 467.03(c), on page 49151, column one, "discharge limits in direct discharge" is corrected to read, "discharge limits in direct discharge permits and for pretreatment standards. Compliance with the monthly discharge limit is required regardless of the number of samples analyzed and averaged."

62. In 40 CFR 467.04, on page 49151, column one, the compliance date for PSES is corrected to read, "October 24, 1986".

63. On page 49151, column one, following 40 CFR 467.04, add a new section, 40 CFR 467.05 to read as follows:

§ 467.05 Removal Allowances for Pretreatment Standards.

Removal allowances pursuant to 40 CFR Part 403.7(a) may be granted for the toxic metals limited in 40 CFR Part 467 when used as indicator pollutants.

64. In 40 CFR 467.12, on page 49151, column two, under *Core Without an Annealing Furnace Scrubber*, "Mg/off-kg (pounds per/million off-pounds)" is corrected to read, "Mg/off-kg (lb/million off-lbs)".

65. In 40 CFR 467.12, on page 49151, column two, the table heading, "*Core Without an Annealing Furnace Scrubber*" is corrected to read, "*Core With an Annealing Furnace Scrubber*".

66. In 40 CFR 467.12, page 49151, the term "Mg/off-kg (pounds per/million off-pound)" is replaced with, "mg/off-kg (lb/million off-lbs)" each time it appears. This term appears in the tables labelled: *Core With an Annealing Furnace Scrubber, Continuous Sheet Casting Spent Lubricant, Solution Heat Treatment Contact Cooling Water,* and *Cleaning or Etching Bath.*

67. In 40 CFR 467.12, on page 49151, column two, the table heading, "*Core With an Annealing Furnace Scrubber*" is corrected to read, "*Core Without an Annealing Furnace Scrubber*".

68. In 40 CFR 467.12, on page 49151, column three, under *Continuous Sheet Casting Spent Lubricant,* the maximum for monthly average for aluminum, "0.0062" is corrected to read, "0.0063".

69. In 40 CFR 467.12, on page 49151, column three, under *Solution Heat Treatment Contact Cooling Water,* the maximum for monthly average for aluminum, "24.20" is corrected to read, "24.66".

70. In 40 CFR 467.12, on page 49151, column three, under *Cleaning or Etching Bath,* the maximum for monthly average for aluminum, "0.562" is corrected to read, "0.573".

71. The term, "Mg/off-kg (pounds per million off-pounds)" is replaced with, "mg/off-kg (lb/million off-lbs)" each time it appears.

This term appears in the following Tables:

Section	Pages	Column	Title of table
467.12	49152	1	*Cleaning or Etching Rinse.*
		1	*Cleaning or Etching Scrubber Liquor.*

72. In 40 CFR 467.12, on page 49152, column one, under *Cleaning or Etching Rinse*, the maximum for monthly average for aluminum, "43.69" is corrected to read, "44.52".

73. In 40 CFR 467.12, on page 49152, column one, under *Cleaning or Etching Scrubber Liquor*, the maximum for monthly average for aluminum, "49.93" is corrected to read, "50.88".

74. In 40 CFR 467.13, on page 49152, column one, the table heading, *"Core Without an Annealing Furnace Scrubber"* is corrected to read, *"Core With an Annealing Furnace Scrubber"*.

75. In 40 CFR 467.13, on page 49152, column two, the table heading, *"Core With an Annealing Furnace Scrubber"* is corrected to read, *"Core Without an Annealing Furnace Scrubber"*.

76. In 40 CFR 467.13, on page 49152, column two, under *Solution Heat Treatment Contact Cooling Water*, the maximum for monthly average for aluminum, "6.396" is corrected to read, "6.518".

77. In 40 CFR 467.13, on page 49152, column two, under *Cleaning or Etching Bath*, the maximum for monthly average for aluminum, "0.562" is corrected to read, "0.573".

78. In 40 CFR 467.13, on page 49152, column three, under *Cleaning or Etching Rinse*, the maximum for monthly average for aluminum, "4.368" is corrected to read, "4.45".

79. In 40 CFR 467.13, on page 49152, column three, under *Cleaning or Etching Scrubber Liquor*, the maximum for monthly average for aluminum, "6.070" is corrected to read, "6.186".

80. In 40 CFR 467.14, on page 49152, column three, the table heading, *"Core Without an Annealing Furnace Scrubber"* is corrected to read, *"Core With an Annealing Furnace Scrubber"*.

81. In 40 CFR 467.14, on page 49153, column one, the table heading, *"Core With an Annealing Furnace Scrubber"* is corrected to read, *"Core Without an Annealing Furnace Scrubber"*.

82. In 40 CFR 467.15, on page 49153, column three, the table heading, *"Core Without an Annealing Furnace Scrubber"* is corrected to read, *"Core With an Annealing Furnace Scrubber"*.

83. In 40 CFR 467.15, on page 49153, column three, the table heading, *"Core With an Annealing Furnace Scrubber"* is corrected to read, *"Core Without an Annealing Furnace Scrubber"*.

84. In 40 CFR 467.15, on page 49153, column three, under *Solution Heat Treatment Contact Cooling Water*, the maximum for any one day for chromium, "0.090" is corrected to read, "0.90".

85. The tables titled, *"Cleaning or Etching Scrubber"* are corrected to read, *"Cleaning or Etching Scrubber Liquor"* wherever they appear. This title appears in the following sections:

Section	Page	Column
467.15	49154	1
467.16	49154	3
467.25	49157	2
467.26	49158	1
467.35	49161	3
467.36	49162	2
467.45	49163	3
467.46	49164	2
467.55	49167	2
467.56	49168	1
467.65	49171	1
467.66	49171	3

86. In 40 CFR 467.16, on page 49154, column two, the table heading, *"Core Without an Annealing Furnace Scrubber"* is corrected to read, *"Core With an Annealing Furnace Scrubber"*.

87. In 40 CFR 467.16, on page 49154, column two, the table heading, *"Core With an Annealing Furnace Scrubber"* is corrected to read, *"Core Without an Annealing Furnace Scrubber"*.

88. In 40 CFR 467.16, on page 49154, column three, under *Cleaning or Etching Scrubber*, the maximum for monthly average for cyanide, "0.15" is corrected to read, "0.16".

89. In 40 CFR 467.22, on page 49155, column one, under *Core*, the maximum for monthly average for aluminum, "0.408" is corrected to read, "0.416".

90. In 40 CFR 467.22, on page 49155, column two, under *Direct Chill Casting Contact Cooling Water*, the maximum for monthly average for aluminum, "4.18" is corrected to read, "4.26".

91. In 40 CFR 467.22, on page 49155, column two, under *Solution Heat Treatment Contact Cooling Water*, the maximum for monthly average for aluminum, "24.20" is corrected to read, "24.66".

92. In 40 CFR 467.22, on page 49155, column two, under *Cleaning or Etching Bath*, the maximum for monthly average for aluminum, "0.562" is corrected to read, "0.573".

93. In 40 CFR 467.22, on page 49155, column two, under *Cleaning or Etching Rinse*, the maximum for monthly average for aluminum appearing near the top of the third column, "43.69" is corrected to read, "44.52".

94. In 40 CFR 467.22, on page 49155, column three, under *Cleaning or Etching Scrubber Liquor*, the maximum for any one day for aluminum, "103.24" is corrected to read, "102.24".

95. In 40 CFR 467.22, on page 49155, column three, under *Cleaning or Etching Scrubber Liquor*, the maximum for monthly average for aluminum, "49.93" is corrected to read, "50.88".

96. In 40 CFR 467.23, on page 49155, column three, under *Core,* the maximum for monthly average for aluminum, "0.41" is corrected to read, "0.42".

97. In 40 CFR 467.23, on page 49156, column one, under *Direct Chill Casting Contact Cooling Water,* the maximum for monthly average for aluminum, "4.18" is corrected to read, "4.26".

98. In 40 CFR 467.23, on page 49156, column one, under *Solution Heat Treatment Contact Cooling Water,* the maximum for monthly average for aluminum, "6.40" is corrected to read, "6.52".

99. In 40 CFR 467.23, on page 49156, column one, under *Cleaning or Etching Rinse,* the maximum for monthly average for aluminum, "4.37" is corrected to read, "4.45".

100. In 40 CFR 467.23, on page 49156, column two, under *Cleaning or Etching Scrubber Liquor,* the maximum for monthly average for aluminum, "6.07" is corrected to read, "6.19".

101. In 40 CFR 467.24 on page 49156, column two, under, *Core,* the maximum for monthly average for cyanide, "0.010" is corrected to read, "0.011".

102. In 40 CFR 467.25 on page 49157, column two, under, *Solution Heat Treatment Contact Cooling Water,* the maximum for any one day for cyanide, "0.56" is corrected to read, "0.59".

103. In 40 CFR 467.25, on page 49157, column two, under *Solution Heat Treatment Contact Cooling Water,* the maximum for monthly average for zinc, "1.24" is corrected to read, "1.25".

104. In 40 CFR 467.32, on page 49158, column two, the BPT effluent limitations under *Core* are corrected to read, as follows:

The maximum for any one day for oil and grease, "7.28" is corrected to read, "7.32".

The maximum for monthly average for oil and grease, "4.37" is corrected to read, "4.39".

The maximum for any one day for suspended solids, "14.92" is corrected to read, "15.0".

The maximum for monthly average for suspended solids, "7.10" is corrected to read, "7.13".

105. In 40 CFR 467.32, on page 49158, column two, under *Extrusion Press Leakage,* the maximum for monthly average for aluminum, "4.64" is corrected to read, "4.73".

106. In 40 CFR 467.32, on page 49158, column three, the BPT effluent limitations for *Direct Chill Casting Contact Cooling Water* are corrected to read as follows:

The maximum for monthly average for chromium, "0.27" is corrected to read, "0.24".

The maximum for monthly average for cyanide, "0.18" is corrected to read, "0.16".

The maximum for monthly average for zinc, "0.90" is corrected to read, "0.81".

The maximum for monthly average for aluminum, "4.64" is corrected to read, "4.26".

The maximum for monthly average for oil and grease, "17.74" is corrected to read, "15.95".

The maximum for monthly average for suspended solids, "28.82" is corrected to read "25.92".

The maximum for any one day for suspended solids, "60.60" is corrected to read, "54.49".

107. In 40 CFR 467.32, on page 49158, column three, under *Press Heat Treatment Contact Cooling Water,* the maximum for monthly average for aluminum, "24.20" is corrected to read, "24.66".

108. In 40 CFR 467.32, on page 49158, column three, under *Solution Heat Treatment Contact Cooling Water,* the maximum for monthly average for aluminum, "24.20" is corrected to read, "24.66".

109. In 40 CFR 467.32, on page 49159, column one, under *Cleaning or Etching Bath,* the maximum for monthly average for aluminum, "0.562" is corrected to read, "0.573".

110. In 40 CFR 467.32, on page 49159, column one, under *Cleaning or Etching Rinse,* the maximum for monthly average for aluminum, "43.69" is corrected to read, "44.52".

111. In 40 CFR 467.32, on page 49159, column one, under *Cleaning or Etching Scrubber Liquor,* the maximum for any one day for aluminum, "103.24" is corrected to read, "102.24".

112. In 40 CFR 467.32, on page 49159, column one, under *Cleaning or Etching Scrubber Liquor,* the maximum for monthly average for aluminum, "49.93" is corrected to read, "50.88".

113. In 40 CFR 467.32, on page 49159, column two, under *Degassing Scrubber Liquor,* the maximum for monthly average for aluminum, "8.20" is corrected to read, "8.35".

114. In 40 CFR 467.33(b) which appears on page 49159, column two, "There shall be no discharge of wastewater pollutants from the degassing operation" is corrected to read, "There shall be no discharge allowance for wastewater pollutants from the degassing operation".

115. In 40 CFR 467.33(c), on page 49159, column two, in the table labelled *Core,* "BPT effluent limitations" is corrected to read, "BAT effluent limitations".

116. In 40 CFR 467.33(c), on page 49159, column two, under *Core,* the maximum for any one day for aluminum, "2.18" is corrected to read, "2.19".

117. In 40 CFR 467.33(c), on page 49159, column two, under *Core,* the maximum for monthly average for aluminum, "1.08" is corrected to read, "1.09".

118. In 40 CFR 467.33(c), on page 49159, column two, in the table labelled *Extrusion Press Leakage,* "BPT effluent limitations" is corrected to read, "BAT effluent limitations".

119. The term, "Mg/off-kg (lb/million off-lbs)" is replaced with "mg/off-kg (lb/million off-lbs)" each time it appears in the following tables:

Section	Pages	Column	Title of table

120. In 40 CFR 467.33(c), on page 49159, column three, under *Direct Chill Casting Contact Cooling Water,* the maximum for monthly average for aluminum, "4.18" is corrected to read, "4.26".

121. In 40 CFR 467.33(c), on page 49159, column three, under *Press Heat Treatment Contact Cooling Water,* the maximum for monthly average for aluminum, "6.40" is corrected to read, "6.52".

122. In 40 CFR 467.33(c), on page 49159, column three, under *Solution Heat Treatment Contact Cooling Water,* the maximum for monthly average for aluminum, "6.40" is corrected to read, "6.52".

123. In 40 CFR 467.33(c), on page 49159, column three, under *Cleaning or Etching Bath,* the maximum for monthly average for aluminum, "0.56" is corrected to read, "0.58".

124. In 40 CFR 467.33(c), on page 49160, column one, under *Cleaning or Etching Rinse,* the maximum for monthly average for aluminum, "4.37" is corrected to read, "4.45".

125. In 40 CFR 467.33(c), on page 49160, column one, under *Cleaning or Etching Scrubber Liquor,* the maximum for monthly average for aluminum, "6.07" is corrected to read, "6.19".

126. In 40 CFR 467.34(a), on page 49160, "There shall be no discharge of wastewater pollutants from the degassing operation" is corrected to read, "There shall be no discharge allowance for wastewater pollutants from the degassing operation".

127. In 40 CFR 467.34(b), on page 49160, column one, "from the core shall not" is corrected to read, "from the core and ancillary operations except those listed in paragraph (a) shall not".

128. In 40 CFR 467.34(b), on page 49160, column one, the new source performance standards for the *Core* are corrected as follows:

The maximum for monthly average for chromium, "0.057" is corrected to read "0.051".

The maximum for any one day for suspended solids, "5.08" is corrected to read, "5.10".

129. 40 CFR 467.35 which appears on page 49160, column three, is corrected by redesignating and revising the introductory text as (a) and by adding paragraphs (b) and (c) to read as follows:

§ 467.35 Pretreatment standards for existing sources.

(a) Except as provided in 40 CFR 403.7 and 403.13, any existing source subject to this subpart which introduces pollutants into a publicly owned treatment works must comply with 40 CFR Part 403 and achieve the following pretreatment standards for existing sources.

(b) There shall be no discharge allowance for wastewater pollutants from the degassing operation.

(c) The mass of wastewater pollutants from the core and ancillary operations except those identified in paragraph (b), introduced into a POTW shall not exceed the following values:

* * * * *

130. In 40 CFR 467.35, on page 49161, column one, under *Core,* the maximum for any one day for oil and grease, "6.78" is corrected to read, "6.80".

131. In 40 CFR 467.35, on page 49161, column two, the pretreatment standards for existing sources for the *Cleaning or Etching Bath* are corrected as follows:

"Aluminum" corrected to read, "TTO".

The maximum for any one day entry for TTO, "1.15" is corrected to read, "0.124".

The maximum for monthly average entry for TTO, "0.59" is corrected to read, "—".

The pollutant listed, "Oil and grease" is corrected to read, "Oil and grease (alternate monitoring parameter)".

The entry for "Suspended Solids" is removed.

The entry for "pH" is removed.

The footnote is removed.

132. 40 CFR 467.36 which appears on page 49161, column three, is corrected by redesignating and revising the introductory text as (a) and by adding paragraphs (b) and (c) to read as follows:

§ 467.36 Pretreatment standards for new sources.

(a) Except as provided in 40 CFR 403.7, any new source subject to this subpart which introduces pollutants into a publicly owned treatment works must comply with 40 CFR Part 403 and achieve the following pretreatment standards for new sources.

(b) There shall be no discharge allowance for wastewater pollutants from the degassing operation.

(c) The mass of wastewater pollutants from the core and ancillary operations except those identified in paragraph (b) introduced into a POTW shall not exceed the values set forth below:.

* * * * *

133. In 40 CFR 467.36, on page 49161, column three, under the *Core,* the maximum for any one day for TTO, "0.23" is corrected to read, "0.24". In the same table, the maximum for monthly average for zinc, "0.14" is corrected to read, "0.15".

134. In 40 CFR 467.36, on page 49162, column two, under *Cleaning or Etching Rinse,* the maximum for any one day for oil and grease (alternate monitoring

parameter), "139.10" is corrected to read, "13.91". In the same table, the maximum for monthly average for oil and grease (alternate monitoring parameter), "139.10" is corrected to read, "13.91".

135. In 40 CFR 467.44, on page 49162, column three, under *Forging Scrubber Liquor,* the maximum for monthly average for zinc, "0.40" is corrected to read, "0.04".

136. In 40 CFR 467.44, on page 49163, column one, the new source performance standards for *Cleaning or Etching Bath* are corrected as follows:

The maximum for any one day for aluminum, "0.772" is corrected to read, "1.094".

The maximum for monthly average for aluminum "0.376" is corrected to read, "0.485".

The maximum for any one day for suspended solids, "—" is corrected to read, "2.69".

The maximum for monthly average for suspended solids "—" is corrected to read, "2.15".

137. In 40 CFR 467.44, on page 49163, column one, under *Cleaning or Etching Rinse,* the maximum for any one day for aluminum, "8.00" is corrected to read, "8.5". In the same table, the maximum for monthly average for aluminum, "2.92" is corrected to read, "3.77".

138. In 40 CFR 467.44, on page 49163, column one, under *Cleaning or Etching Scrubber Liquor,* the maximum for any one day for aluminum, "8.33" is corrected to read, "11.81". In the same table, the maximum for monthly average for aluminum, "4.06" is corrected to read, "5.24". Also, in the same table, the footnote references are removed from the entry for suspended solids and inserted in the entry for pH.

139. In 40 CFR 467.45, on page 49163, column two, under *Solution Heat Treatment Contact Cooling Water,* the maximum for any one day for chromium, "0.896" is corrected to read, "0.897".

140. In 40 CFR 467.45, on page 49163, column three, under *Cleaning or Etching Bath,* the maximum for any one day for TTO, "1.23" is corrected to read, "0.123".

141. In 40 CFR 467.46, on page 49164, column one, *Solution Heat Treatment Contact Cooling Water,* the maximum for monthly average for TTO, "0.86" is corrected to read, "—".

142. In 40 CFR 467.52, on page 49164, column three, under *Core,* the maximum for monthly average for suspended solids, "0.971" is corrected to read, "0.972".

143. In 40 CFR 467.52, on page 49164, column three, under *Continuous Rod Casting Spent Lubricant,* "Mg/off-kg (lbs/million off-lbs)" is corrected to read, "mg/off-kg (lb/million off-lbs)".

144. In 40 CFR 467.52, on page 49164, column three, the BPT limitations for *Continuous Rod Casting Spent Lubricant* are corrected to read as follows:

Pollutant or pollutant property	BPT effluent limitations	
	Maximum for any 1 day	Maximum for monthly average
	mg/off-kg (lbs/million off-lbs) of aluminum rod cast	
Chromium	0.00040	0.00035
Cyanide	0.00057	0.00024
Zinc	0.00287	0.0012
Aluminum	0.0127	0.0053
Oil and Grease	0.0393	0.0236
Suspended Solids	0.0605	0.0383
pH	(1)	(1)

[1] Within the range of 7.0 to 10.0 at all times.

145. In 40 CFR 467.52, on page 49165, column one, under *Solution Heat Treatment Contact Cooling Water,* the maximum for monthly average for aluminum, "24.20" is corrected to read, "24.66".

146. In 40 CFR 467.52, on page 49165, column one, under *Cleaning or Etching Scrubber Liquor,* the maximum for monthly average for oil and grease, "198.80" is corrected to read, "190.8".

147. The term "Mg/off-kg (lb/million off-lbs" is replaced by "mg/off-kg (lb/million off-lbs)" each time it appears in the following tables:

Section	Pages	Column	Title of table
467.53	49165	II	*Continuous Rod Casting Spent Lubricant.*
		2	*Continuous Rod Casting Contact Cooling Water.*
		II	*Solution Heat Treatment Contact Cooling Water.*
		3	*Cleaning or Etching Bath.*
		3	*Cleaning or Etching Rinse.*
		II	*Cleaning or Etching Scrubber Liquor.*
467.54	49166	1	*Core.*

148. In 40 CFR 467.53, on page 49165, column two, under *Continuous Rod Casting Contact Cooling Water,* the maximum for monthly average for cyanide, "0.023" is corrected to read, "0.024".

149. In 40 CFR 467.54, on page 49166, column one, under *Continuous Rod Casting Spent Lubricant,* the maximum for any one day for zinc, "0.0002" is corrected to read, "0.002". In the same table, the maximum for monthly average for suspended solids, "0.03" is corrected to read, "0.024".

150. In 40 CFR 467.54, on page 49166, column two, under *Cleaning or Etching Rinse,* the maximum for any one day for suspended solids, "20.67" is corrected to read, "20.87".

151. In 40 CFR 467.55, on page 49167, column one, under *Continuous Rod Casting Contact Cooling Water,* the maximum for any one day for chromium, "0.853" is corrected to read, "0.086". In the same table the maximum for any one day for cyanide, "0.562" is corrected to read, "0.057".

152. In 40 CFR 467.55, on page 49167, column one, under *Cleaning or Etching Bath,* the maximum for any one day for TTO, "0.13" is corrected to read, "0.124".

153. In 40 CFR 467.55, on page 49167, column two, under *Cleaning or Etching Scrubber,* the maximum for any one day for TTO, "1.33" is corrected to read, "1.34".

154. In 40 CFR 467.56, on page 49167, column two, under *Core,* "Mg/off-kg (lb/per million off-lbs)" is corrected to read, "mg/off-kg (lb/million off-lbs)".

155. In 40 CFR 467.56, on page 49167, column three, the pretreatment standards for new sources for *Continuous Rod Casting Contact Cooling Water,* are corrected to read as follows:

Pollutant or pollutant property	PSNS	
	Maximum for any 1 day	Maximum for monthly average
	mg/off-kg (lbs/million off-lbs) of aluminum rod cast	
Chromium	0.072	0.029
Cyanide	0.039	0.016
Zinc	0.196	0.082
TTO		0.134
Oil and Grease (alternate monitoring parameter)	1.94	1.34

156. In 40 CFR 467.62, on page 49168, column two, under *Core* the maximum for monthly average for aluminum, "1.47" is corrected to read, "1.50".

157. In 40 CFR 467.62, on page 49168, column two, under *Continuous Rod Casting Spent Lubricant,* the maximum for monthly average for cyanide, "0.0002" is corrected to read, "0.0003".

158. In 40 CFR 467.62, on page 49168, column two, under *Continuous Rod Casting Spent Lubricant,* the maximum for monthly average for aluminum, "0.006" is corrected to read, "0.007". In the same table, the entry for suspended solids, "0.038" is corrected to read, "0.039".

159. In 40 CFR 467.62, on page 49168, column three, under *Solution Heat Treatment Contact Cooling Water,* the maximum for any one day for aluminum, "49.54" is corrected to read, "49.55". In the same table, the maximum for monthly average for aluminum, "24.19" is corrected to read, "24.66".

160. In 40 CFR 467.63, on page 49169, column one, under *Continuous Rod Casting Contact Cooling Water,* the

maximum for any one day for chromium, "0.085" is corrected to read, "0.086". In the same table the maximum for monthly average for cyanide of "0.023" is corrected to read, "0.024".

161. In 40 CFR 467.63, on page 49169, column two, under *Solution Heat Treatment Contact Cooling Water*, the maximum for any one day for chromium, "0.896" is corrected to read, "0.897".

162. In 40 CFR 467.64, on page 49169, column three, under the *Core*, the maximum for any one day for cyanide, "0.093" is corrected to read, "0.094". In the same table, the maximum for monthly average for aluminum, "1.26" is corrected to read, "1.27".

163. In 40 CFR 467.64, on page 49169, column three, under *Continuous Rod Casting Spent Lubricant*, the maximum for monthly average for aluminum, "0.0051" is corrected to read, "0.0053".

164. In 40 CFR 467.64, on page 49170, column one, under *Solution Heat Treatment Contact Cooling Water*, the maximum for any one day for chromium, "0.760" is corrected to read, "0.754".

165. In 40 CFR 467.64, on page 49170, column one, under *Solution Heat Treatment Contact Cooling Water*, the maximum for any one day for cyanide, "0.405" is corrected to read, "0.408".

166. In 40 CFR 467.64, on page 49170, column one, under *Cleaning or Etching Rinse*, "USPS" is corrected to read, "NSPS". In the same table, the maximum for any one day for oil and grease, "13.911" is corrected to read, "13.91".

167. In 40 CFR 467.64, on page 49170, column one, under *Cleaning or Etching Scrubber Liquor*, "mMg/off-kg (lb/million off-lbs)" is corrected to read, "mg/off-kg (lb/million off-lbs)".

168. In 40 CFR 467.65, on page 49170, column two, under *Continuous Rod Casting Contact Cooling Water*, the maximum for any one day for chromium, "0.085" is corrected to read, "0.086". In the same table, the maximum for monthly average for cyanide, "0.023" is corrected to read, "0.024". Also in the same table, the maximum for monthly average for zinc, "0.118" is corrected to read, "0.119".

169. In 40 CFR 467.65, on page 49170, column three, under *Solution Heat Treatment Contact Cooling Water*, the maximum for monthly average for zinc, "1.24" is corrected to read, "1.25".

170. In 40 CFR 467.65, on page 49171, column one, under *Cleaning or Etching Scrubber*, the maximum for any one day for TTO, "1.33" is corrected to read, "1.34".

171. In 40 CFR 467.66, on page 49171, column two, the pretreatment standards for new sources for *Continuous Rod Casting Contact Cooling Water* are corrected to read as follows:

Pollutant or pollutant property	PSNS	
	Maximum for any 1 day	Maximum for monthly average
	Mg/off-kg (lbs/million off-lbs) of aluminum rod cast	
Chromium	0.072	0.029
Cyanide	0.039	0.016
Zinc	0.196	0.082
TTO	0.134	
Oil and Grease (alternate monitoring parameter)	1.94	1.94

172. In 40 CFR 467.65, on page 49170, column two, under *Core*, the maximum for monthly average for chromium, "0.84" is corrected to read "0.084".

[FR Doc. 84-8092 Filed 3-26-84; 8:45 am]

BILLING CODE 6560-50-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Circular No. 2542]

43 CFR Parts 3100, 3200, 3400 and 3500

Oil and Gas Leasing; Geothermal Resources Leasing; Coal Management; and Leasing of Minerals Other Than Oil and Gas; Amendment Changing the Collection Process for Mineral Leases

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking will amend the existing regulations covering the procedures for collection of bonus and rental payments required in connection with mineral leases issued by the Bureau of Land Management. The final rulemaking will transfer most bonus and rental collections after the payment for the initial lease year to the Minerals Management Service. This final rulemaking is being issued to comply with the requirements of the Federal Oil and Gas Royalty Management Act of 1982 and a Memorandum of Understanding between the Bureau of Land Management and the Minerals Management Service.

EFFECTIVE DATE: April 26, 1984.

ADDRESS: Any inquiries or suggestions should be sent to: Director (140), Bureau of Land Management, 1800 C Street, NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Robert C. Bruce, (202) 343-8735.

SUPPLEMENTARY INFORMATION: This final rulemaking will implement the provisions of the Federal Oil and Gas Royalty Management Act ob 1982 (30 U.S.C. 1701-1757) and a Memorandum of Understanding between the Bureau of Land Management and the Minerals Management Service dealing with the question of remittances in connection with mineral leases issued by the Bureau of Land Management. Basically, the final rulemaking changes the provisions in the existing regulations requiring that all bonus and rental remittances made in connection with mineral leases be made to the Bureau of Land Management. Under this final rulemaking, normally only the initial bonus, first year's rental and all required fees will be remitted to the Bureau of Land Management, with all subsequent payments being remitted to the Minerals Management Service. The change made by the final rulemaking will permit the Minerals Management Service to better meet its responsibility of providing the highest possible return from mineral leases granted by the United States.

The change is being issued as a final rulemaking because it is an administrative change, one that imposes no new burdens on the public. Holders of mineral leases will continue to have to remit required payments, but with the amendment being made by this final rulemaking, most post-lease issuance bonus and rental remittances will be made to the Minerals Management Service, rather than to the Bureau of Land Management. The final rulemaking excepts leases on six categories of lands from the requirement that most post-lease issuance bonus and rental remittances be paid to the Service, but will continue to be paid to the Bureau. The holders of the approximately 3,000 leases covered by this exception have been notified that they will continue to make their payments to the Bureau.

The principal author of this proposed rulemaking is Robert C. Bruce, Office of Legislation and Regulatory Management, Bureau of Land Management, assisted by the staff of the Deputy Director for Energy and Mineral Resources, Bureau of Land Management.

It is hereby determined that this rulemaking does not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and will not have a significant economic impact on a substantial number of small

entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

The changes made by this final rulemaking will impact equally on all entities, large or small. The impact will be insignificant since it only requires a change in the agency within the Department of the Interior to whom required remittances payable after lease issuance are made in connection with mineral leases issued by the Bureau of Land Management. Unless the amount of the remittances is changed under the terms of the lease or under authority granted the Secretary of the Interior, the remittances will be unchanged.

The final rulemaking contains no additional information collection requirements requiring approval of the Office of Management and Budget under 44 U.S.C. 3501 et seq.

List of Subjects

43 CFR Part 3100

Administrative practice and procedure, Environmental protection, Mineral royalties, Oil and gas reserves, Public lands—classification, Public lands—mineral resources, Surety bonds.

43 CFR Part 3200

Environmental protection, Geothermal energy, Mineral royalties, Public lands—classification, Public lands—mineral resources, Surety bonds.

43 CFR Part 3470

Coal, Mineral royalties, Mines, Public lands—mineral resources, Surety bonds.

43 CFR Part 3500

Mineral royalties, Public lands—classification, Public lands—mineral resources, Surety bonds.

Under the authority of the Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.), the Mineral Leasing Act for Acquired Lands, as amended (30 U.S.C. 351–359), the Federal Oil and Gas Royalty Management Act of 1982 (30 U.S.C. 226), the Geothermal Steam Act of 1970 (30 U.S.C. 1001–1025), the Federal Coal Leasing Amendments Act of 1976, as amended (90 Stat. 1083–1092), and the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), Groups 3100, 3200, 3400 and 3500, Subchapter C of Title 43 of the Code of Federal Regulations are amended as set forth below.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

March 20, 1984.

PART 3100—[AMENDED]

1. Section 3103.1–1 is revised to read:

§ 3103.1–1 Form of remittance.

All remittances shall be by U.S. currency, postal money order or negotiable instrument payable in U.S. currency and shall be made payable to the Department of the Interior—Bureau of Land Management or the Department of the Interior—Minerals Management Service, as appropriate. In the case of payments made to the Service, such payments may also be made by electronic funds transfer.

2. Section 3103.1–2(a) is revised to read:

§ 3103.1–2 Where submitted.

(a)(1) All filing fees for lease applications or offers or for applications for approval of an instrument of transfer and all first-year rentals and bonuses for leases issued under group 3100 of this title shall be paid to the proper BLM office. In addition, all second-year and subsequent rentals for non-producing leases covering: Coos Bay Wagon Road; Oregon and California Grant; BLM National Grasslands; National Petroleum Reserve—Alaska; the south half of the Red River, Oklahoma; or acquired Taylor Grazing Act lands shall be paid to the proper BLM office.

(2) All second-year and subsequent rentals for non-producing leases not covered by paragraph (a)(1) of this section shall be paid to the Service.

* * * * *

§ 3103.2–2 [Amended]

3. Section 3103.2–2 is amended by amending the introductory paragraph of the section by inserting after the phrase "proper BLM office" in the three places it appears and the phrase "improper BLM office", the one place it appears the phrase,"or the designated Service office, whichever is appropriate," and by removing the period at the end of the last complete sentence in the introductory paragraph and adding the phrase ", except that during the period April 1, 1984, through March 31, 1985, payments made improperly to either the Bureau or Service shall be forwarded to the appropriate agency."

§ 3103.3–2 [Amended]

4. Section 3103.3–2(c) is amended by removing the phrase "until the lease accounts on the non-participating acreage are returned to the Bureau of Land Management".

§ 3108.2–1 [Amended]

5. Section 3108.2–1 is amended by:

A. Amending paragraph (a) by inserting after the phrase "proper BLM office", where it appears, the phrase "or the designated Service office, as appropriate,"; and"

B. Amending paragraph (b) by:

(1) Amending the first sentence of the paragraph by inserting a comma after the word "bill" and after the word "officer";

(2) Amending the third sentence of the paragraph by inserting after the phrase "authorized officer" the phrase "or the designated Service office, as appropriate" and by removing the phrase "on a form approved by the Director"; and

(3) Amending the fourth sentence of the paragraph by inserting after the phrase "proper BLM office" the phrase "or the Service, as appropriate".

PART 3200—[AMENDED]

6. Section 3205.1–1 is revised to read:

§ 3205.1–1 Form of remittance.

All remittances shall be by U.S. currency, postal money order or negotiable instrument payable in U.S. currency and shall be made payable to the Department of the Interior—Bureau of Land Management or the Department of the Interior—the Minerals Management Service, as appropriate. In the case of payments made to the Service, such payments may also be made by electronic funds transfer.

7. Section 3205.1–2 is revised to read:

§ 3205.1–2 Where submitted.

(a)(1) All filing fees for lease applications or offers or for applications for approval of an instrument of transfer and all first-year rentals and bonuses for leases issued under group 3200 of this title shall be paid to the proper BLM office. In addition, all second-year and subsequent rentals and deferred bonus amounts payable after the first year for non-producing leases covering: Coos Bay Wagon Road; Oregon and California Grant; National Grasslands; the south half of the Red River, Oklahoma; or acquired Taylor Grazing Act lands shall be paid to the proper BLM office.

(2) All second-year and subsequent rentals and deferred bonus amounts payable after the initial payment for leases not covered by paragraph (a)(1) of this section shall be paid to the Service."

(b) All royalties on producing leases, communitized leases in producing well units, unitized leases in producing unit areas, leases on which compensatory royalty is payable and all royalty payments under easements for directional drilling are to be paid to the Service.

PART 3400—[AMENDED]

8. Section 3473.1–1 is revised to read:

§ 3473.1–1 Form of remittance.

All remittances shall be by U.S. currency, postal money order or negotiable instrument payable in U.S. currency and shall be made payable to the Department of the Interior—Bureau of Land Management or the Department of the Interior—Minerals Management Service, as appropriate. In the case of payments made to the Service, such payments may also be made by electronic funds transfer.

9. Section 3473.1–2 is revised to read:

§ 3473.1–2 Where submitted.

(a)(1) All first-year rentals and the first-year portions of all bonuses for leases issued under group 3400 of this title shall be paid to the Bureau of Land Management State office having jurisdiction over the lands (43 CFR Subpart 1821). In addition, all second-year and subsequent rentals and deferred bonus amounts payable after the first year for non-producing leases covering: Coos Bay Wagon Road, Oregon and California Grant; National Grasslands; the south half of the Red River, Oklahoma; or acquired Taylor Grazing Act lands shall be paid to the Bureau of Land Management State office having jurisdiction over the lands (43 CFR Subpart 1821).

(2) All second-year and subsequent rentals and deferred bonus amounts payable after the initial payment for leases not covered by paragraph (a)(1) of this section shall be paid to the Service.

(b) All royalties on producing leases, all payments under leases in their minimum production period, and all advance royalties shall be paid to the Service.

10. Section 3503.1–1 is revised to read:

§ 3503.1–1 Form of remittance.

All remittances shall be by U.S. currency, postal money order or negotiable instrument payable in U.S. currency and shall be made payable to the Department of the Interior—Bureau of Land Management or the Department of the Interior—Minerals Management Service, as appropriate. In the case of payments made to the Service, such payments may also be made by electronic funds transfer.

PART 3500—[AMENDED]

11. Section 3503.1–2 is revised to read:

§ 3503.1–2 Where submitted.

(a)(1) All first-year rentals and bonuses for leases issued under group 3500 of this title shall be paid to the proper BLM office. In addition, all second-year and subsequent rentals for non-producing leases covering: Coos Bay Wagon Road; Oregon and California Grant; National Grasslands; the south half of the Red River, Oklahoma; or acquired Taylor Grazing Act lands shall be paid to the proper BLM office.

(2) All second-year and subsequent rentals and all payments for leases not covered by paragraph (a)(1) of this section shall be paid to the Service.

(b) All royalties on producing leases and all payments under leases in their minimum production period shall be paid to the Service.

LEGAL SERVICES CORPORATION

45 CFR Parts 1612, 1618 and 1621

Instruction on Implementation of Eligible Client Grievance Procedures.

AGENCY: Legal Services Corporation.

ACTION: Withdrawal of LSC Instruction 83–10.

SUMMARY: Instruction 83–10, dealing with the establishment of grievance procedures pursuant to Section 1006(b)(2) of the Legal Services Corporation Act of 1974, as amended 1977, 45 CFR 1612.5, 45 CFR 1618, and 45 CFR 1621, was published in the **Federal Register** on Monday, December 19, 1983, at page 56058. On the basis of comments received indicating that the language of the Instruction could be interpreted as going beyond the language of the Act and Regulations, the Corporation has decided to withdraw Instruction 83–10. It may be reissued in modified form at a later date.

EFFECTIVE DATE: Instruction 83–10 is withdrawn effective March 27, 1984.

FOR FURTHER INFORMATION CONTACT: Thomas J. Opsut, Office of Compliance and Review, Legal Services Corporation, 733 Fifteenth Street, N.W., Washington, D.C. 20005, (202) 272–4331.

Dated: March 20, 1984.

Gregg Hartley,

Director, Office of Field Services.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 83–488; RM–4425]

TV Broadcast Station in Gainesville, Florida; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: Action taken herein assigns UHF Channel 61 to Gainesville, Florida, as its third TV assignment in response to a petition filed by Holt Robinson Communications Corp.

EFFECTIVE DATE: May 22, 1984.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mark N. Lipp, Mass Media Bureau, (202) 634–6530.

List of Subjects in 47 CFR Part 73

Television broadcasting.

Report and Order; Proceeding Terminated

In the matter of amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (Gainesville, Florida); MM Docket No. 83–488, RM–4425.

Adopted: March 8, 1984.

Released: March 16, 1984.

By the Chief, Policy and Rules Division:

1. The Commission herein considers the *Notice of Proposed Rule Making*, 48 FR 27563, published June 16, 1983, which invited comments on a proposal to assign UHF Television Channel 61 to Gainesville, Florida, in response to a petition filed by Holt Robinson Communications Corp. ("petitioner"). Petitioner submitted comments in support of the proposal and expressed an interest in applying for the channel, if assigned. Gainesville Television, Inc. filed opposing comments.

2. Gainesville Television, Inc., licensee of WCJB–TV (Channel 20) in Gainesville, filed comments in opposition to the proposal, stating that there was already sufficient television service provided by stations in and around Gainesville, as well as cable TV service and low power TV applications pending. The Commission has determined that questions concerning sufficiency of service should be taken up at the application stage, where the specific proposal can be analyzed.

3. We believe that the petitioner has adequately demonstrated the need for a third television assignment in

Gainesville and that the public interest would be served by assigning UHF commercial Channel 61 to that community. The channel can be assigned in compliance with the minimum distance separation requirements of § 73.610 of the Commission's Rules. However there are two applications pending for Channel 53 at High Springs, Florida, which specify transmitter locations short spaced to the present Gainesville allocation. These applicants would need to specify another site in order to avoid the spacing problem.

4. Accordingly, pursuant to the authority contained in Sections 4(i), 5(c)(1), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is ordered, that effective May 22, 1984, the TV Table of Assignments, § 73.606(b) of the Rules, is amended, with respect to the following community:

City	Channel No.
Gainesville, Florida	*5–, 20, 61+

5. It is further ordered, that this proceeding is terminated.

6. For further information contact Mark N. Lipp, Mass Media Bureau, (202) 634–6530.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

47 CFR Part 73

[MM Docket No. 83–489; RM–4416; RM–4486]

TV Broadcast Stations in Katy and Pasadena, Texas; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action assigns Channel 51 to Katy, Texas, as its first UHF television channel in response to a petition filed by the Enigma Corporation. A counterproposal submitted by Dr. Samuel Levantino to assign Channel 51 to Pasadena, Texas, has been withdrawn.

EFFECTIVE DATE: May 22, 1984.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Arthur D. Scrutchins, Mass Media Bureau, (202) 634–6530.

List of Subjects in 47 CFR Part 73

Television broadcasting.

Report and Order; Proceeding Terminated

In the matter of amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations, (Katy and Pasadena,[1] Texas); MM Docket No. 83–489, RM–4416, RM–4486.

Adopted: March 8, 1984.
Released: March 16, 1984.

By the Chief, Policy and Rules Division:

1. The Commission has before it the *Notice of Proposed Rule Making*, published in the **Federal Register** on June 27, 1983 (48 FR 29552), proposing the assignment of UHF television Channel 51 to Katy, Texas, in response to a petition by the Enigma Corporation ("Enigma").

2. Comments were filed by Enigma, reiterating its continued intention to apply for a construction permit for Channel 51 if the channel is assigned to Katy, and the Association of Maximum Service Telecasters, Inc. ("AMST").[2] Supporting comments were filed by Dr. Samuel R. Levatino.[3]

3. After consideration of the proposal, the Commission is persuaded that the public interest would be served by assigning Channel 51 to Katy, Texas, as its first television channel assignment. A site restriction of 3.6 miles south is required to avoid short spacing to a construction permit for Station KLMG–TV on Channel 51 in Longview, Texas.

4. Accordingly, pursuant to the authority contained in sections 4(i), 5(c)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.238 of the Commission's Rules, it is ordered, That effective May 22, 1984, the Television Table of Assignments, § 73.606(b) of the Commission's Rules, is amended with respect to the community listed below:

City	Channel No.
Katy, Texas	51+

5. It is further ordered, that this proceeding is terminated.

[1] This community has been added to the caption.

[2] AMST's comments were directed to the Pasadena proposal (see fn. 3, *infra*).

[3] Originally, Dr. Levantino filed a counterproposal to assign Channel 51 to Pasadena, Texas. However, on January 9, 1984, Dr. Levantino withdrew the Pasadena petition in support of the Katy proposal. Thus we have given no further consideration to the Pasadena proposal.

6. For further information concerning this proceeding, contact Arthur D. Scrutchins, Mass Media Bureau, (202) 634–6530.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

47 CFR Part 73

[MM Docket No. 83–97; RM–4235; RM–4428]

FM Broadcast Stations in Pullman, Washington and Moscow, Idaho; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action assigns Class C Channel 258 to Pullman, Washington, in response to a petition filed by P–N–P Broadcasting. The assignment could provide a second FM service to Pullman.

EFFECTIVE DATE: May 22, 1984.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau, (202) 634–6530.

List of Subjects in 47 CFR 73

Radio broadcasting.

First Report and Order

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (*Pullman, Washington* and Moscow, Idaho[1])

MM Docket No. 83–97, RM–4235, RM–4428.

Adopted: March 8, 1984.
Released: March 16, 1984.

By the Chief, Policy and Rules Division:

1. Before the Commission is the *Notice of Proposed Rule Making*, 48 FR 8503, published March 1, 1983, proposing the assignment of Channel 258 to Pullman, Washington, as its second FM assignment. The *Notice* was issued in response to a petition filed by P–N–P Broadcasting ("petitioner"). Petitioner filed comments, restating its intent to apply for the channel, if assigned. A counterproposal was filed by KRPL, Inc.[2] proposing instead the substitution

[1] This community has been added to the caption.

[2] KRPL, Inc. is the licensee of Station KRPL–FM, Moscow, Idaho.

of Channel 258 for Channel 280A at Moscow, Idaho, to which the petitioner responded.

2. A staff study indicates that Channel 291 can be assigned to Moscow, Idaho. Thus, we are issuing a *Further Notice of Proposed Rule Making* seeking comments on the proposed substitution of channels at Moscow. In so doing, we have not considered the comments of KRPL, Inc. comparing the need for the assignment of Channel 258 to Moscow instead of to Pullman.

3. After consideration of P–N–P's proposal, the Commission is satisfied that the public interest would be served by a second FM assignment at Pullman. We shall, therefore, assign Channel 258 to Pullman, Washington. As stated in the *Notice*, the transmitter site is restricted to 3.7 miles south of the city to avoid short spacing to FM Stations KSEM, Moses Lake, Washington, and KICN, Spokane, Washington.

4. Canadian concurrence has been obtained in the assignment of Channel 258 to Pullman, Washington.

5. In view of the foregoing and pursuant to the authority contained in §§ 4(i), 5(c)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is ordered, That effective May 22, 1984, the FM Table of Assignments (§ 73.202(b) of the Rules) is amended with regard to the following community:

City	Channel No.
Pullman, Washington	[illegible], and 285A.

6. For further information, contact Montrose H. Tyree, Mass Media Bureau, (202) 634–6530.

(Secs. 4, 305, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

BILLING CODE 6712–01–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 663

[Docket No. 40228–19]

Pacific Coast Groundfish Fishery

AGENCY: National Marine Fisheries Service; NMFS, NOAA, Commerce.

ACTION: Final rule.

SUMMARY: NOAA issues this final rule to amend the rules implementing the Fishery Management Plan for the Pacific Coast Groundfish Fishery (FMP), published on October 5, 1982 (47 FR 43964). Two measures in § 663.26, Gear Restrictions are clarified so that the mesh size of a trawl codend will be measured in the last 50 meshes of the net, and that a roller or bobbin trawl must have at least two 14-inch rollers or bobbins equally spaced on each side within 10 feet of the center of the footrope. This final rule clarifies and eliminates misinterpretations of the groundfish regulations.

EFFECTIVE DATE: 0001 hours, PDT, on April 25, 1984.

FOR FURTHER INFORMATION CONTACT: T. E. (Gene) Kruse at 206–527–6160 or Floyd S. Anders, Jr. at 213–548–2526.

SUPPLEMENTARY INFORMATION: This final rule clarifies two portions of the existing regulations which govern fishing for groundfish along the Pacific coast. The two portions, § 663.26 (b)(2) and (b)(7), have caused confusion and compliance has been jeopardized. The first change makes it clear that mesh measurements to determine compliance with minimum requirements are to be taken in the last 50 meshes of the codend. The second change clarifies that rollers or bobbins used on the footrope of a trawl net must be 14 inches in diameter, free to rotate, and spaced so that at least two are on each side within ten feet of the center.

This rule was published as a proposed rule on October 31, 1983 (48 FR 50129), with a 45-day comment period, which ended December 15, 1983. Since the notice of the proposed rule was published, the exact dimensions of the stainless steel wedge used to make these measurements have been added to this rule. The genesis of the issues and the basis for the corrective measures were discussed at length in the proposed rule and are not repeated here. No comments were received on the proposed rule. These changes also were the subject of public discussion and comment at meetings of the Pacific Fishery Management Council during the summer of 1983.

Classification

The Regional Director determined that this rule is necessary for the conservation and management of the Pacific coast groundfish fishery and that it is consistent with the Magnuson Fishery Conservation and Management Act and other applicable law.

The Council prepared an environmental impact statement (EIS) for this FMP; a notice of availability was published on November 30, 1979 (44 FR 69005). There will be no change in environmental impact from that determined in the EIS as a result of this rule.

The NOAA Administrator determined that this rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291.

This rule has been certified as "nonsignificant" under the Regulatory Flexibility Act. It makes a minor technical adjustment to clarify the regulations; it will have no economic effect and will create no extra paperwork or reporting burdens.

This rule does not contain a collection-of-information requirement for purposes of the Paperwork Reduction Act. (16 U.S.C. 1801 *et seq.*)

List of Subjects in 50 CFR Part 663

Administrative practice and procedures, Fish, Fisheries, Fishing.

Dated: March 22, 1984.

Carmen J. Blondin,

Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

PART 663—[AMENDED]

For the reasons set out in the preamble, 50 CFR Part 663 is amended as follows:

1. The authority citation for Part 663 is as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 663.26 paragraphs (b)(2) and (b)(7) are revised to read as follows:

§ 663.26 Gear restrictions.

* * * * *

(b) * * *

* * * * *

(2) *Mesh size.* Trawl nets may be used if they meet the minimum sizes set forth below. The minimum sizes apply to the last fifty meshes running the length of the net to the terminal (closed) end of the codend. Minimum trawl mesh size requirements are met if a 20-gauge stainless steel wedge, 3.0 or 4.5 inches (depending on the gear being measured) less one thickness of the metal at the widest part, can be passed with thumb pressure only through 16 of 20 sets of two meshes each of wet mesh in the codend.

* * * * *

(7) *Roller trawl or bobbin trawl.* In the Eureka, Columbia, and Vancouver Subareas, if trawl mesh size less than 4.5 inches is used, rollers or bobbins must be at least 14 inches in diameter and free to rotate, with at least 2 rollers or bobbins equally spaced on each side

of the footrope within 10 feet of the center of the footrope of the net.

50 CFR Part 671

[Docket No. 31230-254]

Tanner Crab off Alaska; Closure of Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Rule-related notice; closure.

SUMMARY: The Director, Alaska Region, NMFS (Regional Director), has determined that the optimum harvest level of Tanner crab in the North Mainland Section of the Kodiak District in Registration Area J will be achieved on March 23, 1984, and that early closure of the fishery is necessary to protect Tanner crab stocks. The Secretary of Commerce therefore issues this notice closing the North Mainland Section to fishing for Tanner crab by vessels of the United States on that date. The previously scheduled closing date is April 30, 1984.

DATE: This notice is effective 12:00 noon, Alaska Standard Time (AST), March 23, 1984. It was filed for public inspection with the Office of the Federal Register on March 26, 1984. Public comments on this notice of closure are invited until April 9, 1984.

ADDRESSES: Comments should be sent to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, AK 99802. During the 15-day comment period, the data upon which this notice is based will be available for public inspection during business hours (8:00 a.m. to 4:30 p.m. AST weekdays) at (1) the NMFS Kodiak Field Office, ADF&G Building, Kashevaroff and Mission Roads, Kodiak, Alaska, and (2) the NMFS Alaska Regional Office, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska.

FOR FURTHER INFORMATION CONTACT:

Raymond E. Baglin (NMFS Fishery Management Biologist), 907-486-4791.

SUPPLEMENTARY INFORMATION:

Background

The Fishery Management Plan for the Commercial Tanner Crab Fishery off the Coast of Alaska (FMP), which governs this fishery in the fishery conservation zone under the Magnuson Fishery Conservation and Management Act, Provides for inseason adjustments by field order of season and area openings and closures. Implementing rules at 50 CFR 671.27(b) specify that these orders will be issued by the Secretary of Commerce under criteria set out in that section.

Section 671.26(f) establishes six districts within Registration Area J in order to prevent overfishing of individual Tanner crab stocks by allowing closure or partial closure of a particular district when the desired harvest level is reached. The Kodiak District is further subdivided into eight sections. The Alaska Board of Fisheries has set the desired 1984 harvest level for the North Mainland Section at 1.25 million pounds, based on pot index surveys conducted by the Alaska Department of Fish and Game (ADF&G) in 1983.

The 1984 fishing season for this section began on February 10. Approximately 15 vessels have delivered about 1.2 million pounds through March 18. The catch rate has declined rapidly from about 45 to about 25 crabs per pot. This rapid decline indicates that stocks are insufficient to support this fishery through the scheduled April 30 closure date. The optimum harvest level of 1.25 million pounds is expected to be reached on March 23.

In light of this information, the Regional Director, in accordance with § 671.27(b), has determined that: (1) The actual condition of Tanner crab stocks in the North Mainland Section is substantially different from the condition anticipated at the beginning of the fishing year; and (2) this difference reasonably supports the need to protect those Tanner crab stocks by closing the North Mainland Section of the Kodiak District, as described in § 671.26(f)(l)(i). This section is therefore closed to all fishing for Tanner crab from 12:00 noon, AST, March 23, 1984, until 12:00 noon ADT, April 30, 1984, at which time the closure of this area prescribed in § 671.26(f)(2)(i) will begin.

This closure will become effective after this notice is filed for public inspection with the Office of the Federal Register and the closure is publicized for 48 hours through ADF&G procedures, under § 671.27(a)(2). Public comments on this notice of closure may be submitted to the Regional Director at the address stated above. If comments are received, the necessity of this closure will be reconsidered and a subsequent notice will be published in the **Federal Register**, either confirming this field order's continued effect, modifying it, or rescinding it.

Other Matters

Tanner crab stocks in the North Mainland Section will be subject to damage by overfishing unless this order takes effect promptly. The Agency therefore finds for good cause that advance notice and public comment on this order are contrary to the public interest, and that no delay should occur in its effective date.

This action is taken under the authority of regulations specified at 50 CFR 671.27, and complies with Executive Order 12291. It is not subject to the requirements of the Regulatory Flexibility Act. It does not contain any collection of information request, as defined in the Paperwork Reduction Act.

Proposed Rules

Federal Register
Vol. 49, No. 60
Tuesday, March 27, 1984

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FEDERAL RESERVE SYSTEM

12 CFR Part 217

[Docket No. R-0514]

Interest on Deposits; Advertising; Regulation Q

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Proposed rulemaking.

SUMMARY: The Board is proposing to amend Regulation Q—Interest on Deposits to incorporate its Policy Statement of March 22, 1984, concerning advertising of split rate time deposits and Individual Retirement Account ("IRA") deposits and to clarify permissible advertising methods in view of the removal of federal deposit interest rate limitations. The Board is also requesting comments on other advertising and disclosure issues that may warrant consideration under Regulation Q.

DATES: Comments must be received by May 22, 1984.

ADDRESS: Interested parties are invited to submit written data, views, or arguments concerning the proposal to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue, N.W., Washington, D.C. 20551, or such comments may be delivered to room B–2223 between 8:45 a.m. and 5:15 p.m. Comments may be inspected in room B–1122 between 8:45 a.m. and 5:15 p.m., except as provided in section 261.6(a) of the Board's Rules Regarding Availability of Information (12 CFR 261.6(a)).

FOR FURTHER INFORMATION CONTACT: Gilbert T. Schwartz, Associate General Counsel (202/452–3625); Paul S. Pilecki, Senior Counsel (202/452–3281); or Elaine M. Boutilier, Attorney (202/452–2418), Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: The Board is authorized under Section 19(j) of the Federal Reserve Act (12 U.S.C. 371b) to prescribe rules governing the advertisement of interest on time and savings deposits by member banks. The current regulation is codified in Regulation Q at 12 CFR 217.6—Advertising of Interest on Deposits. The Board believes that revisions to this regulation may be warranted in view of the deregulation of interest rate ceilings resulting from actions of the Depository Institutions Deregulation Committee ("DIDC") pursuant to the Depository Institutions Deregulation Act of 1980 (Title II of Pub. L. 96–221).

The DIDC has substantially deregulated the limitations on interest rate ceilings that previously existed. In this deregulated environment, depository institutions have greater freedom in structuring time and savings deposits. This freedom has led to a vast diversity in terms and conditions on deposit accounts, making it more difficult for the consumer to compare accounts. Consequently, the issue of whether customers are receiving meaningful information in advertisements for deposit accounts has become more important.

In recognition of this increased importance of advertising, on March 22, 1984, the Board adopted a Policy Statement concerning the advertising of split rate accounts, in particular, the potentially misleading advertising practices for deposits used as investments for IRAs. The Board anticipates that similar actions will be taken by the Comptroller of the Currency, the Federal Home Loan Bank Board, and the Federal Deposit Insurance Corporation. In summary, the Policy Statement provides that the Board believes that advertisements that state in large type an initial rate that is effective for a period of a few months and then state in smaller type a lower rate that will be effective for the remaining term of the deposit can be misleading to consumers. Such advertisements should state both rates in equal type in order not to be regarded as misleading. In addition, advertisements for deposits to be used in connection with IRS should not refer to contributions to such accounts as "tax-free," "tax-exempt" or other similar terms. This action was taken to assure that depository institutions provide meaningful and accurate information and to assist consumers to make comparisons of deposit interest rates being offered.

The Board proposes that the principles set forth in its March 22, 1984 Policy Statement be incorporated into Regulation Q, as an amendment to 12 CFR 217.6. The Board is requesting comments on the proposed amendment, and also is interested in any alternative proposals that would achieve the goals of the Policy Statement. In addition, the Board requests comments regarding other advertising and disclosure issues arising from the deregulation of interest rate ceilings, and whether existing provisions of Regulation Q should be modified to reflect the removal of interest rate ceilings. Currently, the regulation establishes a framework of deposit advertising rules aimed at full disclosure of the material elements of deposit instruments. As a general matter, Regulation Q prohibits any advertisements or solicitations relating to interest paid on deposits that are inaccurate, misleading, or misrepresentative of deposit contracts (12 CFR 217.6(g)). Other provisions of the regulation require that specific types of information appear in advertisements:

(a) Interest rates must be stated in terms of the annual rate of simple interest, and advertisements that display an effective annual yield based on compounding must state the annual rate of simple interest and the basis of compounding (12 CFR 217.6 (a) and (b));

(b) No interest rate can be advertised that states a yield based on a period of more than one year in order to ensure that effective yields are not artificially inflated (12 CFR 217.6(c));

(c) If an advertised rate is payable only on a deposit that meets a specific time or amount requirement, such requirements must be stated clearly and conspicuously (12 CFR 217.6(d));

(d) Advertisements for time deposits must state that interest penalties apply in the event of early withdrawal (12 CFR 217.6(e));

(e) Member banks are required to inform customers at the time that an account is opened as to the method that will be used in computing and paying interest on the account, including any provisions for nonpayment of interest (12 CFR 217.148).

The Federal Deposit Insurance Corporation and the Federal Home Loan Bank Board have virtually identical rules for institutions subject to their respective jurisdictions.

The Board is interested in receiving comments on existing advertising and disclosure practices that may be harmful

to individuals. In addition, the Board is interested in comments or changes that could be made to the existing advertising provisions to reflect the removal of interest rate ceilings on deposits. Such comments could, for example, discuss the proper method of advertising floating or variable interest rates, or requiring that rates for deposits be stated in terms of the average effective annual yield rather than requiring that the simple rate be used.

Regulatory Flexibility Anaylsis

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires the Board to consider the impact of this proposal on small entities. In this regard, it is the Board's view that the proposal would not impose any additional reporting or recordkeeping requirements. The purpose of this proposal is to request comment on any alternatives that the public believes may be preferable to the Board's March 22, 1984 Policy Statement. Suggested alternatives will be considered when comments are analyzed. The proposed rule would apply only to commercial banks which are members of the Federal Reserve System. It is not anticipated that the proposal will have a negative impact on the ability of small depository institutions to attract deposits, and the proposal should benefit consumers in their efforts to obtain the most favorable deposit terms.

List of Subjects in 12 CFR Part 217

Advertising, Banks, banking, Federal Reserve System, Foreign banking.

PART 217—[AMENDED]

Pursuant to its authority under section 19(j) of the Federal Reserve Act (12 U.S.C. 371b) the Board proposes to amend § 217.6 of Regulation Q (12 CFR Part 217) by revising paragraph (a), and by redesignating paragraph (g) as paragraph (g)(1) and adding a new paragraph (g)(2) as follows:

§ 217.6 Advertising of interest on deposits.

* * * * *

(a) *Rate of interest.* (1) Interest rates shall be stated in terms of the annual rate of simple interest. In no case shall a rate be advertised that is in excess of the rate being paid on the deposit.

(2)(i) Advertisements for time deposits where more than one rate is paid must state each rate to be paid on the account in type of equal size together with a conspicuous statement as to the length of time for which each rate is effective and a conspicuous statement of the average effective annual yield for the deposit which assumes compounding of interest at least annually. This applies to accounts where

(A) it is known in advance what the rates to be paid throughout the life of the account will be and,

(B) the initial rate to be paid is higher than subsequent rates.

(ii) For accounts subject to a variable interest rate that is detemined by an index, the initial interest rate may be advertised; however, the advertisement must also include a conspicuous statement as to (A) the time period for which such rate applies, and (B) the method by which the rate will be determined for future periods and the time period for which such rate will apply.

(iii) For accounts that offer an initial fixed rate to be followed by a variable rate determined by an index during the remainder of the term of the account, the method of determining the variable rate shall be stated in type of the same size as the fixed rate. In addition, the time periods for which the initial fixed rate and subsequent rates apply must be conspicuously stated.

* * * * *

(g) *Accuracy of advertising.* (1) * * *

(2) It is misleading and inaccurate for advertisements to refer to an Individual Retirement Account ("IRA") as a "tax-free," "tax exempt" (or other similar language) investment. Contributions to, and earnings on, IRAs are deferred from federal income taxes rather than exempt from taxes.

* * * * *

By order of the Board of Governors of the Federal Reserve System, March 22, 1984.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

CIVIL AERONAUTICS BOARD

14 CFR Part 255

[Economic Reg. Docket: 41686; EDR-471]

Carrier-Owned Computer Reservations Systems

AGENCY: Civil Aeronautics Board.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: In conjunction with a separate notice of proposed rulemaking on carrier owned computer reservations systems being issued simultaneously, EDR-466C, the Board is requesting comments on the need for rules specifying the way in which connecting flights are selected and arranged for display on computer terminals. We also solicit comments on the feasibility of various requirements for objective flight displays and on their effectiveness in meeting consumer needs.

DATE: Comments by: April 26, 1984.

Reply comments by: May 11, 1984.

ADDRESSES: Twenty copies of comments should be sent to Docket 41686, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple copies. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. as soon as they are received.

FOR FURTHER INFORMATION CONTACT: Robert D. Young (202) 673-6060, Samuel E. Whitehorn (202) 673-5450, Paul Samuel Smith (202) 673-5450, Barry L. Molar (202) 673-5205 or George S. Baranko (202) 673-6011, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428.

SUPPLEMENTARY INFORMATION: In EDR-466C, being issued concurrently, we are proposing comprehensive rules to regulate air carrier operation of Computer Reservations Systems (CRS's) that travel agents use to get information about carrier services, make reservations and issue tickets. The proposed rules would prohibit display bias, i.e., giving preference to the flights of certain carriers, in CRS displays, and would regulate pricing of CRS services to user carriers, other aspects of the CRS owner/user carrier relationship, aspects of the CRS owner/travel agent relationship, and use of booking and sales data generated by CRS's.

As discussd in detail in EDR-466C however, we are concerned about the effectiveness of our proposed rule on connecting flight bias. This proposed connecting flight bias rule would prohibit consideration of a carrier identity in selecting connecting points and also in the selection of connecting flights over those points. The nature of the construction of connecting flights,—the selection of connecting points followed by the editing of flights, may make a prohibition on bias easy to evade. In addition, with direct flights, bias usually just places a flight farther from the first line of the first screen. In the case of connecting flights, bias may cause flights not to be displayed at all.

One way to avoid this risk would be to specify the standards that CRS carriers must employ in constructing connecting flights displays. As discussed in EDR-466, we are generally reluctant to intervene in the CRS industry to such a degree and to impose

our judgment as to what is the proper level of service quality. This would be inconsistent with the policy of placing maximum reliance on competition, unless it were shown to be necessary to correct abuses in the market.

In addition, before adopting a specific display requirement, we would have to satisfy ourselves that the requirement in fact reflected consumers' preferences in choosing among connecting flights. Moreover, we would have to consider the cost to carriers of implementing any Board requirement. Such costs would inevitably be passed on to consumers. If they were high enough, the Board's requirement could result in a net reduction in consumer welfare.

Thus there are a number of questions to be answered before we can propose any affirmative connecting flight display requirements. We are issuing this advance notice of proposed rulemaking to solicit information and comments to assist us in answering these questions.

The Need for Specific Standards

The threshold question of course is whether Board-imposed, affirmative standards are required to ensure that connecting flights are not selected for display on the basis of competitive considerations and to ensure that consumers will in fact have the opportunity to learn about flights that best serve their needs. Especially with the appearance of new hubs used by one or two carriers, the danger that CRS vendors can avoid listing competitors' flights even with objective standards may be very real, and we are anxious to explore this possibility further.

If this danger is indeed substantial, we request comment on whether it could be alleviated by adding what might be considered less intrusive requirements, such as a requirement that systems use a minimum number of connecting points or that they include additional connecting flights that do not meet the CRS's objective requirements for a fee. The OAG currently "sells" additional connecting flights. What threshold minimum number of connecting points is sufficient to reduce the risk that objective criteria can still be used to block the display of competitors' flights?

Consumer Preferences

If simple prohibitions on bias are not sufficient to correct abuses, it may be necessary to select objective criteria that best serve consumer interests in selecting flights. There are a number of factors which may be of primary importance, such as departure time, arrival time, elapsed time or waiting time at the connecting point. Some consumers may give primary weight to on-line connections over interline connections while others may be indifferent. Some consumers may prefer large aircraft over small aircraft enough that type of equipment is more important than other considerations. Before proposing any specific standards, we need to determine whether any consideration so predominates as to justify its use as an industry standard. If no single factor predominates but two or three appear to be substantially more important, would a combination of standards be more appropriate?

Feasibility

Assuming that we can identify predominant consumer concerns, we must also determine the feasibility of programming CFS's to display flights in a mannner that accounts for the above.

If time considerations alone are used, CRS's could conceivably have to search flights over all possible connecting points in selecting flights for display. What would be the cost of processing individual flight requests? Would the search introduce substantial delay in the processing of those requests? Would non-time standards such as on-line versus interline or large versus small aircraft require similar universal searches of all possible connecting points? Is it possible to construct a program based on multiple criteria? What would be the cost of such a program?

Most systems use a two-step process to build connecting flights today. Connecting points are first selected using a variety of criteria that may include circuity, frequency of service between the connecting point and each end point, size of the city-pair market in question, or historic traffic flows. Once this selection is made, the service related criteria outlined above—like time, on-line/interline, or equipment type—are used to select the particular flights to be displayed over each connecting point. This prescreening of hubs may alleviate the potential expense and delay of a "pure" service standard, i.e. one that requires comparison of flights over all possible connecting points.

Before we would include prescreening of connecting points in a connecting display stanadard, we must consider a number of issues. How clearly would displays where hubs were prescreened resemble displays under a "pure" service standard? Put another way, how often would the results for the first 5 to 10 connecting flights be the same? Is there a particular prescreening criterion that produces markedly superior results? If the results are close, would the added costs of eliminating the gap by imposing a pure service standard be justified. Is there some way to enhance prescreening standards to close the gap between prescreened and "pure" service displays as requiring a minimum number of connecting points or requiring that the CFSs owner sell additional connecting points? What thereshold minimum number would make a material difference and what would be the cost of such requirement?

Comments by interested parties will assist us greatly in resolving these issues. Of even greater assistance would be any hard information such as any studies or surveys or evaluations by appropriate personnel, that already exists or that might be prepared without extraordinary expense in the period allowed for comments. Once we have evaluated comments and information, we will decide whether uniform standards for connecting flight displays are required.

(Secs. 102, 204, 404, 411, 419, 1102 of Pub. L. 85–726, as amended, 72 Stat. 740, 743, 760, 797, 92 Stat. 1732, 49 U.S.C. 1302, 1324, 1374, 1381, 1389, 1502)

Accordingly, the Civil Aeronautic Board requests comments and information on the issues outlined above.

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320–01–M

---

14 CFR Part 255

[Economic Reg. Docket 41686; EDR–466C]

Carrier-Owned Computer Reservations Systems

AGENCY: Civil Aeronautics Board.

ACTION: Notice of proposed rulemaking.

SUMMARY: The CAB proposes to adopt rules that would deal with competitive abuses and consumer injury resulting from practices of those airlines that provide computer reservations services to other air carriers and travel agents. The Board is proposing rules that would prohibit specific practices, including discrimination in price and other terms of access to information distribution services; tying of access to information distribution services to the purchase of other services or goods; ordering the display of information in computer reservations systems on the basis of carrier identity; including provisions in agreements with travel agents that impede agent access to objective service information; and that would require the

dissemination of certain computer-generated information.

DATES: Comments by: April 26, 1984.

Reply comments by: May 11, 1984.

Comments received after this date will be considered by the Board only to the extent practicable.

ADDRESSES: Twenty copies of comments should be sent to Docket 41686, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple copies. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. as soon as they are received.

FOR FURTHER INFORMATION CONTACT: Robert D. Young (202) 673–6060, Samuel E. Whitehorn (202) 673–5450, Paul Samuel Smith (202) 673–5450, Barry L. Molar (202) 673–5205 or George S. Baranko (202) 673–6011, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428.

SUPPLEMENTARY INFORMATION: This proceeding is an outgrowth of a Congressional request in the Conference Report accompanying Pub. L. 97–369 the Board's 1983 appropriations Act, that the Board investigate the competitive and consumer ramifications of computer reservations systems (CRS's) used by travel agents in marketing air transportation services. In response to this request, the board opened a docket for comments (Docket 41207) and conducted informal interviews with numerous carriers. The Board, in consultation with the Department of Justice, submitted its *Report to Congress on Airline Computer Reservations Systems* (*Report*) on June 1, 1983.

On March 16, 1983, while the Board was preparing the *Report*, the Association of Retail Travel Agents, Ltd. (ARTA) filed petition for rulemaking asking the Board to adopt rules declaring certain avoidable forms of bias in automated reservations systems unlawful. (Docket 41369). After the issuance of the *Report*, two additional petitions were filed. On August 2, 1983, Air Cal, Muse Air, Capitol International Airways, Inc., Midway Airlines, Inc., Ozark Airlines, Inc., Pacific Southwest Airlines, Air Florida, Inc., Jet America Airlines, Inc., Northeastern International Airways, Inc., Pacific Express and Pan American World Airways, Inc. (the Joint Carriers) jointly filed a petition requesting that the Board adopt rules determining criteria for the marketing and operation of CRS's. (Docket 41621). On August 5, 1983 Continental Air Lines, Inc., filed a petition which asked the Board to institute a proceeding to adopt rules to eliminate unfair and deceptive bias and discrimination in the CRS industry. (Docket 41628).

In EDR–466, 48 FR 41171, September 14, 1983 we consolidated the various petitions into a single docket (Docket 41686) and issued an advance notice of proposed rulemaking, which requested comments on the need for rules governing the marketing of CRS services. We indicated that the information then available justified serious concern about the potential for practices in the CRS industry to inhibit competition and injure consumers. If the distribution system or a critical part of it is controlled by a few airlines, and their competitors cannot easily circumvent that system or provide their own system, their ability to compete will be greatly diminished and the premises underlying deregulation will be undercut.

Concluding that CFR access is critical to airlines and consumers, and that a handful of air carriers control those systems now and probably will continue to control them for a long time to come, we requested comments on rules to limit competitive and consumer abuses in three problem areas. First, we suggested that rules to curb display bias might be necessary. Bias is the result of CRS owners' programming their systems to give preference to their own flight information, or that of preferred carriers, in the selection of services displayed on the CRS screen. Second, we suggested that rules to eliminate unfair or discriminatory charges for distributing other air carrier's information through a CRS might be necessary. We were also concerned that CRS carriers might be requiring other carriers to sign agreements for the purchase of unrelated goods or services as a precondition to distributing other carriers' information. Finally we were concerned that the information on travel agent sales to which CRS airlines have access gives them a potentially unfair advantage over their airline competitors.

Comments on the advanced notice of proposed rulemaking were received on November 17, 1983. Generally, the comments fell into four categories. The comments of United Air Lines, Inc., the American Automobile Association, Inc., the Travel Agents' Computer Society and Travel Trust International expressed the view that Board action in this area was unnecessary and unwarranted. Eastern Air Lines, Inc. only commented that any rules the Board might adopt should not be applied to its CRS. While American Airlines, Inc. questioned the need for regulatory intervention, it indicated it would accede to, and in fact proposed, limited rules on CRS practices. The second category of commenters favoring rules included ARTA, Continental Airlines, Delta Air Lines, Inc., the Department of Justice, Frontier Airlines, Inc., Golden Pacific Airlines, the Joint Carriers, Muse Air Corp./Air Cal/Jet America Airlines, Inc. (the Muse Group), Pan American World Airways, Inc., Trans World Airlines, Inc. and Western Airlines, Inc. In their comments, Omega World Travel, Inc., Republic Airlines, Inc., and Tymshare, Inc. argued that the various rulemaking proposals were inadequate to correct the competitive and consumer harm they believed results from air carrier ownership of CRS's. These parties asked us to begin procedures that would produce strutural changes in the CRS industry. Specifically, they seek a proceeding that would consider the need to divest CRS owning carriers of their CRS's or to isolate CRS operations in separate corporate subsidiaries. Of the various commenters, the Bureaus of Competition, Consumer Protection and Economics of the Federal Trade Commission were alone in taking no position. Their comments were filed for the purpose of explaining the FTC's standards for adopting rules predicated on findings of consumer injury.

Reply comments were filed on December 16, 1983 by American, ARTA, the American Society of Travel Agents (ASTA), Continental (we will grant its motion to file late), Delta, DOJ, Eastern, Frontier (we will grant its motion to file an unauthorized document), the Joint Carriers, Midway Airlines, Inc., the Muse group, Nothwest Airlines, Inc., Pan Am, the Regional Airline Association, Republic, TACOS, TWA, Tymshare (we will grant its motion to file late), United, USAir, Inc., Western, and World Airways, Inc.

Simultaneously with our request for comments on EDR–466, we issued Order 83–8–105, August 26, 1983 which directed certain air carriers that operate computer reservations systems used by travel agents to provide specific information concering those systems. (Docket 41663). We indicated that the information might be used in this proceeding or in a future enforcement proceeding under section 411. United and American filed pleadings requesting that we reconsider our order and that it be vacated. These petitions were denied by Order 83–10–74. In that same order we deferred action on United's request for an adjudicatory hearing. (Docket 41735), which has been consolidated into this proceeding.

The information has now been filed. By Orders 83–12–136, 84–1–41 and 84–2–85, we made that information accessible to interested persons for use in formulating their positions in this

proceeding, subject to carefully articulated procedures for maintaining the confidentiality of documents where such treatment was justified.[1]

On the basis of the information we have received in Docket 41663 and comments and reply comments to EDR–466, we have decided to adopt general rules that would forbid air carriers owning computer reservations systems from using those systems to affect air transportation competition adversely and to cause consumer injury. We find that rules dealing with unjust discrimination in the terms of contracts with other carriers are necessary. We are also proposing rules that would prohibit the ordering of information in integrated displays on the basis of carrier identity. Under those rules, CRS vendors would be required to inform participating airlines of the criteria used in selecting connecting cities and ranking flights. We are futher proposing rules that would forbid subscriber contract terms that would impede travel agent access to other information sources. Finally, we are proposing rules requiring CFR carriers to disseminate to participating airlines information generated by CRS's.

I. Overview

It has been just eight years since United and American decided to market to travel agents computers that would provide them with information on flights and fares offered by carriers, and whether seats were available. Those carriers admit that they were willing to provide such services at a substantial loss in order to gain agent acceptance. Moreover they acknowledge that they were willing to include competing carriers' information in their systems, without charge to other carriers in order to make their systems more attractive.

CRS's have become virtually essential for information management. On top of the tremendous amount of information to be managed already, in 1978, airline deregulation multiplied the number of flight and fare offerings available in the marketplace several times. Moreover, deregulation has allowed carriers to change their flight and service offerings almost at will, which has created the need for information sources that are updated far more quickly than those in place prior to 1978. It is not surprising, therefore, that 90 percent of travel agent sales are through CRS systems. They provide a highly efficient information source, in addition to keeping track of passenger reservations and printing tickets.

With travel agents' increasing reliance on computers as an information source, it has become more important for air carriers to have their information displayed on the various computer systems. Travel agents are the primary distributors of air transportation. Moreover, their importance as a distributor is increasing. At the present time over 60 percent of all air transportation sales in the United States are made by agents.

This fact has not gone unnoticed by CRS vendors. In the last three years they have begun to charge their competitors for the display of information through their systems. CRS vendors' tendency to charge and their competitors' willingness to pay for information display highlights the importance of CRS's in the current air transportation distribution industry. Insofar as agents are the primary distribution mechanism, and CRS's are their information source, if a carrier's information does not appear in the computer display, that carrier will be at a significant disadvantage vis-a-vis its competitors. The agent will not know of its services and will not offer them to the public as a travel option.

The information distribution function of computer reservations systems constitutes, in essence, the vertical integration of CRS vendors into air transportation distribution. CRS's are the information source for the prevalent distribution method. Distribution is one level removed from air transportation competition and the level at which consumers actually purchase air transportation services. With vertical integration, if vendors have market power at the distribution level, they can use it to harm competition at the transportation level.

In this proceeding we are examining the CRS industry to assess its competitive and consumer impact on air transportation services. We have been entrusted with the responsibility for ensuring a competitive air transportation industry, and if CRS vendor practices are having an adverse effect on competition and consumers at that level, we believe we have the authority to redress such problems. Specifically, section 411 of the Federal Aviation Act (49 U.S.C. 1381) permits us to determine whether any air carrier has engaged in unfair or deceptive practices or unfair methods of competition in air transportation or its sale. Under section 41, we need not wait until violations of the antitrust laws actually occur. We may act to prevent problems from occurring when we determine that a significant potential for abuses exists.

Our review of the information we have received in Docket 41663 and the comments we have received on EDR–466 leads us to conclude that some CRS vendor practices do, or in the future, may affect air transportation competition and consumer interests substantially and adversely. We have decided, therefore, to propose general rules that would eliminate or prohibit those specific vendor practices. While greater regulatory intervention, in the form of very specific rules of conduct or some form of structural relief might yet be necessary, we believe that the rules we adopt will be adequate to ensure vigorous air transportation competition and to avoid consumer injury.

Our belief that CRS carriers are engaged in unfair methods of competition flows from CRS vendors' role as providers of automated information distribution services to other air carriers. The facts clearly demonstrate that CRS vendors have substantial control over the information travel agents have on their competitor's flights. Our data on CRS vendors' market shares and concentration in the CRS industry shows the industry to be highly concentrated, with just six firms providing CRS services and two of them, American and United, having nearly 70 percent of the CRS market between them. Concentration is even more pronounced on a regional level, with individual CRS vendors frequently having market shares of more than 50 percent. These facts create an inference that CRS vendors at national and regional levels have substantial economic power in the information distribution market.

The inference of economic power is strengthened by evidence that entry into the CRS industry is difficult and that CRS carriers are engaged in conduct that could only occur if they possessed substantial market power. For example, as CRS owners acknowledge, they can differentiate in the prices they charge their carrier competitors for automated information distribution services on the basis of the services' value to their competitors. Regardless of whether such pricing practices are desirable, as a matter of economic theory, a producer of a good or service could not engage in that type of conduct in a competitive market. We may act to prevent its use of adversely affect air transportation competition under section 411, whether or not this economic power can be described as monopoly power.

Our review of CRS vendor practices has revealed conduct producing

[1] Throughout this document we cite material from Dockets 41663 and 41666. The DOJ material cited is contained in Docket 41666, and references to Appendices are those of the commenters—and not those listed in the orders cited above.

competitive harms that may be analagous to conduct that would be labeled an abuse of monopoly power under section 2 of the Sherman Act, 15 U.S.C. 2. CRS carrier vendors are apparently gaining the ability to determine the terms on which they provide automated information distribution services on the basis of the extent to which the other carriers compete with them. The charges being assessed for providing such services are or may be assessed, in significant measure, upon the extent or nature of competition from the other party. Similarly, CRS carriers appear to possess the power to offer special service enhancements to other carriers and to set display priorities based upon the extent or nature of competition from the other carrier.

An entity holding market power in one segment of the distribution chain should not be able to use that power indiscriminately to influence competition in the final product. It can be required to deal on reasonable non-discriminatory terms with its competitors for the final product. To forestall these users of CFR economic power we are proposing rules that would prohibit discrimination in access charges, enhancements, and display priorities based upon a carrier's identity. We are also proposing requiring CRS vendors to inform participating airlines of their criteria for display.

CRS vendors use economic power in another way that adversely affects competition. Some CRS vendors have sufficient economic power to require, as a precondition to providing automated information distribution services, that their competitors compensate them for writing some kinds of tickets. CRS vendors are, in effect, tying CRS access to the purchase of direct sales services, services which were previously done free of charge as a service to the public. It is well established that a firm holding market power in one market cannot exert that power to require the purchase of goods or services in another market. Consequently, we are proposing a rule that would forbid CRS carrier vendors from requiring the purchase or sale of any other goods or services as a condition for participation in their systems.

Our proposed rules are justified because the types of conduct set out above are having an immediate substantial effect on air transportation competition. The targeting of economic power to raise competitor's distribution costs selectively is constraining competition on the merits of fare and service offerings. Further, it appears to have the potential effect of deterring some entry into air transportation markets. Consumers are injured by diminished air transportation competition and higher fares.

We also find that CRS carrier vendors practices may be, or could in the future result in, unfair and deceptive practices under section 411. An unfair and deceptive practice occurs when a practice produces substantial injury to consumers that is not outweighed by offsetting benefits and cannot reasonably be avoided.

Consumers view travel agents as providers of objective travel advice. The system of common accreditation of travel agents was designed for this purpose and its rules impose specific obligations that agents serve their many principals fairly. Agents believe that CRS's can be used to obtain information on all air carriers' services. CRS carriers have fostered this impression by claiming that information is objectively displayed and that the best flights are listed first or in the first display. In practice, however, CRS carriers include in their displays significant preferences for their own services, and those of favored competitors, and these preferences inhibit travel agents' ability to provide objective advice. This is causing substantial injury to consumers in that they are being steered to specific carriers without due regard to price and service offerings. Other air carriers that may provide better service, whether it be at a lower price, at a preferable time or with a more attractive connection, are being denied revenues they would normally receive. As a result, air transportation competition on the merits of fare and service offerings is being undermined. This injury cannot be reasonably avoided by agents or consumers because it is frequently difficult to detect, and, even if detected CRS carriers have the means to change its character and extent almost at will. Moreover, CRS carriers have begun to include clauses in their contracts with agents to inhibit access to alternative information sources. In addition, the alternative CRS systems will also be biased.

In our view these facts lend further support for rules forbidding the use of carrier preference factors in ordering information on CRS displays. They also provide a basis for voiding subscriber contract terms of undue length that require the use of a particular system in the sale of its air transportation services, and that inhibit the use of any other system in the sale of air transportation.

Finally, CRS carriers have gained an unfair advantage over their competitors insofar as CRS's generate information for themselves that is unmatched in making marketing decisions and developing marketing initiatives. Such information is proprietary to the carrier on which the flights are booked and should not, properly, be used for other purposes. If, however, a CRS carrier generates such information, it should make that information available to participating airlines on non-discriminatory terms. We are proposing a rule to this effect.

Should we finally adopt our proposed rules, we are currently contemplating a 90-day transition period, from the date of final publication of the rules, before the rules would become effective. Our examination of the documents submitted in this docket and Docket 41663 suggests that the reprogramming of the various CRS systems to eliminate display bias will not be very burdensome. The major CRS vendors have demonstrated that they could change their display bias very quickly when it was in their economic interest to do so. Of course, our rules will also require CRS providers to renegotiate some provisions of their contracts with carriers and subscribers. We believe 90 days will be adequate for that task. We invite comments on these issues.

II. The Relationship Between CRS's and Air Transportation

A. The Role of Travel Agents in the Marketing of Air Transportation

Since the passage of the Airline Deregulation Act, two striking trends in the distribution of air transportation have developed. First, travel agents have become the primary distribution outlet for air carriers. Second, the overwhelming majority of travel agents have come to rely on CRS's as their primary resource for information on carriers' fares, service and availability.

As the air transport industry is currently structured, airlines have two major outlets for the distribution of their tickets: direct sales made by them and their competitors, and travel agents. Of these two distribution channels, the travel agency system has grown predominant, and its importance is expected to increase over the next few years. Travel agents' share of airline sales has been rapidly increasing in recent years. They accounted for 38% of domestic airline ticket sales in 1977, 53% in 1979, and between 60% and 65% in 1982. Order 82-12-85, p. 19, note 45. Travel agents' share of international sales in the United States is even

higher—approximately 80%. It appears that this trend will continue, at least over the next few years. Based on "research and some careful modeling," United strategists have predicted that the travel agent share of airline sales will grow to 85% by the late 1980's. DOJ Appendix B; UA001583.

The travel agency distribution system has an important feature which sets it apart from distribution systems in other industries. Unlike agents in most other industries, where distributors represent the interests of one on a few principals, each travel agent sells tickets on behalf of almost all airlines. The two major air carrier trade associations—the Air Traffic Conference of America (ATC) for domestic carriers and the International Air Transport Association (IATA) for international carriers—handle the accreditation and policing of travel agents for their members. Travel agents accredited by either or both of the two associations are authorized to sell air transportation for the associations' members. Until recently this conference agency system was the only outside distribution channel that association members could use.

While the Board's decision in the *Competitive Marketing Investigation*, Order 82–12–85, December 16, 1982, now permits the simultaneous use of conference agents and other persons as marketers, carriers have not implemented their new freedom. No carrier to our knowledge is using non-conference travel agents. Indeed, ATC and IATA have sought to reverse the Board's decision both in the courts and Congress.

In order to present both their clients and their air carrier principals adequately, travel agents must have access to accurate and timely information on the carriers' schedules, fares, and seat availability. Prior to deregulation and the growth of CRS's, agents typically accomplished this task as follows: after ascertaining the traveler's needs the agent would turn to the Official Airline Guide (OAG), a book containing carrier schedules and some limited fare information, to locate flights and carriers that could serve the customer's needs. To determine the applicable fares and restrictions, the agent would then turn to carrier tariffs, voluminous publications containing all fares, rules and restrictions for each carrier and routing. Once the agent had determined desirable flight and fare, it would have to telephone the air carrier's reservations office to confirm the flight and fare information, find out whether the carrier had seats available, and make a reservation for his customer. The agent would then write the passenger's ticket by hand or through a teleticket printer.

Even before deregulation this process was cumbersome, time-consuming and costly for both airlines and agents. Recognizing this, the airlines, which had computerized their own in-house reservations functions, made several attempts between 1967 and 1976 to develop an industry-wide CRS for use by travel agents. These efforts failed for various reasons, and in 1976, United announced that it would market its own proprietary CRS system to agents. American and TWA soon followed.

The efficiency benefits of CRS's are obvious. With a CRS, a travel agent can obtain on successive computer screens the schedule of flights offered by various carriers, the fares charged by the carriers, and the availability of seats on particular flights. In addition, the agent can make reservations on most carriers through the computer and can automatically print tickets. On most systems, agents can also make hotel and car rental reservations. This entire process can take place without the intervention of carrier reservations personnel. Travel agents may also add to their reservations computer a "back office" accounting system, which maintains client records for billing purposes and keeps the agents' accounts. This permits an agent to operate virtually a paper-free office. This streamlining of the reservations process results in striking efficiency gains for agents and airlines. One survey estimated that the average productivity gain from automation was forty-two percent. *Travel Weekly*, May 1982, Louis Harris Study at 51.

Deregulation of the air transport industry has further emphasized the superiority and necessity of CRS's as information systems for airlines and travel agents. The number and variety of fare and service offerings, which were relatively stable prior to deregulation, have exploded since that time. So has the frequency of fare and schedule changes. Hub-and-spoke route systems have replaced linear route systems, reducing the number of direct flights but increasing the number of available connecting flights over an ever-widening variety of hub cities. A profusion of new carriers has entered the market. American has argued, with some merit, that CRS's have become a necessity, Docket 41207, American Airlines, Inc., Travel Agency Automation in an Era of Deregulation, April 1983, p. 35, reproduced in Addendum to CAB *Report to Congress on Airline Computer Reservations Systems.*

The growth in travel agency automation, which has paralleled the growth in the travel agent distribution system, further demonstrates CRS's efficiency advantages. In November 1977, United estimated that each of the three CRS's then offered to travel agents (APOLLO, SABRE and PARS) had been placed in about 270 travel agencies. UAO11511. By June 1980, about 4,060 agencies had computer equipment installed. *Automation in Airline Reservation and Ticketing Systems*, pp. 1–3, Docket 36595. Over the following three years, the number of automated agencies grew to about 14,000 by June 30, 1983. *See* DOJ Comments Appendix A, page 1. When one considers that the automated agencies also tend to produce the largest amount of airline revenue, the trend becomes even more dramatic. Some 90% of the airline revenue produced by travel agents is now produced by automated agencies. DOJ Comments at 36.

It is evident that CRS's have become the primary information and distribution resource for airlines and travel agents, and that the old OAG-telephone-manual method is at best a supplement to, rather than a substitute for, CRS's. It is further clear that for a carrier to obtain meaningful access to the majority of the traveling public that uses travel agents, the carrier must be included in the agents' primary information source—the CRS.

B. The CRS Industry Today

While the six CRS's currently available to travel agents have some significant differences, their basic feature is the same—they provide access to electronic display of airline schedule, fare and availability information together with the ability to book, sell and issue tickets automatically through the system. DOJ Comments at 25. They accomplish this by providing access to, and communication with, the reservations data base of one or more airlines. These data bases, which are maintained by all airlines, contain information on schedules, fares, and seat availability for the airline that owns the data base and for others as well. The three basic data components are obtained from various sources. Airline schedules are obtained from the OAG. Virtually all airlines submit their schedules of direct flights to the OAG for its publication. In addition to publishing this information in hard-copy form, the OAG Prepares consolidated computer tapes containing these schedules and provides them to the airlines on a weekly basis. The airlines' computers use two tapes as the

bases through which they search for direct flights and build connections. The Airline Tariff Publishing Company (ATP) perform a similar function with respect to fares and their associated rules and restrictions.

The acquisition of information on seat availability is somewhat more complicated. Since each airline needs to retain control over the inventory of seat for its own flights, there is no centralized information source for seats availability. Instead, the airlines have established a communications network operated by Aeronautical Radio, Inc. (ARINC) through which their computers can exchange reservation requests and information on seat availability. This system is far from perfect. The ARINC network is required to handle an overwhelming amount of message traffic, and some messages are inevitably delayed, lost, garbled or mistaken. In addition, carriers frequently "close" flights for sale by other carriers before all seats are reserved to avoid overbooking or simply to reserve part of their inventory for themselves. As a result of these factors, the most accurate any up-to-date information on the availability of seats for any particular flight resides in the computer of the carrier providing that flight. To overcome the ARINC problem, some large carriers have direct, computer-to-computer links.

The CRS's now available to travel agents are of three basic types: Proprietary, direct access, and multi-access. The proprietary systems (APOLLO, SABRE, PARS and DATAS II) offer the agent access to only one data base—that of the system proprietor. The schedule, availability and other displays are modifications of the displays used by the proprietor's in-house reservations personnel, and the travel agent's transactions are processed in the same way as transactions initiated by the carrier's in-house personnel. The initial display of Eastern's SODA system is also a proprietary display. That is, the agent has acces to, and books his transactions in a modified proprietary data base. In addition, however, the agent is essentially able to view the in-house availability displays of other participation carriers. This feature gives the agent more accurate and reliable information on participating carriers' service, particularly on their seat availablility. A multiple access system (MARS PLUS and the SMART enhancement to SABRE) is basically a computer switch which allows the agent both to view and to interact with the in-house systems of the participating carriers. APOLLO offers another variation, called direct link. The agent views the display of the APOLLO system but it can communicate directly with the in-house systems of participating carriers.

C. CRS Market Share

As noted above, United (with APOLLO) and American (with SABRE) were the first to enter the CRS market. They were followed by TWA (with PARTS). In the 1970's, ITT developed the Mars Plus multi-access system in conjunction with a number of airlines. Finally, in the last three years, Eastern (with SODA) and Delta (with DATAS II) completed the list of current CRS providers. USAir and Frontier have also made aborted attempts to enter the field.

As a result of its investigation of the CRS industry, DOJ has presented to the Board an extensive compilation of the market positions of the six CRS providers in every metropolitan statistical area and consolidated metropolitan statistical area in the U.S. and for the nation as a whole (excluding only those agencies located outside an MSA or CMSA). Based on DOJ's description of its methodology, the absence of any challenge to its figures, and other information available to the Board, those market share statistics appear to present a reliable but conservative picture of the relative positions of CRS hosts. See Tables 1–3.

DOJ computed its statistics on two different bases: (1) The number of travel agency locations for each CRS and (2) the amount of domestic airline revenues generated by those agencies over a one-year period. The second perspective provides a much more accurate picture of the relative economic strength and penetration of the respective systems. From DOJ's tables it is apparent that United and American CRS's far surpass other systems in terms of number of agency subscribers and revenue produced by those subscribers. Information submitted by the CRS hosts themselves increases the relative dominance of APOLLO and SABRE. Responses to Information Directives 1 through 56, Docket 41663.

TABLE 1.—NATIONAL SHARES OF ALL AGENCIES, 18 MO ENDED JUNE 1983

CRS	Number	Percent	Domestic revenues	Percent
APOLLO (United)	[illegible]	18	[illegible]	[illegible]

D. Entry into the CRS Market

Development of a CRS is expensive and time-consuming, even for entrants that are starting with sophisticated in-house systems. American estimates that it has incurred capital costs of $160 million in developing SABRE, and United's claimed expenditures for APOLLO run as high as $500 million. DOJ Comments at Appendix B: UA002433. DOJ estimates that entry would require a minimum investment of at least $100 million. DOJ Comments, at 71. Moreover, it appears that a substantial portion to these capital costs are "sunk" costs—costs that are not recoverable if the enterprise is discontinued. A significant factor in the cost of entry is programming, or software development. In addition, in today's fast-changing data processing field, computer equipment may become quickly outmoded, and its resale value can plummet.

The time required to develop a CRS is also substantial. Programmers experienced with airline data systems are scarce and take from six months to two years to train. DOJ Comments at Appendix D: Kotar Tr. at 184–5, Murray Tr. at 120–26. SABRE and APOLLO have taken years to develop sophisticated enhancements like back-office accounting packages, automatic pricing, complete rules displays and advance boarding pass capabilities. A new entrant who fails to match these attractive features may be limited in the customers he can attract. For example, according to DOJ, Eastern's failure to offer an accounting package in conjunction with its system has limited its market penetration to the smaller travel agencies. DOJ Comments at 72.

A provider of a CRS also faces the economies of scale situation encountered in many "information" industries. The "provision" of the product entails a high fixed cost and a relatively low variable cost per user—average unit costs will decline with increasing output over a considerable range. NERA Analysis, page 9 attached to American's comments. Consequently, there is a "critical mass" of "threshold" factors to be considered—the need to attain some minimum level of market penetration before production becomes economic. *Id.* at 11. At a lower level of market penetration, a CRS owner is operating at a loss. If its costs per transaction are considerably greater than the price it must charge to the competitive, and if it takes a long time to increase its market share enough to lower its costs significantly, the CRS owner will be incurring substantial losses. Such losses are almost entirely sunk costs; they cannot be recouped upon exist.

In the CRS industry, the need to attain a significant share of the market quickly to reach minimum efficient size, and obtain larger incremental revenues, prompted American and United to offer low "introductory" prices to travel agents to whom they initially marketed their systems. *Id.* at 10–12. While this pricing policy was certainly sensible—particularly considering the risk involved in introducing a totally new service to the market place—it apparently set the general pattern for generating revenue that prevails today.

There are three potential sources of revenue for a CRS proprietor to recover its costs and make a profit: charges to travel agent subscribers, fees to airlines for reservations services and, for airline proprietors so-called incremental revenues, *i.e.*, air transport revenues that the CRS proprietor gains by virtue of its system's presence in a travel agency. The pricing and marketing strategies of the two pioneer CRS proprietors have, since their systems' inception, placed the greatest reliance on the third revenue source to pay their way. This strategy has, for better or worse, largely dictated the course of CRS development.

The phenomenon of incremental revenues is relatively simple to describe but difficult to quantify. When a travel agency is automated with a particular carrier's CRS, there is a very strong tendency for the agency to place a disproportionate amount of its customers on the flights of the CRS proprietor. There are several reasons for this phenomenon. First, CRS carriers "bias" the selection and display of industry services to give prominence to their own flights and suppress those of their air carrier competitors. Second, an agent's use of a carrier's CRS tends to foster close contact with, and general good will toward, that carrier. This "halo effect" tends to make the agent prefer flights of the CRS carrier when other factors are equal. Finally, as was described above, a CRS's information on seat availability tends to be more accurate for the proprietor's flights than for those of other carriers, so the agent may feel safer in booking the CRS carrier's flights, *i.e.*, those of the largest transporter in the area.

Although estimates vary, all agree that the amount of additional air transport revenues generated by this phenomenon is tremendous. American, which has devoted the most effort to quantifying incremental revenues, has made estimates ranging from $78.5 to $150 million for 1980. DOJ Comments, at 54 and AA–ER1–22, p. 5. United has made a conservative estimate for purposes of this proceeding that its 1983 incremental revenues from Apollo were over $160 million (versus a system owned by a competitor). Internally, United has made little effort to quantify its incremental revenues, but it apparently believes that "possessing an airlines' [CRS] is strongly associated with disproportionately greater bookings being assigned to that carrier." *See* DOJ Comments at 107.

The extent of incremental revenues is also indicated by internal estimates of return on investment for decision making purposes. TWA has regularly estimated return on investment above 25% for capital expenditures to expand PARS. In some cases estimates have been over 95 percent with payback periods of approximately one year. *See generally* TW-Con, ER1–(22), pp. 32–81. In almost all instances, income generated by increased travel agent and carrier fees alone would have produced losses or barely covered expenses.

United believes that at each SABRE agency converted to APOLLO it will realize a 10-percent increase in air transportation revenue. It expects a 5-percent increase in revenue when a previously unautomated agent becomes an APOLLO agency. UA 12207 and UA 20628.

United and American have emphasized the importance of incremental revenues since the inception of their systems. Their motivations for entering the CRS market in the first place were, quite naturally, their desire to develop a more effective and efficient marketing system for their own air transportation product. Before their systems became widely accepted by travel agents, they had to price their systems attractively. They also had to offer the agents systems with the ability

to research and book industry-wide. They therefore made their information distribution and booking services available to other carriers at no charge. As the systems grew and the CRS carriers began to realize the anticipated incremental revenues, a number of developments took place.

First, their battle to sign up the strategic agencies intensified, and fees for targeted agencies were driven even lower. *See* DOJ Comments at 51–56. Second, the CRS proprietors began to seek ways to obtain revenues directly from other carriers. At first, when the systems were still small, these efforts were directed toward developing "co-host" arrangements whereby carriers that did not compete extensively with the host, Western with American and Delta with United for example, would pay modest (by today's standards) booking fees and a small capital contribution and would assist the host in marketing its system in areas where the co-host had a strong air transportation presence. In exchange, the host would bias its displays to favor the co-host. As the CRS's expanded their travel agent base, the hosts expanded their co-host program with increased booking fees; began in late 1980, to demand "net ticketing agreements" as a condition of CRS access; and, in late 1981, began to demand booking and net ticketing fees from carriers that were not co-hosts. By contrast, some new CRS entrants have not placed such demands on other carriers for access to their systems. *See* DL–NC–ERI–8–(1–3).

Interestingly, the booking fees to non-co-hosts, who received no bias in their favor, were in many cases substantially higher than co-host fees negotiated at the same time with other carriers. Fees per segment booked through APOLLO and SABRE currently range from $0.30 to $3.30, depending on the carrier. DOJ Comments, Table 7, at 139–140. This does not include the fees under "net ticketing arrangements," which American and United could only get other carriers to accept by making entry into such arrangements a precondition to access to their CRS systems. DOJ Comments at 141 and documents cited. Net ticketing fees—fees for handling tickets which name the CRS-owner as the ticketing carrier—can vary from $.50 to $3.85 for tickets written by travel agents and from $1.00 to $12.10 for tickets written by the carrier's own employees, in addition to the CRS access fee. DOJ Comments at 142–143.

While these developments reflected an effort by United and American to expand the revenue base for their CRS's, this new revenue source clearly remained subordinate to incremental revenues. Thus, the widely varying booking fees American charges to co-hosts are based not on American's costs but on the impact the addition of that co-host will have on American's air transport revenues. DOJ Comments at Appendix D: Baker Tr. 130. *See also* DOJ Comments at 118. After November of 1981, United based its pricing strategy not on its costs or on the fees its CRS competitors were charging, but on the degree to which the participating airline competed with United in air transportation. DOJ Comments at 128–134.

The third development that took place as the two systems matured was that their proprietors began to increase the degree and sophistication of the bias in their systems. Several studies commissioned by United found that travel agents have a high degree of tolerance for bias and that they do not work to defeat the bias, and recommended that United increase its level of bias and make it more subtle. UA IR's 018178–018182, 018183–018191, 018266–018366. In August of 1981, United launched a two-phased Parametric Merchandising project designed to increase the level and subtlety of its bias. DOJ Comments at 99. American also increased the level of its bias several times during this period in such a manner as to minimize detection by travel agents. DOJ Comments at 83. Since TWA first introduced bias into PARS, the amount of bias on direct flights has increased twelve-fold. TW–Con–ER1–(26–27), pp. 16–29.

The fact that the incentives and strategies of the two major CRS proprietors are dominated by their desire to maximize downstream air transportation revenues has some important consequences. It forces all other CRS proprietors and potential entrants to match that strategy. If a CRS competitor wishes to attract any travel agent subscribers, it must offer its system at prices that are competitive with the at/or below-cost rates offered by the dominant CRS carriers. That forces the CRS competitor to rely on a combination of carrier fees and incremental revenues to compensate for the revenue shortfall from the travel agent source. Non-carriers or small carriers do not have the large air transport traffic base necessary to realize substantial incremental revenues and so are not able to earn a profitable return on a CRS. Large CRS carriers that are able to realize incremental revenues are forced into a strategy that will maximize their incremental revenues. Delta, for example, allegedly has introduced a substantial element of bias into its system through its choice of connect points even though it markets its system as unbiased. *See* American Airlines Reply Comments at Appendix B.

E. Difficulties in Converting Agents

Another set of obstacles facing any would-be CRS proprietor relates to the difficulties in inducing agents to switch from one system to another. While the CRS industry has grown rapidly, it has at this point reached a certain level of maturity. The 35 percent of travel agents that remains unautomated account for only 12 percent of the air transportation sold by agents. DOJ Comments at Appendix A. A new CRS entrant cannot realistically gain a significant foothold in the CRS market by focusing solely on this pool of the smallest, unautomated agents. The alternatives then, are to attempt to convince automated agents to switch systems or to persuade agents to accept the new CRS as a second system. Both alternatives present serious difficulties.

In most cases, the agency's contract with its current CRS provider restricts its ability to change or add systems. It appears that most travel agent contracts on SABRE are 4–5 years in length, and United has recently begun to sign many agents to 7–10 year contracts. DOJ Comments at 60. These contracts also provide for fairly substantial penalties for cancellation. Notably, the length of American's and United's contracts have been increasing over the years. And, TWA, Delta and Eastern appear generally to use three-year contract terms. The lengthy terms of the contracts on the dominant CRS systems sharply reduce the number of agencies that the CRS entrant can seek to convert at any one time. Liquidated damage provisions may reduce even further the agency revenues the CRS entrant can hope to receive. For example, the liquidated damages clauses in APOLLO contracts require payment of 80 percent of the remaining rentals due under the contract. DOJ Comments at 61.

The two major CRS providers also attempt to restrict an agency from using more than one CRS. United requires that its subscribers use Apollo for at least 95 percent of all bookings that contain any United segments. UA 004603. Because of the prevalence of interlining and United's extensive route network, this so-called "95 percent rule" effectively prohibits any use of a second system for booking and ticketing functions and thereby forces agents to choose between Apollo and another CRS. American's

"minimum of parity" rule requires new subscribers to have at least as many SABRE CRT's as there are non-SABRE CRT's at each location. DOJ Comments at 57. As a result of these policies and other factors, few automated agencies, accounting for 12.6 percent of automated agency revenues, have more than one CRS at the same location. DOJ Comments at 58.

Aside from contractual limitations, agents have a great reluctance to switch systems because that process can be very costly and inconvenient. Switching causes great disruption of the agency's business due to the replacement of equipment and the time required for training and familiarization with the new formats and procedures. United's travel agent research confirms this point. One study, conducted in 1981, reports that "very few owners or managers express even the slightest interest in switching systems. The system they have represents a significant investment not only in terms of money, but in training and adjustment as well." UA 018328, DOJ Comments at Appendix B.

As was noted above, the regions where a carrier's CRS is predominant tend also to be regions where that carrier has a strong air transportation presence. There are two reasons for this striking correlation. First, because the primary source of revenue from CRS operations is incremental revenues, the major CRS proprietors have historically concentrated their sales efforts on the areas and agencies where they had the most air transportation business. Second, and perhaps more important, however, is the fact that in areas where a CRS proprietor has a significant air transportation presence, it has a distinct advantage over a CRS proprietor that does not have such a presence. *See* DOJ Comments at Appendix B; UA 018324–325

The primary basis for the second competitive advantage is the fact, noted above, that the proprietor's CRS contains the most reliable, accurate and up-to-date information on its inventory of airline seats—which the travel agent recognizes as a necessity or a large advantage in writing tickets on that carrier. One of the biggest problems facing the CRS industry and the travel agent today is the so-called "no rec" problem. This occurs when the transmission of reservation requests, seat confirmations, and availability status messages from carrier to carrier through the ARINC message system becomes lost, garbled or delayed. In the typical case, for example, when a travel agent using carrier A's CRS makes a reservation for a customer on a flight of carrier B, A's computer sends a message to B through the ARINC system. If B has space available and accepts the reservation, it sends a confirmation back to the agent through A. If, however, the original reservation message never reaches B, the agent may believe its customer has a confirmed reservation. When the customer arrives for B's flight and finds it booked, the traveler may be turned away because carrier B has no record of the reservation. This problem is avoided if the agent can, through its CRS, book directly into the inventory of the transporting carrier. Thus, travel agents have a very strong incentive to obtain the CRS that gives them immediate access for the largest proportion of their business.

Another example of the advantages gained from a CRS carrier's control over its own seat inventory is last seat availability. Largely because of the delay factors occasioned by ARINC, carriers frequently reserve part of their inventory for sale by their own reservations agents or through their own CRS. A CRS that can offer the agent access to these last available seats for the flights and carriers booked most often has a distinct marketing advantage.

Finally, American and United have recently developed an enhancement that further improves their regional advantages. SABRE and APOLLO agents can now issue their customers advance seat assignments and boarding passes for their proprietor's flights. This appears to be an attractive feature, especially for business travelers. Other enhancements might be developed in the future that would have a similar effect.

F. The Importance of Incremental Passengers in Air Transportation

The key to understanding the effect of CRS practices—particularly bias—on competition in air transportation is to recognize the impact of incremental passengers on costs and profitability. Since a flight costs almost as much to operate empty as full, the cost per passenger is highly dependent on the load factor—the percentage of seats filled with revenue-paying passengers. Simply stated, an airline averaging a 70-percent load factor will operate at roughly half the per passenger cost of a carrier with a 35-percent load factor, all other things being equal.

An airline will consider entry into market in a situation where it can reasonably expect to attain a load factor sufficiently high that it can cover its per passenger cost and make a profit at the prevailing price level. If it obtains more passengers per flight, its profits should increase dramatically—assuming it is not discounting greatly—since the added cost of each additional passenger is a small portion of the ticket price. On the other hand, if it fails to reach a breakeven load factor, its costs per passenger will correspondingly increase in relation to the percentage its load factor is below breakeven. Moreover, unlike a seller of non-perishable goods, an airline's inventory of seats cannot be retained for another day. Once a flight takes off, the unsold seats will never provide any revenue.

The basic point is that small differences in average load factors often make the difference between substantial profit and significant loss in the airline industry. This is the basic reason for the popularity of the so-called "hub and spoke" route systems. Each additional flight a carrier adds at its hub will increase by a small percentage (perhaps only one point) the load factors on connecting flights leaving for points beyond the hub. In this way, the hubbing carrier lowers its per passenger costs and increases its profitability.

Essentially the same phenomenon is at work in the CRS industry. Each of the CRS providers recognizes that if an agent does not use a CRS or uses one without bias, it will place a certain number of passengers on its airplanes. This number can be increased by inducing the agent to use its CRS and by biasing their displays, because the probability of sale decreases line-to-line, screen-to-screen. AA083619. TW–CON–ER1–(9).

The added revenue which the CRS owner obtains through bias is, in most circumstances, profit-laden. Internal airline analyses often assume that 80% of this incremental revenue represents pre-tax profit. *See* TW–CON–ER1–22, pp. 32–81. For the carrier which "lost" that revenue, its profits decline by a similar amount all other things being equal.

Consequently, small shifts in load factor can have enormous implications. The "disadvantaged" competitor can lose much if not all of its profit in the market, and, the "advantaged" carrier can, if it wished, drop its price—since its per passenger costs are lower—thereby gaining a bigger share of the market and cutting the profits of its competitor even more or forcing it to sustain greater losses. Clearly, bias can be used by CRS-owners as a powerful weapon against existing competitors and a strong deterrent to entry by potential competitors.

III. Competitive Analysis

The previous sections describing the nature of competition in air transportation, the marketing of air transportation today, the role of travel agents and the development of CRS systems lay the foundation for our analysis in this section. As more fully explained below, our analysis shows that the major airline-owned CRS systems have substantial market power which they exhibit today by charging very different fees to different carriers and by biasing the information on CRS systems. Neither practice could persist for any period of time in a competitive market. This "power to maintain price and reduce output" in the CRS market gives them the ability to raise competitors' costs and to deter entry into city-pair markets in the airline industry.

At the core of the CRS owners' power is the ability to generate incremental revenues to offset losses incurred because travel agent receipts and carrier booking fees do not cover CRS costs. The millions of dollars of incremental revenues generated by CRS's have the effect of precluding entry into the CRS industry by anyone except a very large air carrier—all, or most, of which already operate a CRS system.

A. Our Statutory Mandate

We believe that Congress gave the Board the authority and responsibility to take appropriate action in this type of situation, primarily under section 411. In the Airline Deregulation Act, Congress placed a high priority on "the prevention of unfair, deceptive, predatory, or anticompetitive practices in air transportation, including the avoidance of "excess market domination and monopoly power" and other conditions "that would tend to allow one or more air carriers unreasonably to increase prices, reduce services, or exclude competition in air transportation." Section 102(a)(7).

Congress also gave the Board authority to prevent "unfair or deceptive practices or unfair methods of competition in air transportation or the sale thereof." Section 411. Section 411 was patterned—indeed is virtually identical to—section 5 of the Federal Trade Commission Act (15 U.S.C. 45) and as the Supreme Court has noted, has the same general purposes. *Pan American World Airways* v. *U.S.*, 371 U.S. 296, 303 (1963). As the Supreme Court has consistently held, "unfair methods of competition" in the Federal Trade Commission Act "was designed to supplement and bolster the Sherman and the Clayton Act . . .—to stop in the incipiency acts and practices which, when full blown, would violate those acts." *FTC* v. *Motion Picture Advertising Service Co.*, 344 U.S. 392, 394–95 (1953). *Atlantic Refining Co.* v. *FTC*, 381 U.S. 357 (1965); *FTC* v. *Brown Shoe Co.*, 384 U.S. 316 (1966). The companion prohibition against "unfair or deceptive practices" in both section 411 and section 5 of the Federal Trade Commission Act was intended to protect consumer from trade practices which, while not necessarily anticompetitive, were misleading, contrary to recognized public policy or injurious to consumers. *FTC* v. *Sperry & Hutchinson Co.*, 405 U.S. 233, 244 (1972).

Given the prophylactic intention of section 411, it is appropriate for us to use section 411 as the basis for prospective rules. It permits us to forestall conduct where we find that a potential for abuse exists. We need not, therefore, determine whether there actually has been a violation of section 411 in order to promulgate rules. See *National Petroleum Refiners Ass'n* v. *FTC*, 482 F.2d 672, 678 (D.C. Cir. 1973), *cert. denied*, 415 U.S. 951. The choice between proceeding by general rule or by individual litigation is "one that lies primarily in the informed discretion of the administrative agency." *SEC.* v. *Chenery Corp.*, 332 U.S. 202–03 (1947); *American Airlines, Inc.* v. *CAB*, 359 F.2d 624 (D.C. Cir. 1966) *cert. denied*, 385 U.S. 843.

In considering CRS carrier practices under this section, we are mindful of the fact that our principal obligation is to ensure effective competition in carriers' fare and service offerings. Of course airline deregulation is premised upon the view that individual city-pair markets are highly contestable. Our concern with the CRS system is that they constitute the primary information source to persons who sell over 60 percent of a typical air carrier's services today and may sell 70–80 percent in a few years. Except for a very few carriers, like People Express and Southwest, which have simplified pricing structures and regularized, frequent flights on heavily traveled routes and do not interline, carriers rely heavily on agents to inform the public of their fare and service offerings, and to write their tickets. Even for those low-cost carriers, access to travel agents at competitive fees and on an unbiased basis could increase the efficiency of their marketing.

To assess the effects of CRS practices on air transportation, we must examine the CRS market. The CRS market consists of the several services CRS owners provide to distributors of air transportation (agents) and to the persons who wish to have their air transportation marketed through agents (other carriers). Agents purchase the electronic display of schedules, fares and seat availability, along with the ability to book reservations and issue tickets electronically by use of the system. Carriers purchase the electronic transmission of current schedule, fare and seat availability information, along with the transmission of reservation information upon an agent's sale of a seat. It is the ability to raise prices or restrict output of these services that is the focus of our analysis.

The CRS situation is one which affects virtually all major airlines in the United States. It is also one in which action, to be effective, should be taken with respect to all airlines/owned CRS systems even if they do not have the magnitude of market power that American and United possess today. The incentives to bias systems and generate incremental revenues are so strong that a rule applicable only to United and American would still leave substantial risk of abuse. The national market shares of the newer CRS's are growing. Moreover, in certain regional markets, where competition is most important, each of the smaller CRS owners have shares approaching those of American and United. To the extent that incremental revenues allow lower prices to agents, CRS competitors not subject to the rule could use this price advantage to offset the quality disadvantage of biased displays and thus perpetuate the problems associated with bias. Consequently, we believe the only responsible course is to propose rules covering all airline-controlled CRS systems.

B. Access to a High Percentage of Travel Agents is Essential

1. *The efficiencies of the travel agent system.* Given the importance of load factors to a carrier's per passenger costs and overall profitability, access to travel agents is usually critical. With minor exceptions, a carrier simply cannot ignore this distribution system which already accounts for over 60 percent of domestic revenue and 80 percent of international revenue today.

Carrier reliance on travel agents as their primary distribution system is based upon the substantial efficiencies of the agency system. As we found in the *Competitive Marketing Investigation*, it is far less costly for most carriers to use agents than to establish an independent distribution system. The common agency system allows carriers to spread the cost of

distribution outlets over a large base. Order 62–12–65 at 35. For many members of the domestic air carrier trade association that accredits agents, the cost of administration of the agency program was less than $1.00 per agent. Individual air carriers could not establish a comparable independent marketing system. The system also facilitates entry into new markets. Even in cities far removed from a carrier's existing route system, there are agents prepared to provide distribution services immediately upon notification of a carrier's decision to enter. A carrier can enter a new city, or provide service in a new market without incurring significant costs in establishing a distribution network. Similarly, carriers can freely exist without liquidating fixed assets. *Id.* at 35–36. The evidence shows that the key to gaining these efficiencies for virtually all airlines is access to the travel agent community through CRS systems on reasonable terms.

United takes exception to our focusing on the treavel agents in this proceeding. It argues that travel agents are merely one form of air transportation distribution available to air carriers and consumers. In its view, direct sales outlets are a readily interchangeable alternative available to both. As we have already explained, however, travel agent distribution is a more efficient means of distributing air transportation services than independent sales outlets. Only carriers with very specialized route systems may be able to circumvent travel agents through direct distribution systems.

Moreover, the *Marketing* case also established that consumers believe travel agents provide a different and more comprehensive type of distribution service than carriers. While there may be some interchangeability, the carriers themselves have assured that consumers will increasingly use travel agents—by creating and maintaining a system under which the consumer does not pay any more for full service from a travel agency than for direct purchases from the airlines. To most consumers, carriers are seen as providing little more than a reservation service. Carriers tend to be called directly when the choice of carrier, the itinerary and time for travel have already been determined. Travel agents, on the other hand, are seen as providers of comprehensive and objective travel advice.

Agent distribution services differ from carriers' direct sales services in that agents are relied upon to offer assistance in the selection of travel alternatives. In essence, consumers rely upon them to keep track of the multitude of service and fare options the various carriers in a market may offer. Of course, travel agents are also used because they offer some types of travel services, such as car rental and hotel reservations, tour packages, cruise packages and travelers checks that airlines' direct sales outlets generally do not offer. Recognition of the basically different service that travel agents perform has been at the core of our explanation of travel agents' rapidly increasing share of the air travel distribution industry. United itself recognized as much when it projected that by 1985 travel agents may be responsible for some 80 percent of ticket sales and, in a few more years, as much as 85 percent. DOJ Comments at Appendix D: Kotar EX. 4 at 10 and UA–001583.

2. *Access to travel agents in a region.* While much of our discussion has focused on the importance of travel agents nationally, the real economic impact is more regional in nature. Obviously, most people use travel agencies with locations in the immediate community, not agencies hundreds of thousands of miles away. Consequently, a carrier is likely to have lower load factors—and therefore higher per passenger costs—if it is denied access to a high proportion of travel agents in the cities it serves. This is why the often high regional market shares cited by the Department of Justice are so troubling. A new entrant into a city-pair market out of Dallas-Ft. Worth, for example, may be denied access to some 54 percent of its potential passengers from that area were it not on the SABRE system, which has 88 percent of that area's travel agents by revenue.

Even where the predominant CRS system in a region has a smaller market share, the effect on load factors could be very significant. A carrier denied meaningful access to a CRS system handling 40 percent of the agent ticket volume in the cities it serves could well have difficulty reaching a quarter of its potential market today and a third of that market in a few years. Ignoring other factors, the carrier could have per passenger costs 30 percent higher (and in the future, 50 percent higher) than a competitor with access to all travel agents. The carrier might reduce some of this cost advantage if it had access to most travel agents at the other end of the city-pair or engaged in extensive advertising and promotion. But, even then, the potential cost disadvantage could still be significant.

Notably, the regional market share figures provided by the Department of Justice—which appear to be conservative—show that in many of the major metropolitan areas of the country, the largest CRS system has at least 40% if the travel agent markets. In many major cities, the percentage is much higher: Boston (69%), Cincinnati (84%), Cleveland (84%), Dallas-Ft. Worth (88%), Denver (72%), Houston (68%), Kansas City (71%), Phoenix (69%), Portland (66)% and Rochester (69%).

3. *CRS is the key to the travel agent market.* As discussed in detail in the earlier section, CRS's are by far the primary conduit to information from carriers to the travel agent community. To most travel agents, CRS's are not a luxury but a competitive necessity as graphically demonstrated by the fact that CRS's have grown from almost zero to ninety percent of the market in less than eight years.

C. The Major CRS Owners Have Market Power

All of the indicia of market power in traditional economic terms are exemplified by the undisputed facts presented in this rulemaking. As noted above, virtually all carriers must have access to a large proportion of travel agents in the regions the airlines serve. Reaching 90% of the travel agent market efficiently requires access to CRS systems. In economic terms, the cross-elasticities of demand between CRS's and their alternatives are very low for almost all carriers and travel agents.

That, in and of itself, would not be a great concern were entry into the CRS industry easy or were the market not concentrated and agents and carriers could use multiple systems or quickly switch between systems. None of these is the case.

1. *Difficulty of entry.* Entry into the CRS industry is not only difficult but indeed may well be impossible for all but the largest carriers that already provide CRS systems This is due to the fact that even the American and United systems—which are among the most sophisticated computer systems in the world—may operate at a loss with their current pricing structure if incremental revenues from air transportation are not included.

Consequently, non-carriers realistically cannot enter the market and thus pose no competitive threat. They simply cannot offer prices competitive with the carrier-owned systems and still earn a profit. U~like carrier providers, they cannot overcome their losses with tens (if not hundreds) of millions of dollars of additional revenues from air transportation. Tymshare's experience—with a much less capital-intensive system than the major CRS's—

demonstrates this fact as it acknowledges that it has been forced to keep the price of its system below its costs in order to compete with carrier systems.

Since the incremental revenue generated by a CRS system for its owner is proportional to the amount of air transportation a carrier provides, it may well be that only the largest airlines—United, American, TWA, Eastern, and Delta—could profitably operate a CRS system today. They have the extensive route systems necessary to generate incremental revenues of the magnitude required to make a CRS system potentially profitable.

It is uncertain whether other major airlines could profitably enter the CRS industry or whether the fringe competitors—TWA, Delta and Eastern—can make significant inroads into the dominance of American and United. To make significant inroads, they have to convert agents since all but some ten percent of agencies (by revenue) are already under contract with one of the other CRS vendors. Or, they have to sell their system as a second system for the agent—something current contract provisions may inhibit.

Notably, United and American are increasingly using contracts with travel agents that make it more difficult for a competitor to convert an agent. Where economies of scale are important, long term leases with penalties for early termination tend to increase the time before a new entrant or fringe competitor has the market share necessary to operate economically and thereby increases its initial losses, risk and sunk costs.

The major CRS owners are also impeding agents' ability to use other systems in conjunction with their own. This is the effect of United's contract provisions that require an APOLLO subscriber to use APOLLO for at least 95 percent of its bookings that include a United segment. American's "minimum of parity" rule has a similar effect.

Of course, even if such clauses did not exist, agents may not readily switch systems. When an agent switches systems, it may incur additional installation and equipment costs. It will undoubtedly experience a period of disruption while the CRS system is replaced and the employees learn to use the new system. Generally, agents have required the new CRS provider to absorb these costs and to discount its system to compensate for the inconvenience of switching.

Finally, a new competitor will have particular problems converting agents in a region where the dominant CRS provider is also a major provider of air transportation. Agents naturally prefer up-to-date and reliable information on the carrier that provides substantial air transportation in the region.

2. *Market shares and concentration.* The potential for substantial market power is increased by the fact that the CRS market is concentrated. Table 2, *supra*, shows that SABRE has 49 percent of automated agencies and APOLLO has 31 percent of automated agencies, in terms or revenue. If all agencies—automated and unautomated—are included, the two major CRS systems have 70 percent of domestic airline revenues derived from travel agencies. And, as noted earlier, the market share of the leading CRS providers in many major metropolitan areas is often much greater.

United suggests that we cannot find market power, however, unless the market share of the dominant firm is much higher—more than 60 percent. This is the case in a number of the regional markets, as detailed in Table 3.

But, more important, we must recognize that a firm can have substantial market power with much less than 60 percent of the market. It all depends on the ease with which customers can switch to alternatives and the ease with which new entrants and fringe competitors can increase output: market elasticities of demand and supply. Landes & Posner, *Market Power in Antitrust Cases*, 94 Harvard Law Review 937, 951 (1981).

While American and United may not have quite that much market power, the fact remains that market elasticities of supply and demand appear to be low. In most cases, neither travel agents nor carriers have any alternative but to be on a system; smaller CRS providers are likely to encounter difficulties in growing quickly; and new entry into the CRS market is difficult if not effectively blocked.

3. *Conduct and performance.* If there were any doubt that United and American have market power in the provision of CRS services, that doubt is dispelled by three facts that can only be explained by the existence of market power.

First, the record shows that American and United are charging different carriers desparate prices for the same service. The price ranges from thirty cents to three dollars per segment booked. As Professor (now Judge) Posner has stated:

> Persistent discrimination is very good evidence of monopoly because it is inconsistent with the competitive market; it implies that some consumers are paying more than the cost of serving them, a situation that would disappear with competition. R. Posner, *Antitrust Law: An Economic Perspective* 63 (1976).

Second, major CRS vendors clearly restrict the output of their product. Restriction of output is the classic behavior of a monopolist since this increases its profits. In the CRS market, the output is really the provision of information. And, restriction of information can be in the form of providing less information or providing less reliable information. In the case of bias, of course, it is the latter. Again, as in the case of systematic price discrimination, bias could not remain prevalent in a competitive market because travel agents and their customers—as well as other carriers—would obviously prefer unbiased information, although they might accept a certain degree of bias in exchange for lower fees. That biased systems not only persist but, in fact, dominate the market indicates very strongly that the incumbents recognize there is little threat of new entry.

Third, the internal documents of American, United and TWA reflect rates of return that could only exist in the long run if they had substantial market power. Since they do not price their CRS services to be profitable on a "stand alone" basis, these high rates of return are attributable to incremental revenues from air transportation. Internal American memos have estimated its rate of return on CRS as 500 percent. United, in fact, instructs its sales personnel not to accept a travel agent contract that will yield less than a 30 percent annual return of investment, including, of course, incremental air transportation revenues. DOJ Comments at 52: UA 004586.

4. *The heavy reliance on incremental revenues perverts competition.* Indeed, as American has noted in its comments, the importance of incremental revenues—which are enhanced by bias—really leads to a situation where all CRS vendors have a strong incentive to compete on the basis of increasing the bias of their systems, at least up to the point that will be tolerated by travel agents. The relationship between United and American, as confirmed by their internal documents, illustrates the problem and the perverse incentives that it creates.

United is the least preferred carrier in terms of listings on the American SABRE system and American is the carrier most biased against on the United system. Each system thereby diverts even more revenues away from a competitor. To combat this, each attempts to find increasingly sophisticated means of biasing its own

system so that, if the bias increases on the other system, the lost revenue will be balanced by the increase in revenue from its system.

The strong incentives for United and American to increase bias is exemplified by United's program for parametric merchandising. *See* DOJ Comments at 99–106. The thrust of United's plans is to bias its system on a market by market basis with various degrees of bias for different carriers, and a bias which is constantly changing depending on the competitive situation. Such unsystematic bias would make it much more difficult for travel agents to detect the bias and overcome it, leading—at least United hopes—to increased incremental revenue to it and diversions of revenue from its competitors.

D. The Impact on Air Transportation

The market power that United and American possess in the CRS industry gives them power to raise competitors' costs in air transportation markets. Other CRS vendors—TWA, Delta and Eastern—are compelled to bias their own systems as protection against the bias in the much more dominant United and American systems so that they do not sustain large losses. TW–CON–ER1–22 at 44, 46, 49, 50. This compounds the dissemination of misleading information to the detriment of travel agents and the consuming public and increases the power of the CRS owners to raise their competitors' costs.

The CRS owners can raise competitors' costs directly by charging higher access fees. The potential impact of this is suggested by an observation of the Joint Carriers in their original petition for rulemaking. Based on CAB data, in 1978, the most profitable year for airlines to date, all carriers made an average profit of about $2.50 per passenger segment. CRS owners also can increase costs indirectly by biasing displays. This diverts sales from other carriers, which is very important because of the economics of load factors in the airline industry. A small decrease in load factors, as noted previously, may make the difference between significant loss and substantial profits.

Most important, the major CRS owners have the power to increase competitors' costs not only in a single market but in all markets in which a competitor flies. This provides a powerful deterrent to entry or to a competitor that may consider competing on the basis of lower fares. United or American can deter such procompetitive activity by threatening to increase access fees and bias for a competitor in all the markets which that competitor serves. The diversion of revenue for a moderate size carrier could amount to tens of millions of dollars a year—much of which, as noted earlier, would otherwise go right to the bottom line.

That non-CRS carriers perceive the threat is demonstrated by correspondence in the record. Air Florida apparently felt that, to overcome United's concern that it would be an aggressive competitor with United, it had to agree to notify United prior to entry into any new market. Likewise Jet America in correspondence with United on at least two occasions apparently promised that it would not be a "low cost" airline. And, Pan American apparently sought to assuage United's concerns that Pan Am would become increasingly competitive with United. DOJ Comments at 166–67: UA 578, UA 18859 and UA 51.

This is not the kind of perception or conduct that we will tolerate in the domestic air transportation industry. The whole foundation of deregulation is the "contestability" of city/pair airline markets. That is, although many markets may be highly concentrated—with two or three competitors—fares and service should remain at competitive levels because of the ease of entry. If entry is deterred, however, incumbent airlines will have more flexibility to raise the price above competitive levels and more efficient airlines will be less able to discipline the major carriers. The result would be fares above competitive levels resulting in a monopoly surcharge to those passengers who do still fly and a reduction in consumer welfare for the economy as a whole.

The problems of bias and discriminatory access fees are compounded by other potential abuses of market power some of which are documented in the record before us. In addition to raising access fees to competitors, United and American have also required that other airlines enter into a "net ticketing agreement" with them as a precondition to the provision of access to their CRS systems. Net ticketing arrangements are contracts by which interlining carriers agree to pay each other for selling and handling the ticket sales on the other carrier. Such arrangements, in and of themselves, may not be anticompetitive at all. However, using access to a CFS as a precondition offers the very great potential of being able to charge unreasonable net ticketing fees or force a carrier to accept the added costs of that agreement—again a means of increasing competitors' costs and increasing the discriminatory nature of access fees.

The major CRS vendors—American and United— also obtain very valuable sales and booking data from their systems which they use in their marketing planning and in dealing with travel agents. This very detailed and timely information permits them to determine exactly how much each travel agent on the CRS system is booking on themselves and each of their competitors. They are therefore in a position to offer agents overide commissions geared toward increasing their load factors in particular markets vis-a-vis a competitor. In and of itself such conduct would not be at all reprehensible. The problem is that the proprietary information necessary to compete with such an override system is simply not available to their competitors. They are therefore in a position to suffer the same types of diversion through a selective commission override system that they now face due to bias.

Finally, a number of carriers have complained that acces to the so called "service enhancements" offered by some CRS systems is not available to all carriers on a nondiscriminatory basis. *See* n.7, *infra*. Again, where service enhancements increase the ability of an airline to sell its air transportation, the major CRS vendors may be in a position to place competitors at a marketing disadvantage.

E. Legal Conclusion

In view of the express policies in section 102 of the Airline Deregulation Act, we believe that we have not only the authority but the responsibility under section 411 to take action to prevent the use of market power in the CRS industry to lessen competition in air transportation. Since that market power occurs only because the CRS providers are able to earn large amounts of incremental revenues from air transportation and would not exist if the CRS providers were not airlines, we believe that we have the authority to take action to reduce the market power in the CRS market.

This conduct is analogous to conduct which the courts have found destroys competition and establishes monopoly. In a number of cases monopolists have been required to deal on reasonable, nondiscriminatory terms. *LaPayre* v. *FTC*, 366 F.2d 117 (5th Cir. 1966) and *Fulton* v. *Hecht*, 580 F.2d 1243, 1249 (5th Cir. 1978) ("[u]nder section 5 of the FTC Act, a monopolist may be required to use uniform and reasonable criteria when dealing with those who compete in an adjacent market.") Moreover, the same duty has been imposed upon joint ventures where the joint ventures control a facility essential to effective

competition. In *U.S.* v. *Terminal Railroad Ass'n,* 224 U.S. 383 (1912) several railroad companies formed a joint venture that controlled access to rail routes to St. Louis. Unanimous consent was required before any new firm could gain access. The court ordered the Association to permit other railroads to use the Association's facilities on reasonable, nondiscriminatory terms. To the same effect are *Associated Press* v. *U.S.,* 326 U.S. 1 (1945), and *Silver* v. *New York Stock Exchange,* 373 U.S. 341 (1068). Thus these cases require that those who control the essential facility provide access to all competitors on non-discriminatory terms.

The size of incremental revenues alluded to above also indicates the risk of consumer deception. The very existence of such incremental revenues indicates that consumers are in fact being misled if not deceived. Travel agents are presented to the public as neutral industry representatives and neither carrier nor agents point out that they use biased information systems. Even if an agent desired to overcome bias, the increasing sophistication of display programming makes it more difficult to detect.

Obviously the amount of incremental revenue does not accurately measure the amount of consumer harm caused by this misinformation. Bias can deprive consumers of the opportunity to take advantage of lower fares. Frontier Comments at Appendix B. Much of the harm may be in the form of inconvenience however. Given the extent of incremental revenue and its recurring nature the consumer injury from deception is likely to be substantial.

Nor can the consumer readily avoid it. To deal with air carriers directly the consumer would have to undertake the very search costs that the use of travel agents is intended to avoid. Switching between automated agents using different systems would only substitute one carrier's bias for another's. While use of a non-automated agent is possible, their numbers are dwindling and consumers would have to forego the advantages of automated agents to use this option.

IV. Our Proposed Course of Action

A. General Rules

Based on our review of the comments and the information filed in the rulemaking and in respose to our Evidence Request, we believe that the dominant CRS owners ahve significant market power over the flow of information between carriers and travel agents. We have also tentatively concluded the CRS owners have the ability and strong incentives to exercise this power to reduce competition in air transportation, and to otherwise injure consumers. The evidence suggests that some CRS owners may in fact be exercising this power today. We therefore have decided to propose rules which limit the exercise of that market power and remove some of the obstacles to entry which are the basis of that market power. The rules would prohibit bias, require CRS owners to give access to other carriers on non-discriminatory terms, and prohibit restraints on agents' use of multiple systems.

Our ability to forecast the future of the CRS industry is far from perfect. We cannot measure precisely the extent or duration of the market power or the limitations on it. These considerations lead us to conclude that it is appropriate to strike a balance which prevents competitive and consumer abuses but still allows the CRS market to function. Our proposed rules should be sufficient to alleviate the major problems that we have identified, but still give CRS owners great latitude in the design and marketing of their systems.

Given the dynamic nature of computer communications and airline distribution, the CRS industry should continue to be monitored by the Board or its successor even after our proposal is implemented. Should this proposal be inadequate, we would anticipate that the responsible agency(ies) would be ready and willing to consider further rules or either partial or complete divestiture. On the other hand, should the CRS owner's market power dissipate through new developments, the rules should be eliminated or modified. Therefore, we propose a mandatory reassessment of these rules by 1990.

1. *Bias.* With the exception of parties opposing rules altogether, all parties have identified bias as an area of abuse can lead to consumer deception and harm to competition. All support or at least accept rules on the subject. A majority of commenters urge us to adopt a simple prohibition of the use of carrier identify as a factor in creating displays.[2] Certain parties, however, argue that such a prohibition would not be effective, and urge us to require that displays be structured in particular ways.[3]

We will not adopt the latter approach to eliminating bias. We have consistently allowed market forces in the airline industry to determine as much as possible the quality and variety of services offered in the CFR industry. To now regulate CRS operations of carriers specifically, would be contrary to the intent of the Airline Deregulation Act. In addition, we hesitate to attempt to decide what single display format best meets consumer needs.

However, the display of connecting flight information presents special problems. All CRS systems now select a limited number of connecting points for each city-pair market and construct connections over those points and edit out certain connections, based on various criteria. This process creates a greater potential for abuse, which could not be readily detected. On the one hand, we recognize that the increased potential for abuse may justify imposition of some standards. On the other hand, we do not now have the information necessary to justify particular standards. Moreover, to defer action entirely while we collect that information would delay implementation of rules in other areas where we are prepared to go forward. We have therefore decided on a two-part approach. We are including as a part of the general CRS proposal, a rule that would prohibit use of carrier identity factors in selecting connecting points and selecting flights. We are also issuing a separate advance notice of proposed rulemaking to solicit suggestions for practical means of dealing with bias in connecting flights and to obtain information on the feasibility of various alternatives.

While we are not proposing to establish mandatory objective criteria at this time, the potential risks of permitting carriers to use total enplanements or flights (total size) at connecting point may warrant a specific prohibition. Some carriers are developing new hubs at smaller points as alternatives to such major hubs as Denver, Atlanta and Chicago. In the absence of any restriction, a CRS owner could adopt as an objective criterion the total size of each hub, e.g., select the five largest or ten largest hubs based on total flights or enplanements. Use of such an objective criterion would effectively deny listing to flights of a system vendor's competitor that elected to develop an alternative hub. We therefore request comments on whether we should expressly prohibit the use of size, at least as between medium and large hubs, as an objective criterion.

---

[2] Continental, Delta, DOJ, Frontier, Pan American and Western. No pro-rule commenter objected to simple bias prohibitions.

[3] American, Republic, ARTA, TWA and Western. Delta and the Joint Carriers specifically opposed Board-mandated display formats.

In an effort to enhance the effectiveness and enforceability of our bias rules, we are proposing two additional rules. First, we propose to require CRS owners to disclose the factors they use in constructing displays, in selecting connecting points, and in editing connecting flights. Many commenters, including CRS owners and user-carriers, support these rules. Second, we propose to require that CRS owners load and handle information in a non-discriminatory fashion.

2. *Pricing.* All commenters supporting Board intervention identified the pricing of CRS services as another potential problem area. A large number of commenters urge us merely to prohibit discrimination in fee levels.[4] They fear that any effort to regulate the level of fees would involve us in lengthy and difficult ratemaking, for which our authority is questionable. Some carriers urge us to go further and either set fees or prohibit unreasonable fees. They argue that fee levels are now excessive and that CRS owners have sufficient market power to maintain excessive fees, even in the face of a simple prohibition on discrimination.[5]

We have decided to prohibit discriminatory fees. As discussed more fully below, we anticipate that incremental revenues will be significantly reduced as a result of the elimination of bias. With lower incremental revenues, it is difficult to say that existing fee levels would be excessive. Indeed, determining reasonable fee levels for CRS's would be extremely difficult.

Although we are inclined to adopt the traditional view of discrimination, *i.e.*, one that permits cost-based differences in fees, we are also sensitive to the risk that such flexibility may lead to abuses. Therefore we are also seeking comment on whether to require each CRS owner to establish uniform fees that would be charged to all carriers, regardless of differences in cost in providing CRS services to different carriers.

Most commenters favoring rules also request that we prohibit CRS owners from requiring the purchase of or payment for other services as a condition of access to their CRS system (tying arrangement).[6] Tying arrangements currently take the form of requirements that carriers accept interline ticketing fee agreements as a condition for CRS access, and they are objected to as abuses of CRS market power. This tying is simply another mechanism of discriminatory pricing. None of the pro-rule commentors have objected to such a prohibition. We propose to prohibit the practice.

3. *Service Enhancements.* A related issue raised by a number of commenters is access to service enhancements, *i.e.* services available through CRS's beyond reservations and ticketing capability. Some commentors, including TWA, a CRS owner,[7] have requested that we require that access to all service enhancements by given to participating carriers because otherwise the system owner has an unfair advantage. American opposes forced licensing.[8] It argues that access to service enhancements is not critical to assuring that the agent has access to the information necessary to book a reservation on a given airline, and that the ability to offer exclusive enhancements is merely a natural attribute of the service competition that spawned CRS development.

We propose to strike a middle ground. We would permit CRS owners to retain exclusive use of enhancements, but require that CRS owners offer them to all other carriers on non-discriminatory terms once they offer enhancements to any outside carrier. This approach prevents enhancements from being used as a weapon to injure competition, while maintaining the incentives for continued development of enhancements. However, we will also consider comments on whether this exception for CRS owners should be allowed.

4. *Travel agent contracts.* Many parties urge us to regulate certain aspects of contracts between CRS owners and travel agents. Some urge us to prohibit in general terms provisions that inhibit use of multiple systems.[9] Certain members of this group also ask us specifically to prohibit provisions that discourage an agent from using competing systems to book a CRS owner's flights.[10]

We propose to prohibit contract provisions that impede the use of multiple systems and that impede switching between systems. In this regard, we would prohibit contracts of longer than five years duration. We are also proposing specific prohibitions on contract provisions that would limit the agent's freedom to choose among systems in connection with booking a CRS owner's flights and that require parity in the number of terminals an agent has from various CRS providers. Contract provisions such as these have the effect of insulating CRS owners from competition and increasing the difficulty of entry into the CRS market.

5. *Booking and sales data.* CRS's generate very detailed information about booking patterns which are made available to the marketing departments of CRS owners. Data that CRS owners make available to other carriers is much less detailed. Most commenters have urged us to regulate practices in this area to prevent CRS owners from having an unfair competitive advantage. They are split as to the appropriate solution. About half urge us to prohibit use of any such information by CRS owners' marketing departments.[11] The remainder contend that such a prohibition would be unenforceable.[12] They clain that only a compulsory disclosure rule would be effective in curing the problem.

We share the doubts about the effectiveness of prohibiting information dissemination to CRS owner marketing departments. We propose requiring CRS owners to offer any booking and sales data that they choose to generate to other carriers. CRS owners would not be obliged to generate booking information. If they do, they can charge non-discriminatory fees for providing the information to other carriers.

6. *Applicability.* We propose to regulate only carrier-owned systems, and only those used by travel agents as that term is commonly understood today, *i.e.* ticket agents that hold themselves out to the public as providing neutral representation of the industry. Internal reservations systems would not be included. The rule would apply to sales of domestic and foreign air transportation.

B. Procedures

In the Advanced Notice of Proposed Rulemaking (ANPRM) EDR-466, we proposed to conduct an informal rulemaking, as defined by the Administrative Procedure Act, 5 U.S.C. 553. We indicated that this type of proceeding would be used to develop rules of general applicability that are prospective and legislative in nature, and to develop a "factual record, responsive policies and appropriate

[12] American, Frontier, Republic and Western.

regulatory action."[13] We solicited comments on the proposed procedure.

We also have indicated on two occasions, in the ANPRM and Order 83–10–74, that we would not hold oral evidentiary hearings. In the ANPRM we stated that any final rule in this case would not rest on "resolution of particular issues of adjudicative fact" [14] but rather on policy determinations based on arguments, opinions, and facts submitted by commenters, and gathered pursuant to our request for information (Order 83–8–105). In Order 83–10–74, in response to various motions and petitions filed by United, and a petition for reconsideration of Order 83–8–105 filed by American, we again rejected the need for an oral evidentiary proceeding. We reiterated that we were not engaging in fact finding about past conduct—which is the end result of an adjudication. Instead, we were concerned about the need for future, prospective rules. However, we noted that it was necessary for us to gather specific facts from carriers to determine, what, if any, future actions were necessary. We also indicated that Order 83–8–105 was not an enforcement proceeding, and rejected efforts to turn it into one. Thus, while reviewing documents—some of which related to past conduct—our focus has been to assess what prospective course we should take. We further stated that comments filed by United in its Petition for Adjudicatory Hearing, Docket 41735, would be considered fully in this proceeding. We address those arguments below.

United alone maintains in three separate documents—a Petition for an Adjudicatory Hearing filed October 13, 1983, and Comments and Reply Comments to the ANPRM—that the Board must undertake to conduct an adjudication. American, in its Petition for Reconsideration of Order 83–8–105, initially agreed with United's position. However, it has not maintained its argument in its comments to the ANPRM. Essentially United makes three points: first, allegations have been made, and facts have been disputed, that can only be, and must first be, resolved through adjudication prior to any rulemaking proceeding, and that the Board is essentially engaging in an adjudication despite labeling it as rulemaking; second, under § 411 we are required to hold an adjudication; and, third, if the CAB voids United's existing CRS contracts without an adjudication United will be deprived of property without due process of the law.

[13] ANPRM at 22.

[14] ANPRM at 22.

The DOJ supports our decision, and the statutory basis for that decision, to proceed by informal rulemaking without holding an oral evidentiary hearing and also asserts that section 411 does not require that formal rulemaking procedures be used. The DOJ also concurs that we are not engaging in *de facto* adjudication, but rather that our intent and procedures clearly fall within the well defined boundaries of rulemaking, and that a trial-type hearing is not required whenever a rulemaking results in a restriction of property rights.

1. *Adjudicatory facts.* We disagree with United that we are engaged in determining the type of facts that would require an adjudication. First, we are engaged in rulemaking under the definitions of the terms "adjudication," "rulemaking" and "rules" contained in the APA, 5 U.S.C. 551(7), (5) and (4), respectively. Second, because of our intention to promulgate rules of general applicability, we are not engaging in an adjudication masquerading as a rulemaking.[15]

To assess whether an agency is engaged in rulemaking or adjudication, courts determine whether the proceeding involves "adjudicative" or "legislative" facts. Professor Davis defines the terms as follows:

> Adjudicative facts are the facts about the parties and their activities, business, and properties. Adjudicative facts usually answer the questions of who did what, where, when, how, why, with what motive or intent; adjudicative facts are roughly the kind of facts that go to a jury case. Legislative facts do not usually concern the immediate parties but are general facts which help the tribunal decide questions of law and policy and discretion.[16]

We recognize that "[w]here adjudicative, rather than legislative facts are involved the parties must be afforded a hearing to allow them an opportunity to meet and to present evidence." [17] However, we disagree that the facts gathered, or the use of those facts, falls within the commonly applied definition of "adjudicative facts." We conclude instead that they fall within the term "legislative facts."

United has tended to view our rulemaking procedure as an attempt to find it in violation of the antitrust laws or to have engaged in unfair or deceptive trade practices. It thus characterizes our action as essentially an adjudication. It seems that United views our request for information, for instance, as an attempt to determine if United's past actions "have violated" the laws.[18] It focuses on specific words used in the ANPRM and Order 83–8–105, and from those selected words argues that we are attempting to assess what wrongful acts United has in the past undertaken.[19] For example, United argues that we asked for organizational charts and the identities of certain key personnel because it "would be of interest in an attempt to assess individual wrongdoing."[20]

These claims are untrue. We sought this information pursuant to Order 83–8–105 to see how the various companies were structured and to expand our own knowledge of how the carriers operated their CRS's—not to assess individual culpability.

The focus of our rulemaking has been on what prospective actions we could or should take. A basic knowledge of the industry was required. Solicited information, and various comments gave us a sufficient basis to proceed—not to punish any carrier for past actions or assess whether violations of the antitrust laws have occurred. In addition, we do not resolve here allegations of wrongdoing.

United and the DOJ spar over their comparison of section 411 with section 5 of the Federal Trade Commission Act, 15 U.S. 45. The DOJ cites *National Petroleum Refiners Ass'n* v. *FTC*, 482 F. 2d 672 (D.C. Cir. 1973), *cert. denied* 415 U.S. 951 (1974) for the proposition that under section 5, which is analogous to section 411, an adjudicatory hearing need not be held before a rule is promulgated. United cites 15 U.S.C. 57(a), to support its argument that the FTC must hold an adjudication prior to issuance of any rule. (United agrees that section 411 was closely modeled after section 5 of the FTC act). Whether or not the FTC must hold an adjudication prior to issuance of a rule under section 5 is not relevant here as the Federal Aviation Act does not contain the same explicit statutory language relied upon by United—section 57a of the FTC Act. Indeed that language was added to the FTC Act in response to the decision in *National Petroleum Refiners* that the FTC could issue rules without holding

an adjudication. Congress did not similarly amend section 411. To the extent that analogies can be drawn between section 5 and section 411, the addition of section 57a to the FTC Act in no way diminishes the Board's rulemaking authority under section 411.

2. *Statutory authority.* We have primarily relied upon sections 102, 104 and 411 as the statutory authority for our proposed rule. As noted in the ANPRM, those sections of the ADA provide ample authority for our decision to employ informal rulemaking procedures.[21] United, however, argues that sections 102 and 204 are not relevant as to whether we proceed by rulemaking or by adjudication, since neither section address which course we must take.

United recognizes that section 411 does not contain the words "on the record" but argues that despite the absence of that language the application of the statute is "essentially adjudicative" and thus we must hold a hearing. United also contends that because section 411 contains the word "order," and the definition of "adjudication" under the APA also includes the word "order," we therefore must engage in an adjudication.

The DOJ asserts that formal rulemaking is necessary when the language of the statute includes the words "on the record"—which sections 102, 204 and 411 do not.

We agree with the DOJ that we are not required to undertake formal rulemaking or engage in adjudication in this proceeding. The language of all the statutory sections does not contain the words "on the record" and consistent with Supreme Court decisions we believe our procedures fully satisfy section 553 of the APA.[22] We also may provide for oral argument which would give parties a "greater opportunity to persuade and enlighten" [23] the Board, than is required under the APA. Also, as noted in the ANPRM, while section 411 does provide for a notice and hearing before the issuance of a cease and desist "order" we consistently have held that we need not hold an oral evidentiary hearing when we engage in rulemaking.[24] In addition, we are not here issuing a cease and desist "order", and thus United's argument concerning "order" and "adjudication" too must fall.

Finally, if we were engaged in "essentially an adjudication" perhaps case law cited by United would require us to hold a hearing "on the record" despite the absence of that phrase in any of the statutory sections relied upon here. However, we need not address that issue there because we are *not* engaged in "essentially an adjudication", as discussed earlier.

3. *Due Process.* We also do not agree with United that our action here will deprive it of property without due process. First, we are providing United with the processes attendant to informal rulemaking. United's argument is that that form of process is inadequate because we are restricting their contractual rights. However, trial-type processes are not required whenever a rulemaking restricts a property right. Virtually all substantive rulemaking affects or restricts property rights and the courts have not overturned rules merely for that reason.[25]

The DOJ notes that our chosen forum provides for much wider participation than would occur if we were engage in a adjudication. In *Hercules, Inc.* v. *EPA*, 598 F.2d 91, 118 (D.C. Cir. 1978) the court noted that even if only one company was subjected to a proposed toxic substance rule, such a standard affects more than that particular company and "[r]ulemaking, not adjudication, is the appropriate, flexible procedural mechanism to accommodate the input of all concerned." We agree with the DOJ's and the court's conclusion that our proposed forum will provide all concerned the ability to comment on general rules that we believe will have a far-ranging beneficial effect.

A claim for adjudicatory procedures must rest on the existence of material *facts* in dispute, not arguments, inferences, conclusions, public policy or economic theory. For the most part United's specific points allegedly requiring adjudication are either not facts, or are facts upon which we do not rely. Moreover, we do not propose to reach a decision "as to whether past conduct was unlawful so the proceeding is characterized by an accusatory flavor and may result in disciplinary action."[26] We have made no accusations of illegal conduct and no civil or criminal penalties will be meted out. In addition, United does not dispute many of the *facts* we rely upon, including the number of agents automated by APOLLO and other systems, the absolute and relative sales revenues flowing through these systems, the differences in access prices and other terms afforded participating carriers, the listing of flights on the basis of carrier identity, the existence of hundreds of millions of dollars in total incremental revenues. Whether American actually drove New York Air out of a specific city-pair market through CRS manipulation is not determinative.[27] Likewise with respect to agents' willingness to work around bias, every study shows that screen placement affects sales. Furthermore, it is an economic judgment that observed CRS access disparities are not examples of legitimate value of service pricing. We have reviewed the assembled, uncontested facts and based on the knowledge gained and expertise in air transportation, reached conclusions on market concentration, structure, and performance, as well as on injury to consumers andcompetition. United is not entitled to an adjudicatory proceeding to contest those conclusions. We are obliged to inform all interested persons of the facts on which we have relied and the processes used to reach our present position. We have done so. United is now free to challenge those processes and conclusions in its comments in response to this notice and in court, but can demand no more.

C. Divestiture

We also reject proposals that we order divestiture—complete or partial—at this time. Proponents of divestiture-type remedies have put forward three proposals: requiring airlines to divest themselves completely of CRS's, ordering airlines to set up separate profit centers for their CRS's with a "Chinese wall" between the two entities (including requiring that financial cost reports be generated and distributed), and mandating that carriers set up "maximally" separate subsidiaries to lower barriers to entry and eliminate incremental revenue. Each of the proponents of these proposals argues that its remedy would ensure a competitive market place, with a minimum of further government intervention.

Opponents generally claim that these remedies are unwarranted, that no basis

[27] American Reply Comments, pp. 39–40.

for them exists, and that we do not have the authority to order divestiture. In addition, some commentors assert that general standards are the best way to address CRS problems, that competition will foster better systems, and that efficencies inherent in vertical integration should not be destroyed. Still others argue that divestiture would not prevent bias, discriminatory access fees, or misuse of information by the third party vendors, and that, therefore, consumers would not be protected.

Divestiture/separate subsidiaries could arguably "cure" all of the ills asserted, and involve little government intervention in the future. On the other hand, at this point, the necessity for such action is not clear. First, general rules should have a direct effect in preventing CRS market abuses, while at the same time encouraging innovation and fostering efficiencies. In addition, general rules should enable the industry to continue to mature, without government direction of that growth. This should permit companies to reap the rewards of technological innovation fostered by competition, while at the same time reduce regulatory oversight of the market consistent with the intent of the Airline Deregulation Act.

Second, divestiture cases require an inquiry into specific facts and a review of past conduct to determine whether or not the remedy is appropriate. This would, necessarily, involve adjudicatory-type hearings. As a practical matter, these cases often take years to resolve, and thus the effectiveness of our role would be questionable. Third, there may be a whole host of efficencies produced by the vertical integration of airline ownership of CRS that are otherwise unobtainable. For example, transaction costs may be lower for a vertically integrated firm than if we required separate ownership. We do not now have sufficient information to determine which, if any, efficiencies or benefits would be lost or gained by divestiture, and thus, at this time we will not undertake to employ such a remedy. Finally, we note that while we reject divestiture at this time, it may be a viable option in the future, if, after our proposed rules are made final, they prove ineffective. We suspect that if the market does not function competitively in the future, evidence of abuses would surface, and DOJ or any aggrieved party could then present its arguments for divestiture to a district court.

Our Proposal

We propose to issue regulations prohibiting display bias, unjust discrimination in fees and access to service enhancements, and the tying of provisions of computer services to the purchase of other goods or services. The proposed Part 255 would also enable travel agents to use multiple CRS systems and switch systems more easily—thereby permitting new and smaller CRS owners to make inroads into the market. The proposed rule would also regulate use of travel agent sales and booking data generated by CRS's. We discuss the scope of the rule after explaining the substantive provisions in more detail.

I. Specific Provisions of the Rule

A. Display of Information § 255.4

Proposed § 255.4 deals with the problems of bias, and the related problem of information loading.

Bias can reduce competition in air transportation. To the extent that bias reduces the bookings per flight of disfavored carriers, their per passenger costs are increased. Bias also can cause a carrier contemplating entering a market served by a system owner to reconsider its decision. It would have to ponder not only loss of passengers caused by specific market bias, but also the potential loss of passengers systemwide caused by a general increase in bias against its services in retaliation for its entry.

Bias can also result in direct consumer injury which is not easily quantified, but can be readily identified. We know that incremental revenues industry-wide total hundreds of millions of dollars a year. Some percentage of that total logically must constitute consumer injury in terms of dollars—injury also occurs through potential added inconvenience via selection of a less desirable flight because of bias. The magnitude of consumer losses is likely to be in the tens of millions of dollars a year.

1. *Requirement of Comprehensive Display.* Paragraph (a) requires all systems to offer comprehensive displays showing the services of all carriers. Thus, a CRS-owner cannot exclude any carrier. This requirement, when combined with paragraphs (b) and (c), also mandates that displays be free from bias, i.e., that carrier identity not be considered in the selection and ranking of flights.

The rule would apply to all carrier owned CRS's, even those that offer agents direct-access capabilities to other carriers' internal systems. We have considered Eastern's argument that such systems be exempted from any anti-bias rule, but find them unpersuasive. Eastern alleges that with direct/access, agents can overcome any primary screen bias by simply jumping around from biased internal system to biased internal system. In addition Eastern claims that it would be competitively handicapped if it were subject to an antibias rule. Agents would have access to other carriers' biased internal displays, but Eastern would not have the opportunity to counter with bias in its primary display.

Eastern has underestimated the potential consumer and competitive harm from bias for these types of systems. The process of switching between internal systems is likely to be time consuming and detract from the efficiencies that lead agents to use CRS's in the first place. The record suggests that agents use the direct access feature primarily to get more accurate information on last seat availability and to confirm status of reservations, not to overcome bias.

Eastern has also overstated the potential burden of offering an unbiased display. SODA already offers a comprehensive display, admittedly a biased one. In terms of direct expense, Eastern will face the same costs as other system owners—the cost of unbiasing an existing display. As to the competitive disadvantage, Eastern is free to encourage agents to use, its internal displays. In fact, Eastern's SODA system would be comparable to American's SMART system, which American obviously believes will give it a competitive advantage, not put it at a disadvantage.

There is also a serious drawback to Eastern's proposal. The exception could make the prohibition of bias totally ineffective. American, TWA, or any other carrier with direct access capability, could claim the benefit of the exception and carriers without such capability might be prompted to develop it. In a short time we would return to the very situation we have today. Agents would be faced with bias in whatever carrier owned system they used, and could only overcome it through time consuming searches through numerous biased screens.

2. *Display Bias.* Paragraph (b) and its subparagraphs set out our proposed rule on bias. The paragraph itself prohibits the use of carrier identity factors in the ordering of flight displays.

Subparagraph (1) directs that flights be ranked on the basis of service factors that do not consider carrier identity and are applied equally to all carriers. System vendors would be free to select the service criteria to be used. This subparagraph would reinforce the basic requirement that no carrier, including the system vendor, may receive a

preference in the listing of flights based on its identity.

The second subparagraph would require vendors to disclose to carriers and agents, on a current basis, both the creteria they use in ranking flights and the weightings attached to each. Many parties have commented that such publication is necessary to ensure that system vendors are not evading the Board's rule, and to allow agents to evaluate intelligently the information that they see displayed. We are inclined to agree.

We have decided against specifying the service criteria to be used in constructing direct schedule displays, that is affirmative display requirements. American, for example, has requested us to require consolidation of direct and connecting flights, and others have requested that we mandate use of the OAG format, which separates direct flights from connecting flights and lists flights by departure time. Each of these requests is based on a similar line of reasoning: unless we establish uniform objective criteria, system vendors will abuse their discretion to select service criteria so as to favor their own flights in their displays.

We recognize that this risk is present with a rule that simply prohibits use of carrier identity factors. However, we do not believe that the risk justifies the government imposition of uniform display criteria at this time. First, the disclosure requirement should substantially reduce the risk of manipulation. Second, a rule dictating service factors would stifle competition, innovation, and variety in the industry unnecessarily.

3. *Connecting Flight Bias.* a. *The need for special rules.* We are proposing a separate rule on connecting flight displays. While connecting flights will be subject to the general prohibition on use of carrier identity factors, they pose additional problems. All system vendors today select a limited number of possible connecting points over which to build connections. They then edit all of the possible flight combinations over each point. Generally the purpose of edit procedures is to eliminate duplicate and unattractive connections so that the agent need not search through multiple display screens in order to find connections that are realistic for the traveler. However, the procedure may also be used to eliminate attractive competing services.

A number of parties have suggested that because of these complicating factors, a simple rule against bias would be ineffective. The multitude of selections that a system vendor has to make to offer useful and timely displays of connections simply would make such a rule unenforceable. They suggest that we impose standards for selecting and displaying connecting flights. They argue that imposition of standards would make manipulation more difficult and also make detection easier.

Others have suggested that we require a minimum number of connecting points—nine has been urged by American. They argue that unless we require connections to be constructed over a large number of connect points, carriers will inevitably pick points that favor their flights and will fail to show connecting flights over other hubs that are as good if not better. If the required number of connecting points is high, however, it is more likely that even if the owner's hubs are used, most other suitable connecting services will be shown on the display.

B. *The proposed rule.* We have decided as an initial step to take the more limited approach of merely prohibiting bias in connections. The proposed rule starts with a general prohibition on use of carrier identity factors in the display of connecting flights. It is followed by two subparagraphs that govern specific aspects of selection of connecting flight display.

The first subparagraph requires that connecting points be chosen on the basis of service criteria that do not consider carrier identity and that are applied to all carriers equally. Subject to those limitations, the CRS owner would be free to choose the criteria. The second requires that all editing be done on the same objective basis for all carriers. Thses two subparagraphs should eliminate one of the more pernicious forms of bias in connections—the failure to list some attractive connections. Imposing a requirement that hubs be selected without regard to which carriers serve the hub will reduce the risk that a competitive carrier's connecting flights are not displayed because it happens to use a connecting point that the system vender does not. The system vendor would not be permitted to include its major hub or hubs automatically as connections for any city pair. Those hubs would be weighted on an equal footing with all other possible connecting points.

We also propose to require that CRS owners provide carriers and travel agents with up-to-date information on their chosen connecting points and all criteria used to select connecting points and to edit flights. This disclosure requirement should assist in monitoring carrier performance under the rule, and make it more difficult to circumvent our rule.

c. *The need for more information.* We have decided not to propose specific standards for display of connecting flights, or to specify a minimum number of connecting points in this notice. We recognize that a simple bias prohibition may not be completely effective. Our proposal affords CRS carriers substantial latitude in selecting criteria to be used in order connecting displays. It may be difficult to determine whether competitive considerations have come into play in such circumstances. Nevertheless, as discussed in more detail in the Advance Notice of Proposed Rulemaking being issued concurrently, we are concerned about the feasibility and ramifications of other options.

At this time, we do not have enough information to evaluate adequately the various requests for affirmative rules on connecting flights bias. The time required to obtain and analyze that information could substantially delay enactment of any rule. Rather than delay our entire CRS program while we explore this issue more fully, we are now proposing general prohibitions on connecting flight bias. We are, however, simultaneously issuing an advance notice of proposed rulemaking that focuses on more specific approaches to connecting flight bias.

4. *Information loading.* Our proposed rule on information display contains one other element: a rule on loading of information. Many parties have complained that the inclusion of erroneous information in a system is almost as serious a problem as bias. Parties allege that new schedules or fares have not been included, that full flights show up as available, and that flights with unsold seats show up as full. While CRS owners claim that most of these problems are caused by human error, some participating carriers suspect that these mistakes are intentional.

We agree that some rules are appropriate in this area. Like bias, misinformation in the CRS can be injurious to the consumer. Erroneous information about a carrier's services can cause agents to avoid booking on it; fewer bookings raise that carrier's costs per revenue passenger. Competition between it and the CRS owner is thus reduced, not because of any change in the relative quality or costs of the competing carriers' air transportation services, but because the flow of information is controlled by the CRS owner.

Our proposed rule on information loading has three elements. The first is a general requirement that information provided by carriers be loaded with the same care and timeliness as that of the CRS owner once it is received. This provision establishes a rule of fair and nondiscriminatory treatment. It is not a rule of absolute equality. The rule requires only that the time between receipt of information on changes and the loading of that information be essentially the same for all carriers, including the owner. It does not, however, prevent the CRS owner from updating information about itself more often, if the CRS operation receives more frequent information about the owner's flights, fares and availability.

The second element is a requirement that CRS owners disclose their information input formats and procedure. This is designed to reduce the risk delayed carriers are apprised of the CRS owner's information loading procedures and formats, they should be better able to supply information that facilitates prompt loading and accuracy.

The third element requires that if system vendors offer enhanced loading capability to any carrier, it be offered to all on a non-discriminatory basis. This is intended to address the concerns of parties that urge for us to require vendors to allow for direct updating of information. These parties claim that so long as information must be processed by the vendor's personnel, it can be manipulated, and they argue that the only effective means of precluding manipulation is to permit direct updating.

An absolute direct updating requirement has serious drawbacks, however. Without some assurances of technical compatibility, and controls over access to data base for updating purposes, the risks of both intentional and unintentional misinformation could actually increase.

Once a vendor has shown the capability and willingness to overcome these problems, however, by providing another carrier with enhanced information loading capability, it is appropriate to require that all carriers willing to meet its system's technical and operational requirements have the opportunity to use the enhanced capability on non-discriminatory terms.

B. Contracts with Participating Carriers § 255.5

The next section of our proposed rules deals with certain aspects of contracts between CRS owners and participating carriers which we believe to be detrimental to competition in air transportation.

1. *Unjust price discrimination.* The first paragraph proposes a requirement on pricing. As discussed above, it appears that some CRS owners are using their market power to price access to participating carriers in a discriminatory manner and/or on the basis of the degree of competition between them. This raises the costs of CRS owners' competitors and stifles competition. The ability of some CRS owners to dictate the costs of their competitors' information flow to travel agents in what may be an arbitrary fashion justifies rules on the pricing of CRS services.

Our rule would prohibit unjust discrimination between carriers in the setting of fees. It would not necessarily require that CRS owners charge equal prices to all users. Price differentials based on cost differences would be permitted so that participating carriers could have incentives to reduce their costs to the CRS owner. Without such incentives, the CRS-owner's cost could be higher—higher costs that would be reflected in higher fees for all participating carriers.

We are very concerned, however, that any rule that allows cost based price differences not lead to the perpetuation of the great disparity in fees that we see today. We anticipate that the rule would create a strong presumption in favor of equal fees. In the event that a fee was challenged as discriminatory, the burden would be on the CRS carrier to substantiate the cost differences that justify fee differentials.

Such cost differences might arise in a variety of ways. A CRS customer might offer services that reduce the system vendor's cost of handling its data and transactions. For example, the customer might prepare the data in the vendor's format or it might offer the vendor use of an underutilized communications line. These and other cost savings resulting from such arrangements could be recognized in the fees under our rule.

Systems might offer different levels of service. In some cases, carrier schedules appear on the system, but the agent is required to contact the carrier by phone to make this reservation. If system vendors offered truly different service levels, and CRs users were free to choose among them without any coercion, fee differentials based on the differences in cost of the services would not be unjust or discriminatory.

2. *Resolving disputes.* We have considered the arguments of various parties that a rule prohibiting discrimination would be unworkable, or that it would lead to full scale ratemaking. We believe that once the rule is in place, government intervention should be rare. The presence of certain carriers in the CRS is important to agents and therefore to CRS owners. Their importance to agents will give them some countervailing bargaining power. It is expected that under a non-discrimination rule CRS owners will have to approach this group of carriers first. The fees that result form these negotiations, along with our rule, should restrain abuses in CRS pricing for all other carriers.

To further enable the market to police itself, we also propose to require that all CRS contracts with participating carriers provide for expedited arbitration of fees. (§ 225.5(c)). This clause is designed to avoid the lengthy delay that would be involved in a traditional ratemaking case before the Board (or its successor), but would provide parties that believed that they were the victims of price discrimination with a means of seeking redress. We have imposed arbitration clauses often as a part of Labor Protection Provisions in merger cases, in recognition of the need to provide a sure and expeditious means of resolving disputes, and in recognition of the limits on the Board's ability to resolve questions relating to LPP's quickly. The same need for a means of prompt dispute resolution exists here. Therefore we conclude that an arbitration requirement is appropriate to ensure that our proposed rule is effective in controlling discrimination. We invite specific comments on this element of our proposal.

3. An Alternative: completely equal fees. Nevertheless, we are concerned that a rule permitting cost-based differences in fees may permit abuses. Such abuses would likely be most burdensome to the new smaller carriers that now are paying the highest fees.

A possible solution to this problem that would avoid some pitfalls of full-scale rate regulation would be to take a more restrictive view of discrimination. We would welcome comments on an alternative rule of strict equality. Each system vendor would be required to establish uniform fees for its services, but they would be free to determine the level of those fees.

At the moment, we have some doubts about the benefits of such a rule. The rule could conceivably eliminate some of the incentive for participating carriers to reduce the system vendor's costs of servicing them. A rule of strict equality might also lead to cross subsidization among CRS users. It is possible that costs of providing system services to carriers will vary to some degree between customers.

We request parties to comment on a rule requiring strictly equal fees as an alternative to a rule prohibiting unjust discrimination in fees. Parties should focus in particular on the need for such a rule, *i.e.* the risks of abuse of a rule on discrimination, and on the potential for harm from the distortion in the market that a rule requiring strict equality would produce.

4. *Rate-setting.* Finally, several parties have urged that we go further than a simple prohibition on discrimination. They urge us to either set rates, or impose a reasonable fee requirement. They argue that besides the problem of fee differentials, fees charged to competitors—especially low-cost new entrants—are excessive. Without a rule on fee levels, they suggest that CRS owners may simply charge excessive fees to all carriers.

Rate regulation has been shown to impose such distortions on dynamic markets that we view it as a last resort. Moreover, the accounting complexities that would be involved in setting reasonable rates for CRS services are unusually great. For example, fees to travel agents as well as carriers would have to be regulated. This in turn would require allocations of expenses and investments between agents and carriers. In addition, further allocations would have to be made to account for the fact that most CRS owners use much of the same software and hardware for their internal systems. The time and effort required to resolve these questions would be substantial.

Most important, any effort to control fees could lead to substantial distortions in the CRS market. While there may be market power present, some competition occurs. Any attempt to set fees could reduce the influence of competitive forces. If uniform fees were set for the industry, lower cost systems could not exploit this advantage to attract a portion of the business from incumbents. There would be no long run improvement in the conditions of market power. Even if fee levels were set for individual systems, there would be a loss of flexibility and ability to react quickly to changing circumstances. Setting fees could also reduce incentives to innovate or increase efficiencies. In contrast, the rule on price discrimination does not preclude competition between CRS suppliers. It only imposes a certain fairness requirement on that competition.

5. *Tying.* The proposed rule also would prohibit "tying". It would prohibit the CRS owner from requiring the purchase or sale of any goods or services as a condition for participation in the CRS. To date, the problem has come to the Board's attention in the context of interline fees and CRS participation. CRS owners appear to require participants to agree to pay reciprocal fees for processing interline tickets as a condition for participation in the CRS. CRS-owners write more interline tickets than participants, such that the owners come out ahead. The ability to tie can be exercised just effectively in other areas. Therefore, the proposed rule would prohibit tying of any goods or services. The rule would not, of course, prohibit voluntary agreements in which goods or services are substituted for cash in the payment of fees.

Tying arrangements, especially in the form of mandatory net ticketing agreements, raise the cost of air transportation. CRS participants must not only pay the basic booking fees, but must also pay the interline ticketing fees. This effectively raises the cost of air transportation. The impact is effectively the same as that of discriminatory access fees.

In addition, there appears to be no valid business reason for tying interline ticketing and CRS services. A CRS can display any other carrier's service. Owners are compensated for that service through the booking fee. If the fee is not sufficient to cover costs, the solution is to raise the booking fee. Conversely, carriers can write interline transportation on each other even if the first is not a participant in the second's CRS system. Compensation for this service can occur without reference to CRS's.

We have considered the arguments of opponents of a rule on tying, and we find them unconvincing. United, for instance, argues that CRS services and interline ticketing are not separate services, and that therefore, there can be no tie in the traditional sense. As we disussed above, however, CRS's do not represent a method of distribution *per se*. Rather they represent a method of providing information to a distribution outlet. As such, CRS access is a distinct service from interline ticketing. Therefore CRS's and interline ticketing can be considered as separate services for purposes of analysis.

United argues that its linkage between CRS services and net ticketing fees is not the tying condemned by the antitrust laws. It claims that the tying prohibited by the antitrust laws is the use of market power by a supplier over one good or service to force customers to purchase a second. United is not forcing carriers to choose its interline ticket writing services over other competing services. It claims that almost all carriers desire United's interline ticketing service, and that the linkage is olny intended to insure that United is reimbursed for providing them.

This argument ignores the more fundamental nature of the harm of tying arrangements. Without a prohibition on tying, there is a strong risk that CRS owners will be able to use compulsory net ticketing agreements to evade the discriminatory pricing prohibition. Some CRS owners have shown an ability to compel net ticketing agreements as a condition for CRS access, and they have managed to differentiate fees widely. The rule on discriminatory fees will not diminish the economic incentives of CRS carriers to charge higher fees to their competitors. A failure to prohibit tying arrangements in the face of their existence today would provide CRS owners with an opportunity to do so, our prohibition on discriminatory fees not withstanding.

C. Subscriber Contracts § 255.6

The next section of the proposed rule sets down requirements for CRS owner contracts with subscribers, which we define to be travel agent users. The first paragraph would prohibit subscriber contracts longer than five years. The remaining paragraphs would prohibit direct and indirect restraints on use of multiple systems by individual agents. These can take the form of a direct prohibition or, more commonly, of requirements that a given percentage of bookings made on the CRS owner be processed through its CRS. In addition, the rule would prohibit CRS vendors from conditioning commission payments on the use of its system. This would include conditions for receiving overrides as well as conditions for receiving base commissions.

Many parties have complained that the combined effects of long-term contracts, "exclusive use" provisions, excessive liquidated damages clauses, and below cost pricing are to impede entry into the CRS industry and expansion by small vendors. These practices are employed to get the agent onto the owner's system and keep it there. Once on, any carrier cannot avoid dealing with the CRS owner if it wants to communicate with the agent. If the CRS owner has enough agents signed on, the carrier cannot avoid dealing on the CRS owner's terms.

We are concerned about the ramifications of these features of the owner-subscriber relationship for competition in the CRS market and their ramification in the air transportation market. While we have not selected major structural remedies at this time, we also recognize that to the extent that

market power is the source of CRS problems today, reduction of market power may be the best long-term solution. These practices appear to entrench vendors and hence preserve market power. As discussed below, there appears to be little other business justification for contract terms in excess of five years or for "exclusive use" arrangements. While possession of market power is not itself necessarily condemned under antitrust policy, use of contract terms such as this to maintain market power may well be. *U.S.* v. *United Shoe Machinery Corp.*, 110 F.Supp. 295 (D. Mass. 1953), *U.S.* v. *Aluminum Co. of America*, 148 F.2d 416 (2nd Cir. 1945).

We also believe that long-term contracts and the exclusive use provisions have the effect of reinforcing or preserving the consumer deception that results from bias. Both terms make it more costly and difficult for agents to use alternate sources of information, even if they are dissatisfied with the misinformation provided by carrier-owned systems. Admittedly, misinformation should decrease once our rules prohibiting bias are in place. Nevertheless, as a number of parties have argued, our rules may be subject to circumvention. The fact that agents can more easily seek alternate sources of information may limit system vendors' incentives and ability to continue to bias.

The arguments against rules in these areas have not dissuaded us from proposing regulations—with one limited exception. American claims that under existing tax laws, five-year contracts are necessary for agents to claim the full benefit of investment tax credits. If this is true, it would appear reasonable to permit five-year contracts. We invite comments on this particular argument, and on whether a different contract term is appropriate.

The other argument against limitations on the length of contracts, in contrast, has little merit. Opponents suggest that long-term contracts enhance the ability of new entrants to compete. Under this theory, if long-term contracts are the norm in an industry, then a new entrant can expect to negotiate similar long-term contracts. This ability reduces the risk of entry substantially and thereby makes entry easier. Our problem with this theory is that it ignores one practical reality. The CRS market is almost saturated. New entrants benefit little from the reduced risks inherent in long-term contracts if similar long-term contracts held by incumbents mean that very little of the market is actually open to the new entrant at any given time. In all likelihood, the risks inherent in being locked out of substantial segments at any given time outweigh risk reduction associated with long-term contracts.

None of the parties have convinced us that "exclusive use" provisions should not be prohibited. Some parties have said that their "exclusive-use" clauses are merely defensive countermeasures against clauses of other system vendors. To the extent that this is true, our rules will eliminate the need for such defensive measures. Parties have also claimed that they are merely a quality control device. as the CRS owner's own system is likely to have the most accurate and up-to-date information about its own services, it is not unreasonable to require agents to use its system in booking its air transportation services. The flaw in this argument is that the higher quality information itself provides a powerful incentive to use the vendor's system when booking flights on the vendor. The primary effect of the exclusive use clauses is to preclude agents from using other systems to overcome poor quality information about other carriers' services.

United offers one more justification which has not persuaded us against the rule. United claims that "exclusive-use" clauses are necessary to preserve competitive balance in the travel agency industry. It argues that in the absence of such clauses, the larger, richer agents would buy multiple systems, primarily to get the broadest range of availability information. Smaller agents that could not afford multiple systems would be at a disadvantage, and would ultimately lose customers because of their inability to offer the same service.

It goes without saying that it is not for United, or any other private business, to dictate the terms of competition in the travel agency industry. The whole purpose of competition is to reward those that offer superior service or lower prices. The ability to purchase multiple systems represents rewards for having better served consumer needs in the past and is itself a form of improved customer service. Neither United nor any other CRS vendor should interfere with the natural workings of the market place.

Two aspects of the vendor-subscriber relationship are not addressed in our proposal: below-cost pricing and excessive liquidated damages clauses. This is not due to a lack of concern. On the contrary, we have every reason to believe that CRS owners routinely offer systems to subscribers at prices below costs, *i.e.* prices which would be less than the cost of providing the system on a stand-alone basis—without incremental air transportation revenues—and that they insist on liquidated damages provisions that could be deemed excessive. However, we have concluded that rules in this area will not be necessary.

It appears that the primary purpose of below cost pricing is to gain access to incremental revenues. With the prohibition on bias, there will be reduced incentives to offer below cost contracts to travel agents. In addition, the elimination of bias-induced incremental revenues and the non-discriminatory fee rule will substantially reduce the ability of CRS vendors to make up for below cost agent contracts out of other CRS revenues.

As to the excessive liquidated damages provisions, they are condemned under general contract law as penalties and are usually held unenforceable by the courts. We do not intend that adoption of CRS rules preempt general contract laws applicable to vender-subscriber contracts, including prohibitions on penalties. However, if parties believe that contract law remedies are inadequate to prevent excessive liquidated damages we invite them to discuss a prohibition on any liquidated damage clauses or other appropriate alternatives.

D. Service Enhancements § 255.7

In addition to the rules outlined above, we propose rules that do not fall into these categories. The first concerns enhancements. Although the term service "enhancement" is used by almost all parties, they give it different meanings. Some use it to refer to such things as the capability to issue boarding passes or make advance seat selection. Others would include the agent's ability to get direct access to a carrier's internal reservation system, or the ability of a carrier to update its own information directly. There is a common thread through all of these categories, however. A service enhancement represents something more than the mere ability to make a reservation and issue tickets.

This thread forms the basis of the definition of enhancement in the proposed rule. "Service enhancement" would mean a product or service, offered through CRS's other than the display of information on schedules fares, rules and availability, the ability to make reservations, and the ability to issue tickets. Anything else, including direct access and direct updating would be considered an enhancement.

There are a number of reasons for defining enhancements in this fashion. As discussed more fully below, we propose to allow system vendors to favor themselves to some degree in the use of enhancements. Our definition insures that system vendors do not use this leeway to deny to competitors the basic functions of CRS's, information distribution and communications for purposes of ticketing. The consequences of exclusion from these basic services would certainly be far worse than those of merely being denied the ability to have boarding passes issued. At the same time the generic approach recognizes that CRS's are still undergoing refinement and development. New capabilities may develop over the years. Rather than limit the rule to capabilities that exist today, the definition will encompass future developments without constant amendments.

Just as parties differ on what constitutes a service enhancement, they differ on what the Board should do about them. At one extreme, parties argue that the Board should impose no requirements. They claim that any rule would have the effect of denying the natural advantages and rewards for having taken the risks in developing the enhancements. At the other extreme, parties request that the Board require CRS vendors to make enhancements available to all participating carriers when they use them in connection with their own services ("forced licensing"). Still a third group urges the Board to adopt a middle ground, of allowing system vendors to keep enhancements for themselves, but requiring that they be offered to all outside carriers once they are offered to any.

We have decided to follow the middle course and to require only that whenever an enhancement is offered to one participating carrier, it must be offered to all on a nondiscriminatory basis. There is no absolute requirement to offer enhancements to other carriers, and the vendor is free to use it exclusively. Once it gives up exclusive use, however, it is required to treat all carriers fairly.

This non-discrimination requirement does not require that all carriers that desire the enhancement receive it at precisely the same time. For example, unlimited access to the enhancement could be denied if the participating carrier did not have the required technical capabilities. If the vendor is incapable of providing the enhancement to all at the same time, access to some can be delayed, provided that the schedule is not based on competitive considerations. Finally, the rule would not prevent the vendor from charging fees for enhancements, provided that it does not discriminate.

This approach to enhancements strike the best balance between the public interest in assuring that control of CRS's not adversely affect competition in air transportation, and the private interests of CRS owners in legitimately reaping rewards for their enterprise in developing their systems.

As parties who support a rule on enhancements correctly point out, denial of access to enhancements can have the same kind of effect as bias. Agents will favor the CRS host that offers the enhancements in connection with its services—especially enhancements like boarding passes—over carriers that cannot offer them. This will cause the traffic pool of have-not carriers to decrease, and thus increase the per passenger cost for the have-not carriers.

On the other hand, when basic display and ticketing capability are not involved, the effect is likely to be less pronounced. In addition, a rule requiring vendors to offer all enhancements might deprive them of the fruits of their efforts and could therefore discourage them from developing new enhancements.

We are not entirely comfortable with allowing system vendors to keep service enhancements to themselves. We have not been able to quantify the risks of permitting vendors to do this or the potential risks of "forced licensing." We therefore request parties to comment specifically on the issue of "forced licensing." Comments should focus on the need for "forced licensing." *i.e.* the risks of the alternative, and on the potential negative impact to the extent that concrete data is available, it should be provided.

E. Marketing Information § 255.8

We are also proposing rules on the use of sales and booking information. At present, system vendors collect a substantial amount of data on travel agent bookings. This detailed information is given to the system vendor's marketing department, which in turn can use it to analyze agent productivity, and the success of the carrier's marketing strategies in individual markets and against specific competitors. Participating carriers are given data about their own bookings from "sponsored" agents and may be given general aggregate data for the rest of the industry.

A number of parties have requested rules in this area. They claim that access to the detailed data gives CRS vendors an unfair advantage. It enables them to target particular agents for incentive commissions and to analyze quickly their success in particular city-pairs. Without access to such detail themselves, other carriers cannot compete as effectively in developing a travel agent sales incentive program. They claim that system vendors are taking unfair advantage of their role as communications link between the agent and the carrier. They argue that the sales information is proprietary to the carrier whose services are booked and that mere transmission over the vendor's system does not give its marketing department a right of access.

Proponents of rules have suggested various options. Some have argued that we should prohibit distribution to vendor marketing departments. They argue that the information is indeed proprietary between the agent and the carrier on which it books and that, accordingly, it should not be disseminated. Another group argues that a rule prohibiting access by the vendors' marketing department would be unenforceable. Given this fact, the only way to cure the unfairness is to require disclosure, notwithstanding the proporietary nature of the information. American proposes something of a middle ground. Claiming that the information is proprietary to the agent, it would release all information that the agent permits to be released. Given the fact that travel agents are true agents of the carrier on which they book, it would seem that any proprietary right in booking information if it exists belongs to the carrier—not the agent or CRS owner. However, under common accreditation, an agent for one carrier is usually an agent for others. American's approach could put agents in a conflict of interest position with respect to their common law duty of loyalty to their principals.

Our proposed rule would simply require system vendors to supply participating carriers any marketing sales and booking data they elect to generate on reasonable and non-discriminatory terms. Vendors would not be required to generate any information that they do not already. They would be required merely to make available information that the system produces for a reasonable non-discriminatory fee.

The use of booking data by CRS vendors can have negative implications for competition in air transportation. Vendors can use the information to target competitors and attract traffic away from them. As with other CRS practices, the effect is to increase the per unit cost of other carriers' operations. As with other aspects of

CRS operations, competing carriers have no effective means of counteracting this outcome. The data that they get are either too incomplete or too dated to be useful in effectively matching the system vendor's sales efforts.

The use of CRS booking data does not appear to be merely a harmless by-product of CRS's. To the extent that system vendors are merely generating detailed information and studies about sales of their own services, we would agree that they are simply enjoying the fruits of their innovation. However, the vendors are going beyond that and also using for competitive purposes the sensitive booking data that they collect on other carriers simply because they are a communications link, much like the telephone line. Such conduct has no justification.

We have not been persuaded by arguments against Board intervention. Some vendors claim that the information really is not all that useful because it tallies bookings, rather than actual flights taken. We believe that these carriers are underestimating the value of the information, at least in their comments. The value of information of this nature depends on three factors: accuracy, detail and timeliness. The primary advantages of booking data are timeliness and detail. Reports available to the vendor are generated weekly or monthly and contain information on each travel agent's bookings for all carriers. The most detailed information that other carriers can get on all carriers is our own O&D data and service segment data which are broken down only as far as city-pairs, and are not available until several months after the time period covered. Admittedly, booking data may not reflect flights actualy taken, but it is only reasonable to expect that system vendors have developed formulae that correlate their own bookings with actual passengers carried. That correlation is not likely to vary significantly from carrier to carrier. Besides, O&D and service segment data are also flawed. Compared to other information that is available to carriers about the sales of their competitors, booking data are probably as accurate, and it is certainly much more detailed and timely and hence more useful.

F. Purpose, Applicability and Definitions—§§ 225.1, 225.2 and 225.3

These sections, establish the scope of the proposed rule. The proposed rule would apply only to carrier owned systems (either air carrier, or foreign air carrier) and would apply to all sales of passenger air transportation, i.e., interstate, overseas and foreign, make oy travel agents as the concept is commonly understood in the United States.

1. *Application to non-carrier CRS.* We have tentatively decided not to regulate non-carrier systems at this time. As noted above, the air transportation marketing, computer, and communications industries are all in a state of flux. Our proposed rule attempts a measured response to problems that we perceive exist today or may exist in the future. Third party systems do not, at the present time, appear to present significant problems for competition in the air transportation market.

Thus, regulation of third party systems would do little to protect air transportation competition or promote consumer welfare. It could have long-term detrimental effects, however, as we noted above. To the extent that there is market power in the CRS industry, actions to improve the effectiveness of actual and potential competition may in the long run be a better means of controlling abuses than government regulation. Subjecting third party systems to some of the proposed rules might substantially increase entry costs of potential third party entrants. This would in turn reduce the effectiveness of potential competition as a disciplining force.

The only third party system now in existence is Tymshare's Mars Plus. For a variety of reasons, its operation does not pose serious risks to air transportation competition or consumer interests.

Tymshare at present has only a limited share of the market, and it has never been a major participant. *See* Tables 1 and 2, *supra*. Many carriers do not even participate on its system. Domestically, only Eastern, Northwest, TWA and Pan American participate. *Report*, Appendix F. It does not have market power which creates the risk of harm to competition in air transportation.

The risks to consumers presented by Mars Plus is also low. Mars Plus offers only access to its participating airlines' internal systems. It makes no claim that its individual displays offer complete or best flight information, although it does claim that agents' ability to jump between in-house systems allows it to find the information. Neither agents nor carriers can reasonably expect that individual display screens of internal reservation system seen through the Mars PLus system will be unbiased.

2. *Applicaton to foreign air transportation and foreign air carriers.* The applicability and purpose section also make it clear that the proposed rule would apply to foreign as well as domestic air transportation. A number of parties have urged the Board to limit application of the rule in foreign air transportation. They argue that foreign flag carriers that operate CRS's in their home countries, bias in favor of themselves more than U.S. carrier systems do, and that it would be unfair to require U.S. carriers to give them equal treatment here when U.S. carriers cannot get equal treatment abroad. Some parties suggest that the Board solve this problem by limiting application of the rule to domestic air transportation. Others urge the Board to simply exclude foreign air carriers that themselves operate CRS's that do not conform to Board rules from the rule's protective cover.

As discussed more fully below, (*See* § 255.9(b)) we have decided to adopt the latter approach: *i.e.*, foreign air carriers that operate systems in their home countries that are biased against U.S. carriers will not be protected by our rules.

We also propose to limit our rule to use of CRS's in the United States. This is consistent with our position, most recently stated in the *Competitive Marketing Investigation*, 82–12–85, December 16, 1982, that marketing and distribution of air transportation services, as opposed to operation of such services, is largely an internal matter for each country. Thus, although our proposal would apply to use of CRS's for sales of all air transportation within the U.S., we are not attempting to regulate CRS practices outside the U.S., even when they affect the sale of air transportation.

3. *Application to types of users.* Finally, we are limiting the applicability of the rule based on the type of user. The rule would apply only to systems sold to "subscribers" as defined in the proposed rule. "Subscriber" is defined as a ticket agent that holds itself out as a neutral industry representative. By the concept of holding-out, we mean both explicit and implicit holding out, *i.e.*, holding oneself out as a "travel agent" and relying on the common perception that a "travel agent" is an industry representative. Much of our policy concerns over CRS's stem from their use by industry agents who are perceived by the traveling public as, and in many cases consider themselves to be, neutral advisors. This neutrality is often relied on by new entrant carriers to provide a ready distribution network. When a ticket agent holds itself out as a dealer for a specific carrier or carriers, however, neither the public nor other carriers should reasonably expect it to provide neutral representation of all

carriers in the industry. Therefore, our proposed rule would not apply to instances where CRS's are used by ticket agents who hold themselves out as agents of selected carriers, nor does it apply to CRS's used by persons other than ticket agents. Thus, the rule would not apply to carriers' internal reservation systems or systems offered only to commercial accounts for their own use.

C. Exceptions § 255.9

We also propose two limited exceptions to the CRS rules.

1. *Carriers refusing to pay non-discriminatory fees.* The first exception deals with carriers that might refuse to agree to pay the non-discriminatory fees required by our rules. Some carriers today pay relatively low fees to system vendors. Usually these are carriers whose presence is considered necessary to make a system acceptable to agents, and they may be also carriers that vendors do not perceive to be strong air transportation competitors. It has been suggested that because of their importance to agents, these carriers may have some leverage to refuse to pay non-discriminatory fees which are likely to be higher than the fees that they currently pay.

Some parties have argued that system vendors should be permitted, if not required, to drop such carriers from their systems. They argue that otherwise, this group of carriers will simply refuse to negotiate in good faith and get a free ride. Other parties argue that total removal from the system would be inconsistent with the consumer protection purposes of our rules. Agents would be obliged to abandon the CRS entirely for another information source in order to make a booking on these excluded carriers. They suggest that vendors be permitted to retain bias in their systems against such carriers with full disclosure to the agent. While the biased information would be less accurate, at least the agent could still use the CRS to book on the affected carrier.

We agree that any rule should permit system vendors to give less preferred treatment to carriers that refuse to pay non-discriminatory fees. Ideally, the rule would be fashioned in such a way as to minimize the incentives of participating carriers to hold out for a free ride. Unfortunately, incentives will vary among systems and participating carriers, and with time. A precise weighing of these incentives would be difficult, if not impossible. System vendors, through the ongoing negotiating process, will be in a much better position to weigh and evaluate the business motivations of participating carriers.

Therefore, our proposed rule would not apply to CRS services offered to carriers that do not enter into participation agreements, consistent with the proposed rule. This leaves the CRS owner discretion to adjust services offered to non-contributing carriers. Depending on the circumstances, it will have the option of removing a carrier from its system entirely, maintaining its schedules in its display but cutting off ticketing capability, or biasing its display against that carrier. However, in no case could a CRS owner give superior service to a carrier that refused to pay non-discriminatory fees.

We recognize that there is some risk in giving too much discretion to system vendors. It may well be that a participating carrier is so important that the vendor will continue to carry it on its system without penalty, even when it refuses to bargain in good faith. To require specific action would, however, eliminate the flexibility that we consider to be desirable in dealing with unwilling carriers. Moreover, any inclination to give non-contributing carriers the rights given participating carriers will be tempered by the knowledge that such an action creates the risk of being found in violation of the prohibition on discriminatory fees.

2. Foriegn air carriers.

The second exception deals with foreign carriers. CRS owners in particular have pointed out that many foreign carriers discriminate against U.S. carriers in their home country. In particular, foreign permit holders that operate CRS's in their home countries apparently discriminate heavily against U.S. international carriers in their displays, often more heavily than system vendors discriminate against their competitors in the U.S. We agree that U.S. carriers should not be forced to give up their advantage against carriers that operate discriminatory CRS's abroad without any assurances that those carriers will give up like advantages in their home countries.

The International Air Transportation Competition Act of 1979 (IATCA) established definite public policy in this case. We are directed to strengthen the competitive position of U.S. carriers to at least ensure equality with foreign air carriers (49 U.S.C. 1302(12), and to pursue the elimination of discrimination and unfair competitive practices faced by United States carriers in foreign air transportation in developing negotiating policy. (49 U.S.C. 1502(b)(9).) In addition, IATCA authorized the Board to take retaliatory action if we find that a foreign carrier or its government discriminated against our carriers.

This strong concern for assuring equal competitive opportunities for U.S. carriers vis-a-vis foreign carriers means that here, we must balance the policies of section 411 with other policies in the Act.

As outlined above commenters have suggested two solutions. The first, applying the CRS rules only to the sale of domestic air transportation, represents too great a sacrifice of the interests embodied in section 411. While the degree of competition in foreign air transportation varies widely from country to country, there is effective competition in many foreign markets. The harm to competition and consumer interests from bias, discriminatory fees and other practices covered by the proposed rule would be just as great in those foreign markets as it is in domestic air transportation. A general exception for foreign air transportation would deny the benefits of the rule to "innocent" air carriers, foreign air carriers and consumers of foreign air transportation because certain foreign carriers operating CRS's happen to bias their systems.

The second alternative mentioned by the commenters goes much further in fulfilling the policies of section 411. Therefore, we propose a second exception for foreign carriers that operate systems that discriminate against U.S. carriers. The exception would state that the protections of the rule do not apply to services offered to foreign air carriers that operate systems that discriminate against *any* U.S. carrier in their displays. We are not attempting to force foreign carriers to modify their own practices regarding CRS's in their home countries. Rather, we are simply stating that if foreign carriers expect to get the benefit of fair play in CRS's in the U.S., they must be prepared to offer the same benefits to U.S. carriers in their own countries. Foreign carriers that do not operate CRS's at all would not be subject to the exception, and they would have the full benefits of the Board's rule. The exception would not allow system vendors to give preferential listing to any foreign carrier.

Our proposal was intentionally fashioned to be as narrow as possible to meet the problem of foreign carrier practices with respect to U.S. carriers. Any exceptions to the rule diminish its efficacy in reducing consumer deception, and maintaining competition in air transportation. The proposed exception is designed to minimize this loss of efficacy. In addition, it is

consistent with our policy of taking proportionate countermeasures in the face of discrimination against our carriers. (See, *e.g.*, Order 81–12–91, December 14, 1981 and Order 83–6–20, May 18, 1983.)

An exception tied to foreign carriers' operation of their own systems does no more than to allow our carriers to respond in kind to practices of their foreign air carrier competitors in a well defined area of their operations. In addition, our proposal does not prevent U.S. carriers CRS owners from voluntarily offering all the protections of our rules to foreign carriers. They are free to do so if they wish. All the exception does is to avoid compelling U.S. carriers to give non-discriminatory treatment to foreign carriers that do not afford such treatment to U.S. carriers in their systems' displays. This approach best balances the competing interests in acknowledging foreign carrier practices in defining the scope of our rule.

H. Review and Termination § 255.10

We also propose a review of the rules within five years of their effective date, with termination on December 31, 1990 unless they are extended by our successor on the basis of that review.

As noted above, both the air transportation distribution and information processing industries may change dramatically. A specific review requirement and termination date assures that the successor to the Board will reevaluate the CRS rules in light of changing circumstances at a later point.

The time frame proposed assures that an essentially meaningless review is not required before enough time has elapsed for change to occur. However, this will not preclude earlier review if desired as a matter of discretion. Such a review might occur under two circumstances: If changes in the relevant industries occur soon enough that our successor may reasonably question the need for rules before their five-year term expires; and conversely, experience under the rule may cause our successor to reasonably question whether they are sufficient to correct the problems we have identified. In either event, we anticipate that the rule could be revised without regard to the termination date.

II. Other requests

We have received a number of other requests for rules that we have decided not to propose, which we discuss separately below.

A. Mandatory Participation in Other Systems

DOJ has requested that we require CRS owning carriers to participate in other systems. It argues that one of the largest impediments to successful penetration of the CRS market is the refusal of CRS owners that are also major carriers to participate in new systems. It attributes the failure of Tymshare to achieve greater market penetration in part to the refusal of American and United to join the MARS PLUS system. DOJ claims that mandatory participation would reduce CRS industry market power by making actual and potential competition more viable.

The primary problem with DOJ's request is that it is designed to enhance entry for a particular CRS competitor, Tymshare's MARS PLUS. Tymshare's difficulty in penetrating the market is the result of two factors. The first is its inability to use incremental revenues to lower fees charged to agents. The second is the refusal of carriers like United and American to participate. This refusal means that an agent that desires to book on United for example, must rely on the internal system of another carrier. Those internal systems are likely to be heavily biased against United, making this option unattractive to agents.

Our bias rules, which will reduce incremental revenues, should alleviate the first cause of Tymshare's problems. DOJ's requested rule is intended to cure the second. The proposal is flawed because Tymshare's second difficulty, in part, is the result of a business decision. Had Tymshare decided to offer a proprietary display, it would be able to offer accurate information on United using OAG and ATP tapes. The reservations and ticketing function could be performed through the internal reservation system of any MARS PLUS participant that had an interline agreement with United.

DOJ's proposal is thus an attempt to compel CRS owners to enhance the quality of CRS services offered by actual or potential competitors even through such competitors could provide the enhanced quality of service, if they are willing to undertake the effort of developing a propietary system. Indeed, with the advent of an electronic OAG, an arrangement might be worked out using that as a proprietary screen that greatly reduced the costs involved.

We consider intervention in the CRS market to benefit a particular competitor as wholly inconsistent with our effort in the proposed rules to give maximum flexibility to CRC industry participants to respond to the needs in the market. Even if a third party CRS vendor elects not to provide a proprietary screen, it will have another means to overcome the disadvantage caused by the refusal of some carriers to participate. It can pass the costs saved from not developing the proprietary screen along to agents in the form of lower fees. This kind of variety in service and price is precisely what one would expect in a market that is functioning competitively.

B. Discussion Authority and Collective Bargaining

Certain carriers have requested authority under section 412 of the Act and immunity under section 414 for discussions among carrier purchasers of CRS services with a view toward permitting joint negotiation of CRS participation terms. They argue that problems with bias and access fees result from the fact that no single carrier is as important to the viability of the CRS as the CRS access is to the carriers. This relative importance gives the CRS owner the ability to impose unreasonable terms. They predict that if participants could join together in negotiations, presumably with the ability to withdraw jointly in the face of unsatisfactory terms, then the positions of CRS owners and user airlines would be more balanced.

Joint discussions are not necessary to prevent CRS's from being used to reduce competition in air transportation, and they could be counter-productive. We have consistently rejected carrier requests for immunity for joint purchasing of goods or service, even from suppliers with alleged monopoly powers as inconsistent with competition under the Act. Order 83–2–17. The commenters have not demonstrated that an exception should be made here.

The danger in joint discussions is that they could create market power in the hands of the participants which could have unforseeable and undersirable consequences. Thus, carriers might use their collective power to force CRS owners to accept their price. This might, in the extreme, make CRS operations uneconomic or, what is more likely, force CRS owners to raise prices to carriers that are not participants in the collective bargaining process.

Our proposed rules on bias and CRS owner-carrier contracts are designed to reduce the potential for abuses that may arise from the disparate bargaining power of CRS owners and other carriers. Until we have had a chance to test their effectiveness, we are not disposed to depart from our long-standing policy of refusing to risk giving market power to carriers that purchase CRS services by permitting collective bargaining.

C. Ticketing and Plating Practices

Certain commenters have also requested that we further examine the CRS owner practices concerning ticket writing. They are concerned that CRS owners continue to encourage agents to issue tickets naming the CRS provider as the ticketing carrier so they may gain the advantage of cash float and net ticketing fees.

The issue of travel agent ticketing practices was recently addressed at length in a proceeding reviewing ATC agreements. Orders 82–12–77, 83–4–135, and 83–7–55. There, we directed ATC to modify its agreements governing ticketing standards to conform to the public interest, and to assure that no carrier, particularly CRS owners, achieves unfair competitive advantages over others based solely on its being identified as a ticketing carrier. All CRS owners are currently ATC members and are bound by this agreement, which has been modified to meet our concerns. If CRS owners are not abiding by the terms of the agreement, carriers have ample remedies elsewhere. Adding provisions to our proposed rule that are peripheral to the basic issue of carrier access to CRS's and agents is not necessary to protect competition in these circumstances.

D. Use of Carrier Codes

Frontier has requested that we adopt rules addressing United's recently announced policy of removing multiple carriers that share a single two-letter airline designator from its Apollo display.

Generally speaking, airlines are each assigned two letter designators that are used to identify them in industry fare and schedule publications as well as for other purposes. For some time however, some carriers have shared a common designator. The practice started with USAir and its franchisees, the Allegheny Commuters, and it has been followed by other carriers that are establishing franchising networks, such as Pan American and Eastern. Most recently, Frontier has elected to share its designator with its newly established affiliate, Frontier Horizon.

According to Frontier, United has announced that it will discontinue the use of common designator codes for franchisees and affiliates and their airline "parent" in the ordering of displays. Apparently United considers the practice to be misleading in that what its computer shows to be on-line service is really interline service.

Frontier claims that because of the joint control, Frontier Horizon's service is the equivalent of Frontier's, and it argues that connecting service between the carriers is the equivalent of on-line service. It requests that we require CRS owners to display both carriers' services using the same designator code.

Other carriers, such as USAir, have filed an emergency rulemaking petition which asks the Board to take similar action. The use of single designators by affiliates and franchisees is also the subject of pending third party enforcement complaints.

We have decided not to consider these requests here. Frontier and the affiliated carriers have raised what may well be a serious problem. The sharing of designators has been a practice in the industry for at least 15 years, starting with the Allegheny Commuters. We are unaware of any substantial consumer complaints that the practice is deceptive. In addition, the Board within the last year has sanctioned the sharing of airline designators, subject to a general disclosure requirement, *Emerald Air Fitness Investigation* Order 83–4–98, April 20, 1983. We prefer to address this issue in the context of the emergency rulemaking petition, in part because we could not complete this proceeding in time to give the petitioners any immediate relief if we decided that is warranted.

Paperwork Reduction Act

The collection-of-information requirements in this proposal are subject to the Paperwork Reduction Act, Pub. L. 96–511, 44 U.S.C. Chapter 35. Those requirements have been submitted to the Office of Management and Budget (OMB) for review and comment. Persons may submit comments on the collection-of-information requirements to OMB and to the Board. Comments sent to OMB should be addressed to: Office of Information and Regulatory Affairs, ATTN: Desk Officer for Civil Aeronautics Board, Office of Management and Budget, Washington, D.C. 20503.

Initial Regulatory Flexibility Analysis

The Regulatory Flexibility Act, Pub. L. 96–354, is designed to ensure that agencies consider flexible approaches to the regulation of small businesses and other small entities. It requires regulatory flexibility analyses for rules that, if adopted, will have a significant economic impact on a substantial number of small entities.

The analysis is required to describe the need, objectives, legal basis for, and flexible alternatives to the agency's proposed action. These requirements are met by the discussion above. In addition, the analysis must include a description of the small entities to which this proposal would apply, the reporting, recordkeeping, or other compliance requirements of the proposed rule, and any other Federal rules that may duplicate, overlap, or conflict with it.

The Board tentatively finds that this rule may, if adopted as proposed, have a significant economic impact on a substantial number of small entities. The proposed rule would affect airlines operating aircraft with less than 60 seats, travel agents, and new, low-cost airlines.

The proposed rule would have an overall beneficial economic impact on a substantial number of small air carriers. First, they would benefit by the prohibition of display bias. Currently, none of these carriers are system vendors and consequently have not enjoyed the benefit of built-in display preference. Under the new rules, their flights will be displayed strictly on the basis of service criteria. This change will allow them to go from what is often the least desirable display to a competitive go from what is often the least desirable display to a competitive display. As a result, these small carriers will be better able to compete.

The proposed prohibition on tying arrangements will also benefit small aircraft operators. Presently, many small airlines are forced by system vendors to sign agreements to pay for interline tickets as a condition for staying on the system. Under the new rule, this cost would be eliminated.

The general availability of service enhancements might improve the quality of service offered by small aircraft operators. Under the proposed rule, if a system vendor has the technical capability to provide service enhancements to other carriers, it must allow any participating carrier to provide that service upon request. This change will provide small aircraft operators the opportunity to compete with larger, more established airlines on new service elements.

Finally, the rule will help small airlines compete by giving them access to information they previously could not have obtained. For example, a small carrier would be able to analyze booking information obtained from the service vendor to develop markets or change flight schedules. Alternatively, it could use the service criteria for ranking the order of connecting flights to ensure that it gets a favorable display. In a competitive environment, such information will be valuable.

If this rule is adopted, small carriers may have to pay higher fees. Presently, few small aircraft operators directly compete with the system vendors. As a

result, many of these operators have free or low-cost display. Under the new rule, fees must be non-discriminatory so that such an indirect subsidy would no longer be allowed.

Travel agents would also be affected by this rule. Nationwide, there are approximately 21,000 travel agents, 74–80 percent of which use automated reservations systems. Of these 21,000 travel agents, the Board estimates that over three quarters would be considered small entities for the proposes of the Regulatory Flexibility Act.

This rule may result in travel agents paying higher fees than at present. Currrently, CRS owners rely on incremental revenues to recoup some portion of the cost of their systems. If this rule is adopted, some of these incremental revenues may be redistributed among other carriers and subscribers so that the system vendors cannot economically continue to subsidize their subscribers. In addition, may travel agents are presently paying fees that are below cost because certain vendors intentionally set low prices to gain a larger market share. Under the proposed rules, the fees for travel agents should be more consistent.

Travel agents should benefit, however, by the elimination of bias in the system. This change should increase efficiency and lower agency costs since personnel will no longer be required to take time to overcome bias. In addition, the rules on contracts between owners and agents will provide agents with greater opportunities to take advantage of CRS competition to lower costs. Further, under a regime of individual carrier commission rates, travel agents will have greater opportunity to recoup through increased commissions any cost increases associated from the rules. In effect, carriers that now have higher costs because of bias will have an incentive to share with agents their cost savings resulting from the rule. Finally, to the extent that service enhancements are available and used by other carriers, travel agents using computerized reservation systems will be able to offer better service than they do now.

New low-cost airlines should receive significant benefits from this rule. Presently, new entrants are among the greatest competitive threat to the established airlines that own the CRS systems. As a group, they currently must pay the highest fees for access to the system. Under the new rules, these entrants well pay the same fees as everyone else, which should result in a substantial cost savings. Similiarly, flights by new entrants tend to be dislayed inconspicuously. The prohibition against bias should result in more favorable displays, which in turn should increase sales and lower the cost per seat. Finally, the elimination of interline ticket fees should also help lower carrier costs.

The rule does not contain any direct reporting, recordkeeping, or other compliance requirements. System vendors must disclose to interested subscribers and participating carriers what criteria were used in determining the order of display and the construction of connecting flights. In addition, the vendors must make available any marketing data generated by their system. The vendors are not required, however, to provide this information to the Board.

There are no other Federal rules that duplicate, overlap, or conflict with this proposed rule.

Regulatory Impact Analysis and Review

Executive Order 12291, dated February 17, 1981, requires every executive agency to perpare a Regulatory Impact Analysis for every "major rule." Major rule is defined in the order as any that is likely to result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

As an independent agency, the Civil Aeronautics Board is not required to comply with E.O. 12291. Because of the importance of this rule and its expected transfer to the Department of Transportation in connection with the sunset of the Board, we are voluntarily preparing a Regulatory Impact Analysis. Beause we are scheduled to sunset at the end of 1984 and it is important that this rulemaking be in place sufficiently prior to that time to allow the Board to implement it, we are not providing the 60-day review period provided in section 3 of the Executive Order for the Director of the Office of Management and Budget. Instead, our usual 10 work day OMB period will apply.

We find that this rule, if adopted as proposed would meet the definition of a major rule within the meaning of the Executive Order. American has estimated that the effect of incremental revenues on SABRE ranged from $78.5 to $150 million in 1980. DOJ Comments at 54. United has estimated that its 1983 incremental revenues from APOLLO were over $160 million. There can be no question, therefore, that the sum of incremental revenues for all CRS owners is well over $100 million. Because this rule may result in a redistribution of a large portion of these revenues among CRS owners, participating carriers, and travel agents, it is a major rule under the terms of Executive Order 12291. In addition, the rule may result in a major increase in costs or prices for certain air carriers and travel agents.

The Executive Order sets forth five general requirements for new rules.

Administrative decision shall be based on adequate information concerning the need for and consequences of proposed government action;

Regulatory action shall not be undertaken unless the potential benefits to society from the regulation outweigh the potential costs to society;

Regulatory objectives shall be chosen to maximize the net benefits to society;

Among alternative approaches to any given regulatory objective, the alternative involving the least net cost to society shall be chosen; and

Agencies shall set regulatory priorities with the aim of maximizing the aggregate net benefits to society, taking into account the condition of the particular industries affected by regulations, the condition of the national economy, and other regulatory actions contemplated for the future.

We carefully considered each of these elements in the preceding Supplementary Information. Our tentative findings are based on information set forth in the various petitions for rulemaking, answers filed to those petitions and our extensive investigation into computer reservations systems. The investigation included substantive information requests from all the CRS owners. We also relied on extensive research conducted by the Department of Justice that was compiled for its investigation into the same area.

Our proposed rules have four or five major provisions. For each, we find that its benefits to consumers will substantially exceed its potential costs.

The elimination of carrier preference factors in the ordering of information on CRS displays will cause a significant revenue shift from CRS providers and certain preferred carriers to generally smaller, currently disfavored carriers. United and American estimated incremental revenue shifts of as much as $150–$160 million each year. The CRS providers are likely to retain the remainder because of the "halo" effect. Currently disfavored carriers are likely to experience revenue gains comparable

to those some carriers experienced when they went from "other airline" to "cohost status," generally 10 to 20 percent revenue gains per agency.

This shift of revenues with the elimination of bias will have significant beneficial effects on consumers. It will strengthen the merits of fare and service offerings as the basis for consumer selection of flights. Consumers can expect lower air fares as the CRS providers lose their ability to raise other carriers' costs through bias. While we cannot exactly predict consumer savings, because of the magnitude of the bias problem, if even a small percentage was passed through to the consumer the savings would amount to tens of millions of dollars.

Our proposal that carriers disclose their criteria for ordering display information will cause CRS carriers some additional costs, particularly to generate and disseminate the information. However, these costs should not be substantial, on the order of a few thousand dollars a year. The benefits, on the other hand, will be tremendous. Insofar as the rule provides the means for other carriers to monitor CRS carrier practices, the rule will be more effective than Board regulation. Many carriers currently have reservations departments that can perform this function. We, on the other hand, would have to establish a mechanism for continued government oversight of CRS carrier practices.

Currently, fees from other carriers and agents are generally insufficient to cover CRS providers' operating costs. Only through the benefits of bias have they become profitable. With the elimination of a substantial portion of bias revenues, CRS providers may raise costs to participating airlines and travel agent subscribers. We do not anticipate dramatic cost increases to these persons because CRS losses, when incremental revenues are not considered, are not substantial. On the basis of the profit and loss statement submitted to us, it has been determined that American's CRS operations could break even if air carrier subscribers were charged 54 cents a booking. We expect, therefore, modest increases in booking fees to other carriers because of our bias rules, and virtually no change in subscriber charges.

Insofar as our rules foreclose unjustly discriminatory access charges there will also be revenue transfers between CRS providers and participating carriers. The fees charged the generally smaller carriers that currently pay from $2–$3 should decrease. Those of the larger, more established carriers should increase somewhat, at least to .54 cents a booking if not to the $1.00 per booking range. Overall, participating airlines should pay more than they do at the present time for CRS services. These costs will be offset, however, by the substantial benefits gained from the elimination of bias.

Another reason to expect higher booking fees is our decision to eliminate CRS contract terms that require an airline to pay net ticketing charges as a precondition to CRS access. The ticketing services for which these charges are assessed do not appear to be of sufficient value to other carriers to, standing by themselves, warrant compensation. Insofar as other carriers are willing to pay them to gain CRS access, it appears that CRS carriers could merely charge more for CRS services, with no significant loss of revenue. As with our rule on unjustly discriminatory fees, smaller carriers are likely to pay somewhat less for CRS access and the larger, established carriers somewhat more. The effect of these marginal revenue transfers will also be offset by the tremendous benefits to be gained from a more competitive air transportation industry.

Finally, our rule requiring CRS carriers to make available to participating airlines the information generated by their systems will not result in significant new costs. The programs necessary to generate the information are or will already be in place. Our rule will merely result in slight administrative costs attendant to distributing the information to requesting carriers.

In considering the need for rules and the alternatives suggested to our proposed course we have endeavored to take the approach that will produce the maximum set benefits to society. The cost of doing nothing, in our view is tremendous. Consumer losses would be measured in hundreds of millions of dollars.

The alternatives of beginning a proceeding aimed at the possible mandated divestiture of some or all of carrier owned CRS systems, requiring separate corporate subsidiaries, and highly specific rules of conduct for CRS providers have also all been considered. We find that each of these alternatives would be more costly. The costs attendant to a separation of American's SABRE system, for example, from its other operations would be substantial. Among costs American would have to bring on line a new mainframe to handle in-house computer needs and hire new personnel to oversee its operation.

While the costs, attendant to these alternative proposals should be greater than those of our proposed course, it does not appear that any greater benefits might be obtained. Our proposed rules will eliminate the conduct that is causing an immediate adverse impact on air transportation competition and consumer injury without undue interference in management prerogatives or the workings of the marketplace. As a result, our course involves the least net cost to society and maximizes the aggregate net benefits.

Comment Period

In light of our conclusions on the significant potential for competitive harm and consumer injury from CRS practices, comments on this notice of proposed rulemaking will be due 30 days after publication in the **Federal Register.** CRS carriers' ability to bias their systems, discriminate in access charges, and use computer generated information to their competitive advantage is lessening competition in air transportation. We have the responsibility under the Federal Aviation Act to act quickly in such circumstances. For this reason, we find good cause to conduct this rulemaking on an expedited basis with a 30-day comment period.

Options for Which Comments are Requested

To assure that parties are fully aware of all options on we are requesting comments, they are listed below:

All provisions of the proposed Part 255, infra; a rule prohibiting use of total hub size in selecting connecting points (pp. 32–33); a rule requiring strictly equal fees in lieu of one that would permit cost based fee differences (p. 49); and a rule requiring CRS owners to offer service enhancements as soon as they are developed (p. 56). We are also requesting comments on whether we should adopt affirmative standards for display of connecting flights in a separate advance notice of proposed rulemaking.

List of Subjects in 14 CFR Part 255

Advertising, Air carriers, Air transportation-foreign, Antitrust, Consumer protection, Essential air service, Travel agents.

Accordingly, the Civil Aeronautics Board proposes to amend 14 CFR Chapter II by adding a new Part 255, *Carrier-Owned Computer Reservations Systems,* to read:

PART 255—CARRIER OWNED COMPUTER RESERVATIONS SYSTEMS

Sec.
255.1 Purpose.
255.2 Applicability.
255.3 Definitions.

255.4 Display of information.
255.5 Contracts with participating carriers.
255.6 Contracts with subscribers.
255.7 Service enhancements.
255.8 Market information.
255.9 Exceptions.
255.10 Review and termination.

Authority: Secs. 102, 204, 404, 411, 419, 1102 Pub. L. 85–726 as amended, 72 Stat. 740, 743, 760, 769, 797; 92 Stat. 1732; 49 U.S.C. 1302, 1324, 1374, 1381, 1389, 1502.)

§ 255.1 Purpose.

The purpose of this part is to set forth requirements for operation by air carriers of computer reservation systems used by travel agents so as to prevent unfair, deceptive, predatory, and anticompetitive practices in air transportation.

§ 255.2 Applicability.

This rule applies to air carriers and foreign air carriers that own, control or operate computerized reservations systems for travel agents in the United States, and the sale in the United States of interstate, overseas, and foreign passenger air transportation through such systems.

§ 255.3 Definitions.

"Availability" means information provided in display with respect to the seats a carrier holds out as available for sale on a particular flight.

"Carrier" means any air carrier, any foreign air carrier, and any commuter air carrier, as defined in 49 U.S.C. 1301(3), 49 U.S.C. 1301(22), and 14 CFR 298.2(f), respectively that are engaged directly in the operation of aircraft in passenger air transportation.

"Discriminate", "Discrimination," and "discriminatory" mean, respectively, to discriminate unjustly, unjust discrimination, and unjustly discriminatory.

"Display" means the system's presentation of carrier schedules, fares, rules or availability to a subscriber by means of a computer terminal.

"Participating carrier" means a carrier that has an agreement with a system vendor for display of its flight schedules, fares, and seat availability in a system.

"Service enhancement" means any product or service offered to subscribers of passengers in conjunction with a system other than the display of information on schedules, fares, rules, and availability, and the ability to make reservations or to issue tickets for air transportation.

"Subscriber" means a ticket agent, as defined in 49 U.S.C. 1301(40) of the Act, that holds itself out as a neutral source of information about, or tickets for, the air transportation industry in general, and that has entered into an agreement for the use of a system.

"System" means a computerized airline reservation system offered by a carrier to subscribers for use in the United States that contains information about schedules, fares, rules or availability of other carriers and that provides subscribers with the ability to issue tickets.

"System vendor" means a carrier that owns, controls or operates a system.

§ 255.4 Display of information.

(a) All system vendors shall offer a display that includes the schedules, fares, rules and availability of all carriers in accordance with the provisions of this section.

(b) In ordering the information contained in a display, system vendors shall not use any factors relating to carrier identity.

(1) System vendors may order flight information on the basis of any service criteria that do not reflect carrier identity and that are consistently applied to all carriers, including the system vendor.

(2) System vendors shall provide upon request to all subscribers and participating carriers the current criteria used in ordering flights for the integrated display and the weight given to each criterion.

(c) System vendors shall not use any factors relating to carrier identity in constructing the display of connecting flights.

(1) System vendors may select the connecting points to be used in the construction of connecting flights for each city pair on the basis of any service criteria that do not reflect carrier identity and that are applied consistently to all carriers, including the system vendor.

(2) System vendors may select connecting flights for inclusion ("edit") on the basis of service criteria that do not reflect carrier identity and that are applied consistently to all carriers, including the system vendor.

(3) System vendors shall provide all subscribers to their systems and participating carriers with information on:

(i) All connecting points used for each market;

(ii) All criteria used to select connecting points;

(iii) All criteria used to "edit" connecting flights; and

(iv) The weight given to each criterion in (ii) and (iii) above.

(d) Upon receipt of information from any carrier, system vendors shall apply the same standards of care and timeliness to loading information concerning participating carriers (including direct updating) as it applies to the loading of its own information.

(1) If a system vendor provides special loading capability to any other carrier, it shall offer the same capability to all participating carriers in a nondiscriminatory fashion as soon as technically feasible.

(2) Each system vendor shall provide upon request to all participating carriers all current data base update procedures and data formats.

§ 255.5 Contracts with participating carriers.

(a) No system vendor shall unjustly discriminate among participating carriers in the fees for participation in its system, or for system related services.

(b) No system vendor shall condition participation in its system on the purchase or sale of any other goods or services.

(c) In order to facilitate compliance with the provisions of this section, each system vendor shall include in every participation contract a clause providing for expedited arbitration of disputes relating to alleged discrimination in fees.

§ 255.6 Contracts with subscribers.

(a) No subscriber contract shall have a term in excess of five years.

(b) No system vendor shall directly or indirectly prohibit a subscriber from obtaining or using any other system.

(c) No system vendor shall require use of its system, by the subscriber in any sale of its air transportation services.

(d) No system vendor shall require that a travel agent use its system as a condition for the receipt of any commission for the sale of its air transportation services.

§ 255.7 Service enhancements.

In the event that a system vendor offers a service enhancement to any participating carrier, it shall offer it to all participating carriers on nondiscriminatory terms.

§ 255.8 Marketing information.

Each system vendor shall make available to all participating carriers on nondiscriminatory terms all marketing, booking and sales data that it elects to generate from its system.

§ 255.9 Exceptions.

(a) The obligations of a system vendor under this support shall not apply where a carrier refused to enter into a contract that complies with this part or fails to pay a nondiscriminatory fee.

(b) The obligations of a system vendor under this part shall not apply to any

foreign air carrier that operates an airline computer reservation system for travel agents outside the United States that does not display the flights of all United States carriers equally with the flights of the foreign carrier.

§ 255.10 Review and termination.

(a) The Federal agency administering this rule shall conduct a review within 5 years after its effective date.

(b) Unless extended on the basis of the review specified above, this rule shall terminate on December 31, 1991.

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary.

Correction

In FR Doc. 84-6444 beginning on page 8937 in the issue of Friday, March 9, 1984, make the following corrections.

1. On page 8941, second column, in Footnote 21, last line, insert "call" after "long"; third column, in Footnote 23, eighth line from the bottom, "differerent" should read "difficult".

§ 1.17 [Corrected]

2. On page 8945, first column, § 1.17, paragraph (h)(2)(vii)(a)(*2*), twenty-first line from the top, insert "not" after "have".

BILLING CODE 1505-01-M

PEACE CORPS

22 CFR Part 303

Compliance With Public Information Act

AGENCY: Peace Corps.

ACTION: Proposed rule.

SUMMARY: Notice is hereby given that the Director of the Peace Corps proposes to amend Chapter III of Title 22, Code of Federal Regulations, by replacing Part 303 with a new Part 303, which provides regulations permitting the inspection and copying of documents of the Peace Corps. Originally, regulations governing dissemination of information to the public were published as Part 303 of Title 22, Code of Federal Regulations. Amended regulations with regard to the dissemination of Peace Corps records, documents and other information in conformity with the Freedom of Information Act, 5 U.S.C. 552 as amended by Pub. L. 93-502, 88 Stat. 1561, were published in the **Federal Register,** Vol. 40, No. 83, April 29, 1975, as Chapter XII, ACTION, Part 1215, or Title 45, Code of Federal Regulations because the Peace Corps was a part of the ACTION Agency. Under the provisions of Pub. L. 97-113, Title VI, the Peace Corps became an independent Agency on February 21, 1982. Accordingly, the Peace Corps is now republishing amended Freedom of information Act regulations to reflect the current statutory provisions.

DATES: Comments must be received on or before May 29, 1984.

ADDRESSES: Comments should be submitted to and are available for examination from 8:30 a.m. to 5:00 p.m. Monday through Friday except holidays, at the Peace Corps, 806 Connecticut Avenue, N.W., Washington, D.C. in Room 1207, Office of the General Counsel. Comments may also be hand delivered to this address.

FOR FURTHER INFORMATION CONTACT: Robert McClendon, Freedom of Information Act Officer, Office of Administrative Services, 202-254-6180 or Robert Martin, Associate General Counsel, 202-254-7966.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

The Peace Corps has determined that rule is not a major rule because it is not likely to result in an annual effect on the economy of $100 million or more.

Paperwork Reduction Act

This rule impose no obligatory information requirements on the public.

Regulatory Flexibility Act of 1980

The Director certifies that this rule, if adopted will not have a significant economic impact on a substantial number of small entities.

Reasons for this Proposed Rule

The provisions of the Freedom of Information Act, 5 U.S.C. 552, as amended, require that each agency of the Federal government make available to the public at established places any records reasonably described in a request therefore and other records therein specified.

Accordingly it is proposed that 22 CFR Chapter III Part 303 be amended to provide a new procedure implementing the provisions of the Freedom of Information Act.

List of Subjects in 22 CFR Part 303

Administrative practice and procedure, Freedom of Information Records.

PART 303—INSPECTION AND COPYING OF RECORDS: RULES FOR COMPLIANCE WITH FREEDOM OF INFORMATION ACT

Sec.

303.1 Purpose.
303.2 Definitions.
303.3 Records generally available.
303.4 Availability of records.
303.5 Records which may be exempt from disclosure.
303.6 Manner of requesting records—appeals.
303.7 Authority to release and certify records.
303.8 Location of records.
303.9 Identification of records.
303.10 Schedule of fees.

Authority: 5 U.S.C. 552 Pub. L. 87-293 as amended (22 U.S.C. 2501 *et seq.*); Pub. L. 97-113, Sec 601; Executive Order 12137, May 16, 1979.

§ 303.1 Purpose.

The purpose of this part is to prescribe rules for the inspection and copying of opinions, policy statements, staff manuals, instructions, and other records of the Peace Corps pursuant to 5 U.S.C. 552.

§ 303.2 Definitions.

As used in this part, the following definitions shall apply:

(a) "The Agency" means Peace Corps.

(b) "Records" includes all books, papers, maps, photographs, films, tapes, or other documentary material or copies thereof, regardless of physical form or characteristics, made in or received by the Peace Corps and preserved as evidence of its organization, functions, policies, decisions, procedures, operations or other activities but does not include books, magazines, or other materials acquired solely for library purposes and available in the library of the agency.

(c) "Identifiable" means, in the context of a request for a record, one which is reasonably described in a manner sufficient to permit the location of the material requested.

(d) "Unit" means an office of the Agency headed by a senior official who shall be responsible for making initial determinations of availability of documents or records requested hereunder. The head of any such Unit may delegate his or her responsibility hereunder to his or her Deputy or some other official during any absence of such official. At present, the units of the

Agency for the purposes hereof consist of, the Office of the Director; the Executive Secretariat; the Office of Private Sector Development; the Office of Executive Talent Search; the Office of General Counsel and Legislative Liason; the Office of Public Affairs; the Office of the Associate Director for Marketing, Recruitment, Placement and Staging; the Office of the Associate Director for International Operations; and the Office of the Associate Director for Management.

§ 303.3 Records generally available.

The agency will make promptly available to any member of the public the following documents:

(a) All final opinions and orders made in the adjudication of cases.

(b) Statements of policy and interpretation adopted by the agency which have not been published in the Federal Register.

(c) Administrative staff manuals and instructions to the staff which affect a member of the public.

(d) A current index, which shall be updated at least quarterly, covering so much of the foregoing materials as may have been issued, adopted or promulgated after July 4, 1967, is maintained by the Agency and copies of same or any portion thereof shall be furnished upon request at a cost not to exceed the cost of duplication. The Agency deems further publication of such index in the **Federal Register** both unnecessary and impractical.

(e) To the extent necessary to prevent a clearly unwarranted invasion of personal privacy, the Agency may delete identifying details from materials furnished under this section.

(f) Brochures, flyers and other similar material shall be furnished to the extent that same are available. Copies of any such brochures and flyers which are out of print shall be furnished upon request at the cost of duplication, provided, however, that in the event no copy exists, the Agency shall not be responsible for reprinting the same.

(g) The Agency will not be required to create or compile selected items from its file and records or to provide a requester with statistical or other data unless such data has been compiled by the Agency and is available in the form of a record in which event such record shall be made available as provided in this part.

§ 303.4 Availability of records.

All records of the Peace Corps, in addition to those ordinarily maintained and disseminated under 303.3 hereof, requested under 5 U.S.C. 522(a)(3) and reasonably described in any request therefore shall be made promptly available upon request of any member of the public for inspection or copying upon compliance with procedures established in this part, except to the extent that a determination is made, in accord with the procedures set forth herein, that a record is exempt from disclosure, and should be withheld in the public interest. All publications and other documents heretofore provided by the Peace Corps in the normal course of business will continue to be made available upon request to the appropriate unit of the Agency. No charge will be made for such documents unless necessary by reason of the fact that such document is no longer in print in which case the charge shall not exceed the cost of duplication as set forth herein.

§ 303.5 Records which may be exempt from disclosure.

The following categories are examples of records maintained by the Peace Corps which, under the provisions of 5 U.S.C. 552(b), may be exempted from disclosure:

(a) Records required to be withheld under criteria established by an Executive Order in the interest of national defense or foreign policy and which are in fact properly classified pursuant to any such Executive Order. Included in this category are records required by Executive Order No. 12356, as amended, to be classified in the interest of national defense or foreign policy.

(b) Records related solely to internal personnel rules and practices. Included in this category are internal rules and regulations relating to personnel management and operations which cannot be disclosed to the public without substantial prejudice to the effective performance of a significant function of the Agency.

(c) Records specifically exempted from disclosure by statute.

(d) Information of a commercial or financial nature including trade secrets given in confidence. Included in this category are records containing commercial or financial information obtained from any person and customarily regarded as privileged and confidential by the person from whom they were obtained.

(1) It is the policy of the Peace Corps not to release information which is a trade secret or commercial or financial information obtained from a person and privileged or confidential within the meaning of 5 U.S.C. 552(b)(4), and to give submitters of information which may be exempt from disclosure under 5 U.S.C. 552(b)(4) adequate opportunity to provide information at the administrative level which may establish such exemption.

(2) A person submitting information to the Peace Corps, if previously notified by the Peace Corps of his/her right to request confidential treatment for information, must request that the information be considered exempt from disclosure at the time of submission. Failure to do so will be deemed an acknowledgement that the submitter does not wish to claim exempt status.

(3) A person submitting information not covered by paragraph (2) which is the subject of a Freedom of Information Request, and which may be exempt from disclosure, shall be given prompt written notification of such request, unless it can be established that the information should not be disclosed, or that the information has already been lawfully published or made available to the public. Such notice must afford submitters at least ten working days in which to object to the disclosure of any requested information.

(4) Each request for exemption from disclosure under 5 U.S.C. 552(b)(4) as a trade secret or privileged or confidential commercial or financial information must:

(i) Specifically identify the exact material claimed to be confidential.

(ii) State whether or not the information identified has ever been released to a person not in a confidential relationship with the submitter.

(iii) State the basis for submitter's belief that the information is not commonly known or readily ascertainable by outside persons.

(iv) State how release of the information would cause harm to the submitter's competitive position.

(5) The agency will not normally decide whether material received with a request for exemption from disclosure under 5 U.S.C. 522(b)(4) is entitled to be withheld unless a request for disclosure is made. Any reasonably segregable portion of a record will be disclosed after deletion of any portions determined to be exempt.

(6) The agency will give careful consideration to all specified grounds for exemption prior to making its administrative determination and, in all cases in which the determination is to disclose, provide the submitter with a statement of the reasons why its disclosure objection was not sustained. The Peace Corps will provide the submitter with at least ten days advance notice of the proposed release date of information in cases in which an

objection to disclosure has been rejected.

(7) The Peace Corps will notify the submitter promptly of any instance in which a requester brings suit seeking to compel disclosure of its information. Submitters should not request exemption from disclosure unless they are prepared to assist the agency in the defense of any judicial proceeding brought to compel disclosure.

(e) Interagency or intra-agency memoranda or letters which would not ordinarily be available by law to party in litigation with the Agency. Included in this category are memoranda, letters, interagency and intra-agency communications and internal drafts, opinions and interpretations prepared by staff or consultants and records of deliberations of staff, ordinarily used in arriving at policy determinations and decisions.

(f) Personnel, medical and similar files. Included in this category are personnel and medical information files of staff, volunteer applicants, former and current volunteers, lists of names and home addresses and other files or material containing private or personal information, the disclosure of which would amount to a clearly unwarranted invasion of the privacy of any person to whom the information pertains.

(g) Investigatory files complied for law enforcement purposes. Included in this category are files compiled for the enforcement of all laws, or prepared in connection with government litigation and adjudicative proceedings; provided however, that such records shall be made available to the extent that their production will not (1) interfere with enforcement proceedings; (2) deprive a person of a right to a fair trial or an impartial adjudication; (3) constitute an unwarranted invasion of personal privacy; (4) disclose the identity of a confidential source, and in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful security intelligence investigation, confidential information furnished by a confidential source; (5) disclose investigative techniques and procedures; or (6) endangered the life or physical safety of law enforcement personnel.

(h) In the event any document or record requested hereunder shall contain material which is exempt from disclosure under this section, any reasonably segregable portion of such record shall, notwithstanding such fact, and to the extent feasible, be provided to any person requesting same, after deletion of the portions which are exempt under this section.

(i) Documents or records determined to be exempt from disclosure hereunder may nonetheless be provided upon request in the event it is determined that the provision of such document would not violate the public interest or the right of any peson to whom such information might pertain, and that disclosure is not prohibited by law or Executive Order.

§ 303.6 Manner of requesting records-appeals.

(a) Requests under the Freedom of Information Act (5 U.S.C. 552) for access to Peace Corps records may be filed in person or by mail with the Director of Administrative Services, Peace Corps, 806 Connecticut Avenue N.W., Washington, D.C. 20526. All requests and the envelope in which they are sent must be plainly marked "FOIA Request." Personal written requests will be received from between 10 a.m. and 4 p.m., Monday through Friday, except for official holidays.

(b) Requested records which are reasonably described shall either be made available within ten working days after receipt of any such request or a written notice that the request cannot be complied with will be provided to the person making such request within such ten day period. Any such notice of inability to comply shall specify the reasons for refusal and the right of the person making such request to appeal such adverse determination. In the event a request for a record or document is made to the Director of Administrative Services, and such office does not have the requested material, the requester shall be immediately notified. The request shall be deemed received when actually received by the Director of Administrative Services.

(c) Upon receipt of a notice of failure to comply, a person making a request for information, records, or documents may, within 15 calendar days from the receipt of such notice, appeal such adverse determination to the Director of the Peace Corps or designee. Such appeal shall be in writing and shall specify the date upon which the notice of failure or refusal to comply was received by the person making such request. The Director or designee shall make determination with respect to such appeal within 20 working days after receipt of such appeal. Written notice of such determination shall be provided to the person making the request in writing. If the original denial of the request for records is upheld in whole or in part, such notice shall include notification of the right of the person making such request to have judicial review of the denial and appeal as provided under the Freedom of Information Act (5 U.S.C. 552).

(d) The time limits specified above for initial compliance, and appeal from a refusal to comply, may be extended by the Agency upon written notice to the person making the request. Such notice shall set forth the reasons for such extension and the date upon which determination is expected. Such extension may be applied at either the initial stage or the appellate stage, or both, provided that the aggregate of such extensions shall not exceed ten working days. Circumstances justifying an extension will include the following:

(1) Time necessary to search and collect requested records from segments of the Agency separate from the office processing the request;

(2) Time necessary to search, collect and appropriately examine a voluminous number of records demanded in a single request; or

(3) Time necessary for consultation with another agency having a substantial interest in the determination of the request, or among two or more components of the agency which have an interest in the subject matter of the request.

(e) The time limits provided in this section are mandatory and a person requesting records shall be deemed to have exhausted his or her administrative remedies with respect to such request in the event the Agency fails to comply within the said applicable time limit provisions as extended in accord with this section. In unusual circumstances in which additional time is necessary to collect and review the records requested, the Act provides that a court of appropriate jurisdiction may allow the agency additional time for such purpose. Alternatively, the Agency and the person making such request may agree as to a reasonable time for completion of Agency work upon such request.

(f) Any notification of denial of any request for records under this subsection shall set forth the names and titles or positions of the persons primarily responsible for the denial of such request.

(g) Upon receipt of a request for a record or document the Director of the Office of Administrative Services will promptly make an initial determination as to whether the request for the record reasonably describes such record with sufficient specificity to determine the unit of the Agency to which such request should be referred. Upon making such initial determination, he shall immediately refer such request to the head of the unit concerned. Upon receipt

of the request the head of the unit shall promptly determine whether the description of the record contained in the request is sufficient to permit its identification and production.

(h) If the Director of Administrative Services or the head of the unit concerned determines that the description contained in the request is not sufficient to reasonably describe the record requested, the requester shall be advised and shall be permitted to amend the request to provide any additional information which would better identify the record. The requester shall be provided with appropriate assistance from the head of the unit concerned, the Director of Administrative Services or any member of their staffs. A request which is amended in accord herewith shall be deemed to have been received by the Agency on the data of receipt of the amended request.

(i) If the head of the unit concerned determines that the record requested is reasonably described so as to permit its identification, he or she shall make it available unless he or she determines, after consultation with the General Counsel, that (1) the record is exempt from disclosure and (2) it should be withheld in the public interest or to protect the rights of persons to whom the information pertains. When such a determination is made the requester shall be immediately notified in writing as provided herein.

(j) Peace Corps offices overseas are not responsible for maintenance of any Freedom of Information Act indexes, documents, or records (other than materials normally kept and maintained in such offices). Insofar as they do have any materials, they will make them available upon written or oral request to persons who are present in their respective countries addressed to the Director, Peace Corps, c/o American Embassy in the applicable country. Such requests shall be treated informally and as expeditiously as possible. In the event any such request is received for information which might be exempt from disclosure under the provisions of § 303.5 hereof, a copy of the material and the request together with any recommendation shall be forwarded to the Director of Administrative Services for processing. Such a request shall be considered received when actually received by the Director of Administrative Services.

(k) The Peace Corps maintains recruiting offices in many states. These offices are not responsible for maintaining Freedom of Information Act indexes, reading rooms, or other records or documents. Requests to any Recruiting Office or Service Center Office for materials not given out in the normal course of business shall be referred to the Director of Administrative Services. The request shall be in writing and shall be deemed received when actually received by the Director of Administrative Services.

§ 303.7 Authority to release and certify records.

(a) Authority is hereby delegated to the Director of Administrative Services, Office of Management, to furnish, pursuant to these regulations, copies of records to any person entitled thereto, and upon request to provide certified copies thereof for use in judicial proceeding or other official matters as provided below.

(b) The Director of Administrative Services and his or her deputy, are hereby designated to act as authentication officers. When both the authentication officers are unavailable, any other person within such office designated by the Director of Administrative Services may act in his or her place and stead. The authentication officer is hereby authorized to sign and initial certificates of authentication for and in the name of the Director of the Peace Corps. The form of authentication shall be as follows:

Certificate of Authenticity

In testimony whereof, I ————————, Director of the Peace Corps, have hereunder caused my name to be subscribed by the authentication officer of said agency at Washington, D.C., this ———— day of ————, 19—.

Director of the Peace Corps
By

Authentication Officer, Peace Corps.

(c) The authentication officer is also hereby authorized to issue such statements, certificates, or other documents as may be required in connection with judicial proceedings or other official matters to show that, after thorough search of Peace Corps records, a requested record has not been found. (See Rule 44(b) Federal Rules of Civil Procedure).

§ 303.8 Location of records.

The Agency will maintain a central records room at its headquarters in Washington, D.C. The headquarters of the Peace Corps is presently located at 806 Connecticut Avenue, NW., Washington, D.C. The present location of the central records room shall be the Paperwork and Records Management Branch, the location of which may change from time to time. The specific location of the records room may be determined by requesting such information from the Peace Corps receptionist in the Office of the Director of the Peace Corps.

§303.9 Identification of records.

(a) In order for the Agency to locate records and make them available it is necessary that it be able to identify the specific records sought. Persons wishing to inspect or secure copies of records should therefore seek to describe and identify them as fully and as accurately as possible. In cases where requests are submitted which are not sufficient to permit identification, the records officer receiving the request will endeavor to assist the person seeking the records in filling in necessary details.

(b) Among the kinds of information which a person seeking records should try to provide in order to permit an identification of a record are the following:

(1) The unit or program of the Agency which may be responsible for or may have produced the record.

(2) The specific event or action, if any, and if known, to which the record refers.

(3) The date of the record or the period to which it refers or relates, if known.

(4) The type of record, such as an application, a contract, or a report.

(5) Personnel of the office who may have prepared or have knowledge of the record.

(6) Citation to newspapers or publications which are known to have referred to the record.

§ 303.10 Schedule of fees.

(a) It is the policy of the Peace Corps to encourage the widest possible distribution of information concerning programs under its jurisdiction. To the extent practicable, this policy will be applied under this part so as to permit requests for inspection or copies of records to be met without substantial cost to the person making the request. Search and reproduction charges will be made in accordance with subsection (b) below. The Peace Corps will conduct a thorough review of all fee waiver requests, on a case-by-case basis, and will grant waivers or reductions in feeds only in those cases in which the requester establishes that the disclosure of the information will primarily benefit the general public.

(b) Search and copying charges will be made as follows:

(1) Copies made by photostat or otherwise (per page) $.10.

(2) Search service will be charged according to current hourly rates or quarterly fraction thereof, at the first step of the FS–3/1 or FS–8/1 salary level rounded to the nearest dollar. Currently, $16.00 per hour will be charged for a search by a professional level employee and $7.00 will be charged for a search by a clerical level employee. Such charges will be changed on the effective date and in accordance with changes in the Foreign Service salary schedule. A charge will be made regardless of whether the search is successful in locating a requested record.

(3) When no specific fee has been established for a service, for example when the search involves computer time or special travel, transportation, or communications costs, the Director of Administrative Services will determine the direct costs of the service and include such costs in the fees chargeable under this section.

(4) In the event a request for documents or records is received which does not state that the requester will pay any or all reasonably necessary costs, or costs up to an amount specified in such request, and the head of the unit or the Director of Administrative Services determines that the anticipated cost for search and duplication of the records requested will be in excess of $25, or in excess of the limit specified in the request, the Director of Administrative Services shall so advise the requester promptly after receipt of the initial request. Such notification shall specify the anticipated cost of search and reproduction of the records requested. The requester may thereafter amend his or her request to specify fewer documents or agree to accept the estimate of anticipated costs, in which case the request shall be deemed received by the Agency upon the receipt date of the requester's response. A requester may, prior to making a request, ask for an estimate of cost from the Director of Administrative Services who shall promptly respond to such request.

(5) Payment should be sent or delivered to the Director of Administrative Services. Such payment should be check or money order payable to Peace Corps. A receipt for fees will be provided upon request. All fees collected are deposited into the General Fund Receipt Account at the U.S. Department of the Treasury.

(c) A requester may, in his or her original request, or subsequently, ask for a fee waiver or that documents be furnished at a reduced charge. A request for documents shall not be deemed to have been received until a determination of the question of fee waiver or reduction has been made, provided however, that such determination shall be made within five working days from the receipt of a fee waiver request. A request for waiver or reduction of fees shall specify the amount of reduction requested and the reasons which cause the requester to feel that the public interest would be served by a waiver or reduction of fees. The following procedure will be followed:

(1) Upon the receipt of a fee waiver or fee reduction request the Director of Administrative Services will refer such request to the Director or such official as he or she may designate. The Director or designee will promptly determine whether such request should be granted in whole or in part, and such determination is final. The request will be reviewed in accordance with the following Freedom of Information Act fee waiver objectives: (i) The fostering of disclosure of non-exempt agency records where it will primarily benefit the general public, and (ii) the preservation of public funds where there will be insufficient public benefit derived from disclosure.

(2) There are five general factors which are considered in determining whether there is sufficient public benefit to be derived from disclosure to warrant the granting of a fee waiver.

(i) First, a determination must be made as to whether there is a genuine public interest in the subject matter of the documents for which a fee waiver is sought; absent such a public interest, there is no basis for granting a waiver. The "public" to be benefited need not be so broad as to encompass all citizens, but it must be distinct from the requester alone. An interest which is personal to the requester is insufficient, nor is it in the public interest to grant a waiver solely on the basis of a requester's indigency.

(ii) The second factor which the Agency will examine is the value to the public of the records themselves. A fee waiver is appropriate only if the disclosable contents of the records are in fact informative on the issue found to be of public interest. No matter how interesting or vital the subject matter of a request, the public is benefited only if the information released meaningfully contributes to the public development or understanding of the subject.

(iii) The third factor to be considered is whether the requested information is already available in the public domain. Where requested information is already in the public domain, the fee waiver will be denied.

(iv) Fourth, the identity of a FOIA requester is considered in acting on a request for a fee waiver. A requester's identity and qualifications, e.g., expertise in the subject area and ability and intention to disseminate the information to the public, is evaluated. Therefore, requesters should specifically describe their qualifications, the nature of their research, and the purposes for which they intend to use the requested materials. Bare assertions by requesters that they are "researchers" or have "plans to author a book" are insufficient.

(v) The fifth criterion requires an assessment, based upon information provided by the requester as well as information independently available to the agency, of any personal interest of the requester reasonably expected to be benefited by disclosure. Such interests include any commercial interest, as well as the interests of first-party requesters in records pertaining to themselves and the interests of parties seeking records for use in litigation.

(3) Fee reductions may be based on any equitable basis, including the percentage of the material requested which meets the waiver criteria, or the extent to which the request meets the first four criteria described in paragraph 2. The requirement that it meet the fifth criteria, that the primary benefit be to the public, is absolute.

(4) A decision to grant a fee waiver or reduction with respect to records pertaining to a particular subject, or with respect to a particular requester, does not create a precedent for subsequent requests for materials relating to the same subject, or by the same requester.

(Approved by the Office of Management and Budget. OMB control number 0420–A003)

Issued at Washington, D.C. on March 22, 1984.

Loret M. Ruppe,

Director.

BILLING CODE 8051–01–M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Part 635

[FHWA Docket No. 84–3]

Participation in Contract Claim Awards and Settlements

AGENCY: Federal Highway Administration [FHWA], DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Highway Administration (FHWA) is requesting

comments on proposed revisions to its regulation concerning the extent to which Federal-aid highway funds may participate in awards and settlements of Federal-aid highway contract claims brought by private contractors against State highway agencies (SHA's). The revised regulation would clarify the current regulation by specifying more definitive criteria in determining eligibility for participation. It is anticipated that the revised regulation would enable SHA's to submit more specific information supporting their requests for participation and would make participation determinations more consistent State-to-State.

DATE: Comments must be received on or before May 29, 1984.

ADDRESS: Submit written comments, preferably in triplicate, to FHWA Docket No. 84–3 Federal Highway Administration, Room 4205, HCC–10, 400 7th Street, SW., Washington, D.C. 20590. All comments received will be available for examination at the above address between 8:30 a.m. and 4:15 p.m. ET, Monday through Friday. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. Paul E. Cunningham, Chief, Construction and Maintenance Division, Office of Highway Operations, (202) 426–0392, or Mr. Hugh T. O'Reilly, Office of the Chief Counsel, (202) 426–0780, Federal Highway Administration, 400 7th Street, SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: Under the Federal-aid highway program, 23 U.S.C. 101 *et seq.*, construction of Federal-aid highways is generally performed by State highway agencies through private contractors. FHWA reimburses the States for a statutory pro rata share of the construction costs that are incurred. In the course of construction, disputes between the contractor and the State's administering agency may occur. The contractors may allege that unanticipated costs were or must be incurred, and attribute the cause to matters that were under State control. For example, contractors may argue that agency administrators required them to perform work that was not contemplated by the plans and specifications, or that subsurface conditions were encountered which materially differed from those represented in the contract. Often, such disputes are resolved informally at the project level. Where the SHA initially denies liability, State law generally provides a forum for resolution of these claims. State courts, administrative boards, arbitration panels, or other tribunals may hear and decide them, or they may be settled by the parties in lieu of such proceedings.

Under a project agreement with the SHA, entered into under 23 U.S.C. 110, FHWA agrees to reimburse the State for the estimated Federal share of the construction costs incurred, based upon a prescribed statutory rate, see 23 U.S.C. 120. State highway agencies will often request FHWA to reimburse them for a portion of the contract claim payments they must make to a contractor, on the basis that such payments reflect a cost of construction.

It has been recognized that FHWA has no inherent contractual obligation to participate in any and all contract claim settlements, "Louisiana Department of Highways v. United States," 604 F.2d 1339 (Ct.C1., 1979). In "Commonwealth of Pennsylvania, Department of Transportation v. United States," 643 F.2d 758 (Ct.C1., 1981), the former United States Court of Claims further found "proper" FHWA's requirement that unbudgeted settlement costs must be "reasonable" in order to be eligible for Federal participation. That court also concluded that the ultimate burden of demonstrating that the actual costs involved were "reasonable" resides with the State.

The regulation currently governing the participation of the FHWA in contract claim awards and settlements is 23 CFR 635.120. This provides in full as follows:

> The eligibility for, and extent of, Federal-aid participation in claim awards made by the State to Federal-aid contractors on the basis of arbitration board awards or State court judgments shall be determined on a case-by-case basis. Generally, the criteria for establishing Federal-aid participation in claims and resultant settlements is the extent to which such settlements are grounded in contract provisions and specifications and actual costs incurred. Where legal issues arise in the course of resolving a claim, any data submitted for consideration shall include a brief from the legal counsel for the State setting forth the basis for determining the extent of the State's liability for the claim under local law.

This regulation, published in 1974, restates a policy of FHWA that has remained consistent over the years. It essentially adopts language of uncodified policy directives dating back to 1964 which indicate that the policy on eligibility incorporated therein was one that had been followed, at least informally, prior to that time.

Although this policy has been in place for a long time, questions of interpretation have been prompted by the literal language of the regulation, particularly that of how "grounded in contract provisions and specifications" should be construed. In the "Louisiana Department of Highways" case the Court of Claims described this key eligibility language as being "far from clear," 604 F.2d at 1340, and suggested that it be clarified. This thought was again echoed in the "Pennsylvania Department of Transportation" case, 643 F.2d at 765. In 1981 the American Road and Transportation Builders Association argued that eligibility issues could best be resolved by making Federal-aid participation automatic in any case where a settlement is approved by the SHA's chief administrative officer and the State's Attorney General.

While FHWA maintains its right to exercise separate and independent judgment on claim reimbursement eligibility questions, a clearer statement of the criteria which would be employed in making such judgments appears warranted. It is also proposed to provide more guidance to SHA's as to the nature of the supporting information and documentation believed necessary for FHWA to make informed determinations.

Under proposed paragraph (a), the present case-by-case determination approach would be retained. Recurring similarities are uncommon in the ways that claims arise. While there are identifiable types of claims, the facts related to them are often very different. No categories of judgments or settlements could be identified which appear appropriate for exclusion from *any* review. It is also proposed not to differentiate between judgments of arbitration proceedings, administrative board determinations, or court judgments, or the settlements entered into in lieu of these proceedings. Each case and resolution would be considered on its own merits. The primary participation criterion would essentially reflect the interpretations by the former Court of Claims that the resolutions of claims and the costs incurred be "reasonable" ones, and would recognize that the burden rests with the SHA to demonstrate such reasonableness. Thus, it is proposed that Federal funds would not participate to the extent that any contract adjustments were unreasonable or unsupported. In this regard, it may be instructive to relate the comments of the former Court of Claims on the meaning of "reasonable," in the context of a claims settlement:

> At a minimum, a claim against a State must have some basic merit to be considered for reimbursement as 'reasonable.' But the mere fact that a claim against a State may have

some legal merit does not mean any possible settlement of the claim is reasonable. We must also look as to whether the settlement, as made, appears to be reasonable on all of the facts available to a State at the time of settlement. We have, in other circumstances, characterized the duty of reasonableness in several ways, but the essence of the term is that a party must proceed prudently, wisely, and efficiently. The settlement is reasonable only to the extent it would have been made by a prudent businessman placed in a similar position. . . . Reasonableness requires, we think, not only that the State explore and adopt less expensive means of terminating a lawsuit other than by outright cash settlement but, also, that the State proceed in a manner so that its potential liability on claims is kept to a minimum. "Commonwealth of Pennsylvania, Department of Transportation v. United States," 643 F.2d at 765, 766 (citations omitted.)

Given the fact that the burden of demonstrating reasonableness of the judgment or settlement remains with the SHA, it is proposed to disallow participation where the contract adjustments are "unsupported" by the SHA. In cases where there is a court or administrative judgment involved, such "support" may be contained in the records of these proceedings.

Contract law principles apply to these contract adjustments and the manner in which contractors might be compensated through them. To reflect this basic fact, it is proposed to retain the concept that the adjustment have a basis in the terms of the contract, which would include the contract's plans and specifications. However, use of "a basis in" rather than "grounded in" the terms of the contract is considered more direct and definitive.

Sole reliance on the literal terms of the contract can sometimes be misplaced, as where State courts have refused to give full effect to the language of particular clauses. Further, doctrines evolved through State law may be applicable in situations where no contract clauses are relevant or, if relevant, require careful interpretation. Thus, it is proposed to require that contract adjustments have a basis in "applicable State law," as "fairly construed." Again, where there has been a State court or administrative judgment rendered, the "basis in State law, as fairly construed" for the contract adjustment will ordinarily be quite apparent. However, when a careful review by FHWA of the case leads to a belief that such a basis was lacking, a recommendation to appeal may be made. This would not change from present practice.

It is also proposed to deny participation where the basis for the adjustment or compensation is "not in accord with prevailing principles of public contract law." There would be respect under this standard for the common, State-to-State differences in substantive law, and sufficient margin would be afforded for the maturation and evolution of contract law. However, under the rule as proposed, denials of participation could be made where the State determinations clearly departed from the mainstream of thought on the particular issues presented. States may certainly choose to adopt positions that are generous in the extreme to plaintiffs in actions against it. However, in circumstances where the Federal share of any resulting awards or settlements are 75 to 90 percent or even more, the Federal interests would not appear to be appropriately served by requiring FHWA to, in effect, adhere without question to the State position. Some examples of cost items believed inappropriate for participation include consequential or punitive damages and anticipated profit, which are noted in proposed § 635.120(c). The general statement regarding nonparticipation in adjustments or compensation "not in accord with prevailing principles of public contract law" would preserve FHWA's discretion in other, similar areas.

Proposed paragraph (b) would identify for SHA's the key supporting materials which should accompany a request for participation. These include (1) information as to the legal and contractual basis for the claim, (2) the factual and cost data supporting the award or settlement, (3) an audit report, where feasible, of the actual costs incurred by the contractor, and (4) a memorandum of law from the SHA's counsel if evaluation of a legal controversy would be expected to be critical to consideration of the award or settlement for participation. Where an audit is not feasible, provision would be made for the SHA and FHWA to mutually agree on the costs which were reasonably incurred by the contractor.

When a contractor claim has been reduced to judgment, especially where a written opinion has been entered, submission of court papers, legal briefs, and key exhibits would usually suffice to meet these proposed requirements. Where cases have been settled, the case file may well contain documents supporting the settlement which may also be used for this purpose. Typical of such documents would be claim submissions themselves, contractor documents furnished in support of the claim, SHA claim review memoranda, inspector's diary entries, and pertinent correspondence on the issues raised.

The intent of proposed paragraph (b) is to identify those materials FHWA ordinarily needs in order to make informed determinations on participation. This paragraph largely restates present practice.

Under proposed paragraph (c), it would be clarified that participation would be denied to the extent to which State employees, officers, or agents acted unreasonably in project design, plan preparation, contract administration, or other activities which gave rise to the claim. This largely follows in concept a finding made by the former Court of Claims in the "Pennsylvania Department of Transportation" case that FHWA could reduce its level of participation on a claim to reflect the unreasonable failure by that State to mitigate damages by giving timely direction to the contractor. "Acted unreasonably" would set a somewhat higher standard than mere negligence, encompassing gross negligence, intentional acts or omissions, fraud, or other acts or omissions not accepted within the standards of the profession involved.

It is proposed in this paragraph to identify several cost items in which Federal participation would be clearly denied. Several of these, as noted above, represent cost elements which are routinely disallowed under prevailing concepts of public contract law. Included in this category are consequential damages, punitive damages, and anticipated profits, as well as attorney's fees awarded to an opposing party in litigation against the State. In this context, "consequential damages" means damages which are not reasonably within the contemplation of the parties at the time they contract, and which cannot be foreseen as the result of the failure of a duty. Consequential damages would thus include failure of business, losses of or on other contracts, mental anguish, and other remote, speculative, or collateral damages.

Further, it is proposed to deny participation in post- or pre-judgment and settlement interest. The one exception to this would be award of interest during the period of appeal when the State has appealed an adverse decision with prior concurrence by FHWA. This would reflect conformity with the general principle that interest is not recoverable against the United States unless specifically provided for by contract or statute (see 28 U.S.C. 276(a)). In addition, it is not believed that such interest costs may logically be considered as being a "cost of construction" (see 23 U.S.C. 101(a) and 120). Finally, except for the situation in

which the State acts upon FHWA's specific recommendation to appeal a case, the control over litigation and, especially, payments under judgments or settlement agreements are matters entirely under the discretion and control of the States. In situations, then, where a State is dilatory in making payments, FHWA should not be in the position of having to absorb most of the interest costs that could be imposed.

Proposed paragraph (c) would also clarify that the rule regarding participation in contract claim awards and settlements would not govern Federal participation in tort, inverse condemnation, or other claims erroneously styled as being "claims under a contract."

Proposed paragraph (d) would be added to specify that where States affirmatively recover compensatory damages from contractors, subcontractors, or their agents, whether through contract claims, counterclaims, or crossclaims, on a project upon which there was Federal-aid participation, the Federal share of such recovery shall be credited back to the particular project account. Such credit would, in turn, increase the unobligated balance of that project's Federal-aid program category.

The FHWA has determined that this document is neither a major rule under Executive Order 12291 nor a significant regulation under the Department of Transportation regulatory policies and procedures. The proposed revisions are intended to merely clarify current regulations by specifying relevant criteria in determining eligibility for participation. Since there is no substantive change in the approach or procedures FHWA has traditionally employed in dealing with contract claims participation requests, it is anticipated that this action will not have a significant economic effect. Therefore, a full regulatory evaluation is not required. For the foregoing reasons and under the criteria of the Regulatory Flexibility Act, is is hereby certified that this proposal will not have a substantial economic impact on a substantial number of small entities.

The FHWA believes the paperwork burden imposed by this regulation would be reasonable but invites comments on ways to reduce the burden without jeopardizing the basic purpose of the regulation.

In consideration of the foregoing, and under the authority of 23 U.S.C. 110, 120, 315, and 49 CFR 1.48(b), the FHWA proposes to amend Part 635, Subpart A of Chapter I of Title 23, Code of Federal Regulations, by revising § 635.120 to read as set forth below.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning, and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program)

List of Subjects in 23 CFR Part 635

Government contracts, Grant programs—transportation, Highways and roads.

Issued on: March 21, 1984.

R. A. Barnhart,

Federal Highway Administrator, Federal Highway Administrator.

PART 635—CONSTRUCTION AND MAINTENANCE

Subpart A—Contract Procedures—[Amended]

The Federal Highway Administration proposes to amend Part 635 of Chapter I of Title 23, Code of Federal Regulations, by revising § 635.120 to read as follows:

§ 635.120 Participation in contract claim awards and settlements.

(a) The eligibility for, and extent of, Federal-aid participation in a contract claim award made by a State to a Federal-aid contractor on the basis of an arbitration proceeding, administrative board determination, or court judgment, or a contract claim settlement entered into in lieu of such proceedings, shall be determined on a case-by-case basis. However, Federal funds will not participate to the extent that any contract adjustments made were unreasonable or unsupported, or do not have a basis in the terms of the contract and applicable State law, as fairly construed. Further, participation may be denied where the basis for the adjustment or contractor compensation is not in accord with prevailing principles of public contract law.

(b) When requesting such participation, a State shall, in writing, set forth the legal and contractual basis for the claim, together with the factual and cost data supporting the award or settlement. Federal-aid participation in such instances should be supported by an audit by the State of the actual costs incurred by the contractor. Where an audit is not feasible, or actual costs cannot be determined, the State and FHWA may agree upon a reasonable estimate of the actual costs incurred, plus profit if applicable. Where difficult, complex or novel legal issues appear in the claim, such that evaluation of legal controversies is critical to consideration of the award or settlement, the State shall include in its submissions a brief from its counsel setting forth the basis for determining the extent of the State's liability under local law, with a level of detail commensurate with the magnitude and complexity of the issues involved.

(c) Federal funds will not participate to the extent to which State employees, officers or agents acted unreasonably in project design, plan preparation, contract administration or other activities which gave rise to the claim. Nor will Federal funds participate in such cost items as consequential or punitive damages, anticipated profit, or any award or payment of attorneys fees paid by a State to an opposing party in litigation. Payment of interest is not-participating, except for pre-judgment interest which was incurred during appeal of an adverse judgment and the State appealed such judgment with prior concurrence by FHWA. Also, this section does not authorize Federal participation in tort, inverse condemnation, or other claims erroneously styled as claims "under a contract."

(d) In cases where States affirmatively recover compensatory damages through contract claims, cross-claims, or counterclaims from contractors, subcontractors, or their agents on projects on which there was Federal-aid participation, the Federal share of such recovery shall be equivalent to the Federal share of the project or projects involved. Such recovery shall be credited to the project or projects from which the claim or claims arose.

23 CFR 660

[FHWA Docket No. 84-2]

Forest Highways; Construction and Maintenance; Allocation of Funds

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The FHWA is requesting comments on proposed revisions to its regulation for the construction and maintenance of forest highways as it relates to the allocation of funds. The proposed revision has been developed in accordance with the criteria specified in Section 126 of the Surface Transportation Assistance Act of 1982 (1982 STAA). This revision would provide for allocating forest highway funds based upon the relative transportation needs of the national forest system. The Forest Service (FS) has participated in the development of the proposed rule, and the chief of the

Forest Service has concurred in the allocation method.

DATE: Comments must be received on or before May 11, 1984.

ADDRESS: Submit written comments, preferably in triplicate, to FHWA Docket 84–2, Federal Highway Administration, Room 4205, HCC–10, 400 Seventh Street, SW., Washington, D.C. 20590. All comments received will be available for examination at the above address between 7:45 a.m. and 4:15 p.m., ET, Monday through Friday. Those desiring notification of receipt of comment must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. Allen W. Burden, Chief, Program Planning and Coordination, Office of Direct Federal Programs, (202) 426–0456, or Mr. Michael J. Laska, Attorney, Office of the Chief Counsel, (202) 426–0761, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m., ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: On January 6, 1983, the President signed into law the 1982 STAA (Pub. L. 97–424, 96 Stat. 2097). Section 126 of the 1982 STAA amends 23 U.S.C. 202 and requires the Secretary of Transportation to allocate forest highway funds according to the relative needs of the various elements of the national forest system by taking into consideration the need for access as identified through renewable resource and land use planning and the impact of such planning on existing transportation facilities. Section 105 of the 1982 STAA increased authorization for forest highway funds from $33 million per year to $50 million per year.

In distributing funds prior to the 1982 STAA, including the funds made available under the FY 1983 Continuing Appropriations, the 1958 land area and land value formula were utilized for apportionments. The remaining forest highway funds, made available for FY 1983 under the 1982 STAA, were allocated using the previous apportionment values as an interim measure until such time as the relative needs of the various elements of the national forest system could be determined.

In 1983, the FHWA and the United States Forest Service (FS) jointly developed a new allocation method using values based on relative transportation needs of renewable resource outputs and costs for backlog of improvements on roads designated as forest highways.

In FY 1984, the new allocation method was used with a protection provision that ensured each forest highway area will be allocated at least the amount of funds it received in FY 1982.

The 1958 apportionment formula values are not a complete indicator of relative needs. They are based on 1955 data which is out of date and 50 percent of the formula is based on land value. Land is difficult to determine accurately and is not a true indicator of relative transportation needs. Any new allocation method must ensure that each forest highway State has a stable funding level in order to continue with the 5 year program update as described in 23 CFR 660.109. In addition, provisions should be included to ensure that adequate funding is available for each forest highway area.

The following are factors that were considered for a new forest highway allocation:

- Timber harvest volume,
- Recreation visitor days,
- National forest land area,
- Present value benefit,
- Forest related vehicle miles of travel,
- Percent forest related traffic,
- Forest highway mileage,
- Relative condition of forest highways, and
- Relative cost to bring forest highways up to a safe and adequate standard.

National forest land area was eliminated, since it is not an accurate indicator of relative need for highway access. In some forest highway areas, a portion of the land area may be designated as roadless or have little or no need for highway access.

The present value benefit, which is an output of FS land management planning, was eliminated because it includes nonrenewable forest resources and values for nontraffic-generated benefits such as water quality. Also, the reliability of the data is questionable.

Forest highway mileage was eliminated because it is not an accurate measure of relative needs. The relative condition of forest highways was eliminated because it is already reflected in the cost factor.

It is proposed that 23 CFR 660.107, apportionments, be revised to read as "Allocations" and that funds be allocated based upon relative needs of the various elements of the national forest systems as determined by the relative percent of resource outputs and the relative percent of road related improvement costs attributed to forest traffic for the following reasons:

1. Timber Harvest Volumes (TV) and Recreation Visitors Days (RVD) are the two main National Forest's renewable resource outputs identified by land management planning as having a direct impact on forest highway transportation needs. Table 1 and Table 2 shows the relative percent of the national total in each State for TV and RVD respectively. This data was derived from current alternative data (May 1983) which will be used in the 1985 update of the Forest and Range Land Renewable Resources Planning Act. Equal weight is being given to TV and RVD since both have similiar impacts on relative transportation needs.

2. Standardized improvement cost factors were used which took into consideration road width, terrain, and type of improvement needed. In addition, bridge improvement costs were added for each bridge based upon the condition to the bridges. Roads, which are designated as forest highways, are open to public travel. As such, these roads not only serve the national forest but other areas as well. The Federal responsibility to assist in the development and improvement of forest highways as related to the national forests can be expressed as the forest related cost. The forest related cost to improve a forest highway can be determined by multiplying the relative improvement costs by the percent of forest related traffic. When this is cumulated by forest highway areas, the relative costs of forest related improvements can be determined and are summarized in Table 3.

3. Cost of improvements is indirectly related to forest highway mileage which is a product of forest highway route designation. To minimize the influence of forest highways route designation on the allocation of funds, a regional standardization factor (K) has been incorporated to ensure proper weight between benefits (resource outputs) and costs (forest highway investments) is achieved. The K value consists of relative percent of FS Regional resource outputs (TV+RVD) divided by relative percent of forest related vehicle miles of travel (VMT). For a specific area where the relative percent of resource output is constant, as the forest highway mileage is increased or decreased, VMT increases or decreases, and the "K" factor will decrease or increase respectively. When the relative forest related improvement costs are multiplied by this factor, the relative improvement costs are placed in proper balance with resource outputs. The K values are shown in Table 4. Idaho, Wyoming, and California have different K factors for the portions that are in different FS regions.

When the forest related cost of improvements in Table 3 is multiplied by the K values in Table 4 and the

product is added for all forest highway areas, the total percent is 101.35 percent. These values then can be normalized by factor of 100 divided by 101.35. The normalized values for (K × Cost × % FS Traffic) are shown in Table 5.

In FY 1984, forest highway funds were distributed on a FS region basis to allow flexibility as required in certain States to meet project funding and scheduling needs. The allocation on a FS region basis does not require that the annual distribution of funds by State boundary be expended in that State that year. Transfer of funds on a borrow basis between States is allowed in order to maximize use of all available funds.

Each State will be assured that over a 3 year period (FY 1984, FY 1985, and FY 1986), the total allocated funds will be available for use on forest highways within that State boundary. Any temporary transfer (borrow) of funds shall have the concurrence of the FS and State highway administration (SHAs) affected by the transfer. The FHWA Direct Federal Division Engineer will ensure that credits are appropriately established within the overall approved forest highway program plans and schedules.

It is proposed that the following allocation formula be used without any prior fiscal year protection values:

½ (TV+RVD)+½ (K × Cost × % FS Traffic).

Where:

—TV is percent of total timber harvest volume.

—RVD is percent of total recreation visitors days.

—Cost is improvement cost to bring forest highways to a given standard.

—K is regional standardization factor based on ratio of relative percent resources outputs to relative percent forest related vehicle miles traveled.

Table 6 shows the regional allocation of funds for forest highways including a breakdown by State boundary.

Since the procedures for program and project selection (23 CFR 660.109) are not being changed, it is not anticipated that this proposal will have a national significant economic effect. Accordingly, a full regulatory evaluation is not required. For the foregoing reasons and under the criteria of the Regulatory Flexibility Act, it is certified that this proposal will not have a significant economic impact on a substantial number of small entities.

Comments on the proposed fund allocation are requested from all interested parties. The comments should specifically address the effects of the proposed allocation method on the effectiveness of the forest highway program.

The FHWA has determined that this document contains neither a major rule under Executive Order 12291 nor a significant proposal under the regulatory policies and procedures of the Department of Transportation.

In consideration of the foregoing and under the authority of section 126 of the 1982 Surface Transportation Assistance Act, 23 U.S.C. 202 and 49 CFR 1.48(b), the FHWA proposes to amend Part 660 of Title 23, Code of Federal Regulations, by revising Subpart A, § 660.107, as set forth below.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Forest highways, Highways and roads.

Issued on: March 21, 1984.

R. A. Barnhart,

Federal Highway Administrator, Federal Highway Administration.

PART 660—SPECIAL PROGRAMS (DIRECT FEDERAL) [AMENDED]

Section 660.107 of 23 CFR is revised to read as follows:

§ 660.107 Allocations.

On October 1 of each fiscal year, the FHWA will allocate funds for forest highways using values based on relative transportation needs of the various elements of the national forest system, after deducting such sums as deemed necessary for the administrative requirements of the FHWA; the necessary expenses of the FS; and the necessary costs of forest highway research and development, and engineering studies.

BILLING CODE 1505-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 902

Permanent State Regulatory Program of Alaska

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is proposing to modify the deadline for Alaska (1) to promulgate rules governing the training, examination and certification of blasters and (2) to develop and adopt a program to examine and certify all persons who are directly responsible for the use of explosives in a suface coal mining operation. On February 29, 1984, Alaska requested a 12 month extension of time for the development of a blaster certification program. All States with regulatory programs approved under the Surface Mining Control and Reclamation Act of 1977 (SMCRA of the Act) are required to develop and adopt a blaster certification program by March 4, 1984. Section 850.12(b) of OSM's regulations provides that the Director, OSM, may approve an extension of time for a State to develop and adopt a program upon a demonstration of good cause.

DATE: Comments must be received by April 26, 1984 at the address below, no later than 5:00 p.m.

ADDRESSES: Written comments should be mailed or hand delivered to Mr. William Thomas, Field Office Director,

Casper Field Office, Office of Surface Mining, Freden Building, 935 Pendell Boulevard, Mills, Wyoming 82644.

FOR FURTHER INFORMATION CONTACT: Mr. William Thomas, Field Office Director, Casper Field Office, Office of Surface Mining, Freden Building, 935 Pendell Boulevard, Mills, Wyoming 82644; Telephone: (307) 328–5830.

SUPPLEMENTARY INFORMATION: On March 4, 1983, OSM issued final rules effective April 14, 1983, establishing the Federal standards for the training and certification of blasters at 30 CFR Chapter M (48 FR 9486). Section 850.12 of these regulations stipulates that the regulatory authority in each State with an approved program under SMCRA shall develop and adopt a program to examine and certify all persons who are directly responsible for the use of explosives in a surface coal mining operation within 12 months after approval of a State program or within 12 months after publication date of OSM's rule at 30 CFR Part 850, whichever is later. In the case of Alaska's program, the applicable date is 12 months after the approval of the State program, or May 2, 1984.

On February 29, 1984, the State of Alaska submitted to OSM a request for a 12 month extension to submit final rules addressing the blaster certification program. The State of Alaska is in the process of developing, in conjunction with the University of Alaska, a blaster training and certification program. The State is also in the process of developing regulations addressing the training, examination and certification of blasters. Due to the problems inherent in implementing a new program such as Alaska's, the State has indicated a need for additional time in which to develop an adequate program consistent with the requirements of 30 CFR Part 850.

Therefore, OSM is seeking comment onthe State's request for additional time to develop and adopt a blaster certification program. Section 850.12(b) of OSM's regulations provides that the Director, OSM, may approve an extension of time for a State to develop and adopt a program upon a demonstration of good cause.

Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 7029(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules would be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

30 CFR Part 914

Permanent State Regulatory Program of Indiana

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is announcing procedures for the public comment period and for a public hearing on the substantive adequacy of a proposed program amendment to the Indiana Permanent Regulatory Program (hereinafter referred to as the Indiana program) received by OSM pursuant to the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

The proposed amendment submitted by the State on March 5, 1984, consists of five modifications to the Indian statute pertaining to the hearing on a lands unsuitable petition, location of permit applications, permit application denials, requirements for a permittee to submit an annual status report to the State and adjustment of bond amounts.

This document sets forth the times and locations that the Indiana program and proposed amendment are available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment and information pertinent to the public hearing.

DATE: Written comments relating to Indian's proposed modification of it's program not received on or before 4:00 p.m. on April 26, 1984, will not necessarily be considered in the District's decision to approve or disapprove the proposed program modifications.

If requested, a public hearing will be held on April 23, 1984, beginning at 10:00 a.m. at the location shown below under "ADDRESSES."

ADDRESSES: Written comments should be mailed or hand-delivered to: Mr. Richard D. McNabb, Director, Indianapolis Field Office, Office of Surface Mining Reclamation and Enforcement, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana 46204. Telephone: (317) 269–2600.

If a public hearing is held, its location will be at: OSM Indianapolis Field Office, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana. Telephone: (317) 269–2600.

FOR FURTHER INFORMATION CONTACT: Mr. Richard D. McNabb, Director, Indianapolis Field Office, Office of Surface Mining Reclamation and Enforcement, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana 46204. Telephone: (317) 269–2600.

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures

Availability of Copies

Copies of the Indiana program, the proposed amendment, and a listing of any scheduled public meeting and all written comments received in response to this notice will be available for review at the OSM offices and the Office of the State Regulatory Authority listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays.

Office of Surface Mining Reclamation and Enforcement, Room 5315, 1100 L Street NW., Washington, D.C. 20240

Office of Surface Mining Reclamation and Enforcement, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana

Indiana Department of Natural Resources, 608 State Office Building, Indianapolis, Indiana 46204

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "**DATES**" or at locations other than Indianapolis, Indiana, will not necessarily be considered and included in the Administrative Record for the final rulemaking.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed under "**FOR FURTHER INFORMATION CONTACT**" by the close of business April 16, 1984. If no one requests to comment at the public hearing, the hearing will not be held.

If only one person requests to comment, a public meeting, rather than a public hearing, may be held and the results of the meeting included in the Administrative Record.

Filing of a written statement at the time of the hearing is requested and will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment and wish to do so will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment, have been heard.

Public Meeting

Persons wishing to meet with OSM representatives to discuss the proposed amendment may request a meeting at the OSM office listed in "**ADDRESSES**" by contacting the person listed under "**FOR FURTHER INFORMATION CONTACT.**"

All such meetings are open to the public and, if possible, notices of meetings will be posted in advance in the Administrative Record. A written summary of each public meeting will be made a part of the Administrative Record.

II. Discussion of the Proposed Amendment

Information regarding the general background on the Indiana State Program, including the Secretary's Findings, the disposition of comments and a detailed explanation of the conditions of approval of the Indiana program can be found in the July 26, 1982, **Federal Register** (47 FR 32071–32108).

On March 5, 1984, the Director, Indiana Department of Natural Resources, submitted to OSM pursuant to 30 CFR 732.17, a proposed State program amendment for approval. The proposed amendment is titled Senate Enrolled Act No. 30 which was signed by the Governor of Indiana on February 29, 1984. This statutory amendment proposes to amend five provisions of the approved Indiana program. Briefly, the proposed modifications and statute cites are:

1. Deleting the requirement for the hearing on a lands unsuitable petition to be conducted according to the Indiana Administrative Adjudication Act. IC 13–4.1–2–4.

2. Changing the filing location of permit applications from the county recorders' offices to the main public library in the county of operation and providing that the applicant can remove the application from public inspection at the library thirty (30) days after the final Commission decision on that application, provided that the application remains on file for public inspection at the Division of Reclamation field office. IC 13–4.1–3–3.

3. Providing that a permit can be denied if the applicant owns or controls operations currently in violation of the old Indiana Coal Mining Law, or if the applicant or operator controls or has controlled coal mining operations with a demonstrated pattern of willful violations of the old Indiana Coal Mining Laws, in addition to the existing language based on violations of the new Indiana law and Federal law. Further, the term applicant or operator is defined to include the officers, partners or directors of the named applicant, allowing the Commission to consider violations of operations owned or controlled by the persons behind the named applicant. IC 13.4.1–4–3.

4. Adding a requirement for the permittee to submit an annual status report to the Natural Resources Commission. IC 13–4.1–5–7.

5. Providing that bond amounts, once established, may be adjusted, if the permittee's history of mining and reclamation changes during the term of the permit. IC 13–4.1–6–6.

Therefore, pursuant to 30 CFR 732.17 and 732.15, the Director requests public comment on the adequacy of the above modifications. If the Director determines that the proposed modifications are in accordance with SMCRA and consistent with the Federal regulations, the amendment will be incorporated as part of the approved Indiana program.

Procedural Matters

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

30 CFR Part 931

Permanent State Regulatory Program of New Mexico

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is proposing to modify the deadline for New Mexico (1) to promulgate rules governing the training, examination and certification of blasters and (2) to develop and adopt a program to examine and certify all persons who

are directly responsible for the use of explosives in a surface coal mining operation. On March 5, 1984, New Mexico requested a 12 month extension of time for the development of a blaster certification program. All States with regulatory programs approved under the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act) are required to develop and adopt a blaster certification program by March 4, 1984. Section 850.12(b) of OSM's regulations provides that the Director, OSM, may approve an extension of time for a State to develop and adopt a program upon a demonstration of good cause.

DATE: Comments must be received by April 26, 1984 at the address below, no later than 5:00 p.m.

ADDRESSES: Written comments should be mailed or hand delivered to Mr. Robert Hagen, Field Office Director, Albuquerque Field Office, Office of Surface Mining, 219 Central Avenue, N.W., Albuquerque, New Mexico 87102.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Hagen, Field Office Director, Albuquerque Field Office, Office of Surface Mining, 219 Central Avenue, N.W., Albuquerque, New Mexico 87102; Telephone: (505) 766–1486.

Supplementary Information

On March 4, 1983, OSM issued final rules effective April 14, 1983, establishing the Federal standards for the training and certification of blasters at 30 CFR Chapter M (48 FR 9486). Section 850.12 of these regulations stipulates that the regulatory authority in each State with an approved program under SMCRA shall develop and adopt a program to examine and certify all persons who are directly responsible for the use of explosives in a surface coal mining operation within 12 months after approval of a State program or within 12 months after publication date of OSM's rule at 30 CFR Part 850, whichever is later. In the case of New Mexico's program, the applicable date is 12 months after publication date of OSM's rule, or March 4, 1984.

On March 5, 1984, the State of New Mexico submitted to OSM a request for a 12 month extension to submit final rules addressing the blaster certification program. The State indicated that it is making considerable progress in developing a program for the training, examining and certification of blasters. The New Mexico Permanent Program Committee has developed proposed regulations that will be submitted shortly to the New Mexico Coal Surface Mining Commission, the rulemaking body. The State has indicated a need for additional time to complete the above tasks so as to develop an adequate program consistent with the requirements of 30 CFR Part 850.

Therefore, OSM is seeking comment on the State's request for additional time to develop and adopt a blaster certification program. Section 850.12(b) of OSM's regulations provides that the Director, OSM, may approve an extension of time for a State to develop and adopt a program upon a demonstration of good cause.

Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules would be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

30 CFR Part 935

Public Comment Procedures and Opportunity for Public Hearing on Proposed Amendment to the Ohio Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed Rule.

SUMMARY: OSM is announcing procedures for a public comment period and for requesting a public hearing on the substantive adequacy of a program amendment submitted by Ohio as an amendment to the State's permanent regulatory program (hereinafter referred to as the Ohio program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment consists of proposed changes to the Ohio regulations concerning blaster training and certification.

This notice sets forth the times and locations that the Ohio program and proposed amendment will be available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment, and the procedures that will be followed for the public hearing.

DATES: Written comments from the public must be received by 4:30 p.m., April 26, 1984 to be considered in the decision on whether the proposed amendment should be approved and incorporated into the Ohio regulatory program. A public hearing on the proposed amendment will be held only if requested. If no one requests a public hearing, none will be held. If only one person requests a public hearing, a public meeting, rather than a hearing, may be held and the results of the meeting included in the Administrative Record. If a hearing is requested and scheduled, a notice announcing the time and location of the hearing will be announced in the **Federal Register**. Requests for a public hearing should be directed to Ms. Nina Rose Hatfield at the address or telephone number listed below by 4:00 p.m., April 11, 1984.

ADDRESSES: Written comments and requests for a hearing should be directed to Ms. Nina Rose Hatfield, Field Office Director, Columbus Field Office, Office of Surface Mining, Room 202, 2242 South Hamilton Road, Columbus, Ohio 43227; Telephone: (614) 866–0578.

Copies of the Ohio program, the proposed modifications to the program, a listing of any scheduled public meetings, and all written comments received in response to this notice will

be available for public review at the OSM Field Office listed above and at the OSM Headquarters Office and the Office of the State regulatory authority listed below, during normal business hours Monday through Friday, excluding holidays.

Office of Surface Mining, Room 5315, 1100 "L" Street, NW., Washington, D.C. 20240

Ohio Division of Reclamation, Building B, Fountain Square, Columbus, Ohio 43224

FOR FURTHER INFORMATION CONTACT: Ms. Nina Rose Hatfield, Field Office Director, Columbus Field Office, Office of Surface Mining, Room 202, 2242 South Hamilton Road, Columbus, Ohio 43227; Telephone: (614) 866-0578.

SUPPLEMENTARY INFORMATION:

I. Background

The Ohio program was approved effective August 16, 1982, by notice published in the August 10, 1982 **Federal Register** (47 FR 34688). The approval was conditioned on the correction of 28 minor deficiencies contained in 11 conditions. Information pertinent to the general background, revisions, modifications, and amendments to the Ohio program submission, as well as the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Ohio program can be found in the August 10, 1982 **Federal Register**.

II. Submission of Revisions

By letter dated March 5, 1984, Ohio submitted proposed regulations which would establish requirements for the training and certification of blasters working in surface coal mining operations. The new requirements are set forth in OAC 1501:13-14-05— *Training, Examination, and Certification of Blasters*.

At the time of the Secretary's approval of the Ohio program, OSM had not yet promulgated Federal rules governing the training and certification of blasters. Therefore, the State was not required to include such requirements in its program. However, in the notice announcing conditional approval of the Ohio program, the Secretary specified that Ohio would be required to adopt such provisions following promulgation of the Federal standards (47 FR 34688, August 10, 1982).

On March 4, 1983, OSM issued final rules effective April 14, 1983, establishing the Federal standards for the training and certification of blasters at 30 CFR Chapter M (48 FR 9486). OSM is seeking comment on whether the Ohio proposed rules are no less effective than the Federal regulations and satisfy the criteria for approval of State program amendments at 30 CFR 732.15 and 732.17.

The full text of the proposed program amendment submitted by Ohio is available for public inspection at the addresses listed above. Upon request to OSM's Field Office Director, each person may receive, free of charge, one single copy of the proposed amendment. If approved, the amendment will become part of the Ohio program.

III. Procedural Requirements

1. Compliance with the National Environmental Policy Act

The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. Executive Order No. 12291 and the Regulatory Flexibility Act

On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules would be met by the State.

3. Paperwork Reduction Act

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 84-269; RM-4572]

FM Broadcast Station in Humnoke, Arkansas; Proposed Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein, at the request of James M. Cope, proposes the assignment of Channel 269A to Humnoke, Arkansas. The assignment could provide that community with its first local FM service.

DATES: Comments must be filed on or before May 7, 1984, and reply comments on or before May 22, 1984.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

Notice of Proposed Rule Making

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations, (Humnoke, Arkansas); MM Docket No. 84-269, RM-4572.

Adopted: March 8, 1984.
Released: March 16, 1984.

By the Chief, Policy and Rules Division:

1. The Commission has before it a petition for rule making filed by James M. Cope ("petitioner") seeking the assignment of FM Channel 269A to Humnoke, Arkansas, as that community's first local FM service. Petitioner has stated his intention to apply for the channel, if assigned. The channel can be assigned in compliance with the Commission's minimum distance separation and other technical requirements as long as the transmitter is located at least 1.1 mile north of Humnoke to avoid a short spacing to Station KQEW, Channel 269A, at Fordyce, Arkansas.

2. We believe it would be appropriate to seek comments on the proposed assignment as it could provide Humnoke with its first local FM facility. Therefore, IT IS PROPOSED TO AMEND the FM Table of Assignments, § 73.202(b) of the Commission's Rules, for the community listed below:

City	Channel No.	
	Present	Proposed
Humnoke, Arkansas		269A

3. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

4. Interested parties may file comments on or before May 7, 1984, and reply comments on or before May 22, 1984, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows:

James M. Cope, 3509 N. Cypress, North Little Rock, Arkansas 72116 (Petitioner)

5. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

6. For further information concerning this proceeding, contact Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303).

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, it advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished by the Commission.'

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[MM Docket No. 84-270; RM 4598]

FM Broadcast Station in Pittsburg, Texas; Proposed Changes made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign FM Channel 276A to Pittsburg, Texas, as its first FM assignment, in response to a petition filed by Charles D. Hagen and Steven Milner.

DATES: Comments must be filed on or before May 7, 1984, and reply comments on or before May 22, 1984.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

Radio broadcasting.

Notice of Proposed Rule Making

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations, (Pittsburg, Texas); Docket No. 84-270, Rm-4598.

Adopted: March 8, 1984.
Released: March 16, 1984.

By the Chief, Policy and Rules Division:

1. A petition for rule making has been filed by Charles D. Hagen and Steven Milner ("petitioners"), proposing the assignment of FM Channel 276A to Pittsburg, Texas, as its first FM service. Petitioners expressed an interest in applying for the channel, if assigned.

2. The channel can be assigned in compliance with the minimum distance

separation requirements provided there is a site restriction of 7.6 miles northwest of Pittsburg. The site restriction would prevent short spacing to FM Station KJCS on Channel 277 in Nacogdoches, Texas, and FM Station KOSY on Channel 273 in Texarkana, Texas. However, with the site restriction, it may prove difficult to provide a city-grade (70 dBu) signal to the community pursuant to the requirements of § 73.315. The petitioner, in an amendment to his petition, provided information that a site is available that appears to meet the minimum spacing requirements and at the same time provide a city-grade signal to the principal community.

3. In view of the fact that the proposed assignment could provide a first FM service to Pittsburg, Texas, the Commission believes it appropriate to propose amending the FM Table of Assignments, § 73.202(b) of the Commission's Rules, with respect to the following community.

City	Channel No.	
	Present	Proposed
Pittsburg, Texas		276A

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before May 7, 1984, and reply comments on or before May 22, 1984, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows:

Phil Prescott, Prescott & Prescott, Merchants Bank Building, Suite 305, 5217 Ross Avenue, Dallas, Texas 75206 (Attorney for the petitioner)

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(c)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the persons) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

[MM Docket No. 84-271; RM-4501]

TV Broadcast Station in Bakersfield, California; Proposed Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: At the request of Stephen J. Mewhort, the Commission has proposed the assignment of UHF TV Channel 48 to Bakersfield, California, as its fifth television assignment.

DATES: Comments may be filed on or before May 7, 1984, and reply comments on or before May 22, 1984.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau (202) 634–6530.

List of Subjects in 47 CFR Part 73

Television Broadcasting.

Notice of Proposed Rule Making

In the matter of Amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations, (Bakersfield, California); MM Docket No. 84–271, RM–4501.

Adopted: March 8, 1984.
Released: March 16, 1984.

By the Chief, Policy and Rules Divisions.

1. The Commission has before it a petition for rule making filed by Stephen J. Mewhort ("petitioner") seeking the assignment of UHF TV Channel 48 to Bakersfield, California. Petitioner has stated his intention to apply for the channel, should it be assigned.

2. Bakersfield (population 105,611),[1] the seat of Kern County (population 403,089), is located in southern California, approximately 170 Kilometers (102 miles) northwest of Los Angeles. The assignment would represent the fifth television channel assigned to Bakersfield. The channel can be assigned in compliance with the Commission's minimum distance separation requirements with a site restriction of 2.7 miles north to avoid a short spacing to the construction permit for Station KTIE, Channel 63, Oxnard, California.

3. In view of the fact that Bakersfield could receive an additional television broadcast service, the Commission believes it would be in the public interest to seek comments on the proposal to amend the Television Table of Assignments, § 73.606(b) of the Commission's Rules, for the following community:

City	Channel No.	
	Present	Proposed
Bakersfield, California	17, 23–, 29, *39–.....	17, 23–, 29, *39–, 48

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before May 7, 1984, and reply comments on or before May 22, 1984, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel, or consultant, as follows:

Mr. Edward M. Johnson, Edward M. Johnson & Associates, Suite 450, One Regency Square, Knoxville, Tennessee 37915 (Consultant to petitioner)

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), and 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(e)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed.

[1] Population figures are taken from the 1980 U.S. Census.

Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

Federal Motor Vehicle Safety Standards; Transmission Shift Lever Sequence

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of termination of rulemaking.

SUMMARY: This notice terminates the NHTSA rulemaking action begun when this agency published a grant of petition for rulemaking on a petition by Zemco, Inc., concerning Safety Standard No. 102, *Transmission Shift Lever Sequence, Starter Interlock, and Transmission Braking Effect.* In order to produce an aftermarket fuel saving device, Zemco, Inc., sought to have this agency amend the provisions of the standard requiring that the engine starter be inoperable when the transmission shift lever is in the forward or reverse position. After a limited test of the Zemco device, the NHTSA determined that the operational safety of the fuel saver may compromise safe vehicle operation. However, the agency emphasizes that if in the future a more effective and safe fuel saving device is developed, amendments to Standard No. 102 could then be considered.

FOR FURTHER INFORMATION CONTACT: Dr. August Burgett, Crash Avoidance Division, National Highway Traffic Safety Administration, 400 Seventh Street, S.W., Washington, D.C. 20590 (202-426-1351).

SUPPLEMENTARY INFORMATION: On July 31, 1980, the NHTSA published a notice granting a petition for rulemaking by Zemco, Inc., concerning Safety Standard No. 102, *Transmission Shift Lever Sequence, Starter Interlock, and Transmission Braking Effect* (45 FR 50845). The petitioner sought to produce an aftermarket fuel saving device that automatically shuts off when the vehicle stops in traffic and would restart when the accelerator is depressed. In order to market the device, Zemco, Inc., requested an amendment to the provision in the standard mandating that the engine starter be inoperable when the transmission shift lever is either in the forward or the reverse position (49 CFR 571.102, S3.1.3). In its petition, Zemco, Inc., asserted that the device could offer fuel saving benefits without negative effects on safety. Because of the high cost and potential future shortages of gasoline and because of industry interest in developing fuel conservation devices, the NHTSA granted the Zemco petition.

The Zemco Fuel Economy Device

The Zemco fuel saving device is an aftermarket mechanism which can be mounted on both old and new vehicles. The device is activated by pushing the "on" button located on the command console which is affixed to the dashboard. This switch allows the operator to choose whether or not to activate the device. By design, the unit will not operate for approximately one minute after initial engine starting, to permit the engine to warm-up.

The control unit requires signals from two sensors for its operation. The first signal is received from the vehicle's brake system. When the operator applies the foot brakes, an electrical signal from the brake light switch is routed to the fuel economy control unit.

A second sensor detects the speed of the vehicle. This sensor is installed on the vehicle's drive shaft. A signal from this sensor is routed to the fuel economy control unit when the vehicle speed is *0* mph for a two second period.

Approximately two seconds after receiving signals from the brake light switch and the movement sensor, the control unit opens the ignition circuit to the coil, thereby stopping the engine. To restart the engine, the operator simply presses the accelerator, which has been fitted with a microswitch. The microswitch signals the control unit to close the ignition relay and to activate the relay for the engine starting system, resulting in a brief starting delay. After the engine is restarted, the device will not stop the engine again until the vehicle moves several feet, preventing multiple restarts.

Testing of Zemco Fuel Saving Mechanism

Originally, the NHTSA planned a general investigation of the concept of reduced idle time and the safety hazards it might pose in a three-year study. However, the study on fuel economy designs was not funded due to other projects with higher safety priority. The agency instead commenced a specific review of the potential safety and fuel economy effects of the Zemco fuel saving device.

The NHTSA undertook to test the operational safety of the Zemco device in house with members of the NHTSA staff. An intercity route with numerous stop lights, stop signs and differing terrain was selected. A questionnaire was prepared to elicit operator reaction to the various driving situations and conditions.

The test focused on potential safety problems. Fuel economy, reliability, maintenance and other aspects and functions of the device were not considered. Weather conditions were those typical of the Washington fall. No operations under nighttime driving or adverse weather conditions such as fog, rain or snow were undertaken. After evaluating and summarizing the responses of the drivers, several main concerns arose regarding potential safety hazards.

Starting Delay—Merging Traffic

After a stop, there is a brief starting delay before the engine is restarted. This delay could be hazardous when making turns across traffic. For example, a merging left turn from a stop, particularly across a divided intersection against oncoming and cross traffic, poses a potentially unsafe situation due to the delay. A similar but less hazardous set of circumstances exists on a right hand merge from a stop, especially with pedestrians in the crosswalk or with the vehicle entering a "yield" section of a high speed expressway.

Lack of Automatic Shut-Off

The mechanism is activated when the operator pushes the "on" button located on the command console mounted on the dash. Once the device is turned on, it stays "on" until the "off" button of the console is pushed. There is no positive signal to the driver to inform him that the device is activated. There is no automatic shut-off of the device when a driver stops the vehicle and exits without turning off the fuel saving unit. A positive signal such as a light display or sound could warn the exiting driver

that he has left the fuel-saving device "on".

A hazardous situation could also arise as to the uninformed driver. For instance, if one driver exits a vehicle without turning off the device, the next driver could enter, start the vehicle and drive off without the knowledge that the fuel saving device is activated.

The Zemco installation kit contains a small 2¾ in x ⅝ inch gummed label, warning that the vehicle is equipped with a stop/start device. The label reads: "CAUTION—Vehicle Equipped With Fuel Saver. Engine Will Automatically Re-Start With Vehicle In Gear." There is not active warning to an uninstructed driver that the vehicle is equipped with a fuel saving unit.

The potential safety hazards to the unknowing driver could be averted by an automatic shut down system. For instance, the fuel saving unit could cease functioning automatically upon some specified signal such as turning off the ignition, leaving the driver's seat or opening the driver's door.

Effect on Other Vehicle Functions

The Zemco device may pose safety hazards in relation to other vehicle functions. For example, some older vehicles are equipped with vacuum or hydraulic wiper systems. When the engine shuts off, the wiper system will also stop. This condition could lead to safety problems in inclement weather by adversely affecting visibility.

Furthermore, the use of a stop/start mechanism could be unsafe for vehicles equipped with power steering or brakes. When the engine turns off there may be inadequate vacuum or pressure to keep the power steering and brake systems functioning. This problem can be averted through a special booster arrangement that provides sufficient vacuum or pressure to keep these systems operational when the engine is shut off. Such a booster is not found in the Zemco device.

Stalling on Restart

The Zemco fuel economy unit is an aftermarket item and could be installed in new, well-tuned vehicles as well as old, out-of-tune vehicles. The Zemco fuel saver is designed to permit only one automatic restart after a two-second stop and shutdown. The second restart is accomplished by shifting into "neutral" or "park" and cranking with the key. An older, out-of-tune vehicle may stall upon restart. Hazardous traffic delays could result because of older vehicles equipped with the Zemco mechanism.

Furthermore, this same problem may occur in any vehicle when it is cold. This stalling problem can be avoided by delaying the functioning of the fuel saving device until after the coolant reaches a certain temperature.

Avoidance of Engine Shutdown

In the fuel economy unit, there may be a built-in challenge to the driver to avoid engine shut down due to the two second delay prior to shut down after a stop. In trying to prevent the two second dead stop, the driver may be motivated to effect a rolling stop at a "stop" sign, in slow moving traffic, or in slowly decelerating while approaching a red light about to change. To avoid engine shut down, the driver may continue to roll forward slowly so that the control unit will not signal the engine to shut off. Trying to avert a shutdown by creeping maneuvers will likely distract operators, resulting in hazardous driving conditions.

Conclusion

In light of the foregoing arguments concerning the negative effects on safety of the Zemco fuel saver, the agency is terminating its rulemaking activity on the matter. But the agency strongly encourages further research and development in the area of fuel economy devices. The termination of rulemaking in this instance reflects only on the type of design offered, not on the concept of reduced idle time. The NHTSA emphasizes that many of its safety concerns could be overcome by design modifications. The agency further stresses that if in the future a more effective and safe fuel economy device is developed, amendments to Standard No. 102 could then be considered.

Issued on: March 22, 1984.

Barry Felrice,

Acting Associate Administrator for Rulemaking.

BILLING CODE 4910-59-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1048

[Ex Parte No. MC-37 (Sub-36)]

Proposed Supplement to the Commercial Zone Regulations in Lieu of Specific Definition of the Houston, TX Commercial Zone

AGENCY: Interstate Commerce Commission.

ACTION: Proposed rule; Houston, TX commercial zone.

SUMMARY: The Port of Galveston seeks specific definition of the Houston, TX commercial zone to assure that the present zone is unaltered by contraction of the Houston city limits through an anticipated de-annexation. Rather, than specifically define the Houston Commercial Zone, the Commission proposes to supplement its regulations so that contraction of municipal boundaries do not disturb established commercial zones.

DATES: Comments are due April 26, 1984.

ADDRESSES: The original and 15 copies of comments should be sent to: Ex Parte No. MC-37 (Sub-No. 36), Case Control Branch, Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:

Thomas J. Barry, (202) 275-7540

or

Howell I. Sporn, (202) 275-7691

SUPPLEMENTARY INFORMATION: We propose to amend Title 49 of the CFR by adding a new paragraph (c) to § 1048.102 to read as follows:

§ 1048.102 Controlling distances and population data.

* * * * *

(c) Contraction of municipal boundaries shall not alter the size of established commercial zones.

Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. Infosystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC, 20423, or call 289-4357 (DC metropolitan area) or toll-free (800) 424-5403.

This action proposed will not have an adverse effect on either the quality of the human environment or conservation of energy resources.

Regulatory Flexibility Statement

The Commission certifies that this proposal will not have a significant economic impact on a substantial number of small entities. Its purpose is to maintain the *status quo* of commercial zones so as to ensure that changes in political boundary lines do not disturb commercial shipping patterns or competitive relationships.

List of Subjects in 49 CFR Part 1048

Motor carriers, Commercial zones.

This decision is issued pursuant to 49 U.S.C. 10321, 49 U.S.C. 10526 and 5 U.S.C. 553.

Decided: March 16, 1984.

By the Commission, Chairman Taylor, Vice Chairman Andre, Commissioners Sterrett and Gradison.

James H. Bayne,

Acting Secretary.

Feed Grain Donations for the Fort Berthold Reservation Indian Tribes in North Dakota

Pursuant to the authority set forth in Section 407 of the Agricultural Act of 1949, as amended (7 U.S.C. 1427) and Executive Order 11336, I have determined that:

1. The chronic economic distress of the needy members of the Fort Berthold Reservation in North Dakota has been materially increased and became acute because of severe and prolonged drought substantially reducing range forage and hay production, thereby creating a serious shortage of feed and causing increased economic distress. This reservation is designated for Indian use and is utilized by members of the Mandan, Hidatsa and Arikara Tribes for grazing purposes.

2. The use of feed grain or products thereof made available by the Commodity Credit Corporation for livestock feed for such needy members of the tribe will not displace or interfere with normal marketing of agricultural commodities.

3. Based on the above determinations, I hereby declare the reservation and grazing lands of the tribe to be acute distress areas and authorize the donation of feed grain owned by the Commodity Credit Corporation to livestock owners who are determined by the Bureau of Indian Affairs, Department of the Interior, to be needy members of the tribe utilizing such lands. These donations by the Commodity Credit Corporation may commence upon signature of this notice and shall be made available through May 31, 1984, or to such other time as may be stated in a notice issued by the Department of Agriculture.

Signed at Washington, D.C. on March 22, 1984.

Everett Rank,

Administrator, Agricultural Stabilization and Conservation Service

BILLING CODE 3410-05-M

Rural Electrification Administration

Puerto Rico Electric Power Authority

AGENCY: Rural Electrification Administration, USDA.

ACTION: Notice.

SUMMARY: The Administrator of the Rural Electrification Administration will consider a request for financial assistance in the approximate amount of $32,087,000 from Puerto Rico Electric Power Authority, San Juan, Puerto Rico. The proposed loan will finance 70 percent of a project which includes service for 14,766 additional electric consumers, 542 miles of distribution line, upgrading transmission facilities and various system improvements. Construction will take place throughout the island of Puerto Rico.

ADDRESS: All interested parties are invited to submit written comments to REA within 60 days. Comments should be sent to Mr. Joe S. Zoller, Assistant Administrator—Electric, REA, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Mr. Wilfredo Marcial Gonzalez, Executive Director, Puerto Rico Electric Power Authority, GPO Box 4267, San Juan, Puerto Rico 00936 or Mr. Joseph R. Binder, Director, Southeast Area Electric REA, U.S. Department of Agriculture, Washington, D.C. 20250.

SUPPLEMENTARY INFORMATION: Pursuant to Executive Order 12372, "Intergovernmental Review of Federal Programs" and in conformance with 7 CFR Part 3015 "Intergovernmental Review of U.S. Department of Agriculture Programs and Activities," REA is providing notice that the Administrator of REA intends to consider a request for financial assistance from the Puerto Rico Electric Power Authority. Interested parties may obtain information on the proposed loan, including the engineering and economic feasibility studies and the proposed schedule for advances to the borrower of loan funds, from Mr. Wifredo Marcia Gonzalez at the address given above.

This program is listed in the Catalog of the Federal Domestic Assistance as 10.850 Rural Electrification Loans and Loan Guarantees.

Dated: March 20, 1984.

Harold V. Hunter,

Administrator.

BILLING CODE 6320-01-M

[Dockets 34507, 40541, 41676; Order 84-3-91]

El Al Israel Airlines Limited; Order To Show Cause

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order To Show Cause: Order 84-3-91.

SUMMARY: The Board proposes to approve the following applications:

Applicant: El Al Israel Airlines Limited.

Dockets: 34507, 40541, 41676.

Dates applications filed: January 17, 1979; March 18, 1982; August 31, 1983.

Authority sought: El Al requests authority to serve Miami, Chicago, Boston and Los Angeles; to conduct beyond service from one specified U.S.

point to Mexico City, Mexico; and to perform charter flights in accordance with the terms of the August 1978 U.S.-Israel Protocol. We propose to grant the requests. In addition, we propose to: (1) authorize El Al to serve Montreal as an intermediate point (without traffic rights between Montreal and the United States)—authority consistent with the Protocol; and (2) delete the intermediate points Iceland, Greenland, the Azores, and the Provinces of Newfoundland and Quebec which are listed in El Al's current permit, but are not listed in the 1978 Protocol.

Objections: All interested persons having objections to the Board's tentative findings and conclusions that this authority should be granted, as described in the order cited above, shall, no later than April 9, 1984, file a statement of such objections in each docket with the Civil Aeronautics Board (20 copies) and mail copies to the applicant, the Department of Transportation, the Department of State, and the Ambassador of Israel. A statement of objections must cite the docket numbers and must include a summary of testimony, statistical data, or other supporting evidence.

If no objections are filed, the Secretary of the Board will enter an order which will, subject to disapproval by the President, make final the Board's tentative findings and conclusions and issue the proposed permit.

Addresses for objections:

Dockets 34507, 40541, 41676, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428

Ruth J. Weinstein, Esq., Hale, Russell and Gray, 101 Park Avenue, New York, N.Y. 10178

Robert Reed Gray, Esq., Benjamin R. Achenbach, Jr., Esq., Hale, Russell and Gray, 1025 Connecticut Avenue, NW., Washington, D.C. 20036

To get a copy of the complete order, request it from the C.A.B. Distribution Section, Room 100, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Persons outside the Washington metropolitan area may send a postcard request.

FOR FURTHER INFORMATION CONTACT: Nancy Pitzer Trowbridge, Regulatory Affairs Division, Bureau of International Aviation, Civil Aeronautics Board; (202) 673-5134.

By the Civil Aeronautics Board: March 21, 1984

BILLING CODE 6325-01-M

[Docket 42052; Order 84-3-86]

Complaint of Pan American World Airways, Inc. Against the Government of Nigeria, Nigeria Airways; Order

On March 19, 1984, Pan American World Airways, Inc. (Pan American) filed a complaint against the Government of the Federal Republic of Nigeria (Nigeria) and its flag carrier, Nigeria Airways. Pan American alleges that Nigeria has barred it from obtaining remittance in U.S. dollars of the bulk of its 1983 net airline revenues obtained in Nigerian currency for ticket sales made in Nigeria; that the value of such blocked funds for 1983 is $17 million; and that this $17 million is not a debt owed to Pan American as a creditor, but consists of funds owned by Pan American and held captive by Nigeria. Pan American also alleges that it was advised on February 17, 1984, by senior Nigerian officials that these funds are to be amalgamated with other funds due other claimants and no payment at all will be made for two and a half years at a minimum. Pan American claims that this action by Nigeria does grave harm to Pan American, since its costs are largely dollar costs and prevents Pan American from paying expenses incurred in its services to Nigeria with revenues earned in Nigeria.

Pan American alleges that these actions of Nigeria are in direct violation of Article 12 of the Air Transport Agreement between the United States and Nigeria, which provides for expeditious conversion and repatriation of local revenues in excess of sums locally disbursed; constitute an unreasonable restriction on its access to foreign markets; and are discriminatory in favor of Nigeria Airways *vis-a-vis* Pan American.

Pan American states that it will terminate one of its two Nigeria flights on or about April 29, 1984; that after reviewing the failure of its latest efforts to obtain repatriation of its funds held hostage in Nigeria, it will terminate all of its Nigeria service, absent a recovery of its 1983 funds and an assurance that blocks to repatriation will cease in the future: that this decision will become unchangeable on or about April 20: that to permit the U.S. Government time to resolve this problem, it will defer termination of service until June 1, 1984; and that termination of service to Nigeria necessarily also requires the termination of service between the U.S. and Kenya and the U.S. and Senegal.

Pan American requests that we exercise our authority under section 2(b) of the International Air Transportation Fair Competitive Practices Act of 1974, as amended (IATFCPA) and section 402(f) of the Federal Aviation Act of 1958, as amended (Act) to modify Nigeria Airways' foreign air carrier permit to only allow one frequency a week to the United States effective April 29, 1984, and to terminate such permit as of June 1, 1984, unless the carrier voluntarily agrees to transfer all of its dollar revenues to a third party fiduciary which will undertake to pay to Pan American such amounts as Pan American certifies are being blocked in excess of 30 days by the Nigerian Government.

The International Air Transportation Competition Act of 1979 substantially expanded our ability to deal with allegations of unfairly restrictive and discriminatory practices by foreign governments and foreign airlines. We now possess power to respond quickly to such practices through amendments to section 402 of the Act and section 2 of the IATFCPA which permit us to deny, alfer, amend, modify, suspend, cancel, limit or condition any foreign air carrier permit or tariff if we find such action to be in the public interest. They also enable us to act without any hearing or to dispense with oral evidentiary hearings and base our decision or written evidence and arguments submitted by interested parties in appropriate circumstances. Furthermore, to ensure that complaints filed under this legislation receive prompt attention, section 2 of the IATFCPA provides that we shall approve, deny, dismiss or set a complaint for hearing, or institute other proceedings proposing remedial action, within 60 days after receipt of the complaint. We may extend the period for taking action in increments of 30

days up to 180 days, if we conclude that it is likely that the complaint can be satisfactorily resolved through negotiations.

With these considerations in mind, we have decided to invite all interested persons to answer the complaint in this docket. Answers shall include all data, evidence, and argument upon which persons rely to support their position, and shall cover all substantive and procedural issues they wish the Board to consider. We will also provide an opportunity to reply to these answers.

Answers shall be filed no later than 15 days from the service date of this order, and replies no later than 7 calendar days from that answer date.[1] Given the urgency of the situation described in the complaint, we will not be disposed to grant requests for extension of these dates.

After receipt and consideration of these pleadings and any evidence submitted, we will issue a further order in this proceeding. As indicated above, we may either provide for further procedures, defer action for 30 days, or grant, dismiss, or deny the complaint in whole or in part.

Accordingly,

1. We invite any interested person to file and serve upon persons named in paragraph 3, below, no later than April 5, 1984, answers to the complaint in Docket 42052. If comments are filed, replies may be filed, and must be served as above, but no later than April 12, 1984;

2. If timely and properly supported requests are filed, we will give consideration to the matters and issues raised by the requests before we take further action, provided that we may order further procedures within the statutorily determined time period; and

3. We will serve this order upon Pan American World Airways, Inc., Nigeria Airways, the Ambassador of the Federal Republic of Nigeria in Washington, D.C., and the United States Departments of State and Transportation.

We shall publish this Order in the **Federal Register.**

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary.

[FR Doc. 84-8193 Filed 3-26-84; 8:45 am]

BILLING CODE 6320-01-M

[1] We delegate to the Director, Bureau of International Aviation, the authority to dispose of all procedural questions arising in this proceeding, except for requests for oral evidentiary hearings, until further Board order.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 17-82]

Application for a Special-Purpose Subzone for Huffy Bicycle Plant in Celina, Ohio; Industry Impact Study Completed; Comments Invited

This notice concerns the application of the Greater Cincinnati Foreign-Trade Zone, Inc., grantee of Foreign-Trade Zone 46 in Cincinnati, Ohio, to the Foreign-Trade Zones Board, on behalf of the Huffy Corporation for a special-purpose foreign-trade subzone at its bicycle manufacturing plant in Celina, Ohio, filed July 30, 1982 (48 FR 35543, 8/16/82). The period for public comment on this proposal closed on December 3, 1982 (47 FR 44128). During the open record period a number of comments in opposition were received from the domestic bicycle and bicycle parts industries.

In order to assist the examiners committee in its evaluation of the proposal, the Board's Executive Secretary requested an economic analysis from the Bureau of Industrial Economics, U.S. Department of Commerce. The analysis (BIE report) was completed on March 9, 1984.

Notice is hereby given that a public version of the BIE report, in which certain figures have been ranged or approximated to protect business confidentiality, is being made available for comment by interested parties. The report is available for inspection and copying at the Central Records Room (Room B-099), Import Administration, U.S. Department of Commerce, 14th and Pennsylvania, NW., Washington, D.C. 20230, (202-377-1248). Comments must be postmarked by April 30, 1984, and submitted with 12 copies to the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, 14th and Pennsylvania, NW., Room 1872, Washington, D.C. 20230.

Dated: March 21, 1984.

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 84-8215 Filed 3-26-84; 8:45 am]

BILLING CODE 3510-DS-M

International Trade Administration

Export Trade Certificate of Review

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Application.

SUMMARY: The Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce has received an application for an Export Trade Certificate of Review. This notice summarizes the conduct for which certification is sought and invites interested parties to submit information relevant to the determination of whether a certificate should be issued.

DATE: Comments on these applications must be submitted on or before April 11, 1984.

ADDRESS: Interested parties should submit their written comments, original and five (5) copies, to: Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, Room 5618, Washington, D.C. 20230.

Comments should refer to this application as "Export Trade Certificate of Review, application number 84-00012."

FOR FURTHER INFORMATION CONTACT: Charles S. Warner, Director, Office of Export Trading Company Affairs, International Trade Administration, 202/377-5131; or Eleanor Roberts Lewis, Assistant General Counsel for Export Trading Companies, Office of General Counsel, 202/377-0937. These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (Pub. L. 97-290) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. The regulations implementing Title III are found at 48 FR 10596-10604 (Mar. 11, 1983) (to be codified at 15 CFR Part 325). A certificate of review protects its holder and the members identified in it from private treble damage actions and from civil and criminal liability under Federal and state antitrust laws for the export trade, export trade activities and methods of operation specified in the certificate and carried out during its effective period in compliance with its terms and conditions.

Standards for Certification

Proposed export trade, export trade activities, and methods of operation may be certified if the applicant establishes that such conduct will:

1. Result in neither a substantial lessening of competition or restraint of trade within the United States nor a substantial restraint of the export trade of any competitor of the applicant,

2. Not unreasonably enhance, stabilize, or depress prices within the United States of the goods, wares, merchandise, or services of the class exported by the applicant,

3. Not constitute unfair methods of competition against competitors engaged in the export of goods, wares, merchandise, or services of the class exported by the applicant, and

4. Not include any act that may reasonably be expected to result in the sale for consumption or resale within the United States of the goods, wares, merchandise, or services exported by the applicant.

The Secretary will issue a certificate if he determines, and the Attorney General concurs, that the proposed conduct meet these four standards. For a further discussion and analysis of the conduct eligible for certification and of the four certification standards, see "Guidelines for the Issuance of Export Trade Certificates of Review," 48 FR 15937–40 (April 13, 1983).

Request for Public Comments

The Office of Export Trading Company Affairs (OETCA) is issuing this notice in compliance with section 302(b)(1) of the Act which requires the Secretary to publish a notice of the application in the **Federal Register** identifying the persons submitting the application and summarizing the conduct proposed for certification. The OETCA and the applicant have agreed that this notice fairly represents the conduct proposed for certification. Through this notice, OETCA seeks written comments from interested persons who have information relevant to the Secretary's determination to grant or deny the application below. Information submitted by any person in connection with the application(s) is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552).

The OETCA will consider the information received in determining whether the proposed conduct is "export trade," "export trade activities," or a "method of operation" as defined in the Act, regulations and guidelines and whether it meets the four certification standards. Based upon the public comments and other information gathered during the analysis period, the Secretary may deny the application or issue the certificate with any terms or conditions necessary to assure compliance with the four standards.

The OETCA has received the following application for an Export Trade Certificate of Review:

Applicant: Northwest Fruit Exporters, 1005 Tieton Drive Yakima, WA 98902, Telephone 509/453–4837.

Application #: 84–00012.

Date Received: March 6, 1984.

Date Deemed Submitted: March 12, 1984.

Members in Addition to Applicant: Andrus & Roberts Produce Company, Sunnyside, WA; C.M. Holtzinger Company, Yakima, WA; Cascadian Fruit Shippers, Wenatchee, WA; Columbia Fruit Packers, Inc., Wenatchee, WA; Diamond Fruit Growers, Hood River, OR; George F. Joseph Orchard, Yakima, WA; Hansen Fruit & Cold Storage, Yakima, WA; Highland Fruit Growers, Yakima, WA; Inland Fruit & Produce Company, Wapato, WA; Mojonnier & Sons, Inc., Walla Walla, WA; Northern Fruit Company, Wenatchee, WA; Obert Cold Storage, Zillah, WA; Pacific Fruit Company, Yakima, WA; Phillippi/Pro Pack, Wenatchee, WA; Roche Fruit Company, Yakima, WA; Skookum, Inc., Wenatchee, WA; Snokist Growers, Yakima, WA; Stadelman Fruit, Inc., The Dalles, OR; Stadelman Fruit, Inc., Yakima, WA; Stemilt Growers, Wenatchee, WA; The Dalles Cherry Growers, The Dalles, OR; Washington Fruit & Produce, Yakima, WA; Wenatchee Wenoka Growers, Wenatchee, WA; and Yakima Fruit & Cold Storage, Yakima, WA.

Summary of the Application:

Northwest Fruit Exporters (NFE) is a non-profit corporation organized in 1978 by certain sweet cherry growers, packers and shippers to represent them in connection with the export of fresh sweet cherries. As a qualified Webb-Pomerene association, NFE is already active in the Japanese market. NFE has now submitted an application seeking certification for certain activities relating to the export of fresh sweet cherries worldwide, with an initial emphasis on countries in the Far East.

The applicant intends to conduct on behalf of its members the following export trade activities and methods of operation relating to the export of fresh sweet cherries: advising and cooperating with the United States Government in establishing procedures regulating the export of this product; participating in negotiations and reaching agreements with foreign governments and private persons regarding (a) fumigating, packing and other quality control procedures, and (b) the quantities, time periods, prices and terms and conditions upon which members will export; establishing and operating fumigation facilities export quotas among growing regions and members; providing market entry and development assistance, including related administrative and promotional services; and arranging transportation services for export.

The OETCA is issuing this notice in compliance with section 302(b)(1) of the Act which requires the Secretary to publish a notice of the application in the **Federal Register** identifying the persons submitting the application and summarizing the conduct proposed for certification. Interested parties have twenty (20) days from the publication of this notice in which to submit written information relevant to the determination of whether a certificate should be issued.

Dated: March 21, 1984.

Irving P. Margulies,

Acting General Counsel.

[FR Doc. 84–8150 Filed 3–26–84; 8:45 am]

BILLING CODE 3510–DR–M

[Case No. 644]

Charles J. McVey, Jr., et al.; Export Privileges

In the Matter of Charles J. McVey, Jr., 1140 North Armando, Anaheim, California 92806; Rolf Lienhard c/o Frank AG, International Transporte Frachthof West, Postfach 236, 8058 Zurich-Flughafen, Switzerland, Yuri Boyarinov c/o Electronorgtechnika, G–200, Smolenskaja pl. 32/34, Moscow, U.S.S.R.; order amending temporary denial of export privileges.

By Order of October 13, 1983 (48 FR 48699, October 20, 1983) (the "Order"), Frank A.G. was designated in Paragraph III, as a party related to one or more of the respondents and was temporarily denied, pursuant to § 388.19 of the Export Administration Regulations (currently codified at 15 CFR Parts 368–399 (1983)), all privileges of participating in any manner or capacity in the export of U.S.-origin commodities or technical data.

Frank A.G. has moved to vacate the Order with respect to it on the ground it lacks any relationship with any of the respondents such that the Order should apply to it. The Department of Commerce (the "Department") has now stated that it has no objection to Frank A.G.'s motion.

Based on the representations made by Frank A.G. and by the Department, I find that the motion to vacate is justified, and that granting it will not jeopardize the purpose of the Order.

Accordingly, It is hereby Ordered, that, effective immediately, the Order of October 13, 1983 is amended by deleting, from the related parties named in Paragraph III, the following: Frank AG, aka. Frankair Frank AG Zurich, Switzerland; aka. Frankair, Postfach 236, 8058 Zurich-Flughafen, Switzerland.

A copy of this Amendment of the Order shall be served upon Frank A.G., upon each of the respondents, and upon each of the related parties named in Paragraph III of the Order, and a copy of this Amendment shall be published in the **Federal Register**.

Dated: March 20, 1984.

Thomas W. Hoya,

Hearing Commissioner.

[FR Doc. 84-8157 Filed 3-26-84; 8:45 am]

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

Federal Consistency Appeal by Exxon Company, U.S.A. from California Coastal Commission Objection

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of Appeal.

SUMMARY: On March 9, 1984, the Secretary of Commerce received an appeal by Exxon Company, U.S.A. (Exxon) from an objection by the California Coastal Commission (Commission) that Exxon is proposed drilling of an exploration well at well location B in the Southwest Quarter of Lease OCS–P 0467 in the Santa Rosa Unit in the Santa Barbara Channel, as provided in Exxon's Plan of Exploration, as amended (Plan), filed with the U.S. Department of the Interior, is inconsistent with the California Coastal Management Program. This appeal has been filed pursuant to Section 307(c)(3) (A) and (B) of the Coastal Zone Management Act of 1972, as amended (CZMA), 16 U.S.C. 1456(c)(3) (A) and (B) and implementing regulations at 15 CFR Part 930 Subpart H.

Interested persons are advised that they may submit comments to the Secretary of Commerce (Secretary) on the issues raised in this appeal within 30 days from the date of publication of this notice. Comments should be sent to: Robert J. McManus, General Counsel, National Oceanic and Atmospheric Administration, Department of Commerce, 14th and Constitution Avenue, NW., Room 5814, Washington, D.C. 20230.

Copies of comments also should be sent to the following persons:

1. James C. Dale, Exxon Company, U.S.A., P.O. Box 4279, Houston, Texas 77210–4279;
2. Tim Eichenberg, California Coastal Commission, 631 Howard St., San Francisco, CA 94105; and
3. William Grant, Minerals Management Service, Pacific OCS Region, 1340 W. 6th Street, Los Angeles, CA 90017.

Comments should addressed whether Exxon's proposed exploration drilling complies with the regulatory criteria, as set forth in 15 CFR 930.121 and 930.122, to be considered by the Secretary in deciding whether the drilling may be Federally approved under Section 307(c)(3) (A) and (B) of the CZMA notwithstanding the objection of the California Coastal Commission.

Access to Exxon's Notice of Appeal and accompanying public information, and to the public information contained in comments submitted by Federal and State agencies, will be available to the public at the following State and Federal offices during normal working hours:

1. California Coastal Commission, 631 Howard Street, 4th Floor, San Francisco, California 94105; and
2. Office of the Assistant General Counsel for Ocean Services, National Oceanic and Atmospheric Administration, Department of Commerce, Room 270, 2001 Wisconsin Avenue, NW., Washington, D.C. 20235.

A copy of Exxon's notice of appeal and supporting information is also available at the Santa Barbara Public Library, 40 E. Anapamu, Santa Barbara, California 93101; and the Minerals Management Service, Pacific OCS Region, Public Information Room, 1340 W. 6th St., Los Angeles, California 90017.

FOR FURTHER INFORMATION CONTACT: Bernard C. Cody, Attorney Advisor, National Oceanic and Atmospheric Administration, 2001 Wisconsin Avenue NW., Washington, D.C. 20235, (202/254–7512).

SUPPLEMENTARY INFORMATION: On August 26, 1983, Exxon filed an appeal with the Secretary of Commerce from the Commission's objection that Exxon's Plan of Exploration is inconsistent with the California Coastal Management Program. According to the Plan filed on February 4, 1983 with the Minerals Management Service of the U.S. Department of the Interior, Exxon proposed to drill three exploratory wells in the Southwest Quarter of Lease OCS–P 0467. The Commission's consistency objection was based primarily on its concern that the drilling operations, as proposed, would interfere with thresher shark commercial fishing normally conducted during the period December through April. Following discussions between Exxon and the Commission which led to a partial settlement of the matters in dispute, Exxon withdrew its appeal to the Secretary on December 2, 1983. As a part of that settlement, Exxon amended its Plan of Exploration on November 30, 1983, to conflicts with the commercial fishing industry. On December 15, 1983, the Commission withdrew its consistency objection to the drilling of Well A. During subsequent discussions between the parties concerning Wells B and C, Exxon agreed to delete Well C from its amended Plan. On February 8, 1984, the Commission objected to Exxon's consistency certification for Well B, on the ground that exploratory drilling in this area outside the period from December through April would interfere with thresher shark commercial fishing.

Exxon's exploratory drilling may be federally approved notwithstanding the objection of the Commission that the drilling is inconsistent with the California Coastal Management Program if the activity meets one of two tests. To meet the first test, four criteria must be satisfied: (a) The activity furthers one or more of the competing national objectives or purposes contained in Sections 302 and 303 of the CZMA; (b) when performed separately or when its cumulative effects are considered, the activity will not cause adverse effects on the natural resources of the coastal zone substantial enough to outweigh its contribution to the national interest; (c) the activity will not violate any requirements of the Clean Air Act, as amended, or the Clean Water Act, as amended; and (d) there is no reasonable alternative available which would permit the activity to be conducted in a manner consistent with the State management program. To meet the second test, the Secretary must find that a national defense or other national security interest would be significantly impaired if the activity were not permitted to go forward as proposed. If the Secretary does not find that the activity meets either of these two tests, the Federal agency shall not approve the activity.

(Federal Domestic Assistance Catalog No. 11.419 Coastal Zone Management Program Administration)

Dated: March 20, 1984.

Robert J. McManus,

General Counsel, National Oceanic and Atmospheric Administration.

[FR Doc. 84-8203 Filed 3-26-84; 8:45 am]

BILLING CODE 3510-08-M

Marine Mammals; Notice of Issuance of Permit; Mark Blane McHugh

On February 9, 1984, Notice was published in the **Federal Register** (49 FR 4962), that an application had been filed with the National Marine Fisheries Service by Mr. Mark Blane McHugh, Port Aransas, Texas 78373 for a scientific research permit to take an unspecified number of bottlenose dolphins by harassment for a period of two years.

Notice is hereby given that on March 20, 1984 the National Marine Fisheries

Service issued a Scientific Research Permit as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) to Mr. Mark Blane McHugh subject to certain conditions set forth therein.

The Permit is available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southeast Region, 9450 Koger Boulevard, St. Petersburg, Florida 33702.

Dated: March 20, 1984.

Richard B. Roe,

Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

[FR Doc. 84-8165 Filed 3-26-84; 8:45 am]

BILLING CODE 3510-22-M

Marine Mammals; Notice of Issuance of Permit; Moclips Cetological Society

On October 24, 1983, Notice was published in the **Federal Register** (48 FR 35694) that an application had been filed with the National Marine Fisheries Service by Moclips Cetological Society, P.O. Box 945, Friday Harbor, Washington, 98250 for a permit for potential harassment while conducting census and identification studies of killer whales, gray whales, minke whales, humpback whales, and harbor and Dall's porpoises.

Notice is hereby given that on March 16, 1984, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Endangered Species Act of 1973 (16 U.S.C. 1531–1543), the National Marine Fisheries Service issued a permit to Moclips Cetological Society to take an unspecified number of cetacean species, subject to certain conditions as required by the Endangered Species Act of 1973.

Issuance of this permit for humpback and gray whales is based on a finding that such permit (1) was applied for in good faith; (2) will not operate to the disadvantage of the endangered species which is the subject of the permit, and (3) will be consistent with the purposes and policies set forth in Section 2 of the Endangered Species Act of 1973. This Permit was issued in accordance with, and is subject to Parts 220–222 of Title 50 CFR of the National Marine Fisheries Service regulations governing endangered species permits (30 FR 41367), November 24, 1974.

The Permit is available for review by interested persons in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Northwest Region, 7600 Sand Point Way NE., BIN C15700, Seattle, Washington 98115.

Dated: March 16, 1984.

Richard B. Roe,

Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

[FR Doc. 84-8166 Filed 3-26-84; 8:45 am]

BILLING CODE 3510-22-M

Receipt of Application for Permit; National Zoological Park

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant: a. Name: National Zoological Park (P6I), Smithsonian Institution.

b. Address: Washington, D.C. 20008.

2. Type of Permit: Scientific Research.

3. Name and Number of Animals: California sea lions (*Zalophus californianus*), 1,200.

4. Type of Take: Capture, tag, including radio tags, metabolic studies and release.

5. Location of Activity: Channel Islands, California.

6. Period of Activity: 5 years.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.;

Regional Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731.

Dated: March 20, 1984.

Richard B. Roe,

Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

[FR Doc. 84-8164 Filed 3-26-84; 8:45 am]

BILLING CODE 3510-22-M

Receipt of Permit Applications

This document publishes for public review a summary of applications received by the Secretary of State requesting permits for foreign vessels to fish in the fishery conservation zone under the Magnuson Fishery Conservation and Management Act (Magnuson Act, 16 U.S.C. 1801 et seq.).

Send comments on applications to: Fees, Permits, and Regulations Division (F/M12), National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, or, send comments to the Fishery Management Council(s) which review the application(s) as specified below:

Douglas G. Marshall, Executive Director, New England Fishery Management Council, Suntaug Office Park, 5 Broadway (Route 1), Saugus, MA 01906, 617–231–0422

John C. Bryson, Executive Director, Mid-Atlantic Fishery Management Council, Federal Building, Room 2115, 800 South New Street, Dover, DE 19901, 802–674–2331

David H. G. Gould, Executive Director, South Atlantic Fishery Management Council, Southpark Building, Suite 306, 1 Southpark Circle, Charleston, SC 29407, 803–571–4366

Omar Munoz-Roure, Executive Director, Caribbean Fishery Management Council, Banco De Ponce Building, Suite 1108, Hato Rey, PR 00918, 809–753–6910

Wayne E. Swingle, Executive Director, Gulf of Mexico Fishery Management Council, Lincoln Center, Suite 881, 5401 West Kennedy Blvd., Tampa, FL 33609, 813–228–2815

Joseph C. Greenley, Executive Director, Pacific Fishery Management Council,

526 S.W. Mill Street, Portland, OR 97201, 503–221–6352
Jim H. Branson, Executive Director, North Pacific Fishery Management Council, 605 W. Forth Avenue, Anchorage, AK 99510, 907–271–4064
Kitty M. Simonds, Executive Director, Western Pacific Fishery Management Council, 1164 Bishop Street, Room 1608, Honolulu, Hawaii 98613, 808–523–1368

For further information contact Shirley Whitted or John D. Kelly (Fees, Permits, and Regulations Division), 202–634–7432.

The Magnuson Act also requires the Secretary of State to publish a notice of receipt of all applications for such permits summarizing the contents of the applications in the **Federal Register**. The National Marine Fisheries Service, under the authority granted in a memorandum of understanding with the Department of State effective November 29, 1983 issues the notice on behalf of the Secretary of State.

Individual vessel applications for fishing in 1984 have been received between March 22, 1984 and March 22, 1985 from the Government(s), shown below.

Dated: March 23, 1984.

Carmen J. Blondin,

Deputy Assistant Administrator, for Fisheries Resource Management, National Marine Fisheries Service.

Fishery codes and designation of regional councils which review applications for individual fisheries are as follows:

Code	Fishery	Regional council
ABS	Atlantic Billfishes and Sharks	New England, Mid-Atlantic, South Atlantic, Gulf of Mexico, Caribbean.
BSA	Bering Sea and Aleutian Islands Groundfish	North Pacific
GOA	Gulf of Alaska	North Pacific.
NWA	Northwest Atlantic Ocean.	New England, Mid-Atlantic, South Atlantic, Gulf of Mexico, Caribbean.
SMT	Seamount Groundfish (Pacific Ocean).	Western Pacific.
SNA	Snails (Bering Sea)	North Pacific.
WOC	Pacific Groundfish (Washington, Oregon, and California).	Pacific
PBS	Pacific Billfishes and Sharks.	Western Pacific.

Activity codes which specify categories of fishing operations applied for are as follows:

Activity Code	Fishing Operations
1	Catching, Processing, and Other Support.
2	Processing and Other Support, Only.
3	Other Support Only.
4	"Joint Venture" in Support of U.S. Vessels.

Nation, vessel name, vessel type	Application No.	Fishery	Activity
Government of Japan:			
Akebono Maru No. 2, Medium Stern Trawler.	JA–84–1154	BSA	1

Korea

The Government of Korea has applied for fishing permits to engage in joint venture activities with the American partners ALASKA JOINT VENTURE FISHERIES, ALASKA CONTACT LTD., AND DAERIM AMERICAN INC. The application between Korea and the American partner Alaska Joint Venture Fisheries requests the harvest of 1,300 mt of Pacific cod, and 700 mt of other species in the GOA fishery. This joint venture will take place between the months of April–July. The application between Korea and the American partner Alaska Contact Ltd., requests the harvest of 2,000 mt of Pacific cod and 500 mt of other species in the GOA fishery. This joint venture will take place between the months of July–September. The application between Korea and the American partner Daerim American Inc., requests the harvest of 1,500 mt of Pacific cod and 1,000 mt of other species in the GOA fishery. This joint venture will take place between the months of May–December.

Japan

The Government of Japan has applied for fishing permits to engage in joint venture activities with the American partner PETER PAN SEAFOODS, INC. The application requests 4,500 mt of yellowfin sole and 400 mt of other species. This joint venture will take place between the months of April–June and August–September.

[FR Doc. 84–8274 Filed 3–26–84; 8:45 am]

BILLING CODE 3510–22–M

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services

Research in Education of the Handicapped

AGENCY: Department of Education.

ACTION: Application notice establishing the closing date for transmittal of new grant applications—Research in Education of the Handicapped Program.

Applications are invited for new Field-Initiated Research projects under the Research in Education of the Handicapped program.

Authorization for this program is contained in sections 641 and 642 of Part E of the Education of the Handicapped Act.

(20 U.S.C. 1441, 1442)

Applications may be submitted by State and local educational agencies, institutions of higher education, and other public agencies and nonprofit private organizations.

The purpose of the Research in Education of the Handicapped program is to make awards for research and related activities, and to conduct research, surveys, or demonstrations relating to the education of handicapped children and youth.

On October 28, 1983, the Secretary published (48 FR 49533) an application notice establishing the closing date for transmittal of new grant applications for Field-Initiated Research projects. As in previous years, most of these applications for projects propose to conduct research on problems that can be addressed in a relatively short period (12 to 36 months). Certain research efforts, however, require a longer period. For example, in order to answer some research questions, a longitudinal design is necessary, or a series of studies building on one another may be required. In other instances, new measurement techniques or instruments must be developed or field tested before the principal research activities can begin. In order to provide the sustained support required for those kinds of research projects, the Secretary invites applications for new awards for Field-Initiated Research projects that require support for a 60-month period.

The appropriate study areas for proposed Field-Initiated Research projects are limited only by the purpose of the research program and the need for a 60-month period of support to accomplish the research objectives and activities.

Closing date for transmittal of applications: An application for a grant

must be mailed or hand delivered by May 21, 1984.

Applications delivered by mail: Applications sent by mail must be addressed to the Department of Education, Application Control Center, Attention: CFDA Number 84.023H, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

An applicant must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail.

Each late applicant will be notified that its application will not be considered.

Applications delivered by hand: Hand-delivered applications must be taken to the Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C.

The Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

An application for a new project that is hand delivered will not be accepted by the Application Control Center after 4:30 p.m. on the closing date.

Available funds: It is estimated that approximately 10 awards will be made for new Field-Initiated Research projects under this program. For fiscal year 1984, the average amount of these awards will be approximately $50,000. This estimate of funding level does not bind the U.S. Department of Education to a specific number of grants or to the amount of any grant, unless that amount is otherwise specified by statute or regulations. Grant approval is for a 60-month period subject to an annual review of progress and availability of funds.

Application forms: Application forms and program information packages are expected to be ready for mailing by April 6, 1984. These materials may be obtained by writing to the Research Projects Branch, Office of Special Education Programs, U.S. Department of Education, 400 Maryland Avenue, S.W. (Switzer Building, Room 3076), Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the application package. However, the program information is only intended to aid applicants in applying for assistance. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or performance requirements beyond those imposed under the statute and regulations.

The Secretary strongly urges that the narrative portion of the application not exceed twenty (20) pages in length. The Secretary further urges that applicants submit only the information that is requested.

(OMB 1820-0028—Expires 2/28/87)

Applicable regulations: Regulations applicable to this program include the following:

(a) The regulations governing the Research in Education of the Handicapped Program (34 CFR Part 324).

(b) The Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 74, 75, 77, and 78).

FOR FURTHER INFORMATION CONTRACT: Eileen Lehman, Research Projects Branch, Office of Special Education Programs, U.S. Department of Education, 400 Maryland Avenue, S.W. (Switzer Building, Room 3523), Washington, D.C. 20202. Telephone: (202) 732-1120.

(20 U.S.C. 1441, 1442)

(Catalog of Federal Domestic Assistance Number 84.023; Research in Education of the Handicapped)

Dated: March 22, 1984.

Madeleine Will,

Assistant Secretary, Office of Special Education and Rehabilitative Services.

[FR Doc. 84-8128 Filed 3-26-84; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Office of the Secretary

National Petroleum Council, Coordinating Subcommittee of the Committee on the Strategic Petroleum Reserve' Meeting

Notice is hereby given that the Coordinating Subcommittee of the Committee on the Strategic Petroleum Reserve will meet in April 1984. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Committee on the Strategic Petroleum Reserve will address various aspects of the Strategic Petroleum Reserve and the long-term availability and movement patterns of tankers worldwide. Its analysis and findings will be based on information and data to be gathered by the various task groups. The time, location, and agenda of the Coordinating Subcommittee meeting follows:

The Coordinating Subcommittee will hold its second meeting on Tuesday, April 3, 1984, starting at 8:00 a.m., in the Monticello Room of the Madison Hotel, 15th and M Streets, NW., Washington, D.C.

The tentative agenda for the Coordinating Subcommittee meeting follows:

1. Opening remarks by the Chairman and Government Co-Chairman.
2. Discuss an organizational structure for the study.
3. Discuss a timetable for completion of the study.
4. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Coordinating Subcommittee is empowered to conduct the meeting in a fashion that will, in his judgment facilitate the orderly conduct to business. Any member of the public who wishes to file a written statement with the Coordinating Subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Gerald J. Parker, Office of Oil, Gas and Shale Technology, Fossil Energy, 301/353-3032 prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E-190, DOE Forrestal

Building, 1000 Independence Avenue, SW., Washington, D.C, between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C., on March 20, 1984.

William A. Vaughan,

Assistant Secretay Fossil Energy..

[FR Doc. 84-8084 Filed 3-26-84, 8:45 am]

BILLING CODE 6450-01-M

Economic Regulatory Administration

[Docket No. ERA-FC-84-003]

Powerplant and Industrial Fuel Use Act of 1978: Electric Utility Conservation Plans

AGENCY: Economic Regulatory Administration.

ACTION: Notice of approval of amendment to conservation plans.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives notice that it has approved the proposed amendment to approved electric utility conservation plans filed by the Texas Utilities Electric Company under section 808(d)(3) of the Powerplant and Industrial Fuel Use Act of 1978, as amended, 42 U.S.C. 8301 *et seq.* ("FUA" or "the Act") and 10 CFR 508.6.

The public file for Texas Utilities Electric Company containing this Notice of Approval of Amendment to the Approved Conservation Plans and all other pertinent documents is available for inspection at the Department of Energy, Freedom of Information Reading Room, 1000 Independence Avenue, S.W., Room 1E-190, Washington, D.C. 20585, telephone (202) 252-6020. Approval of the amendment to the conservation plans is based on ERA's consideration of the entire record of the proceeding, including any comments received during the public comment period for the plan.

DATE: In accordance with 10 CFR 508.5(b), this notice shall take effect on March 27, 1984.

FOR FURTHER INFORMATION CONTACT:

Edward J. Peters, Jr., Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA-073 G, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 252-8162

Marya Rowan, Office of the General Counsel, Forrestal Building, Room 6A-141, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 252-6739

SUPPLEMENTARY INFORMATION: Section 1023 of the Omnibus Budget Reconciliation Act of 1981, Pub. L. 97-35 ("OBRA") amended FUA by adding a new section 808, entitled "Electric Utility Conservation Plan." That section requires utilities which own or operate any existing electric powerplant which used natural gas as a primary energy source between August 14, 1980 and August 13, 1981, and which also plan to use natural gas in any electric powerplant, to develop and submit to DOE for approval a plan setting forth the means of conserving electric energy. The conservation goal, to be achieved not later than the fifth year after DOE's initial approval of the plan, is the equivalent of ten (10) percent of the utility's electric energy output attributable to natural gas generation, sold within its own system during the four calendar quarters ending on June 30, 1981, measured on an annual basis.

In 1982, DOE approved conservation plans for Dallas Power & Light Company (DP&L), FC Case No. 50736-9999-99-49 (47 FR 41163, September 17, 1982); to Texas Electric Service Company (TESCO), FC Case No. 52901-9999-99-49 (47 FR 54319, December 2, 1982); and for Texas Power & Light Company (TP&L), FC Case No. 52902-9999-99-49 (47 FR 56387, December 16, 1982), while these companies were subsidiaries of the Texas Utilities Company (TU). In 1983, subsequent to DOE's approval action, DP&L, TESCO and TP&L were merged into Texas Utilities Electric Company, another subsidiary of TU.

On January 27, 1984, Texas Utilities Electric Company filed with ERA a proposed amendment to the above-described electric utility conservation plans in which it requested that the approved programs and conservation goals of these plans be consolidated into a single plan that would be administered by Texas Utilities Electric Company, as successor to the three companies.

Notice of Receipt of the proposed amendment to the three approved conservation plans, providing for a thirty (30) day public comment period, was published in the **Federal Register** on February 14, 1984 (49 FR 5655). The comment period ended March 15, 1984. No comments on the proposed amendment to the plans were received.

Based upon the entire record of this proceeding, ERA has determined that the proposed amendment to consolidate the conservation plans and goals of each named utilities meets the requirements for approval contained in 10 CFR 508.8. Based on the information contained in the proposed amendment, ERA has determined that the conservation programs contained in the consolidated plan will remain as previously approved, at which time DOE found that they would not produce environmental consequences significant enough to warrant detailed documentation pursuant to the National Environmental Policy Act or its implementing regulations (40 CFR Part 1500 *et seq.*). Thus, DOE's approval of the proposed amendment consolidating the plans does not represent a major Federal action significantly affecting the quality of the human environment. Pursuant to 10 CFR 508.6 and section 808(d) (1) and (3) of FUA, DOE hereby approves the amendment to consolidate the subject electric utility conservation plans.

Texas Utilities Electric Company, as the successor to the three subsidiaries, is to administer the consolidated plan and file the annual report of progress for each remaining year of the five-year plan beginning with the 1984 annual report due January 30, 1985.

Issued in Washington, D.C. on March 19, 1984.

Robert L. Davies,

Director, Coal & Electricity Division, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. ER84-318-000]

Alabama Power Co.; Filing

March 21, 1984.

The filing Company submits the following:

Take notice that on March 12, 1984, Alabama Power Company (Alabama) tendered for filing Revised Sheet No. 34 to its FERC Electric Tariff, Original Volume No. 1. The purpose of this filing is to give notice that effective January 20, 1984 electric service to the Pettus Street Delivery Point of the City of Dothan was terminated. The City of Dothan requested this cancellation and the load served from the Pettus Street Delivery Point was transferred to the East Haven and South Park Avenue Delivery Points.

Copies of the filing were served upon the City of Donothan.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 5, 1984. Protests will be considered by the

Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 84-8093 Filed 3-26-84; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER84-316-000]

Duke Power Co.; Filing

March 21, 1984.

The filing Company submits the following:

Take notice that on March 12, 1984, Duke Power Company (Duke) tendered for filing a supplement to the Company's Electric Power Contract with the City of Clinton. Duke Power states that this contract is on file with the Commission and has been designated Duke Power Company Rate Schedule FERC No. 249.

Duke further states that the Company's contract supplement, made at the request of the customer and with agreement obtained from the customer, provides for the following increase in contract demand: Delivery Point No. 1 from 18,000 KW to 24,000 KW.

Duke Power indicates that this supplement also includes an estimate of sales and revenue for twelve months immediately preceding and for the twelve months immediately succeeding the effective date. Duke Power proposes an effective date of May 18, 1984.

According to Duke Power, copies of this filing were mailed to the City of Clinton and the South Carolina Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 5, 1984. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

Kansas City Power & Light Co.; Application for Exemption

March 20, 1984.

Take notice that Kansas City Power & Light Company (KCPL) filed an application on February 16, 1984 for exemption from certain requirements of Part 290 of the Federal Energy Regulatory Commission's (FERC) regulations concerning collection and reporting of cost of service information under section 133 of the Public Utility Regulatory Policies Act (PURPA), Order No. 48 (44 FR 58687, October 11, 1979). Exemption is sought from the requirement to file on or prior to June 30, 1984 and biennially thereafter, information on the costs of providing electric service as specified in Subparts B, C, D, and E of Part 290. In addition, KCPL requests a waiver of the requirement that an application for exemption shall be filed "no less than 18 months prior to the time the information would otherwise be required" (Section 290.601(a)).

In its application for exemption KCPL states, in part, that it should not be required to file the specified data for the following reasons:

> Section 133 data are not needed for consideration of rate standards and policies under Title I of PURPA.
>
> Section 133 data are not relied upon for retail rate regulatory purposes by the Missouri Public Service Commission and the Kansas Corporation Commission.
>
> The cost of collecting, analyzing, and reporting the data necessary to satisfy Section 133 requirements exceed the value and benefits realized by the consumer and the state regulatory commissions.

Copies of the application for exemption are on file with FERC and are available for public inspection. FERC's regulations require that said utility also apply to any state regulatory authority having jurisdiction over it to have the application published in any official state publication in which electric rate change applications are usually noticed, and that the utility publish a summary of the application in newspapers of general circulation in the affected jurisdiction.

Any person desiring to present written views, arguments, or other comments on the application for exemption should file such information with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before 45 days following the date this notice is published in the **Federal Register.** Within that 45 day period, such person must also serve a copy of such comments on: Mr. Robert B. Sullivan, Director of Rates and Regulatory, Kansas City Power & Light Company, 1330 Baltimore Avenue, Kansas City, Missouri 64105.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. TA82-2-15-004]

Mid Louisiana Gas Co.; Proposed Changes in FERC Gas Tariff

March 21, 1984.

Take notice that on March 13, 1984, Mid Louisiana Gas Company (Mid Louisiana) re-submitted for filing the following proposed changes in its FERC Gas Tariff:

> Substitute Forty-Fourth Revised Sheet No 3a
> Substitute Alternate Forty-Fourth Revised Sheet No. 3a.

In addition, Mid Louisiana filed the following exhibits: Revised Exhibit A, page 14; Exhibit A, page 14A; and Exhibit A, page 14B.

Mid Louisiana states that copies have been sent to Gulf States Utility Company and its attorneys, and to the Louisiana Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before April 2, 1984. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. ER84-319-000]

Pennsylvania Power & Light Co.; Filing

March 21, 1984.

The filing Company submits the following:

Take notice that on March 12, 1984, Pennsylvania Power & Light Company (PP&L) tendered for filing as a rate schedule an executed agreement dated as of February 15, 1984 between PP&L and Power Authority of the State of New York (NYPA).

PP&L state that the rate schedule provides for a maximum energy reservation charge rate of $24.70 per megawatt hour and an energy charge rate based upon the incremental cost of providing the energy.

PP&L requests an effective date of March 12, 1984, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing have been served upon NYPA and the Pennsylvania Public Utility Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before April 5, 1984. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. ER84-317-000]

Public Service Company of New Mexico; Filing

March 21, 1984.

The filing Company submits the following:

Take notice that on March 12, 1984, Public Service Company of New Mexico (PNM) tendered for filing proposed changes in its Rate Schedule FPC No. 31. On said date, PNM tendered for filing Amendment No. 4 (the Amendment) to Service Schedule B of the Master Interconnection Agreement between PNM and Plains Electric Generation and Transmission Cooperative, Inc. (Plains).

PNM states that the proposed Amendment provides for an extension of the term of Service Schedule B from May 31, 1984, to December 31, 1984, and specified minimum amounts of power that Plains will purchase from PNM in 1983 and 1984.

PNM further states that the primary purpose of the proposed Amendment is to extend the term of Service Schedule B for seven months to coincide with the anticipated in-service date of Plains' Electric Generation Station Unit One.

PNM requests an effective date of January 1, 1984, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing were served upon Plains and the New Mexico Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 5, 1984. Protests will be considered by the Commission, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 84-8098 Filed 3-26-84; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP84-279-000]

Algonquin Gas Transmission Co.; Application

March 22, 1984.

Take notice that on March 2, 1984, Algonquin Gas Transmission Company (Applicant), 1284 Soldiers Field Road, Boston, Massachusetts 02135, filed in Docket No. CP84-279-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the modification of an existing meter station located in Uncasville, Connecticut, to allow for increased deliveries of authorized contract quantities to an existing customer, The Connecticut Light and Power Company (CL&P), formerly the Connecticut Gas Company, and to authorize Applicant to reflect such change of name, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is asserted that CL&P has requested that Applicant deliver larger quantities of gas at higher pressures than are now being delivered at the Uncasville meter station, which would enable CL&P to render service to its Montville electric generating plant. It is stated that CL&P has certificated that its downstream distribution facilities are suitable for the higher pressure resulting from the proposed modifications.

Applicant proposes to modify the Uncasville meter station by installing facilities capable of receiving and measuring gas at a higher pressure and higher rate. Applicant states that it would install piping, an enlarged heater, and measurement equipment together with related facilities. Applicant asserts that such modifications would enable CL&P to make such higher volume and higher pressure deliveries to the Montville plant whenever Applicant's line pressure is adequate. Applicant further asserts that the proposal does not represent an increase in the annual contractual quantity that CL&P currently purchases from Applicant.

Applicant further requests authority to change the name of its existing customer, CL&P, formerly The Connecticut Gas Company, reflecting such change of name in its authorization for service.

Applicant estimates cost of the proposed modifications to the Uncasville meter station to be $128,100 with such costs being reimbursed by CL&P to Applicant.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 12, 1984, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice

and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

John W. Ellis; Application

March 22, 1984.

The filing individual submits the following:

Take notice that on March 14, 1984, John W. Ellis filed an application pursuant to section 305(b) of the Federal Power Act to hold the following positions:

Director, President, and Chief Executive Officer, Puget Sound Power & Light Company

Director, Washington Mutual Savings Bank

Director, SAFECO Corporation

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 16, 1984. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER84-320-000]

Iowa-Illinois Gas and Electric Co.; Filing

March 22, 1984.

The filing company submits the following;

Take notice that on March 13, 1984, Iowa-Illinois Gas and Electric Company (Iowa-Illinois) tendered for filing a proposed change in its Rate Schedule WES (applicable only to Sherrard Power System Orion, Illinois), FPC Wholesale Electric Tariff, Original Volume No. 1. The change reflected in 4th Revised Sheet No. 5, proposed to be effective May 14, 1984, would increase revenues from jurisdictional sales and service by $1,962,060 based on the 12-month period ending December 31, 1982.

Iowa-Illinois alleges that the reason for the proposed increased revenues is because its operating outcome has declined to a level which provides an inadequate return. It further alleges that it is essential in the interest of preserving its financial integrity that its revenues and operating income be necessary to provide good electric service and to attract the additional capital required.

Copies of the filing were served upon Sherrard Power System and the Illinois Commerce Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 9, 1984. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[Docket No. ES84-34-000]

Kansas City Power & Light Co.; Application

March 22, 1984.

Take notice that on March 12, 1984, Kansas City Power & Light Company filed an application with the Federal Energy Regulatory Commission seeking authority, pursuant to Section 204 of the Federal Power Act, to issue not more than $300 million of Short-Term Debt and Commercial Paper on or before June 30, 1986, which would mature no later than December 31, 1987.

Any person desiring to be heard or to make any protest with reference to the application should file a motion to intervene or protest on or before April 12, 1984, with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). The application is on file with the Commission and available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. CP84-251-000]

K N Energy, Inc.; Application

March 22, 1984.

Take notice that on February 22, 1984, as supplemented March 1, 1984, K N Energy, Inc. (K N), P.O. Box 16265, Lakewood, Colorado 80215, filed in Docket No. CP84-251-000 an application, pursuant to section 7 (c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing K N to establish a new delivery point with respect to the sale of gas to a new customer, Iams Company, Inc. (Iams), all as more fully set forth in the request which is on file with the Commission and open to public inspection.

K N states that it was authorized to provide natural gas service to an alfalfa dehydration mill near Odessa, Nebraska, pursuant to order issued in Docket NO. G-1857 on June 30, 1954. It is further stated that Iams has obtained from the owner of the plant the right to purchase gas from K N but that Iams desires to have its gas delivered at a location in the vicinity of Aurora, Nebraska, for use in a new agricultural processing plant that would produce pet food. In order to assist Iams, K N requests authorization to install a delivery point and related facilities approximately 4.5 miles west of Aurora in Hamilton County, Nebraska. It is stated that Iams would fully reimburse K N for the cost of constructing the new delivery point.

K N states that the total volumes that would be delivered to Iams at Aurora would not exceed the total volumes authorized at Odessa. It is further stated that the annual volumetric limitation on the gas delivered to Iams at the Odessa delivery point would be 185,000 Mcf. K N indicates that the change in delivery points and volume reassignment would not be prohibited by any of K N's existing tariffs. Furthermore, K N avers that it has sufficient capacity to make the proposed deliveries without detriment or disadvantage to its other customers.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 12, 1984, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for K N to appear or be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

[Docket No. ER84-322-000]

Pacific Gas and Electric Co.; Filing

March 22, 1984.

The filing Company submits the following:

Take notice that on March 15, 1984, Pacific Gas and Electric Company (PGandE) tendered for filing a notice of change in rates and charges under electric resale rate Schedule Nos. 84, 85, 72, 53 and R-2. The proposed rates are based on formulas contained in rate settlements reached between PGandE and the City and County of San Francisco, Sierra Pacific Power Company, CP National Corporation, the Shasta Dam Area Public Utility District, the City of Santa Clara and the Northern California Power Agency, respectively.

PGandE states that the proposed changes would increase revenues from jurisdictional sales and service by a total of $3,559,597 based on the 12 month estimated test period ending December 31, 1984.

PGandE requests an effective date of January 1, 1984, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing were served upon the affected customers and the California Public Utilities Commission.

Any person desiring to be heard or to protest said filing should a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 9, 1984. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Panhandle Eastern Pipe Line Co.; Change in FERC Gas Tariff

March 22, 1984.

Take notice that on March 16, 1984, Panhandle Eastern Pipe Line Company (Panhandle) tendered for filing the following sheets to its FERC Gas Tariff, Original Volume No. 1:

First Revised Sheet Nos. 3-E, 3-U and 32-V

Panhandle states that these sheets are submitted to include the GRI Funding Unit Charge in the rates authorized in Panhandle's Rate Schedule AIC.

Panhandle requests that these sheets become effective on January 1, 1984 as this is the date upon which the new GRI rate became effective pursuant to the Commission's order dated October 28, 1983.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before April 3, 1984. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. QF84-195-000]

Schoeller Technical Papers, Inc.—Pulaski Facility; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

March 22, 1984.

On March 2, 1984, Schoeller Technical Papers, Inc., (Applicant) of P.O. Box 250, Pulaski, New York 13142, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located on Centerville Road, Pulaski, New York. The facility will consist of an existing combustion turbine generator unit, a new waste heat recovery boiler, and associated equipment. The primary energy source for the facility will be natural gas. The useful thermal energy output, which is in the form of process steam, will be utilized in paper production processes. The net electric power production capacity of the facility will be 2,850 kilowatts.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of the filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. CP84-264-000]

United Gas Pipe Line Co.; Request Under Blanket Authorization

March 22, 1984.

Take notice that on February 27, 1984, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP84-264-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that United proposes to construct and operate a sales tap for the delivery of natural gas under the authorization issued in Docket No. CP82-430-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United proposes to install a sales tap on a 2-inch pipeline and to provide daily requirements on natural gas to David G. LaRosa in St. Tammany Parish, Louisiana. It is stated that service would be rendered for commercial use through Louisiana Gas Service Company (Louisiana Gas). It is stated further that the current sale to the distributor is under Rate Schedule G-N pursuant to a service agreement between United and Louisiana Gas dated July 30, 1979. United proposes to supply approximately 19 Mcf of natural gas per day and states that the proposed tap would not cause an increase in the customer's contractual maximum daily quantity nor an increase in its entitlements under United's effective curtailment plan. United further states that gas volumes delivered through the proposed sales tap would have no significant effect on existing service requirements either with respect to peak day and/or annual gas deliveries.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. CP84-268-000]

United Gas Pipe Line Co.; Request Under Blanket Authorization

March 22, 1984.

Take notice that on February 29, 1984, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP84-268-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that United proposes to construct and operate two sales taps for the delivery of natural gas to its distributor-customer, the Utility Board of the Town of Citronelle, Alabama (Citronelle), under the authorization issued in Docket No. CP82-430-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

It is stated that Tap No. 1 would serve daily requirements to Citronelle's residential customers and Tap No. 2 would be used only to aid deliveries during periods of low pressure. It is stated that both taps would connect the system of Citronelle to United's system in Mobile County, Alabama, the first tap to be connected into United's Baxterville-Mobile 20-inch pipeline and the second tap into United's Lirette-Mobile 30-inch line. United states that the requested sales taps would not cause an increase in the customer's contractual maximum daily quantity nor its entitlements under United's effective curtailment plan. United further states that it has sufficient capacity to provide gas service to its other existing customers. It is stated that United sells natural gas to Citronelle pursuant to a service agreement between the parties dated April 1, 1983, under United's Rate Schedule G-N. As proposed, Citronelle would reimburse United for all costs connected with the construction of the proposed taps.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-00048; BH-FRL 2553-8]

Administrator's Pesticide Advisory Committee (Proposed); Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of meeting.

SUMMARY: The proposed Administrator's Pesticide Advisory Committee (APAC) will hold a preliminary meeting to discuss the operation of the proposed Committee and to identify and evaluate issues to be addressed by the Committee in future meetings. General activities of the Office of Pesticide Programs (OPP) will also be discussed. The meeting will be open to the public.

DATE: The preliminary meeting will take place on Wednesday, April 11, 1984, at 9:00 a.m. and adjourn by 4:30 p.m.

ADDRESS: The preliminary meeting will be held in: Rm. M-2409, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Betty Winter, Designated Federal

Official/Executive Secretary, (Proposed) Administrator's Pesticide Advisory Committee (TS–788), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E–637, 401 M St., SW., Washington, D.C. 20460, (202–382–2910).

SUPPLEMENTARY INFORMATION: The principal agenda items for the preliminary meeting of the proposed APAC will be the identification of pesticide administrative and legislative issues appropriate for consideration by the proposed Committee and the manner in which these issues should be addressed. The agenda will also include briefings and discussions of interest to the proposed Committee. The EPA Administrator, William D. Ruckelshaus, and the Assistant Administrator for Pesticides and Toxic Substances, John A. Moore, will brief the proposed Committee and solicit discussion on topics of interest in the area of pesticide regulation.

The meeting will be open to the public, and time will be set aside for public comments concerning the future work of the proposed Committee. Any member of the public wishing to present an oral or written statement relating to the proposed Committee's work should contact the proposed APAC Federal Designee at the address or phone number listed above.

Currently, this proposed Committee and its functions are under review by the General Services Administration (GSA) Committee Management Secretariat. EPA is continuing to coordinate with GSA to assure the most expeditions review and concurrence on the establishment of this Committee.

Dated: March 22, 1984.

John A. Moore,

Assistant Administrator for Pesticide and Toxic Substances.

BILLING CODE 6560–50–M

[FRL–2553–6]

Region 6; Rescission of PSD Permits

Notice is hereby given that the Environmental Protection Agency (EPA) rescinded Prevention of Significant Deterioration (PSD) permits for the following:

1. PSD–TX–21; United States Steel Corporation; permit issued on July 20, 1977, for the construction of a pipe mill at the existing Texas Works facility located on FM Road 1405, approximately 6 miles southeast of Baytown, Chambers County, Texas; rescinded on May 13, 1982.

2. PSD–TX–69; Val Verde International, Inc. (now Rio Grande Recovery); permit issued on March 30, 1978, for the construction of an atmospheric crude oil topping plant capable of processing waste slop oil located at 3550 Terminal Road, Brownsville, Cameron County, Texas; rescinded on April 8, 1983.

3. PSD–TX–78; Texas Industries, Inc.; permit issued on March 2, 1979, for the construction of a coal strip mining and cleaning plant located on Jaybird Road, approximately 1.5 miles south of Thurber, Erath County, Texas; rescinded on April 12, 1983.

4. PSD–TX–161a; Texas Bitulithic Company; permit issued on December 21, 1978, for the construction of a hot mix asphaltic concrete plant located approximately one mile west of the intersection of State highways 289 and 121, approximately 4 miles south of Frisco, Collin County, Texas; rescinded on February 12, 1982.

5. PSD–TX–167; K.O. Steel Castings, Incorporated; permit issued on January 19, 1979, for the construction of a steel castings foundry at the existing Plant No. 2 located at 3700 Pitluk Road, San Antonio, Bexar County, Texas; rescinded on July 10, 1981.

6. PSD–TX–169a; Board of Trustees of the Galveston Wharves (now FAR-MAR-CO, Incorporated; permit issued on January 19, 1979, for the construction of an export grain elevator in replacement of the damaged grain elevator located at 32 Wharf Road, Galveston, Galveston County, Texas; rescinded on January 21, 1983.

7. PSD–TX–175; Coastal States Petroleum Company; permit issued on July 20, 1979, for the modification of the existing refinery located on Interstate Highway 27, in Corpus Chrisit, Nueces County, Texas; rescinded on February 11, 1982.

8. PSD–TX–195; Chickasha Cotton Oil Company; permit issued on August 22, 1979, for the construction of a cottonseed oil solvent extraction plant located at East South 8th Street and Elgin Avenue in Lamesa, Dawson County, Texas; rescinded on June 15, 1983.

9. PSD–TX–196a; Lufkin Industries, Incorporated; permit issued on March 30, 1979, for the modification of the Main Bay Foundry from a dry sand molding process to a "no-bake" process located near downtown Lufkin, Angelina County, Texas; rescinded on March 15, 1982.

10. PSD–TX–197; Enserch Exploration, Incorporated; permit issued on November 29, 1979, for the construction of an ethane recovery plant located approximately 12 miles from Cisco, Eastland County, Texas; rescinded on February 11, 1982.

11. PSD–NM–208; Navajo Refining Company; permit issued on July 19, 1979, for the replacement of an existing Thermofor Catalytic Cracking Unit with a used Fluid Catalytic Cracking Unit at the existing refinery located at 501 East Main Street, Artesia, Eddy County, New Mexico; rescinded on December 14, 1981.

12. PSD–TX–213a; Consolidated Foundry, Incorporated; permit issued on April 19, 1979, for the construction of a new gray iron jobbing foundry located on FM Road 1346 near San Antonio, Bexar County, Texas; rescinded on April 26, 1982.

13. PSD–OK–223a; Phillips Petroleum Company; permit issued on August 22, 1979, for the expansion of the existing carbon black pilot plant research facility located at Bartlesville, Osage County, Oklahoma; rescinded on March 4, 1982.

14. PSD–LA–238a; R.L. Abshire Construction, Incorporated; permit issued on July 9, 1979, for the construction of a new asphaltic concrete plant located in Lake Charles, Calcasieu Parish, Louisiana; rescinded on August 7, 1981.

15. PSD–TX–241; Marathon Oil Company; permit issued on March 3, 1980, to replace the existing No. 5 topping crude heater, firing refinery gas, with a new heater firing natural gas and No. 6 fuel oil, at the existing refinery located on 6th Street, Texas City, Galveston County, Texas; partially rescinded on October 4, 1982.

. PSD-LA–250; Uniroyal Chemical; permit issued on September 26, 1980, for the construction of a 25 MMBtu/hr waste incinerator at the existing chemical plant located in Geismar, Ascension Parish, Louisiana; partially rescinded on April 23, 1982.

17. PSD–TX255a; United States Gypsum Company; permit issued on February 13, 1980, for the construction of a new wallboard manufacturing facility located 2.8 miles east of Sweetwater, Nolan County, Texas; rescinded on December 16, 1982.

18. PSD–TX265a; GAF Corporation; permit issued on February 27, 1980, for the construction of a new asphalt roofing machine facility located at 2600 Singleton Boulevard, Dallas, Dallas, County, Texas; rescinded on September 18, 1981.

19. PSD–LA–270a; Uniroyal Chemical; permit issued on January 14, 1980, for the construction of a para amino diphenylamine (UBOB) manufacturing facility located at the existing complex in Geismar, Ascension Parish, Louisiana; rescinded on May 13, 1983.

20. PSD–TX–272a; Luling Iron Foundry; permit issued on January 11, 1980, for the construction of a gray iron castings foundry located at 800 North Magnolia, Luling, Caldwell County, Texas; rescinded on March 30, 1982.

21. PSD–TX–288a; W–K–M Valve Division of ACF Industries, Inc.; permit issued on February 22, 1980, for the construction of a no-bake molding facility at the existing foundry located at 126 Collins Road, Richmond, Fort Bend County, Texas; rescinded on May 17, 1983.

22. PSD–TX–360; Shell Oil Company; permit issued on March 27, 1981, for the construction of two internal combustion compressor engines at the existing CO_2 injection facility located on State Highway 67, approximately 5 miles west of McCamey, Upton County, Texas; rescinded on July 9, 1982.

Part 52.21(w) of the PSD regulations amended on August 7, 1980, states that any owner or operator of a stationary source or modification who holds a permit for the source or modification which was issued under 40 CFR 52.21, as in effect on June 19, 1978, may request that the Administrator rescind the permit, or a particular portion of the permit, if the applicant shows that the PSD regulations, as amended on August 7, 1980, would not apply to the source or modification. All the sources listed above, except for PSD–TX–241 and PSD–TX–250, no longer constitutes a major stationary source since, under the new definition of "potential to emit", their controlled emissions are not large enough to constitute a major stationary source or a major modification. Therefore, EPA determined that a PSD permit is no logner required for these facilities and is giving notice that it has rescinded the permits. PSD–TX–241 was partially rescinded because there was a net decrease in the nitrogen oxide (NO_x) emissions and, therefore, NO_x was not subject to PSD review. This source is still subject to the PSD regulations for sulfur dioxide emissions. PSD–TX–250 was partially rescinded because the emissions of sulfur dioxide (SO_2) and particulate matter (PM) from this project are insignificant, as defined in 40 CFR 52.21(b)(23) as in effect on August 7, 1980, and, therefore, the SO_2 and PM emissions are no longer subject to the PSD regulations. The source is still subject to the PSD regulations for nitrogen oxide emissions.

Notices of EPA's proposed action to rescind, or partially rescind, these PSD permits were published in newspapers in the affected area of each facility. No comments were received regarding the proposed rescissions. Documents relevant to the rescission requests are available for public inspection during normal business hours in the offices of the Air Branch, Air and Waste Management Division, U.S. Environmental Protection Agency, Region 6, 1201 Elm Street, Dallas, Texas 75270.

This notice will have no effect on the National Ambient Air Quality Standards.

The Office of Management and Budget has exempted this information notice from the requirements of Section 3 of Executive Order 12291.

Dated: March 14, 1984.

Dick Whittington,

Regional Administration, Region 6.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

Advisory Committee on DBS Standards; Working Group on Signal Format, and Sub-Committee on Transmission Standards; Changed Meeting

March 16, 1984.

Notice of: (1). Date and Room Change of a Meeting of the FCC Advisory Committee on DBS Standards, and (2). Sub-Committee Meeting on Transmission Standards.

Public Notice No. 2845, dated March 9, 1984, indicated that the Working Group on Signal Format will meet on March 20, 1984 in FCC/OST Conference Room No. 7317. This has been changed to March 22, 1984 (all day). The meeting location is now FCC Conference Room No. 5115, 2025 M Street, NW.

There will be a meeting of the Sub-Committee on Transmission Standards on March 30, 1984. The meeting location is CBS, 1800 M Street, 3rd flr.

Those seeking further information may contact B. Pattan, FCC/OST at (202) 653–8098, or chairman of the above groups.

Federal Communications Commission.

William J. Tricarico,

Secretary.

[FR Doc. 84-8114 Filed 3-26-84; 8:45 am]

BILLING CODE 6712-01-M

[MM Docket No. 84–274, File No. BPCT–830818KI, et al.]

Retherford Publications, Inc., et al.; Hearings Designation Order

Adopted: March 13, 1984.
Released: March 19, 1984.
By Chief, Mass Media Bureau.

In re Applications of Retherford Publications, Inc., Sheboygan, Wisconsin, MM Docket No. 84–274, File No. BPCT–830818KI; Sheboygan County Broadcasting Co., Inc., Sheboygan, Wisconsin, MM Docket No. 84–275, File No. BPCT–831011KH; Hometown Television, Inc., Sheboygan, Wisconsin, MM Docket No. 84–276, File No. BPCT–831018KN; for construction permit.

1. The Commission, by the Chief, Mass Media Bureau, acting pursuant to delegated authority, has before it: (1) The above-captioned mutually exclusive applications of Retherford Publications, Inc. (Retherford), Sheboygan County Broadcasting Co., Inc. (Sheboygan County), and Hometown Television, Inc. (Hometown) for authority to construct a new commercial television station on Channel 28, Sheboygan, Wisconsin; (2) a petition to deny Retherford's application filed by Sheboygan County; (3) an opposition filed by Retherford; and (4) a reply to the opposition filed by Sheboygan County.

2. On October 18, 1983, Sheboygan County filed a petition to deny the Retherford application on the grounds that Retherford does not have a site available to it. Generally, petitions to deny filed by one applicant against another are treated as pre-designation petitions to specify issues. As such, they are dismissed (without prejudice to raising the issues before the Administrative Law Judge) because such petitions to specify issues are no longer permitted. *Revised Procedures for the Processing of Contested Broadcast Applications.* (General Docket No. 79–137), 72 FCC 2d 202, 214 (1979). In this case, the petition raises a disqualifying issue which could not be discovered by the staff in the ordinary course of processing. We believe, therefore, that this is a matter appropriately addressed here. To the extent that other issues are raised by the petition, however, the petition will be dismissed.[1]

3. Retherford proposes to locate its transmitter at a site owned and controlled by a competing applicant, Sheboygan County. The site is that of Sheboygen County's Stations WHBL(AM) and WWJR(FM), Sheboygan, Wisconsin. Sheboygan County states that Retherford has never sought permission to use the site and that the site would not be made available to Retherford. Retherford responded that permission was given by telephone to use the WWJR(FM) tower

[1] On November 17, 1983, Retherford filed an opposition to the petition to deny. On November 23, 1983, Sheboygan County filed a reply to the opposition.

coordinates for the purposes of Retherford's application. Retherford, however, concedes that "* * * the tower may not be available for leasing when a license is granted." Retherford does not state when the alleged telephone call was made nor to whom it was made.

4. The Commission has long held that an applicant need not demonstrate absolute assurance of site availability nor legal control over the proposed site; rather, there must be a showing of "reasonable assurance" that the site is available. *John Hutton Corp.*, 27 FCC 2d 214 (1971); *North American Broadcasting Co.*, 15 FCC 2d 984 (1969). The indication that the site will be available must, obviously, be obtained from a person who has authority to give such assurances, i.e., the property owner. It is a well established Commission policy that "neither absolute assurance nor legal control of a site is necssary, but only that when an applicant proposes a site, he must have done so in good faith that the site will be available to him." *Alabama Citizens for Responsive Television Inc.*, 59 FCC 2d 1, 2–3 (1976). Since the specification of a site is an implied representation that an applicant has obtained reasonable assurance that the site will be available, a failure to inquire as to the availability of the site specified in the application is inconsistent with such a representation. Accordingly, an issue will be added as to whether Retherford has a site at the time its application was filed, and whether it now has "reasonable assurance" of the availability of its site.

5. The proposed antenna of Sheboygan County is to be mounted on one of the towers of its own AM Radio Station WHBL, Sheboygan, Wisconsin. The proposed tower of Retherford is to be located 0.04 miles from the directional array of WHBL. Consequently, any grant of a construction permit to either applicant will be conditioned to ensure that WHBL's radiation pattern is not adversely affected by the construction of the proposed TV station.

6. Section 73.636(a)(1) of the Commission's Rules states that no license for a television broadcast station shall be granted to any party if such party directly or indirectly controls one or more AM and/or FM broadcast stations and the grant of such license would result in the Grade A contour of the proposed television station encompassing the entire community of license of the AM and/or FM broadcast station. However, Note 8 to this rule provides, *inter alia*, that applications for UHF television facilities "* * * will be handled on a case-by-case basis in order to determine whether common ownership, operation or control of the stations in question would be in the public interest." Since Sheboygan County is the licensee of Stations WHBL(AM) and WWJR(FM), Sheboygan, Wisconsin, an appropriate issue will be specified to determine whether the common ownership, operation or control of Stations WHBL(AM) and WWJR(FM), and the proposed television station would be consistent with the public interest.

7. Section 73.685(f) of the Commission's Rules requires an applicant proposing to use a directional antenna to include a tabulation of relative field pattern, oriented so that 0° corresponds to True North and tabluated at least every 10° plus any minima or maxima. Sheboygan County has not supplied this data. Accordingly, the applicant will be required to submit an amendment with the appropriate information, to the presiding Aministrative Law Judge and a copy to the TV Branch, Mass Media Bureau, within 20 days after the date of the release of this Order.

8. Hometown has neither shown taht it is financially qualified nor certified that it is financially qualified. Its Exhibit No. 2, however, states that as soon as financial arrangements are completed, the applicant will make the appropriate certification. Accordingly, the applicant will be given 20 days from the date of the release of this Order to review its financial proposal in light of Commission requirements, to make any changes that may be necessary, and if appropriate, to submit a certification to the Administrative Law Judge in the manner called for in Section III, FCC Form 301, as to its financial qualifications. If the applicant cannot make the required certification, it shall so advise the Administrative Law Judge who shall then specify an appropriate issue.

9. Hometown intends to operate the proposed facility as a satellite of commonly-owned station WLRE(TV), Channel 26, Green Bay, Wisconsin. Since the other applicants do not propose a satellite operation, it follows that Hometown must justify the need for a satellite. Accordingly, an appropriate issue will be specified as to the need for a satellite operation.[2]

[2] The issue to be specified as to whether circumstances exist which make the "satellite" form of operation necessary in Sheboygan will be a qualifying issue, for if it is resolved in the negative, the application proposing a satellite operation could not be granted.

10. No determination has been made that the tower height and location specified by Hometown would not constitute a hazard to air navigation. Accordingly, an appropriate issue will be specified.

11. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. Since the applications are mutually exclusive, the Commission is unable to make the statutory finding that their grant will serve the public interest, convenience, and necessity. Therefore, the applications must be designated for hearing in a consolidated proceeding on the issues specified below.

12. Accordingly, it is ordered, That pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine whether, at the time it filed its application, Retherford had reasonable assurance that its proposed site would be available to it for the proposed use and, if not, the effect thereof on the applicant's basic or comparative qualifications;

2. To determine whether Retherford now has reasonable assurance that its proposed site will be available to it for the proposed use.

3. To determine, with respect to Hometown, whether circumstances exist which would make operation as a "satellite" necessary for Sheboygan, Wisconsin.

4. To determine, with respect to Hometown, whether there is a reasonable possibility that the tower height and location proposed would constitute a hazard to air navigation.

5. To determine, with respect to Sheboygan County, whether its interests in Radio Stations WHBL(AM) and WWJR(FM), Sheboygan, Wisconsin, and the proposed television station would be consistent with the public interest.

6. To determine which of the proposals would on a comparative basis, best serve the public interest.

7. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

13. It is further ordered, That, in the event of a grant of the application to either Sheboygan County or Retherford, the construction permit shall be conditioned as follows:

During the installation of the antenna authorized here, AM Station WHBL

shall determine operating power by the indirect method and, if necessary, request temporary authority from the Commission in Washington to operate with parameters at variance in order to maintain monitoring point values within authorized limits. Upon completion of the installation, common point impedance measurements on the AM array shall be made and a partial proof of performance, as defined by § 73.154(a) of the Commission's Rules, shall be conducted to establish that the AM array has not been adversely affected and, prior to or simultaneous with the filing of the application for license to cover this permit, the results submitted to the Commission (along with a tower sketch of the installation) in an application for the AM station to return to the direct method of power determination.

14. It is further ordered, That, Sheboygan County shall submit an amendment providing the information required by § 73.685(f) of the Commission's Rules, to the presiding Administrative Law Judge and a copy to TV Branch, Mass Media Bureau, within 20 days after the date of the release of this Order.

15. It is further ordered, That Hometown shall submit a financial certification in the form required by Section III, FCC Form 301, or advise the Administrative Law Judge that the certification cannot be made, as may be appropriate, within 20 days of the date of the release of this Order.

16. It is further ordered, That the Federal Aviation Administration is made a party respondent to this proceeding with respect to Issue 4.

17. It is further ordered, That the petition to deny filed by Sheboygan County is granted to the extent indicated and otherwise is dismissed.

18. It is further ordered, That, to avail themselves of the opportunity to be heard, the applications and the party respondent herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

19. It is further ordered, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Roy J. Stewart,

Chief, Video Service Division, Mass Media Bureau.

BILLING CODE 6712-01-M

Telecommunications Industry Advisory Group Steering Committee; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Telecommunications Industry Advisory Group Steering Committee scheduled to meet on April 9, 10, 11, 12, and 13, 1984. The meeting will be held at the office of AT&T, 1120 20th Street, NW., Washington, D.C., 10th Floor, Conference Room A&B and will be open to the public. The meeting time for the first day of the meeting is 10:00 AM.

The agenda is as follows:

I. Review of Minutes of Previous Meeting
II. General Administrative Matters
III. Review of Entire USOA Revision
IV. Other Business
V. Presentation of Oral Statements
VI. Adjournment

With prior approval of Gerald P. Vaughan, Chairman, oral statements, while not favored or encouraged, may be allowed if time permits and if the Chairman determines that an oral presentation is conducive to the effective attainment of Steering Committee objectives. Anyone not a member of the Steering Committee and wishing to make an oral presentation should contact Stephen T. Duffy, Group Vice-Chairman ((202) 634-1509) at least five days prior to the meeting date.

William J. Tricarico,

Secretary, Federal Communications Commission.

[FR Doc. 84-8115 Filed 3-26-84; 8:45 am]

BILLING CODE 6712-01-M

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and may request a copy of each agreement and the supporting statement at the Washington, D.C. Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit protests or comments on each agreement to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 20 days after the date of the **Federal Register** in which this notice appears. The requirements for comments and protests are found in § 522.7 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

Agreement No.: 9522-48.

Title: Med-Gulf Conference.

Parties: Atlanttrafik Express Service, Achille Largo, C.IA Venezolana de Navegacion, Constellation Lines, Costa Line, D'Amico Line S.N.p.A., Egyptian Navigation Co., Ltd., Farrell Lines, Inc., Flota Mercante Grancolombiana S.A., Italian Line, Jugolinija, Jugooceanija, Lykes Lines, Nedlloyd Lines, Nordana Line/Dannebrog Lines, Spanish Line, Zim Israel Navigation Co., Ltd.,

Synopsis: The proposed amendment would provide for conference U.S. and Puerto Rican intermodal authority; eliminate the requirement that a member give a 120 days' notice before offering a service within the conference's scope; require a vote of unanimous less one for conference action on rates and rules applicable to cargo movements to points in states bordering the Pacific Ocean and establish a conference-wide right of independent action on 30 day's notice.

Filing Party: Warren L. Lewis, Esquire, Billig, Sher & Jones, 2033 K Street, NW., Suite 300, Washington, D.C. 20006.

Agreement No.: 10064-5.

Title: Colombia/U.S. Gulf Equal Access Agreement.

Parties: Coordinated Caribbean Transport, Flota Mercante Grancolombiana, S.A. Lykes Bros. Steamship Co., Inc.

Synopsis: The proposed amendment will permit Coordinated Caribbean Transport to become a member of the agreement and an associate of Grancolombiana under the Colombian Government's cargo preference laws in the trade between U.S. Gulf ports and Colombian ports.

Filing Party: R. J. Finnan, Director of Pricing, Lykes Bros. Steamship Co., Inc., 300 Poydras Street, New Orleans, Louisiana 70130.

By Order of the Federal Maritime Commission.

Dated: March 21, 1984.

Francis C. Hurney,

Secretary.

BILLING CODE 6730-01-M

Independent Ocean Freight Forwarder License; Applicants

Notice is hereby given that the following applicants have filed with the Federal Maritime Commission applications for licenses as independent ocean freight forwarders pursuant to section 44(a) of the Shipping Act, 1916 (75 Stat. 522 and 46 U.S.C. 841(c)).

Persons knowing of any reason why any of the following applicants should not receive a license are requested to communicate with the Director, Bureau of Tariffs, Federal Maritime Commission, Washington, D.C. 20573.

Robert H. Metti, 18982 Laurel, Livonia, Michigan 48152.

By the Federal Maritime Commission.

Dated: March 21, 1984.

Francis C. Hurney,

Secretary.

BILLING CODE 6730-01-M

[Independent Ocean Freight Forwarder License No. 1376-R]

Sunvan International, Inc.; Order of Revocation

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.15(d) of Federal Maritime Commission General Order 4 further provides that a license shall be automatically revoked for failure of a licensee to maintain a valid bond on file.

The bond issued in favor of Sunvan International, Inc., 7700 Second Ave., Seattle, WA 98108 was cancelled effective March 16, 1984.

By letter dated February 24, 1984, Sunvan International, Inc. was advised by the Federal Maritime Commission that Independent Ocean Freight Forwarder License No. 1376-R would be automatically revoked unless a valid surety bond was filed with the Commission.

Sunvan International, Inc. has failed to furnish a valid bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 1 (Revised), section 9.09(f) dated September 27, 1983;

Notice is hereby given, that Independent Ocean Freight Forwarder License No. 1376-R be and is hereby revoked effective March 16, 1984.

It is ordered, that Independent Ocean Freight Forwarder License No. 1376-R issued to Sunvan International, Inc. be returned to the Commission for cancellation.

It is further ordered, that a copy of this Order be published in the Federal Register and served upon Sunvan International, Inc.

Robert G. Drew,

Director, Bureau of Tariffs.

BILLING CODE 6730-01-M

[Docket No. 84-10]

The Coca-Cola Export Corporation v. Peruvian Amazon Line; Filing of Complaint and Assignment

Notice is given that a complaint filed by the Coca-Cola Export Corporation against Peruvian Amazon Line was served March 16, 1984. Complainant alleges that respondent has violated section 18(b)(3) of the Shipping Act, 1916, in connection with the rate assessed against a particular shipment of complainant.

This complainant has been assigned to Administrative Law Judge John E. Cograve. Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that oral hearing and cross-examination are necessary for the development of an adequate record.

Francis C. Hurney,

Secretary.

FEDERAL RESERVE SYSTEM

Fleet Financial Group, Inc., et al.; Applications To Engage De Novo in Permissible Nonbanking Activities

The companies listed in this Notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (49 FR 794) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation

Y (49 FR 794) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for banking holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, indentifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 17, 1984.

A. Federal Reserve Bank of Boston (Richard E. Randall, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Fleet Financing Group, Inc.*, Providence, Rhode Island; to engage through its subsidiary, Fleet Mortgage Corporation, Milwaukee, Wisconsin, in making, acquiring, selling or servicing of mortgage loans or other extensions of credit; consumer finance; and acting as insurance agent or broker with respect to credit life and credit accident and health insurance that is directly related to a mortgage loan or consumer loan made, acquired, sold or serviced by such subsidiary. Comments on this application must be received not later than April 16, 1984.

B. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South La Salle Street, Chicago, Illinois 60690:

1. *First Community Bancorp, Inc.*, Rockford, Illinois; to engage through its subsidiary, First Community Credit Insurance Company, in reinsurance of credit life and credit accident and health insurance in the State of Illinois, principally the Rockford metropolitan area. Comments on this application must be received not later than April 16, 1984.

C. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Alaska Mutual Bancorporation*, Anchorage, Alaska; to engage *de novo* through its subsidiary, Alaska Mortgage Company, Anchorage, Alaska, in making and servicing loans as would be made by a mortgage company. These geographic areas to be served are the states of Alaska, Arizona, California, Oregon, and Washington.

2. *Fresno Bancorp*, Fresno, California; to engage *de novo* through its subsidiary, Fresno Bansystems, Inc., Fresno, California, in providing data processing and transmission services, facilities, software, hardware or access to such services.

3. *U.S. Bancorp*, Portland, Oregon; to engage *de novo* through its subsidiary, U.S. Bancorp Mortgage Company, Portland, Oregon, in making, acquiring and servicing of loans and other extensions of credit secured by mortgages or deeds of trust on real property, and to act as insurance agent with regard to credit life and disability insurance solely in connection with extensions of credit by Bancorp Mortgage. Comments on this application must be received not later than April 16, 1984.

Board of Governors of the Federal Reserve System, March 22, 1984.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Key Bancshares, Inc.; Formation of Bank Holding Company

The company listed in this notice has applied for the Board's approval under sections 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1) to become a bank holding company by acquiring voting shares and/or assets of a bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c).

The application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated. Interested persons may express their views in writing to the address indicated for the application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, indentifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Key Bancshares, Inc.*, Tampa, Florida; to become a bank holding company by acquiring 100 percent of the voting shares of The Key Bank of Tampa, Tampa, Florida. Comments on this application must be received not later than April 11, 1984.

Board of Governors of the Federal Reserve System, March 22, 1984.

James McAfee,

Associate Secretary of the Board.

Summit Holding Corporation, et al.; Formations, Acquisitions, and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (49 FR 794) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than April 18, 1984.

A. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Summit Holding Corporation*, Beckley, West Virginia; to become a bank holding company by acquiring 100 percent of the voting shares of Big Clock

National Bank, Beckley, West Virginia, successor by merger to Raleigh County National Bank, Beckley, West Virginia.

B. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Eastern Michigan Financial Corporation,* Croswell, Michigan; to become a bank holding company by acquiring 100 percent of the voting shares of State Bank of Croswell, Croswell, Michigan.

2. *First of Charlevoix Corp.,* Charlevoix, Michigan, to become a bank holding company by acquiring 100 percent of the voting shares of First State Bank of Charlevoix, Charlevoix, Michigan. Comments on this application must be received not later than April 19, 1984.

C. **Federal Reserve Bank of St. Louis** (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Mammoth Bancorp, Inc.,* Brownsville, Kentucky; to become a bank holding company by acquiring 85.7 percent of the voting shares of Brownsville Deposit Bank, Brownsville, Kentucky.

D. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *South St. Paul Bancshares, Inc.,* South St. Paul, Minnesota; to become a bank holding company by acquiring 92.5 percent of the voting shares of Summit State Bank of South St. Paul, South St. Paul, Minnesota. Comments on this application must be received not later than April 19, 1984.

E. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Bolder Bancorporation,* Boulder, Colorado; to become a bank holding company by acquiring 80 percent of the voting shares of Bank of Boulder, Boulder, Colorado.

2. *First Flo Corporation,* Florence, Colorado; to become a bank holding company by acquiring 85.5 percent of the voting shares of First National Bank of Florence, Florence, Colorado.

F. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Citizens-Texas Banc Shares, Inc.,* Buffalo, Texas; to acquire 100 percent of the voting shares of Citizens National Bank, Teague, Texas, a *de nova* bank.

2. *Jersey Village Bancshares, Inc.,* Houston, Texas; to acquire 100 percent of the voting shares of Sterling Bank, N.A., Houston, Texas, a *de novo* bank. Comments on this application must be received not later than April 19, 1984.

3. *Waskom Bancshares, Inc.,* Waskom, Texas; to become a bank holding company by acquiring 80 percent of the voting shares of First State Bank, Waskom, Texas.

Board of Governors of the Federal Reserve System, March 22, 1984.

James McAfee,

Associate Secretary of the Board.

Food and Drug Administration

[Docket No. 83F-0320]

Quaker Chemical Corp.; Withdrawal of Petition for Food Additive

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces the withdrawal without prejudice of the petition (FAP 3B3722) proposing that the food additive regulations be amended to provide for the safe use of polyethyleneamino-fatty (C_{16}–C_{18}) amide ethyl sulfate as a softener and debonder of pulp in paper and paperboard in contact with food.

FOR FURTHER INFORMATION CONTACT: James H. Maryanski, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5740.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b), 72 Stat. 1786 (21 U.S.C. 348(b))), the following notice is issued:

In accordance with § 171.7 *Withdrawal of petition without prejudice* of the procedural food additive regulations (21 CFR 171.7), Quaker Chemical Corp., Conshohocken, PA 19428, has withdrawn its petition (FAP 3B3722), notice of which was published in the **Federal Register** of October 17, 1983 (48 FR 47073).

Dated: March 13, 1984.

Richard J. Ronk,

Acting Director, Bureau of Foods.

BILLING CODE 4160-01-M

[Docket No. 84F-0073]

Rohm and Haas Co.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Rohm and Haas Co. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of styrene copolymers in coatings on paper and paperboard intended for use in contact with food.

FOR FURTHER INFORMATION CONTACT: Patricia J. McLaughlin, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, D.C. 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 4B3785) has been filed by Rohm and Haas Co., Independence Mall West, Philadelphia, PA 19105, proposing that the food additive regulations be amended to provide for the safe use of styrene copolymers with methacrylate and acrylate comonomers in coatings on paper and paperboard intended for use in contact with food.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the

notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c) (proposed December 11, 1979; 44 FR 71742).

Dated: March 17, 1984.

Richard J. Ronk,

Acting Director, Bureau of Foods.

BILLING CODE 4160-01-M

[Docket No. 84D-0016]

Medical Device Notification and Voluntary Safety Alert; Availability of Draft Guideline

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability for public review and comment of a draft guideline entitled "Medical Device Notification and Voluntary Safety Alert" prepared by FDA's Center for Devices and Radiological Health (CDRH) (formerly National Center for Devices and Radiological Health). The draft guideline sets forth the procedure that FDA proposes to follow when requiring responsible persons to notify device users of an unreasonable risk of substantial harm presented by any medical device. Persons that voluntarily alert device users of risks posed by medical devices are encouraged to follow the guideline. The draft guideline is being made available for public comment to provide the agency with views to be considered for incorporation into a final guideline.

DATES: Comments by May 29, 1984. FDA will begin following the draft guideline immediately.

ADDRESSES: Written comments may be submitted to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857. Single copies of the draft may be obtained by submitting a written request to the contact person listed below.

FOR FURTHER INFORMATION CONTACT: Leonard J. Stauffer, Center for Devices and Radiological Health (HFZ-321), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-8110.

SUPPLEMENTARY INFORMATION: FDA has observed that when manufacturers, distributors, or other responsible persons discover a risk presented by a medical device, they often voluntarily alert appropriate persons of the risk to reduce or eliminate it. In such cases, the responsible persons have used "advisories," "alerts," or other similarly designated communications to inform the recipient of the steps to be taken to reduce or eliminate the risk.

Under section 518(a) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360h(a)), FDA may order that appropriate persons be notified if FDA determines (1) that a device in commercial distribution and intended for human use presents an unreasonable risk of substantial harm to the public health, (2) that notification is necessary to eliminate such risk, and (3) that no more practicable means are available under the act to eliminate such risk. Such order shall require that adequate notification be provided by the persons and means best suited to all health professionals who prescribe or use the device and to any other person who should receive such notification to eliminate the risk.

CDRH has prepared a draft guideline to set forth the procedures that FDA intends to use in implementing section 518(a) of the act and that FDA recommends manufacturers, distributors, or other responsible persons follow in notifying or alerting health professionals or other persons of an unreasonable risk of substantial harm to the public health presented by a medical device.

The draft guideline, entitled "Medical Device Notification and Voluntary Safety Alert," refers to a notice intended to reduce or eliminate an unreasonable risk of substantial harm to the public health issued voluntarily by any person (including FDA) as a "safety alert" and such notice issued by a manufacturer, distributor, or other responsible person pursuant to an order under section 518(a) of the act as a "notification." Also, the draft guideline describes the following: (1) The factors FDA would use in determining whether to issue a notification order; (2) FDA's responsibility to consult with responsible persons before issuing a notification order; (3) the expected content and distribution of, and followup to a notification or safety alert; (4) the relationship between a notification or safety alert and a recall under 21 CFR Part 7 (FDA's recall guidelines); and (5) other information intended to give manufacturers, distributors, and other responsible persons guidance when notifying appropriate persons of an unreasonable risk of substantial harm presented by a device.

This draft guideline is being made available for public comment before being issued by the agency as its formal position. If, following the receipt of comments, FDA concludes that the guideline reflects acceptable procedures for decisionmaking with respect to application of section 518(a) of the act, the guideline will be formalized and made available under § 10.90(b) of the agency's administrative practices and procedures regulations (21 CFR 10.90(b)). That regulation provides for the use of guidelines to establish procedures of general applicability that are not legal requirements but are acceptable to the agency. A person who follows a guideline is assured that his or her conduct will be acceptable to the agency. A person may also choose to use alternative procedures even though they are not provided for in the guideline. The agency is prepared to meet with persons who choose to depart from a guideline to discuss the matter further to prevent unnecessary expenditure of resources for actions that the agency may later determine to be unacceptable.

The draft guideline is available for public examination in the Dockets Management Branch (address above). Written requests for single copies may be submitted to Leonard J. Stauffer (address above). FDA advises that the agency intends to implement the procedures set forth in the draft guideline upon publication of this notice in the **Federal Register**. The agency encourages persons that voluntarily alert device users to risk posed by medical devices to follow the draft.

Interested persons may, on or before May 29, 1984, submit to the Dockets Management Branch (address above) written comments regarding this draft guideline. Two copies of any comments should be submitted, except that individuals may submit one copy. Comments should be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday. Comments received will be considered in developing a final guideline and in determining whether revision of the draft guideline is warranted.

Dated: March 22, 1984.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 84-8239 Filed 3-26-84; 8:45 am]

BILLING CODE 4160-01-M

Health Care Financing Administration

Medicaid Program; Preventive Services Under Medicaid

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice.

SUMMARY: The purpose of this notice is to encourage States to maximize the availability of preventive services to their Medicaid populations, and to solicit public comment on the criteria HCFA plans to use to evaluate new State plan amendments concerning preventive services. We are also soliciting public comment on the benefits and costs of preventive services. By using the methods described in this notice, States will be able to make a wider range of preventive services available and accessible to Medicaid-eligible individuals.

DATE: To assure consideration, comments must be received by May 29, 1984.

ADDRESS: Address comments in writing to: Health Care Financing Administration, Department of Health and Human Services, Attention: BERC–285–N, P.O. Box 26676, Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to Room 309–G, Hubert H. Humphrey Building, 200 Independence Avenue, S.W., Washington, D.C., or to Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

In commenting, please refer to file code BERC–285–N.

Comments will be available for public inspection beginning approximately 2 weeks from publication in Room 309–G of the Department's office at 200 Independence Avenue, S.W., Washington, D.C., on Monday through Friday of each week from 8:40 a.m. to 5:00 p.m. (202–245–7890).

FOR FURTHER INFORMATION CONTACT: Bill Ullman, 301–594–9827.

I. Background

Preventive services are acknowledged to be of great value in helping an individual to maintain health and well-being. These services can assist an individual in avoiding or minimizing the occurrence of disease and disability. A corollary result is that individual health care costs may be reduced. We have developed this notice to encourage States to maximize the availability of preventive services to their Medicaid populations and to provide guidelines for State plan amendments on coverage of these services.

A number of States already offer an effective package of preventive care under their Medicaid programs. Other States have included coverage of at least some preventive services under their Medicaid programs. Often, however, a wide range of preventive services may already be available in a State, but the services are fragmented among numerous agencies and programs in addition to Medicaid. As a result, Medicaid-eligible individuals may not receive a complete and coordinated program of preventive care. To address this problem, this notice also provides guidance as to how a State Medicaid agency can use increased coordination and referrals to create a more unified program of preventive care.

II. Discussion

The following sections of this notice discuss:

- The nature of preventive services and of scientific and professional opinion regarding their effectiveness;
- Information about preventive services currently available under various Federal programs;
- The various preventive service coverages under the Medicaid program, both within various benefits and separately as optional "preventive services";
- A program for self-evaluation of a State Medicaid program's approach to the overall issue of prevention, and steps to take as a means of assuring that the Medicaid program offers maximum use of existing resources both within and outside of the current State plan; and
- Criteria HCFA will be using to evaluate new State plan amendments concerning preventive services.

A. Types of Preventive Care

Preventive services traditionally have been divided into three categories:

1. Primary prevention that consists of actions, such as immunizations and prenatal care, which are directed at well persons and are intended to help avoid entirely the occurrence of disease and other impairments to health;

2. Secondary prevention that involves detecting the presence of a disease or other impairment in its earliest stages (for example, through screening procedures), when the condition may be most responsive to medical intervention; and

3. tertiary prevention that involves treatment of an already-established medical condition in order to avoid further damage and arrest the process of deterioration.

An additional distinction is made between personal preventive services (which are performed on a one-to-one basis by a qualified health care professional for the purpose of preventing disease or maintaining health) and preventive efforts that are applied at a community level (which involve no direct patient care). Broadly defined, the term "preventive services" can encompass a large range of activities of both types, including interventions applied directly to individuals (such as immunizations and screening for disease) as well as environmental interventions applied at a community level (such as water purification).

For the purpose of Medicaid coverage of preventive services, however, it is necessary to make a further distinction between those services that are medical or remedial in nature and those that are not. The statute defines Medicaid as a program of medical assistance, and repeatedly uses the terms "medical" and "remedial" to describe the general types of care for which Medicaid will make payment (see sections 1903(a)(1), 1905(a)(6), and 1905(a)(18) of the Social Security Act). Since the inception of the Medicaid program, this medical-remedial orientation has been interpreted to include those services that: (1) Involve direct patient care, and (2) are for the express purpose of treating or preventing, or minimizing the adverse effects of illness, injury, or other impairments to an individual's physical or mental health. In order for any service to be covered under the Medicaid program, it must meet both of these elements. Therefore, preventive services applied at the community level are excluded from Medicaid coverage, since they do not involve direct patient care. Preventive services that are furnished to individuals but deal with external social or environmental factors are also excluded, since they do not directly address an individual's physical or mental health. Some examples of non-covered preventive services at the community level and nonmedical services that address broader social or environmental concerns are as follows:

- Activities such as fluoridation of a community's water supply are not covered under Medicaid, since there is no direct patient care involved. However, fluoride dental treatments furnished directly to a Medicaid-eligible individual are covered.
- Investigations to determine the source of a child's elevated blood level are patient-oriented and, therefore, covered; however, environmental interventions to remove the lead source are not.

• Nonmedical preventive services that address broader social or environmental concerns are not covered under Medicaid, even when furnished directly to individuals (e.g., counseling on the importance of smoke detectors, instruction on traffic safety, etc.).

At present, there is no uniformly accepted nationwide standard that specifies a single set of preventive services, or a particular schedule for their delivery, as being the most effective (and we do not attempt to prescribe one here). Medical professional organizations and scientific bodies have given considerable thought to recommendations about those preventive procedures which should be offered to individuals. Groups such as the Canadian Task Force on the Periodic Health Examination, the Ad Hoc Committee of the Institute of Medicine, the American Cancer Society, and the Public Health Service Advisory Committee on Immunization Practices have recommended schedules of diagnostic tests and other preventive services to be administered in the context of periodic examinations over a person's entire lifetime. In addition, certain, professional medical groups have developed preventive services guidelines that apply to specific patient populations. These groups include organizations such as the American College of Obstetricians and Gynecologists, the American Academy of Pediatricians, the American College of Physicians and the American Medical Association.

The presence (or absence) of agreement among various professional and scientific groups regarding the application of individual services and procedures can, in large part, be attributed to the strength of the scientific data base supporting the efficacy of each service or procedure. For example, while there is extensive scientific evidence to support the efficacy and schedule of administration of most immunizations, the date to support many counseling services are not as complete. Decisions regarding coverage of particular services or procedures generally should be guided by criteria which include evidence of the efficacy, acceptability and safety of the procedure, the availability of effective interventions for diseases detected in the asymptomatic state, and the prevalence of the condition in the population at risk. They should also reflect advances in medical research as the scientific data base which supports preventive services is updated. (See section D(1) for criteria that HCFA will use in evaluating States' proposals for coverage of preventive care under Medicaid.)

B. Federal Funding for Preventive Care

In addition to Medicaid, various other programs provide Federal funding of personal preventive services. For example, the Center for Prevention Services, a component of the Centers for Disease Control makes grants to State health departments to help ensure that children receives appropppirate immunizations. Other Federal programs may also fund preventive services that do not involve direct, medically-oriented care of individual patients, but instead address broader social or environmental conditions that also may affect health. These services might include such activities as removal of lead-based paint from the home or promotion of good health through injury prevention.

Additionally, a large portion of the Federal funding for preventive care (other than under the Medicaid program) takes place under the authority of the Public Health Service (PHS) Act. As a result of the Omnibus Budget Reconciliation Act of 1981, a number of former categorical grant programs were consolidated into several PHS block grants. Specifically, this legislation amended title XIX of the PHS Act to establish the Alcohol and Drug Abuse and Mental Health Services Block Grant, and the Preventive Health and Health Services Block Grant. It also amended title V of the Social Security Act to establish the Maternal and Child Health Services Block Grant. Under these block grants, States fund varied services of a preventive nature.

C. Medicaid Coverage of Preventive Care

Medicaid program funding can support preventive care in a variety of contexts. For example, the preventive aspects of some services are specifically included in the definitions of those services in the Medicaid regulations. These services include outpatient hospital services (42 CFR 440.20(a)), clinic services (§ 440.90), dental services (§ 440.100(a)), services for individuals with speech, hearing, and language disorders (§ 440.110(c)(1)), and prescribed drugs (§ 440.120(a)). The Early and Periodic Screening, Diagnosis and Treatment (EPSDT) program for individual under age 21 has a definite preventive orientation, since its purpose is to detect and treat physical and mental health problems in their early stages (§ 440.40(b)). For example, initial and periodic health examinations, and certain dental care, immunizations, and necessary hearing and vision services are mandatory under EPSDT.

Other covered Medicaid services may also include preventive elements. For example, physicians generally include, as part of the services furnished to a patient who is recovering from a heart attack, counseling on the effect of diet, exercise, and smoking. (Such counseling is an inherent part of the physician's covered services for which payment has already been made; thus a separate, additional payment for the counseling aspect of the services would not be made, since this would represent a duplicate payment.)

In addition to inclusion as an integral component of other covered services, preventive care can be furnished as a separate optional Medicaid benefit. Additional diagnostic, screening, or rehabilitative services also can be covered at State option (see 42 CFR 440.130 for definitions of those services). An informal telephone survey recently indicated that a wide variety of preventive care currently is being covered under the preventive services option (§ 440.130(c)). Including are such services as immunizations, medical check-ups, fluoride treatment of teeth, well-baby and well-child care, vision screening, and genetic screening. States may include other types of personal preventive services under this option that are medical or remedial in nature and which are delivered on a personally-oriented basis. In developing an approach to preventive care, each State should consult with local health authorities to identify the most effective set of preventive services for its Medicaid population. We encourage States to share with us their experiences in offering various types of preventive services and informing Medicaid-eligible individuals of their availability.

D. State Preventive Initiatives

States that are interested in initiating or expanding a Medicaid preventive care effort can take a two-fold approach: A) Medicaid funding of the medically-oriented personal preventive services for which Federal financial participation (FFP) is available under title XIX; and B) increased coordination between Medicaid and other programs that fund or provide preventive care, including referral to social and environmental programs and services.

1. *HCFA Criteria for Evaluating Medicaid Preventive Services Proposed by States.* As discussed in section A above, there currently is no single set of preventive services or schedule for their delivery that is uniformly acknowledged to be the most effective. In light of this, and in keeping with the nature of the Federal-State partnership in

administering the Medicaid program, we believe that States which wish to cover preventive services should have the flexibility to design their own packages of preventive care. States should be aware of certain general criteria which HCFA plans to use in reviewing plan amendments for preventive services coverage:

- The proposed services must be preventive in nature and must fit within the basic medical-remedial framework of the Medicaid program (see section A).
- The proposed services must be directed at the patient rather than at the patient's environment.
- The proposed services must not be otherwise available to recipients without cost, nor may they duplicate other Federally-funded services.
- The proposed services must not entail an additional payment for a service which is logically an inherent part of otherwise paid-for services (see section C).

Although the Medicaid statute does not preclude States from funding experimental types of care if they so choose, we encourage States to consider, in addition, the following guidelines when they develop proposals for coverage of preventive services:

- Services to detect disease in its early state should be those proven to be safe and reliable and should be directed at diseases for which an effective intervention exists.
- Services proposed to prevent occurrence of disease or disability (including those to modify predisposing risk factors) should have a demonstrated efficacy in preventing disease or disability.

We welcome any public comments regarding our criteria for evaluating Medicaid State plan amendments that contain preventive care proposals.

2. *Coordination With Other Programs.* Although the range of currently available preventive services (described in sections B and C above) is quite broad, these services sometimes are fragmented among a number of agencies and programs. In the absence of interaction between these agencies and programs, there may be little or no overall coordination in the provision of preventive care. As a result, a Medicaid-eligible individual may not know that many of these preventive services are available, or how to obtain them. We believe that the benefits an individual derives from the preventive services that are covered under Medicaid can be significantly enhanced when these services are provided in coordination with the preventive care available under other programs. In an effort to maximize scarce Medicaid dollars available for preventive services, many States have sought the cooperation and active participation of other public as well as voluntary health agencies, such as State, county, and local health agencies, Head Start, Public Health Service community health centers, neighborhood health centers, and others. All States considering the inclusion of preventive services in their plans are encouraged to follow this example. Such coordination and joint planning avoids costly duplication and overlapping of services. Coordination can be achieved through interagency agreements, informal cooperative arrangements and increased referrals between the Medicaid agency and other programs that offer preventive care.

Medicaid regulations (42 CFR Part 431, Subpart M) and the Medical Assistance Manual (section 5-40-000) contain requirements and options for interagency agreements. These include the following:

- The Medicaid agency is required to have an interagency agreement with the State health agency and the State vocational rehabilitation agency, as well as the title V program. The agreements are designed to make maximum use of the services of these agencies. (Specific characteristics of agreements between the EPSDT program and title V are described in section 5-70-71 of the Medical Assistance Manual.)
- The Medicaid agency, in addition, may execute interagency agreements with other health and social service agencies and organizations, involving services that utilize Federal, as well as State or local funds. For children, youth and pregnant women, these programs could include Head Start, title XX (Social Services Block Grant), certain education programs, and the Special Supplemental Food Program for Women, Infants and Children (WIC).
- Examples of services furnished by other programs and reimbursed by Medicaid through interagency agreements include examinations, immunizations and treatment services, and such activities as informing recipients about available health services, assisting recipients with transportation to health services and health care case management (ensuring continuity of care).

The Medicaid agency can perform a valuable referral function for Medicaid-eligible individuals and can help to supplement the preventive services available to them under the State plan, by directing them to appropriate preventive care available from other sources. In certain situations, the State agency can also help to utilize available Federal funds most effectively by coordinating Medicaid-funded preventive services activities with those of other programs offering related services. (Information on funding arrangements is contained in section 5-40-000 (H) and (I) of the Medical Assistance Manual.)

The use of preventive services holds promise for the Medicaid population, both in terms of improvements in individual health and reductions in the cost of treating illness and injury. We encourage States to review their current programs and determine the desirability of making a wider range of preventive services available and accessible to Medicaid-eligible individuals.

(Catalog of Federal Domestic Assistance Program No. 13.714, Medicaid Assistance Program)

Dated: March 21, 1984.

Carolyne K. Davis,

Administrator, Health Care Financing Administration.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. D-84-732; FR-1903]

Delegation of Authority With Respect to Programs Transfered to the Revolving Fund (Liquidation Programs)

Correction

In FR Doc. 84-6660 beginning on page 9476 in the issue of Tuesday, March 13, 1984, make the following correction.

On page 9477, first column, the **EFFECTIVE DATE** now reading "March 1984" should read "March 13, 1984".

BILLING CODE 1505-01-M

DEPARTMENT OF THE INTERIOR

Information Collection Submitted for Review

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed information collection requirement and related forms and explanatory material may be obtained by contacting the Bureau Clearance Officer and the Office of Management and Budget Interior Department Desk

Officer, Washington, D.C. 20503, telephone (202) 395–7313.

Title: *Nondiscrimination on the Basis of Handicap in Federally-Assisted Programs of the Department of the Interior, 43 CFR Part 17 Subpart B.*

Abstract: Section 504 of the Rehabilitation Act requires that all recipients perform a self-evaluation of their programs in order to achieve compliance with the Act. Recipients employing fifteen or more employees must maintain records of persons consulted and a description of areas examined, problems identified, and corrective actions taken.

Bureau Form Number: 1084–0009.

Frequency: One-time requirement.

Description of Respondents: State and local governments receiving Federal financial assistance from the Department of the Interior.

Annual Responses: 12,500.

Annual Burden Hours: 6,250.

Bureau Clearance Officer: Alfred R. Gordon, (202) 343–4331.

Dated: March 21, 1984.

Edward E. Shelton,

Director, Office for Equal Opportunity.

BILLING CODE 4310–32–M

Bureau of Land Management

[M–58031(SD), M–58034(SD)]

Reality Action; South Dakota; Competitive Reoffering of Two Parcels of Public Land in Lyman County

AGENCY: Bureau of Land Management, Miles City District, South Dakota Resource Area Office, Interior.

ACTION: Amended notice of reality action M–58031(SD) and M–58034(SD); competitive reoffering of two parcels of public land in Lyman County, South Dakota.

SUMMARY: The following described lands have been examined and identified as suitable for disposal by sale pursuant to Section 203 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1713 (1976) at no less than fair market value:.

5th Principal Meridian

M–58031(SD), Appraised Value $2,500

T. 103 N., R. 75 W.,
Section 22: Lot 4
Containing 28.70 acres.

M–58034(SD), Appraised Value $500

T. 103 N., R. 78 W.,
Section 29: Lot 1
Containing 2.60 acres.

These lands are being rescheduled for sale due to protests received on the original sale held on December 21, 1983.

These lands will be offered for sale by *Sealed Bid Only* utilizing competitive bidding procedures on May 2, 1984, at 1:30 p.m., MST, at Montana State Office, Bureau of Land Management, 222 North 32nd Street, P.O. Box 36800, Billings, Montana 59107.

M–58031(SD) Township 103 North, Range 75 West, Section 22, Lot 4. This parcel is located approximately 13 miles southeast of Kennebec, South Dakota, in Lyman County. These lands are along the White River with some being rolling grasslands (White River Breaks) with shale slide banks near the river.

M–58034(SD) Township 103 North, Range 78 West, Section 29, Lot 1. This parcel is located approximately 16 miles southwest of Presho, South Dakota, in Lyman County. The parcel is along the White River with cottonwoods, ash trees and shrub undergrowth.

The above parcels have section line access and are being offered for sale because they are isolated from other blocks of public land and are difficult and uneconomical to manage. The proposed sale is consistent with the Bureau's planning system and Lyman County government officials have been notified of the sale. The transfer of the tracts into private ownership will benefit the public interest and provide for better land management.

Terms and Conditions

The terms and conditions applicable to this sale are as follows:

1. All minerals will be reserved to the United States together with the right to explore, prospect for, mine, and remove same under applicable law and regulations.
2. A right-of-way for ditches or canals will be reserved to the United States on M–58034(SD) in accordance with 43 U.S.C. 945.
3. The sale of these lands will be subject to all valid existing rights and reservations of record.
4. Access for these parcels must be in compliance with County and State regulations.
5. Any actions on these parcels must be in compliance with County and State floodplain ordinances and regulations.

FOR FURTHER INFORMATION CONTACT: Information related to the sale, including environmental assessment, and the record of public discussions is available for review at the South Dakota Resource Area Office, Belle Fourche, South Dakota.

SUPPLEMENTARY INFORMATION:

Bidder Qualifications: The bidder must be a U.S. citizen or, in the case of a corporation, subject to the laws of any state of the U.S. A state, state instrumentality or political subdivision submitting a bid must be authorized to hold property. Any other entity submitting a bid must be legally capable of holding and conveying lands or interests therein under the laws of the State of South Dakota. Bids must be made by the principal or his agent.

Bid Standards: No bid will be accepted for less than the appraised value of $2,500 on M–58031(SD) or $500 on M–58034(SD). Bids must be individually submitted for each parcel in this notice.

Method of Bidding: The land will be sold by *Sealed Bid Only*. Each bid must be accompanied by a certified check, postal money order, bank draft, or cashier's check made payable to the U.S. Department of Interior, Bureau of Land Management, for not less than one-fifth (20%) of the amount bid.

Sealed bids will be received at the Montana State Office, Bureau of Land Management, P.O. Box 36800, Billings, Montana 59107, until 1:00 p.m. MST, May 2, 1984. Sealed bids will be opened in the Montana State Office, 222 North 32nd Street, Billings, Montana 59107.

The sealed bid envelope must be marked in the lower left-hand corner, as follows: Public Land Sale: M–58031(SD); or M–58034(SD) (whichever applies to bid). Date: May 2, 1984.

If two or more valid bids of the same amount are received, the determination of which is to be considered the highest bid shall be by drawing. The drawing, if required, shall be held immediately following the opening of the sealed bids. The highest qualifying sealed bid shall then be publicly declared.

Sale Continuation: In the event these parcels are not sold at the initial sale offering, the parcels will then be available for sale over the counter on a first come, first served basis, at the Montana State Office, Bureau of Land Management, 222 North 32nd Street, Billings, Montana 59107.

Final Details: Once a high bid price is accepted, the successful bidder shall submit the remainder of the full bid price within the time period designated by the authorized officer. Failure to submit the required amount within the allotted time will result in cancellation of the sale and the deposit will be forfeited. All bids will be either returned, accepted or rejected within 60 days of the sale date.

Dated: March 20, 1984.

Ray Brubeker,

District Manager.

BILLING CODE 4310-ON-M

[C-36674 (D-I)]

Colorado: Notice of Realty Action: Sale of Public Land in Delta County

AGENCY: Bureau of Land Management, Interior.

ACTION: Announcing sale of public land in Delta County, Colorado.

SUMMARY: The following described land has been examined and identified as suitable for disposal by sale under Section 203 of the Federal Land Policy and Management Act (FLPMA) of 1976 (90 Stat. 2750; 45 U.S.C. 1713), at no less than the appraised fair market value. Further, except for oil, gas and coal these lands have been determined to have no mineral values. Therefore, the successful high bidder must apply for all the minerals except oil, gas and coal.

Parcel	Legal description	Acreage	Appraised value
C-36674	Delta, County, 6th Principal Meridian, Colorado.		
D	T. 15 S., R. 95 W., Sec. 13, SW¼SE¼.	40.00	$8,000
E	T. 15 S., R. 94 W., Sec. 19, NE¼SE¼.	40.00	8,000
F	T. 15 S., R. 94 W., Sec. 29, W½NE¼.	80.00	16,000
G	T. 15 S., R. 94 W., Sec. 32, W½NW¼.	80.00	20,000
H	T. 15 S., R. 94 W., Sec. 28, NW¼SW¼.	40.00	8,000
I	T. 15 S., R. 94 W., Sec. 32 SW¼SE¼.	40.00	8,000

Bidding: The Federal Land Policy and Management Act requires that bidders must be citizens of the United States, 18 years of age or over, or in the case of a corporation, be subject to the laws of any state of the United States. Bids may be made by a principal (the one desiring to purchase the land) or his duly qualified agent. Each bid must be for all the land in a specified parcel.

Sealed bids must be in a separate sealed envelope with the lower left-hand corner marked (Sealed Bid, Public Land Sale C-36674, Parcel No. ———— (D, E, F, G, H or I), Sale to be May 30, 1984". The sealed bid must be accompanied by a certified check, postal money order, bank draft or cashier's check made payable to the "Dept. of the Interior—BLM" for no less than one-fifth (20%) of the bid. Bids must be received by the Montrose District Office, Bureau of Land Management, 2465 South Townsend Ave., Montrose, CO, 81401 before 10:00 a.m. on May 30, 1984. Sealed bids will be opened at 10:00 a.m. on May 30, 1984.

If two or more envelopes are received containing valid bids of the same amount for the same parcel, the successful bid shall be determined by allowing those bidders to resubmit a new bid. The successful high bidder will be required to submit the remainder of the bid offer by certified check, cash, bank draft, money order, or any combination of these within 30 days after the determination of the highest bid.

In addition the high bidder will be required to apply for all the minerals—except the oil, gas and coal—beneath the parcel bid upon and submit a $50.00 non-refundable filing fee with the application. Failure to deposit 20% of the bid price or to file an application for the minerals will result in the disqualification of the high bidder.

If final payment is not received within the specified 30 days, the high bid will be rejected, the deposit will be forfeited, and the land will be offered to the second highest bidder, subject to the same terms and conditions. All unsuccessful sealed bids will be returned within 30 days of the sale.

If valid bids are not received for any of the parcels by May 30, 1984, the unsold parcels will be offered over the counter on a continuing basis beginning on May 31, 1984 at 7:45 a.m. at the Montrose District Office until the parcels are sold or withdrawn.

Patents will contain the following reservations to the United States:

1. Rights-of-way for ditches and canals constructed by the authority of the United States (26 Stat. 391; 43 U.S.C. 945).

2. Oil, gas, and coal, with the right to explore, prospect for, mine, and remove under applicable law, and such regulations as the Secretary of the Interior may prescribe (43 U.S.C. 1719).

Further, patents will be subject to:

1. All valid existing rights,

2. Oil and gas leases involving all parcels.

The BLM may accept or reject any and all offers, or withdraw any land or interest in land from sale if, in the opinion of the authorized officer, consummation of the sale would not be fully consistent with FLPMA or other applicable laws.

Comments: Detailed information regarding this sale, including the planning documents and Environmental Assessment, is available for review in the Montrose District Office. For a period of 45 days from the date of this Notice, interested parties may submit comments to the District Manager, Montrose District Office. Any adverse comments will be evaluated by the District Manager who may vacate or modify this Realty Action, and issue a final determination. If the absence of any action by the District Manager, this Realty Action will be the final determination of the Department of the Interior.

Paul W. Arrasmith,

Montrose District Manager.

[M-60210]

Realty Action—Exchange; Montana

AGENCY: Bureau of Land Management, Lewistown District Office, Interior.

ACTION: Notice of Realty Action M-60210–Exchange of public and private lands, in Phillips County, Montana.

SUMMARY: The following described lands have been determined to be suitable for disposal by exchange under Section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Principal Meridian Montana

T.29 N., R. 27 E.,
Sec. 17, NE¼NW¼.
T.29 N., R. 28 E.,
Sec. 5, lots 1 and 2, S½NE¼;
Sec. 19, W½NE¼, NE¼SW¼, and NW¼SE¼.
T.35 N., R. 29 E.,
Sec. 26, SE¼NW¼.
T.28 N., R. 31 E.,
Sec. 32, E½, N½SW¼, and SE¼SW¼ (excluding a one acre tract in NW¼SW¼;
Sec. 33, W½SW¼.
T. 31 N., R. 31 E.,
Sec. 19, lot 3, S½NE¼, NE¼SE¼ and SE¼.
T. 36 N., R. 32 E.,
Sec. 27, SE¼NE¼;
Sec. 34, NW¼NE¼.
T. 34 N., R. 33 E.,
Sec. 31, SE¼.

The area described, aggregates 1,480.24 acres.

In exchange for these lands, the United States Government will acquire the surface estate in the following described land:

Principal Meridian Montana

T. 31 N., R. 31 E.,
Sec. 13, SW¼SE¼;
Sec. 14, W½NE¼ and SE¼NW¼;
Sec. 22, N½N½.
T. 36 N., R. 31 E.,
Sec. 3, lot 1 and SE¼;
Sec. 10, E½NE¼ and NE¼SE¼.
T. 28 N., R. 32 E.,
Sec. 32, N½.
T. 33 N., R. 32 E.,
Sec. 2, E½SW¼.

T. 29 N., R. 34 E.,
Sec. 27, NW¼NW¼, S½N½, NE¼SW¼ and N½SE¼.
T. 35 N., R. 34 E.,
Sec. 2, lots 1 to 3, inclusive.
T. 36 N., R. 34 E.
Sec. 35, NW¼SE¼, NE¼SW¼, SE¼SW¼ and S½SE¼.
The area described aggregates 1,704.54

DATES: For a period of 45 days from the date of this notice, interested parties may submit comments to the Bueau of Land Management, at the address below. Any adverse comments will be evaluated by the State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of the Department of Interior.

FOR FURTHER INFORMATION CONTACT: Information related to this exchange, including the environmental assessment and land report is available for review at the Lewistown District Office, Airport Road, Lewistown, Montana 59457.

SUPPLEMENTARY INFORMATION: The publication of this notice segregates the public lands described above from settlement, sale, location and entry under the public land laws, including the mining laws but not from exchange pursuant to Section 206 of the Federal Land Policy and Management Act of 1976.

The exchange will be subject to:

1. A reservation to the United States of a right-of-way for ditches or canals constructed by the authority of the United States in accordance with 43 U.S.C. 945.

2. The reservation to the United States of all minerals on one parcel of land and oil and gas in the balance of lands being transferred out of Federal ownership.

3. All valid existing rights (e.g. rights-of-way, easements, and leases of record).

4. Value equalization by cash payment or acreage adjustments.

5. The exchange must meet the requirements of 43 CFR 4110.4–2(b).

This exchange is consistent with Bureau of Land Management policies and planning and has been discussed with state and local officials. The public interest will be served by completion of this exchange.

Dated: March 18, 1984.

David E. Little,

Acting District Manager.

BILLING CODE 4310-DN-M

Amendment of a Notice of Intent To Prepare Management Framework Plan Amendments, New Mexico, Interior.

AGENCY: Bureau of Land Management (BLM), New Mexico, Interior.

ACTION: Amendment of a Notice of Intent to prepare wilderness plan amendments and a statewide environmental impact statement published in the **Federal Register** January 28, 1982, pages 4154–4155.

SUMMARY: The Interior Board of Land Appeals (IBLA) remanded to the BLM some decisions regarding designation of Wilderness Study Areas (WSA's) in New Mexico.

Portions of the Florida and Cedar Mountains were re-evaluated to determine if they met the minimum requirements to become a WSA. Within the Las Uvas Mountains, the portion of the Rustler Fire Trail past Chivatos Tank was re-evaluated to determine if the trail met the definition of a road.

An area of 22,336 acres in the Florida Mountains met the minimum requirements and is designated as a WSA.

An area of 13,126 acres in the Cedar Mountains did not meet the minimum requirements and is released from further wilderness review. The Rustler Fire Trail met the definition of a road and is cherry-stemmed into the Las Uvas Mountains WSA.

FOR FURTHER INFORMATION CONTACT: Joseph Sovcik, Environmental Coordinator, Bureau of Land Management, P.O. Box 1449, Santa Fe, New Mexico 87501. Telephone: (505) 988–6565; FTS 476–6565.

SUPPLEMENTARY INFORMATION: As a result of this decision, the table in the Notice of Intent in the **Federal Register**, Vol. 47, no. 19, on page 4154, published January 28, 1982, is amended as follows:

Florida Mountains—New WSA acreage—22,336

Leroy C. Montoya,

Acting State Director.

BILLING CODE 4310-FB-M

Availability of Draft Steens Mountain Recreation Management Plan and Notice of Public Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Draft Steens Mountain Recreation Management Plan availability and notice of public meeting.

SUMMARY: This notice sets forth the public comment period of the Steens Mountain Recreation Plan draft and the schedule for the public meeting.

DATES: April 23, 1984—Draft document available; May 10, 1984—Public Meeting at Harney County Courthouse from 7:00 P.M. to 9:00 P.M. in Burns, Oregon; May 25, 1984—30-day public comment period ends.

FOR FURTHER INFORMATION CONTACT: Joshua L. Warburton, District Manager, Burns District, Bureau of Land Management, 74 South Alvord, Burns, Oregon 97720, Telephone (503) 573–5241.

SUPPLEMENTARY INFORMATION: The Draft Steens Mountain Recreation Management Plan will be available for public review and comment after April 23, 1984. Copies of the draft document can be obtained by contacting the following BLM offices: Burns District Office, 74 South Alvord, Burns, OR 97720; Oregon State Office (912), 825 NE. Multnomah, Portland, OR 97208.

During the public comment period, a meeting open to the public will be held at the Harney County Courthouse in Burns, Oregon, on Thursday, May 10th from 7:00 P.M. to 9:00 P.M.

All public comments on the Draft Steens Mountain Recreation Management Plan will be accepted at the Burns District Office from April 23rd to May 25th, 1984.

Dated: March 16, 1984.

Joshua L. Warburton,

District Manager.

Montrose District Grazing Advisory Board; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Montrose District Grazing Advisory Board meeting notice.

SUMMARY: Notice is hereby given in accordance with Public Law 92–463 that the Montrose District Grazing Advisory Board will meet on April 23, 1984. The Board will convene at 10:00 a.m. in the conference room of the United States Forest Service Building, 216 North Colorado Avenue, Gunnison, Colorado. The business meeting will include the following topics:

1. Election of Officers;
2. Discussion of the Taylor Grazing Act 50th Anniversary;
3. Discussion on the CCA/CWGA Steering Committee Tour;
4. Review applicants nominated for Cooperative Management Agreements;
5. Briefing on the DOW Wildlife Feeding Program;

6. Update on the San Juan/San Miguel RMP/EIS effort;

7. Follow-up discussion on the 1983 Summer Range/Wildlife Tour;

8. Advisory Board expenditures for Range Improvement Work;

9. Arrangements for the next meeting.

The meeting is open to the public. Anyone wishing to make an oral statement, must notify the District Manager, BLM, 2465 South Townsend, Montrose, Colorado 81401 by April 18, 1984. Depending on the number of persons requesting time, a per person time limit may be established by the District Manager.

Summary minutes of the board meeting will be maintained in the District Office and be available for public inspection and reproductions (during regular business hours) within 30 days following the meeting.

Paul W. Arrasmith,

District Manager.

Phoenix District Advisory Council; Meeting

The Phoenix District Advisory Council meets April 24 and 25 in Tucson, Arizona. The first day will be devoted to a field trip. The Council will depart the Phoenix District office, 2015 W. Deer Valley Road, Phoenix at 8:15 a.m. Members of the public may accompany the Council, but must provide their own transportation, meals, and lodging. A formal meeting will be held on the second day at the Tucson Hilton Inn, 1601 N. Miracle Mile, from 8:30 a.m. until noon.

The Council has been established by, and will be managed according to, the Federal Advisory Committee Act of 1972, the Federal Land Policy and Management Act of 1976, and the Public Rangelands Improvement Act of 1978.

The agenda for the meeting includes:

Inspection of erosion control and grass seeding programs on public rangelands.

Inspection of mining operations, springs and other naturally-occuring water sources on public lands.

Discussion of Cooperative Management Agreement Policy.

BLM management updates.

Business from the floor.

Public comment and statements.

Future meetings and agenda topics.

The meeting is open to the public. Interested persons may make oral statements for the Council's consideration. Anyone wishing to make an oral statement must notify the District Manager at the Bureau of Land Management, 2015 W. Deer Valley Road, Phoenix, Arizona, 80527 (telephone 602 863-4464) by April 19, 1984. Depending on the number of persons wishing to make an oral statement, a per-person time limit may be set.

Dated: March 18, 1984.

Deane H. Zeller,

Acting District Manager.

BILLING CODE 4310-33-M

[W-81862, W-81931]

Proposed Reinstatement of Terminated Oil and Gas Leases

Pursuant to the provisions of Pub. L. 31-245 and Title 43 Code of Federal Regulations, § 3108.2-1(c), and Pub. L. 97-451, petitions for reinstatement of oil and gas lease W-81862 for lands in Converse County, Wyoming and oil and gas lease W-81931 for lands in Sheridan County, Wyoming, were timely filed and were accompanied by all the required rentals accruing from their respective dates of termination. The lessees have agreed to new lease terms for rentals and royalties at rates of $5.00 per acre, and 16-⅔ percent, respectively. The lessees have paid the required $500.00 administrative fee and will reimburse the Department for the cost of this Federal Register notice. The lessees having met all the requirements for reinstatement of the leases as set out in Section 31 (d) and (e) of the Minerals Lands Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate lease W-81862 effective November 1, 1983, and lease W-81931 effective January 1, 1984, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Harold G. Stinchomb,

Chief, Branch of Fluid Minerals.

BILLING CODE 4310-32-M

Minerals Management Service

Development Operations Coordination Document; Notice of Receipt

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the Receipt of a Proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Corpus Christi Oil and Gas Company has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 4845, Block 438, Brazos Area, offshore Texas. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Port O'Connor, Texas.

DATE: The subject DOCD was deemed submitted on March 1, 1984.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Manager, Gulf of Mexico Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Mr. Hossein Hekmatdoost, Minerals Management Service, Gulf of Mexico Region; Rules and Production; Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Phone (504) 838-0873.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected states, executives of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: March 19, 1984.

John L. Rankin,

Regional Manager, Gulf of Mexico Region.

BILLING CODE 4310-MR-M

National Park Service

Intention To Issue Concession Permit

Pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that sixty (60) days after the date of publication of this notice, the Department of the Interior, through the Director of the National Park Service, proposes to issue a concession permit with Ye Olde Sun Shack, Inc. authorizing it to continue to provide umbrella/chair rental and surf shop sales facilities and services for the public at Jacob Riis Park, Breezy Point District, Gateway National Recreation Area, for a period of FIVE (5) years from

January 1, 1984, through December 31, 1985.

This permit renewal has been determined to be categorically excluded from the procedural provisions of the National Environmental Policy Act and no environmental document will be prepared.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing permit which expired by limitation of time on December 31, 1983, and therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the permit and in the negotiation of a new permit. This provision in effect, grants Ye Olde Sun Shack, Inc. the opportunity to meet the terms and conditions of any other proposal submitted in response to this Notice which the Secretary may consider better than the proposal submitted by Ye Olde Sun Shack, Inc. If Ye Olde Sun Shack, Inc. amends its proposal and the amended proposal is substantially equal to the better offer, then the proposed new permit will be negotiated with Ye Olde Sun Shack, Inc.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be postmarked or hand delivered on or before the sixtieth (60) day following publication of this notice to be considered and evaluated.

Interested parties should contact the Regional Director, North Atlantic Region, 15 State Street, Boston, Massachusetts 02109, for information as to the requirements of the proposed permit.

Dated: March 16, 1984.

Herbert S. Cables, Jr.,

Regional Director, North Atlantic Region, National Park Service.

[FR Doc. 84-8175 Filed 3-26-84; 8:45 am]

BILLING CODE 4310-70-M

Intention To Negotiate Concession Contract

Pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that sixty (60) days after the date of publication of this notice, the Department of the Interior, through the Director of the National Park Service, proposes to negotiate a concession contract with Yosemite Medical Group, authorizing it to continue to provice medical, emergency surgical and related services; the prescription and sale of drugs, medicines, medical appliances and supplies for the public at Yosemite National Park for a period of approximately ten (10) years from January 1, 1985.

This contract renewal has been determined to be categorically excluded from the procedural provisions of the National Environmental Policy Act, and no environmental document will be prepared.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expires by limitation of time on December 31, 1984, and, therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract. This provision, in effect, grants Yosemite Medical Group the opportunity to meet the terms and conditions of any other proposal submitted in response to this notice which the Secretary may consider better than the proposal submitted by Yosemite Medical Group. If Yosemite Medical Group amends its proposal, and the amended proposal is substantially equal to the better offer, then the proposed new contract will be negotiated with Yosemite Medical Group.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be postmarked or hand-delivered on or before the sixtieth (60th) day following publication of this notice to be considered and evaluated.

Interested parties should contact the Regional Director, Western Regional Office, National Park Service, 450 Golden Gate Avenue, San Francisco, California 94102, for information as to the requirements of the proposed contract.

Dated: March 13, 1984.

John D. Cherry,

Acting Regional Director, Western Region.

BILLING CODE 4310-70-M

Intention To Negotiate Concession Permit

Pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that sixty (60) days after the date of publication of this notice, the Department of the Interior, through the Director of the National Park Service, proposes to negotiate a concession permit with Mr. Robert F. Bevington, Jr., authorizing him to continue to provide service station facilities and services for the public at El Portal Administrative Site adjacent to Yosemite National Park for a period of five (5) years from January 1, 1985, through December 31, 1989.

This permit renewal has been determined to be categorically excluded from the procedural provisions of the National Environmental Policy Act, and no environmental document will be prepared.

The foregoing concessioner has performed his obligations to the satisfaction of the Secretary under an existing permit which expires by limitation of time on December 31, 1984, and, therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the permit and in the negotiation of a new permit. This provision, in effect, grants Mr. Robert F. Bevington, Jr. the opportunity to meet the terms and conditions of any other proposal submitted in response to this notice which the Secretary may consider better than the proposal submitted by Mr. Robert F. Bevington, Jr. If Mr. Robert F. Bevington, Jr. amends his proposal, and the amended proposal is substantially equal to the better offer, then the proposed new permit will be negotiated with Mr. Robert F. Bevington, Jr.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be postmarked or hand-delivered on or before the sixtieth (60th) day following publication of this notice to be considered and evaluated.

Interested parties should contact the Superintendent, Yosemite National Park, for information as to the requirements of the proposed permit.

Dated: March 12, 1984.

John D. Cherry,

Acting Regional Director, Western Region.

Agency for International Development

President's Task Force on International Private Enterprise; meeting

Pursuant to the Federal Advisory Committee Act, notice is hereby given of a meeting sponsored by the President's Task Force on International Private Enterprise which will be held on April 9–10, 1984 at the U.S. State Department, Washington, D.C.

This will be the seventh meeting of the Task Force.

The meeting will be closed on Monday, April 9, 1984 from 9:00 AM to 12:00 PM under the authority of section 10(d) of the Federal Advisory Committee Act under the exemption of Section 552b(c)(1) of Title 5, United States Code. The Task Force will hear and discuss classified matters concerning international economic policy and China. The remainder of the meeting will be open to the public. The Task Force will review and discuss findings and proposed recommendations.

There will be an AID representative at the meeting. It is suggested that those in need of further information contact Birge Watkins, Assistant Director, on (202) 944–3350 or by mail c/o The President's Task Force on International Private Enterprise, Agency for International Development, Washington, D.C. 20523.

Dated: March 15, 1984.

BILLING CODE 8116-01-M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 30142 (Sub-1)]

Railcarriers; Southern Railway Company and Virginia and Southwestern Railway Co.; Exemption; Extension of Lease

March 19, 1984.

Southern Railway Company (SRC) leases and operates the properties of its wholly-owned subsidiary the Virginia and Southwestern Railway Company (VSW), consisting of approximately 100 miles of railroad line in Tennessee and Virginia, by virtue of a 1958 lease, and a one-year extension previously granted by the Commission. The extension expired by its terms on March 14, 1984.[1] The two railroads are considering a merger, and have agreed to another one-year extension of the lease (until March 14, 1985). On March 7, 1984, SRC and VSW filed a notice of exemption, under 49 CFR 1180.2(d)(3) for the one-year extension.

This is a transaction wholly within a corporate family which is exempt as a class because it does not result in adverse changes in service levels, significant operational changes, or a change in the competitive balance with carriers outside the corporate family.

[1] A one-year extension was granted in Finance Docket No. 30142, *Southern Railway Company and Virginia and Southwestern Railway Company—Exemption—Extension of Lease* (not printed), served March 21, 1983.

As a condition to the use of this exemption, any rail employees affected by this transaction shall continue to be protected pursuant to *Mendocino Coast Ry., Inc.-Lease and Operate*, 354 I.C.C. 732 (1978) and 360 I.C.C. 653 (1980).

By the Commission.

James H. Bayne,

Acting Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Office of the Attorney General

Notice of Lodging of Final Judgment on Consent Pursuant to Clean Water Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on March 12, 1984 a proposed Consent Decree in *United States* v. *Northland Gold Dredging, Ltd.*, Civil Action No. CV 83–350 was lodged with the United States District Court for the District of Alaska. The proposed Consent Decree concerns defendant's violations of the Clean Water Act by discharge of pollutants from its gold placer mining operation into the Tuluksak River near Nyac, Alaska, without a National Pollutant Discharge Elimination System ("NPDES") permit. The Consent Decree assesses civil penalties in the amount of $25,000. In addition, the Consent Decree imposes injunctive relief requiring, *inter alia*, that defendant comply with effluent limitations for discharge of settleable solids, turbidity, and other pollutants. The injunctive provisions are enforced by stipulated civil penalties.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *Northland Gold Dredging, Ltd.* Ref. 90–5–1–1–1995.

The proposed Consent Decree may be examined at the office of the United States Attorney, District of Alaska, United States Courthouse, 701 C Street, Anchorage, Alaska 99513 and at the Region X Office of the Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington, 98101. Copies of the Consent Decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, N.W., Washington, D.C. 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $1.30 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

F. Henry Habicht II,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Antitrust Division

Competitive Impact Statements and Proposed Consent Judgments; United States v. South Water Market Credit Association

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. Section 16 (b) through (h), that a proposed Final Judgment, Stipulation, and Competitive Impact Statement have been filed with the United States District Court for the Northern District of Illinois in *United States* v. *South Water Market Credit Association*, Civil Action No. 84 C 1896. The defendant in the case is South Water Market Credit Association. The Complaint in this case alleges that the Association and co-conspirators agreed to fix credit terms employed in the sale of produce, in violation of Section 1 of the Sherman Act, 15 U.S.C. 1.

The proposed judgment enjoins the Association for a period of ten years from participating in: (1) Any agreement concerning the amount, duration, or any other term of credit extended to any customer, and (2) any agreement to withhold credit from any person. The proposed judgment also enjoins the Association from using any form or form letter that contains any reference to bills being due within a specified period or on any day of the week. The proposed judgment preserves the right of the Association to circulate credit information to its members.

The proposed judgment requires that notices detailing the rights and obligations of members be sent to members of the Association, and requires the Association to provide a copy of the proposed judgment to anyone who requests one and pays a reasonable copying fee. It further requires the Association for three years to report to the United States actions taken to ensure compliance with the proposed judgment, to provide the

United States with a copy of any new rule or bylaw promulgated by the Association, and to provide the Department of Justice access, upon reasonable notice, to the Association's records and personnel to determine its compliance with the judgment.

Public comment is invited within the statutory 60-day comment period. Such comments, and responses thereto, will be published in the **Federal Register** and filed with the Court. Comments should be directed to Alan L. Marx, Chief, General Litigation Section, Antitrust Division, Department of Justice, Washington, D.C. 20530 (telephone 202–724–6327).

Joseph H. Widmar,

Director of Operations, Antitrust Division.

U.S. District Court, Northern District of Illinois

United States of Amercia, Plaintiff, v. *South Water market Credit Association,* Defendant.

Civil Action No.

Filed: March 1, 1984.

Stipulation

It is stipulated by and between the undersigned parties, by their respective attorneys, that:

1. The parties consent that the Court may file and enter a Final Judgment in the form attached to this Stipulation, on the Court's own motion or on the motion of any party at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16 (b)–(h), and without further notice to any party or other proceedings, if plaintiff has not withdrawn its consent, which it may do at any time before the entry of the judgment by serving notices of its withdrawal on defendant and filing that notice with the Court.

2. In the event Plaintiff withdraws its consent of if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatever and the making of this Stipulation shall be without prejudice to any party in this or any other preceeding.

Dated:

For the plaintiff: J. Paul McGrath, *Assistant Attorney General, Antitrust Division.* Joseph H. Widmar. Alanl L. Marx, Kenneth L. Jost, Angela L. Hughes, *Attorneys for the United States, United Staters Department of Justice, Antitrust Division, Washington, D.C. 20530.*

For the defendant: Le Roy W. Gudgeon, 540 W. Frontage Road, Northfield, Illinois 60093, *Attorney for the South Water Market Credit Association.*

U.S. District Court, Northern District of Illinois

United States of America, Plaintiff, v. *South Water Market Credit Association,* Defendant.

Civil Action No.

Filed: March 1, 1984.

Final Judgment

Plaintiff, United States of America, having filed its Complaint herein on March 1, 1984, and defendant, by its attorney, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law herein and without this Final Judgment constituting any evidence against or an admission by any party with respect to any such issue;

Now, therefore, before the taking of any testimony and without trial or adjudication of any issue of fact or law herein and upon consent of the parties hereto, it is hereby,

Ordered, adjudged, and decreed as follows:

I

This Court has furisdiction of the subject matter of this action and of each of the parties consenting hereto. The Complaint states a claim upon which relief may be granted under Section 1 of the Sherman Act, 15 U.S.C 1.

II

As used in this Final Judgment:

A. "Person" means any individual, partnership, firm, corporation, association, or other business or legal entity;

B. "Produce" means fresh fruits and vegetables;

C. "Member" means any member of the defendant pursuant to the terms specified in its bylaws; and

D. "The date of entry" means the date on which this Final Judgment is entered by this Court. Acts required to be done "on" an anniversary of the date of entry must be done on or before that date.

III

This Final Judgment applies to the defendant and to its officers, directors, managers, agents, employees, subsidiaries, succesors, and assignes, and to all other persons in active concert or participation with any of them who shall have received actual notice of this Final Judgment by personal service or otherwise.

IV

The defendant is enjoined and restrained from directly or indirectly entering into, adhering to, enforcing, or maintaining any contract, understanding, rule, bylaw, regulation, plan, or program with or affecting any member, or urging any member to engage in any practice, which:

(a) fixes, maintains, or establishes the length of time which that member grants or allows customers before payment for produce sold becomes due;

(b) prevents or interferes with the granting of credit to any person by member; or

(c) fixes, maintains, or establishes the amount or any term or condition of credit which any member grants or offers to any person in connection with the sale of produce.

V

The defendant is enjoined from using any stationery, form, of form letter which (a) refers to bills being due on Thursday or any other specified day of the week following purchase, or within any other specified time after purchase, except as provided in the notice that this Final Judgment requires the defendant to provide to its members, or (b) states that customers who do not pay their bills on time will be denied credit by members.

VI

A. Nothing contained in this Final Judgment shall prevent the defendant form circulating to members (1) information concerning the payment history of any person, or (2) the fact that information concerning the credit worthiness of any person is unavailable.

B. Nothing contained in this Final Judgment shall prevent the defendant form (1) conducting credit investigations on behalf of members for the purpose of obtaining credit information for circulation to members, or (2) conducting its business in any oher reasonable, lawful, commercial fashion.

VII

The defendant is hereby ordered:

A. To inform members by providing them with a notice in the form of Exhibit A attached hereto, within thirty (30) days of the date of entry, again six months after the date of entry, and on the anniversary of the date of entry for three (3) years: (a) of the substance of the terms of the Final Judgment: (b) that each of them must individually establish terms and conditions of sale; and (c) that each of them is free to extend credit to any person or firm whatsoever;

B. Within thirty (30) days from the date of entry, and on the first anniversary of the date of entry for three (3) years, to notify each of its officers, managers, and employees who have contact with members or their customers, of the obligations imposed on each of them by this Final Judgment;

C. To have copies of this Final Judgment, including Exhibit A, available for public inspection in its offices, and to provide a copy to any person who requests one for a reasonable copying fee; and

D. Within sixty (60) days from the date of entry, and on the anniversary of the date of entry for a period of three (3) years, to inform plaintiff of actions taken to ensure compliance with this Final Judgment, and to provide plaintiff a copy of any rule or bylaw enacted by the defendant within the preceding year.

VIII

For the purpose of determining or securing compliance with this Final Judgment, and subject to any legally recognized privilege, from time to time:

A. Duly authorized representatives of the Department of Justice shall, upon written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to the defendant made to its principal office, be permitted:

(1) Access during office hours of defendant to inspect and copy all books, ledgers, accounts, correspondence, memoranda, and other records and documents in the possession or under the control of defendant, who may have counsel present, relating to

any matters contained in this Final Judgment; and

(2) Subject to the reasonable convenience of defendant and without restraint or interference from it, to interview officers, employees, and agents of defendant, who may have counsel present, regarding any such matters.

B. Upon the written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division made to defendant's principal office, defendant shall submit such written reports, under oath if requested, with respect to any of the matters contained in this Final Judgment.

No information or documents obtained by the means provided in this Section VIII shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party, or for the purpose of securing compliance with this Final Judgement, or as otherwise required by law.

C. If at the time information or documents are furnished by defendant to plaintiff, defendant represents and identifies in writing the material in any such information or documents for which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and the defendant marks each pertinent page of such material, "Subject to Claim of Protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then plaintiff shall give ten days notice to the defendant before divulging the material in any legal proceedings (other than a grand jury proceeding) to which the defendant is not a party.

IX

Jurisdiction is retained by this Court for the purpose of enabling any of the parties to apply to this Court at any time for such further orders or directions as may be necessary or appropriate for the construction or carrying out of this Final Judgement, for the modification of any of its provisions, for the enforcement of compliance with it or for the punishment of any violation of it.

X

This Final Judgment shall be in effect for the period of ten years following the date of entry.

XI

Entry of this Final Judgement is in the public interest.

Dated: ————.

United States District Judge

Exhibit A

Notice to Members of the South Water Market Credit Association

The United States Department of Justice, on March 1, 1984, filed a complaint in United States District Court in Chicago alleging that the South Water Market Credit Association (the "Association") had violated the Sherman Antitrust Act by engaging in a combination and agreement to fix and maintain credit terms employed in the sale of produce. The complaint alleged that in pursuit of their agreement, the Association and others, among other things, had:

(a) agreed to fix the length of time for which Association members extend credit to customers;

(b) agreed to withhold credit from customers who did not pay their bills within the terms the Association established; and

(c) agreed to withhold credit from customers who did not establish credit through the Association.

The Association, without making any admission of wrongdoing or violation of any laws, entered a consent decree with the government settling the lawsuit. The degree has now been entered by the Court. It requires that we publish this notice so that you understand the decree. A copy of the entire decree is attached, and copies of the decree will be available at the Association's office. Violations of the decree can be punished as civil or criminal contemp of court. The Association and any person who participated in any such violation could be prosecuted, so it is important that you understand and comply with the decree.

Under the decree, the Association cannot have any agreement like those described above with any member. Accordingly, you are free to establish your own credit terms with your customers. You can extend credit to anyone you like, including accounts who have not furnished a financial statement to the Association and accounts identified as delinquent. Previous Association Credit Rules to the contrary are no longer valid, You can extend credit for any period of time you desire.

The Association will continue to distribute information to you concerning the identity of persons who do not pay their bills on time and provide other credit information regarding your customers. You can use this information as you see fit.

The U.S.D.A. regulations regarding prompt payment continue to be in effect. If you and your customer do not discuss when payment of a credit bill is due, and you have no announced terms, then payment is due in 10 days under current regulations. However, under the regulations, you can establish any other length of credit you desire, and payment within those terms constitutes the prompt payment required by the Perishable Agricultural Commodities Act of 1930 (commonly known as the "PACA").

Finally, in choosing what terms of sale you offer to your customers, you cannot reach any understanding or agreement with any other Association member regarding credit terms. Any such agreement or understanding would violate the Sherman Antitrust Act and could subject you to civil or even criminal prosecution. You may, of course, make any credit terms of sale with your customers as you see fit. You may require that payment of credit purchases be made in any period of time that is agreeable to you and your customer.

U.S. District Court Northern District of Illinois

United States of America, Plaintiff, v. *South Water Market Credit Association*, Defendant.

Civil Action No.

Filed: March 1, 1984.

Competitive Impact Statement

Pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b), the United States files this Competitive Impact Statement, relating to the proposed Final Judgment submitted for entry in this case.

I.

Nature and Purpose of the Proceeding

On March 1, 1984, the United States filed a civil antitrust suit alleging that the South Water Market Credit Association (the "Association") and its predecessor, the Chicago Produce Trade and Credit Association, participated in a conspiracy to fix credit terms in the sale of produce from 1902 until the date of filing of the complaint. The Association is an Illinois corporation doing business in Chicago, Illinois. It is an organization with approximately 25 members, most of which are independent wholesale produce firms doing business in the terminal market on South Water Market Street in Chicago.

The complaint alleges that the Association and co-conspirators agreed to fix credit terms employed in the sale of produce in violation of Section 1 of the Sherman Act (15 U.S.C. 1). The complaint asks the Court to: (1) find that the defendant violated the Sherman Act; (2) enjoin the defendant from continuing or renewing the conspiracy; and (3) require that notices be sent to Association members informing them of entry of the judgment.

On the same day the complaint was filed, the parties filed a proposed Final Judgment, Stipulation, and this Competitive Impact Statement. Under the Stipulation, the proposed Final Judgment may be entered after compliance with the Antitrust Procedures and Penalties Act. Entry of the proposed Final Judgment will terminate the action. The Court will retain jurisdiction to interpret, modify or enforce compliance with the provisions of the proposed Final Judgment.

II

Practices and Events Giving Rise to the Alleged Violation

Association members are independent produce distributors. The Association disseminates credit information and lists of delinquent customers to its members weekly. The Association's predecessor, the Chicago Produce Trade and Credit Association, was formed in 1902. The predecessor organization's statement of purpose included several objects, including the regulation of credits and collection of debts. That goal is still considered to be one of the primary purposes of the Association.

The Association's current rules were adopted in 1941 and include several provisions dealing with members' credit practices. The rules state that (1) with specified exceptions, customers of members must pay their bills by Thursday of the week following the sale; (2) members are to report to the Association customers who do not pay on time; (3) the Association will circulate a list of delinquent accounts to all members; (4) no member can extend credit to a delinquent

account; and (5) new customers are to file a financial statement with the Association, which will investigate the customer before members extend it credit. The form financial statement states that bills are due on a specified day of the week following the sale and that delinquent accounts will not be given credit by members. Essentially the same rules are printed on the form cover sheet for the weekly list of delinquent accounts. Thus each week the members are reminded of the Association's credit restrictions.

In December 1982 the Antitrust Division opened an investigation to determine whether the Association was violating or had violated the Sherman Act. The basis for the investigation was a newsclipping which described the Association and stated that its bylaws fixed the term of credit offered by its members and that it circulated a "blacklist" identifying those who did not pay on time. The investigation revealed, as the complaint alleges, that the defendant and co-conspirators had agreed to fix and maintain credit terms employed in the sale of produce.

III

Explanation of the Proposed Final Judgment

The United States and the defendant have stipulated that the proposed Final Judgment may be entered by the Court at any time after compliance with the Antitrust Procedures and Penalties Act. The proposed Final Judgment does not constitute an admission by any party as to any issue of law or fact. Under the provisions of the Antitrust Procedures and Penalties Act, entry of the proposed Final Judgment is conditioned upon a determination by the Court that the proposed Judgment is in the public interest.

The proposed Final Judgment contains two principal forms of relief. First, the defendant is enjoined from repeating the behavior that constituted the conspiracy. Second, the proposed Judgment places an affirmative obligation on the defendant to provide notice of this action to persons affected by the Association's credit rules.

A. Prohibited Conduct

Section IV of the proposed Judgment enjoins certain agreements with members. Section IV(a) enjoins all agreements on the time for which members extend credit. This was the heart of the alleged violation. Section IV(b) bans agreements to withhold credit from any person. This prohibits the alleged ancillary agreements to withhold credit from delinquent and unapproved accounts. Finally, Section IV(c) enjoins agreements regarding the amount or any other term of credit that members grant. This covers agreements on dollar limits, interest charges, or any other term of credit.

Section V rejoins use of forms and form letters that contain any reference to bills being due within a specified number of days, or on any day of the week. As indicated above, the Association has employed several forms of this nature. This prohibition is meant to bring the impropriety of Association use of such forms to the attention of Association officials and to ensure that such forms will not be used in the future.

Section VI confirms that the proposed Judgment does not interfere with the legitimate functions of the Association. It states that the Association can circulate credit information and that it can conduct its business in any other reasonable, lawful, commercial fashion.

B. Affirmative Obligations of the Defendant

Section VII requires that notice of the Judgment be sent to members. The notice, attached as an exhibit to the proposed Judgment, spells out the rights and obligations of members and the Association so that all know what is allowable behavior.

The notice refers to the Perishable Agricultural Commodities Act of 1930, 7 U.S.C. 499(a)–(s). That Act requires, *inter alia*, that dealers must pay promptly for fresh fruits and vegetables. 7 U.S.C. 499(b)(4). United States Department of Agriculture rules provide that prompt payment within the meaning of the Act is payment within any agreed-upon time period or, in the absence of agreement, payment within ten days. 7 CFR 46.2(aa). The proposed Judgment does not interfere with this scheme.

Section VII B requires that the Association, within 30 days of entry of the Judgment and annually for three years, notify its officers, managers, and certain employees of the obligations imposed on each of them by the proposed Judgment. Section VII C requires the Association to provide a copy of the proposed Judgment to anyone who requests one and pays a reasonable copying fee. Section VII D requires the Association for three years to report to the United States actions taken to ensure compliance with the proposed Judgment and to provide a copy of any new rule or bylaw. Thus, the United States will receive reports which will allow it to police compliance with the notice provisions.

Finally, under Section VIII of the proposed Final Judgment, the Justice Department will have access upon reasonable notice, to the defendant's records and personnel to determine its compliance with the Final Judgment and may require the defendant to submit written reports with respect to any of the matters contained in the Final Judgment.

IV

Competitive Effect of the Proposed Final Judgment

The relief encompassed in the Final Judgment is aimed at preventing any recurrence of the activities described in the complaint, and at educating Association members concerning their right to negotiate terms of sale. Agreements on credit terms interfere with the normal operation of competitive forces in the marketplace and, accordingly, result in artifically determined price levels.

Entry of the Final Judgment will ensure that each member of defendant independently determines its terms and conditions of credit in the sale of produce. This assurance is primarily provided by Sections IV and V, which forbid all agreements relating to credit and prohibit the Association from using forms which suggest the existence of common credit terms among members. In addition, the notice requirements of Section VII will ensure that members will receive notices informing them that any Association member is free to offer whatever credit terms it chooses. This should stimulate competition in credit terms and allow the level of credit in the market to reach its competitive equilibrium.

V

Remedies Available to Potential Private Litigants

Section 4 of the Clayton Act, 15 U.S.C. 15, provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages such person has suffered, as well as costs and reasonable attorneys fees. Entry of the proposed Final Judgment in this proceeding will neither impair nor assist the bringing of any such private antitrust action. Under Section 5(a) of the Clayton Act, 15 U.S.C. 16(a), the proposed judgment has no *prima facie* effect in any private lawsuit that may be brought against the defendant.

VI

Procedures Available for Modification of the Proposed Final Judgment

The proposed Final Judgment is subject to a stiuplation between the United States and the defendant providing that the United States may withdraw its consent to the proposed Judgment at any time before it is entered by the Court. The Antitrust Procedures and Penalties Act conditions entry upon the Court's determination that the proposed Judgment is in the public interest. Under Section IX of the proposed Final Judgment, the Court would retain jurisdiction over this action in order, among other things, to permit either party to apply for any necessary or appropriate modification of the proposed Judgment or construction of its provisions.

The Antitrust Procedures and Penalties Act provides a period of at least sixty days preceding the entry of the proposed Final Judgment within which any person may submit to the United States comments regarding the proposed Final Judgment. The United States will evaluate the comments and determine whether it should withdraw its consent. The comments and the response of the United States to the comments will be filed with the Court and published in the **Federal Register** in accordance with the Antitrust Procedures and Penalties Act.

Written comments should be submitted to: Alan L. Marx, Chief, General Litigation Section, Antitrust Division, U.S. Department of Justice, Washington, D.C. 20530.

VII

Alternatives to the Proposed Final Judgment

This proceeding does not involve any unusual or novel issues of fact or law which might make litigation a more desirable alternative than entry of the Final Judgment. All relief requested in the complaint is included in the proposed Final Judgment.

VIII

Determinative Documents

There are no materials or documents that the United States considered determinative in formulating this proposed Final Judgment.

Accordingly, none are being filed along with this Competitive Impact Statement.

Dated: ———————.

Respectfully submitted,

Kenneth L. Jost, Angela L. Hughes,

Attorneys for the United States, United States Department of Justice, Antitrust Division, Washington, D.C. 20530, (202) 724–6468.

BILLING CODE 4410–01–M

National Institute of Justice

Solicitation; Improving Evidence Gathering Through Police and Prosecutor Coordination

Police and prosecutor coordination is essential if felony case attrition is to be kept at a minimum. The problem of felony arrests resulting in no conviction has been estimated to be as high as fifty percent. While a certain amount of this attrition is warranted, a portion results from either the poor quality of the arrest cases when they are presented to the prosecutor, or to problems in coordination and cooperation between law enforcement and prosecuting agencies.

To address the problem of felony case attrition the National Institute of Justice announces a competitive research grant program on "Improving Evidence Gathering Through Police and Prosecutor Coordination". Proposals are requested for experimental research designed to reduce the rate of avoidable felony case attrition through improved case preparation and policy coordination between police and prosecutors.

This solicitation requests proposals from organizations desiring either: (1) To develop, implement and assess new methods of improving felony case evidence gathering and preparation or, (2) to evaluate the effects of an already existing program or policy aimed at enhanced felony case evidence gathering and preparation. It is anticipated that three to five awards will be made from the $500,000 planned for this program.

Both the qualifications of the research team and evidence of cooperation of the participant jurisdiction are among the review criteria.

All proposals must be received no later than June 1, 1984.

A copy of the solicitation may be obtained by sending a self addressed *mailing label* to: Announcement Request, Improving Evidence Gathering, National Criminal Justice Reference Service, Box 6000, Rockville, Maryland 20850.

Dated: March 16, 1984.

James K. Stewart,

Director, National Institute of Justice.

BILLING CODE 4410–18–M

DEPARTMENT OF LABOR

Office of the Secretary

The Steering Subcommittee of the Labor Advisory Committee for Trade Negotiations and Trade Policy; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463 as amended), notice is hereby given of a meeting of the Steering Subcommittee of the Labor Advisory Committee for Trade Negotiations and Trade Policy.

Date, time and place: April 10, 1984, 9:30 a.m., Rm. S4215 A & B Frances Perkins, Department of Labor Building, 200 Constitution Avenue, NW., Washington, D.C. 20210.

Purpose: To discuss trade negotiations and trade policy of the United States.

This meeting will be closed under the authority of Section 10(d) of the Federal Advisory Committee Act. The Committee will hear and discuss sensitive and confidential matters concerning U.S. trade negotiations and trade policy.

For further information contact:

Fernand Lavallee, Acting Executive Secretary, Labor Advisory Committee, Phone: (202) 523–6565, March 20, 1984.

Signed at Washington, D.C. this 20th day of March 1984.

Robert W. Searby,

Deputy Under Secretary, International Affairs.

BILLING CODE 4510–28–M

NATIONAL CREDIT UNION ADMINISTRATION

Agency Forms Submitted to OMB for Review

The following package is being submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 CFR Chapter 35). The current valid OMB clearance expires on March 31, 1984.

Subject: 12 CFR 701.31 Nondiscrimination Requirements (3133–0068).

This regulation requires a Federal Credit Union to keep a copy of the property appraisal. It also requires that a Federal Credit Union using geographic factors in evaluating real estate loan applications must disclose such fact on the appraisal and state its justification.

Respondents: Federal Credit Unions

OMB Desk Officer: Judith McIntosh.

Copies of the above information collection clearance packages can be obtained by calling the National Credit Union Administration, Special Projects Officer, on 202–357–1080.

Written comments and recommendations for listed information collections should be sent directly to the OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503, Attn: Judith McIntosh.

Dated: March 19, 1984.

Rosemary Brady,

Secretary of the NCUA Board.

BILLING CODE 7535–01–M

NATIONAL SCIENCE FOUNDATION

Advisory Panel for Linguistics; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Linguistics.

Date and Time: April 12 and 13, 1984; 9:00 a.m. to 5:00 p.m. each day.

Place: National Science Foundation, 1800 G Street, NW., Room 338, Washington, D.C. 20550.

Type of Meeting: Part Open—Open 4/13—9:00 a.m. to 11:00 a.m., closed 4/12—9:00 a.m. to 5:00 p.m., closed 4/13—11:00 a.m. to 5:00 p.m.

Contact Person: Dr. Paul G. Chapin, Program Director, Linguistics Program, Room 320, National Science Foundation, Washington, D.C. 20550, (202) 357–7896.

Summary Minutes: May be obtained from the Contact Person at the above stated address.

Purpose of Meeting: To provide advice and recommendations concerning support for research in linguistics.

Agenda: Open—General discussion of the current status and future plans of the Linguistics Program.

Closed—To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information, financial data, such as salaries, and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority To Close Meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

March 22, 1984.

M. Rebecca Winkler,

Committee Management Coordinator.

Subpanel on Regulation and Policy Analysis Advisory Panel for Social and Economic Science; Meeting

In accordance with the Federal advisory Committee Act, Pub. L. 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Subpanel or Regulation & Policy Analysis of the Advisory Panel for Social & Economic Science.

Date/Time: April 13, 1984—8:00 a.m. to 6:00 p.m.

Place: National Science Foundation, 1800 G St., NW. (Rm 643) Washington, DC 20550.

Type of Meeting: Closed.

Contact Person: Dr. Laurence C. Rosenberg, Program Director Regulation & Policy Analysis, National Science Foundation, Washington, DC 20550, Room 335, Phone (202) 357–7417.

Purpose of Subpanel: To provide advice and recommendations concerning research in Regulation and Policy Analysis.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority To Close Meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director NSF on July 6, 1979.

M. Rebecca Winkler,

Committee Management Coordinator.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Meeting

In accordance with the purposes of section 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the Advisory Committee on Reactor Safeguards will hold a meeting on April 5–7, 1984, in Room 1046, 1717 H Street NW., Washington, DC. Notice of this meeting was published in the **Federal Register** on March 27, 1984.

The agenda for the subject meeting will be as follows:

Thursday, April 5, 1984

8:30 a.m.–8:45 a.m.: Chairman's Report (Open)—The ACRS Chairman will report briefly to the Committee regarding items of current interest.

8:45 a.m.–12:00 noon: Maintenance Policies and Practices (Open/Closed)—The members will hear and discuss the report of its subcommittee and members of the NRC staff regarding maintenance policies and practices in nuclear power plants.

A portion of this session will be closed to discuss information provided in confidence by a foreign source.

1:00 p.m.–2:00 p.m.: Items for Meeting with NRC Commissioners (Open)—The members will discuss the ACRS position regarding matters to be discussed with the NRC Commissioners including the proposed NRC Safety Research Program for FY 1985, ACRS activities related to QA/QC practices in the nuclear industry, and establishment of an NTSB type board for evaluation of nuclear power plant accidents.

2:00 p.m.–3:30 p.m.: Meeting with NRC Commissioners (Open)—The members will meet with the NRC Commissioners to discuss items noted above.

3:30 p.m.–4:15 p.m.: Implementation of Regulatory Guide 1.97, Instrumentation of Light-Water-Cooled Nuclear Power Plants to Assess Plant and Environs Conditions During and Following an Accident (Open)—The members will hear a briefing regarding the status of implementation of Regulatory Guide 1.97.

4:15 p.m.–5:00 p.m.: Subcommittee Action (Open)—The members will hear and discuss reports of designated Subcommittees regarding the status of assigned activities including provisions for ECCS and decay heat removal.

Friday, April 6, 1984

8:30 a.m.–11:30 a.m.: Ginna Nuclear Power Plant (Open)—The members will hear and discuss reports from its subcommittee, the NRC Staff, and the Licensee regarding the request for a full term operating license for this facility.

Portions of this session will be closed as necessary to discuss Proprietary Material applicable to this matter.

11:30 a.m.–12:30 p.m.: Activities of NRC Regional Offices (Open)—The members will hear and discuss a report from an NRC Regional Director regarding the activities of NRC regional offices.

1:30 p.m.–2:30 p.m.: Severe Accident Policy (Open)—The members will hear a briefing by a representative of the NRC Staff regarding the status of a proposed NRC policy statement regarding consideration of severe nucler power plant accidents in the regulatory process.

2:30 p.m.–3:30 p.m.: Nuclear Power Plant Operating Experience (Open)—The Committee will hear and discuss a proposed NRC Bulletin regarding operation of undervoltage trip devices in nuclear power plant circuit breakers.

3:30 p.m.–4:00 p.m.: Passive Containment System (Open)—The Committee will discuss a proposed ACRS reply to the request for a preapplication review of the passive containment system.

4:00 p.m.–5:00 p.m.: Preparation of ACRS Reports (Open/Closed)—The Committee will discuss proposed ACRS reports/letters regarding items considered during the meeting.

Portions of this session will be closed as necessary to discuss Proprietary Information applicable to the matters being considered and to discuss information involved in an adjudicatory proceeding.

Saturday, April 7, 1984

8:30 a.m.–9:15 a.m.: Appointment of ACRS Members (Closed)—The members will discuss the qualifications of candidates proposed for appointment to the Committee.

This portion of the meeting will be closed to discuss information the release of which would represent an unwarranted invasion of personal privacy.

9:15 a.m.–12:30 p.m.: Preparation of ACRS Reports (Open/Closed)—The Committee will complete preparation of reports/letters regarding items considered during this meeting.

Portions of this session will be closed as necessary to discuss Proprietary Information applicable to the matters being considered and information involved in an adjudicatory proceeding.

Procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on September 28, 1983 (48 FR 44291). In accordance with the procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring

to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the the necessary time during the meeting for such statements. Use of still, motion picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the ACRS Executive Director, R. F. Fraley, prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

I have determined in accordance with Subsection 10(d), Pub. L. 92–463, that it is necessary to close portions of this meeting as noted above to discuss Proprietary Information and information provided in confidence by a foreign source (5 U.S.C. 552b(c)(4)), information involved in an adjudicatory proceeding (5 U.S.C. 552b(c)(10)), information the release of which would represent an unwarranted invasion of personal privacy (5 U.S.C. 552b(c)(6)).

Further information regarding topics to be discussed, whether the meetings has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 202/634–3265), between 8:15 a.m. and 5:00 p.m. est.

Dated: March 22, 1984.

Samuel J. Chilk,

Secretary of the Commission.

BILLING CODE 7590-01-M

[Docket No. 50–302]

Florida Power Corp.; Order Confirming TMI Commitments; Correction

On March 2, 1984 (49 FR 7895), an Order issued by the U.S. Nuclear Regulatory Commission (NRC) was published in the Federal Register. This Order confirms commitments made by the Florida Power Corporation for Post-TMI related issues involving the Crystal River Unit 3 Nuclear Generating Plant, which is located in Citrus County, Florida.

The March 31, 1984 completion date for completion of Emergency Response Facilities, appearing in Page 2 of the Attachment to the Order, has been changed to July 2, 1984.

For additional details, see NRC's letter to the licensee dated March 15, 1984.

Dated at Bethesda, Maryland, this 15th day of March 1984.

For the Nuclear Regulatory Commission.

John F. Stolz,

Chief, Operating Reactors Branch #4, Division of Licensing.

[FR Doc. 84-8207 Filed 3-26-84; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50–220; License No. DPR–63 EA 83–137]

Niagara Mohawk Power Corp. (Nine Mile Point Station, Unit 1); Order Modifying License Effective Immediately

I

Niagara Mohawk Power Corporation (the "licensee") is the holder of Facility Operating License No. DPR–63 issued December 26, 1974 which authorizes the licensee to operate the Nine Mile Point Station, Unit 1 (the "facility") in Scriba, New York.

II

Recent violations at Nine Mile Point Station, Unit 1, including violations of technical specification limiting conditions for operation and technical specification surveillance requirements, indicate a lack of management attention to the control of safety related activities at the facility. These violations represent a continuing negative trend in operations at Nine Mile Point Station, Unit 1. They involve inattentiveness to plant parameters by plant personnel, lack of awareness of plant conditions, and failure to adhere to plant procedures. For example, a Notice of Violation and Proposed Imposition of Civil Penalty was issued to Nine Mile Point Station, Unit 1 on October 6, 1983 for violations which involved the following:

(1) Failure to adequately perform required checks of main steam line radiation monitors in that the readings of two of the monitors were significantly different from the reading of two other monitors, yet no action was taken to determine the cause of this discrepancy, the monitors were not declared inoperable, and appropriate action was not taken as required by the technical specification;

(2) A reactor building inner track bay door was open when the outer door was not sealed, in violation of a plant operating procedure;

(3) A motor starter circuit breaker for a core spray isolation valve was in the off position but not locked in that position, in violation of a technical specification limiting condition for operation.

Further, on November 15, 1983, an enforcement conference was conducted to discuss violations identified during NRC inspection 50–220/83–24, conducted October 1–31, 1983 and Inspection 50–220/83–29 conducted November 9–10, 1983. These violations involved: (1) The failure to maintain primary containment integrity while the reactor was critical as required by technical specifications, and (2) two reactor coolant system isolation valves, required by a technical specification surveillance requirement to be tested for closure times at least once per operating cycle, which had not been tested for closure time during the past five operating cycles, a period of ten years.

III

Such violations demonstrate the need for increased corporate management involvement in plant activities to foster an attitude that will ensure increased personnel attentiveness to plant parameters, increased personnel awareness of plant conditions, and strict adherence by operating personnel to plant procedures and, as a result, increased compliance with NRC requirements. Accordingly, I have determined that the actions set forth below are required by the public health, safety, and interest, and therefore, should be imposed by an immediately effective Order.

IV

In view of the foregoing, pursuant to Sections 103, 161(i), 161(o), and 182 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Part 2 and 10 CFR Part 50, it is hereby ordered effective immediately that:

Within 60 days of the effective date of this Order, the licensee shall submit to the Regional Administrator, Region I, for review and approval, a plan for an independent appraisal of site and corporate management and their functions to evaluate their effectiveness and to develop recommendations for the purpose of increasing corporate management involvement in plant activities to foster an attitude that will ensure increased personnel attentiveness to plant parameters, and increasing personnel awareness of plant conditions, and strict adherence by operating personnel to plant procedures

to ensure that the facility is operated in accordance with license requirements.

The plan shall include, but shall not be limited to, the following elements:

(1) An appraisal conducted by an independent third party management consultant organization retained by the licensee to evaluate current organizational structure and responsibilities, management controls, communication systems and management practices, both at the Nine Mile Point Nuclear Station, Unit 1, and the corporate offices.

This appraisal shall also include an evaluation of how the preoperational, start-up and eventual operating activities at Unit 2 will interface with and affect the management system for the operation of Unit 1.

(2) A description of the appraisal program, the qualifications of the appraisal team, a discussion of how the appraisal is to be documented, and the schedule of completion of appropriate milestones.

(3) Recommendations for changes in the areas mentioned in Item 1 that will provide assurance that the licensee will effectively implement NRC requirements.

Upon approval of the plan by the Regional Administrator, Region I, the plan shall be implemented. Scheduled milestone completion dates may not be extended without good cause and the concurrence of the Regional Administrator, Region I.

The licensee shall direct the approved independent management consultant organization to submit to the Regional Administrator, Region I, a copy of any report of the appraisal and recommendations resulting from the appraisal, and any drafts thereof at the same time they are sent to the licensee or any of its employees or contractors. Prior notice shall be given to the Regional Administrator, Region I, of any meeting or discussion between the licensee and the organization to discuss the results, recommendations, or progress made on the appraisal in sufficient time for the Regional Administrator to determine whether NRC participation is required. In addition, the licensee shall consider the recommendations resulting from the appraisal and provide to the Regional Administrator, Region I, an analysis of each such recommendation and the action to be taken in response to the recommendation. The licensee shall also provide a schedule for accomplishing these actions.

The Regional Administrator, Region I, may relax or terminate in writing any of the preceding conditions for good cause.

V

The licensee may request a hearing on this Order. A request for hearing shall be submitted to the Director, Office of Inspection and Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555 within 30 days of the date of this Order. A copy of the request shall also be sent to the Executive Legal Director at the same address and to the Regional Administrator, Region I, 631 Park Avenue, King of Prussia, PA 19406. Any request for a hearing shall not stay the immediate effectiveness of this order.

If a hearing is to be held concerning this Order, the Commission will issue an Order designating the time and place of hearing. If a hearing is held, the issue to be considered at such hearing shall be whether this Order shall be sustained.

Dated at Bethesda, Maryland this 20th day of March 1984.

For the Nuclear Regulatory Commission.

Richard C. DeYoung,

Director, Office of Inspection and Enforcement.

[FR Doc. 84-8208 Filed 3-26-84; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-410; Construction Permit No. CPPR-112 EA 83-137]

Niagara Mohawk Power Corp. (Nine Mile Point Station, Unit 2); Order

I

Niagara Mohawk Power Corporation (the "licensee") is the holder of construction permit CPPR-112 issued by the Nuclear Regulatory Commission (the "Commission") which authorizes the construction of the Nine Mile Point Station, Unit 2 (the "facility"). The facility is under construction in Scriba, New York.

II

A Construction Appraisal Team ("CAT") inspection was conducted at the facility during the period of November 7 through 19, and November 28 through December 9, 1983. The objective of this CAT inspection was to evaluate the adequacy of construction at the facility which the licensee estimates as currently about 80 percent complete. An additional aspect of the CAT inspection was the review of the licensee's project management involvement with site construction activities to determine whether adequate control existed to meet Commission requirements.

Significant deficiencies in your Quality Assurance program were identified during the CAT inspection as described in Appendix A to the January 31, 1984 Inspection Report (Report No. 50-410/83-18). These findings include, but are not limited to, the following:

(1) The program for review and acceptance of radiographs was found to be deficient. The deficiencies identified included weld quality, radiographic film quality, missing film, and quality of documentation. Some similar deficiencies had previously been identified by the licensee site quality assurance/quality control programs, but timely actions to correct the deficiencies had not been initiated.

(2) The document control system is inadequate as evidenced by the number and type of problems identified. These deficiencies indicate that crafts and inspectors may not be using the latest design documents. Inspection reports often do not reflect the applicable drawing revision. Project Procedure 77, Advance Change Notices (ACN), requires that ACN's be incorporated into the appropriate drawings within a 60-day time period. Because of a large backlog of ACN's, an Interoffice Memorandum dated November 11, 1983 was issued which removed the 60-day time period for incorporating changes into drawings. Therefore, ACN's do not receive full engineering review until the appropriate drawing is revised. This change was made as an expedient action, rather than taking appropriate measures to identify and correct the reasons for a high ACN generation rate.

(3) Deficiencies were identified in the site auditing program, the corrective action system, and the procurement quality assurance program. Audits were not effective in the identification of hardware and program deficiencies, nor in resolving problems in a timely manner. Corrective action systems were deficient with regard to the correction of nonconformances identified and the associated documentation. In addition, several discrepancies were identified during the review of hardware which raise questions as to the adequacy of the Stone and Webster Procurement Quality Assurance Program. Review of a small sample of hardware revealed a number of installed materials and equipment that did not comply with purchase documents.

(4) A number of deficiencies were found in the QA/QC program as evidenced by problems identified in the electrical and mechanical areas. These deficiencies included inadequate acceptance criteria to perform appropriate quality control inspections; failure to perform adequate quality control inspections; and failure to take appropriate actions when deficiencies were identified. The low number of

quality control inspected items as compared to the much larger number of installed items reflects a quality control program that is not timely in accomplishing required work. Although further opportunities may exist to detect existing deficiencies prior to plant operation, the deficiencies identified by the CAT inspection had already evaded the existing quality control program. Failure of the licensee to detect these deficiencies raises serious questions as to the effectiveness of that program.

(5) The prequalification testing program for concrete expansion anchor bolts was found to be inadequate since it did not establish that torque values required in the site specifications were adequate to ensure that the anchor bolts were properly set. The concrete anchor bolts were tested in a 1000 psi concrete mix, rather than a minimum 3000 psi concrete mix which is the concrete mix most representative of field conditions.

(6) Power Generation Control Complex (PGCC) cable and wiring installations exhibited significant deficiencies relative to separation criteria. The applicant's program of quality control inspection does not provide adequate consideration or establish the appropriate procedural controls to assure that specification separation criteria have been satisfied.

These and other deficiencies are described in the CAT Inspection Report (Report No. 50–410/83–18) issued January 31, 1984. A number of the findings identified during the CAT inspection are similar to deficiencies previously identified by Region I. These Region I findings are documented in the NRC Region I Report 50–410/SALP, which covers the period of October 1, 1982 to September 30, 1983. The results of the SALP were discussed during a meeting with the licensee on January 11, 1984, and the report was issued February 23, 1984.

III

The nature and number of the NRC-identified deficiencies, most of which were in areas which had already received licensee's quality control inspection and acceptance, raise serious questions concerning the adequacy of the licensee's management control over the construction process and whether construction that has been completed and the demonstration of its quality has been achieved in accordance with the Commission's requirements.

I have determined that further information is necessary concerning the licensee's ability to manage construction and to determine the adequacy of the construction work completed to date.

IV

In view of the foregoing, pursuant to Sections 103, 161(i), 161(o), and 182 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Part 2 and 10 CFR Part 50, it is hereby ordered that:

A. Within 60 days of the effective date of this Order, the licensee shall submit to the Regional Administrator, Region I, for review and approval, a plan for a review of the CAT inspection findings, the most recent SALP report and licensee-identified deficiencies (both past and current). The plan shall include a description of the scope of the proposed review, the qualifications of the review team and a schedule for completion of appropriate milestones. The review shall determine whether the licensee has correctly identified the underlying/fundamental causes for these deficiencies and whether the licensee's corrective actions have adequately addressed the underlying/fundamental causes as well as adequately addressing the specific deficiencies. This review shall include a thorough reinspection of identified deficiencies. Neither the manager of the review (the reviewer) nor any member of the review team shall have been involved in performing any of the work under review.

Upon approval of the plan by the Regional Administrator, Region I, the plan shall be implemented. Scheduled milestone completion dates may not be extended without good cause and the concurrence of the Regional Administrator, Region I.

The licensee shall direct the reviewer to submit to the Regional Administrator, Region I, a copy of any report, and any drafts thereof, at the same time they are sent to the licensee or any of its employees or contractors. The reports and recommendations shall be submitted to the Regional Administrator, Region I, by a date agreed upon by the licensee and the Regional Administrator.

The licensee shall consider the recommendations resulting from the review and provide to the Regional Administrator, Region I, an analysis of each such recommendation and the action to be taken in response to the recommendation. The licensee shall also provide a schedule for accomplishing these actions.

B. Within 60 days of the effective date of this Order, the licensee shall establish, define and submit to the Regional Administrator, Region I, a listing of performance indicators to be used to measure and monitor quality construction performace in the future. These indicators should address but not be limited to, those areas required to be reviewed by Section A of this Order. These indicators should also address the implementation of corrective actions, and changes made or planned based on deficiencies identified. The licensee shall periodically discuss with the Regional Administrator, Region I, the status of construction as measured by these performance indicators as well as modifications or additions to these performance indicators.

C. Within six months of the effective date of this Order, the licensee shall submit to the Regional Administrator, Region I, for review and approval, a plan for an independent third party to conduct an appraisal of organizational responsibilities, management controls, staffing levels, communications, and operating practices both at the facility and the corporate office. This appraisal shall be initiated after the most recent changes are in effect but no later than one year from the effective date of this Order.

Additionally, this appraisal shall also address the adequacy of actions implemented in response to items A, B and C of this Order. This independent third party shall be directed to make recommendations for changes in the areas reviewed.

The plan shall include a description of the appraisal program, the qualifications of the appraisal team, a discussion of how the appraisal is to be documented, and the schedule of completion of appropriate milestones. Upon approval of the plan by the Regional Administrator, Region I, the plan shall be implemented. Scheduled milestones completion dates may not be extended without good cause and the concurrence of the Regional Administrator, Region I.

The licensee shall direct the approval independent management consultant organization to submit to the Regional Administrator, Region I, a copy of any report of the appraisal and recommendations resulting from the appraisal, and any drafts thereof at the same time they are sent to the licensee or any of its employees or contractors. Prior notice shall be given to the Regional Administrator, Region I, of any meeting or discussion between the licensee and the organization to discuss the results, recommendations, or progress made on the appraisal in sufficient time for the Regional Administrator to determine whether NRC participation is required. In addition, the licensee shall consider the recommendations resulting from the appraisal and provide to the Regional Administrator, Region I, an analysis of

each such recommendation and the action to be taken in response to the recommendation. The licensee shall also provide a schedule for accomplishing these actions.

D. The Regional Administrator, Region I, may relax, or terminate in writing any of the preceding conditions for good cause.

V

The licensee may request a hearing on this Order. Any request for hearing shall be submitted to the Director, Office of Inspection and Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555 within 30 days of the date of thjs Order. A copy of the request shall also be sent to the Executive Legal Director at the same address and to the Regional Administrator, NRC Region I, 631 Park Avenue, King of Prussia, PA 19406.

If a hearing is to be held concerning this Order, the Commission will issue an Order designating the time and place of hearing. If a hearing is held, the issue to be considered at such hearing shall be whether this Order should be sustained.

This Order shall become effective upon the licensee's consent or upon expiration of the time within which the licensee may request a hearing or, if a hearing is requested by the licensee on the date specified in an Order issued following further proceedings on this Order.

Dated at Bethesda, Maryland this 20th date of March 1984.

For the Nuclear Regulatory Commission.

Richard C. DeYoung,

Director, Office of Inspection and Enforcement.

[FR Doc. 84-8209 Filed 3-26-84; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-395]

South Carolina Electric & Gas Co. and South Carolina Public Service Authority (Virgil C. Summer Nuclear Station, Unit No. 1); Exemption

I

The South Carolina Electric & Gas Company (SCE&G) and South Carolina Pubic Service Authority hold operating license number NPF-12 which authorizes the operation of the Virgil C. Summer Nuclear Station, Unit No. 1. The facility consists of one pressurized water reactor located at the licensees' site near Jenkinsville, South Carolina.

II

Section IV.F.1.a. of Appendix E to 10 CFR Part 50 requires each licensee to hold emergency preparedness exercises at a frequency which will enable each State and local government within the plume exposure pathway emergency planning zone to participate in at least one full-scale exercise per year.

SCE&G's letter of January 18, 1984, to Harold R. Denton, Director, Office of Nuclear Reactor Regulation, requested that an exemption be granted from the requirements of 10 CFR 50, Appendix E. Section IV.F.1.a. as it applies to participation by State and local government agencies in the planned March 21, 1984, full-scale emergency preparedness exercise to be held at the Virgil C. Summer Nuclear Station, Unit 1.

SCE&G bases this request for exemption on the previous successful participation by State and local government agencies in full-scale and limited-scale exercises in May 1981 and March 1983, which resulted in favorable findings by FEMA and NRC. SCE&G contends that the experience gained by the State and local government agencies during the exercises is sufficient basis for relief from the annual exercise frequency requirement.

The NRC staff has reviewed the participation of the State in an October 1983 exercise with the H. B. Robinson Nuclear Power Station and the local government agencies in the March 1983 exercise for the V. C. Summer Nuclear Station. The staff determined that the agencies demonstrated a capability to respond effectively to nuclear power station emergency conditions. Based on this review, the staff concludes that an exemption pursuant to the requirements of 10 CFR Part 50, Appendix E, Section IV.F.1.a., is justified, subject to the condition that the State and local government agencies may be required to provide such minimal support as may be essential to the conduct of the March 21, 1984, onsite emergency preparedness exercise.

Based on our evaluation, the staff has concluded that non-participation by State and local government agencies in the March 21, 1984, emergency preparedness exercise for the Virgil C. Summer Nuclear Station, Unit 1 will not adversely affect the overall state of emergency preparedness for the V. C. Summer Nuclear Station and that the requested exemption from the requirements of 10 CFR Part 50, Appendix E, Section IV.F.1.a. should be granted.

III

Accordingly, the Commission has determined that pursuant to 10 CFR 50.12, an exemption is authorized by law and will not endanger life or property or the common defense and security and is otherwise in the public interest.

The NRC staff has determined that the granting of this exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

This exemption is effective upon issuance.

Dated at Bethesda, Maryland, this 20th day of March 1984.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket No. 50-397]

Washington Public Power Supply System (WPPSS Nuclear Project No. 2); Issuance of Director's Decision Under 10 CFR 2.206

Notice is hereby given that the Director, Office of Inspection and Enforcement, has issued a decision concerning a petition dated October 14, 1983, filed by Eugene Rosolie, on behalf of the Coalition for Safe Power. The petitioner had requested that the Nuclear Regulatory Commission institute show cause proceedings to determine whether the construction permit for the Washington Public Power Supply System Nuclear Project No. 2 (WNP-2) should be revoked, a stay of construction imposed, the pending application for an operating license denied and hearings instituted. The Director, Office of Inspection and Enforcement, has decided to deny the petitioner's request.

The reasons for this decision are explained in a "Director's Decision under 10 CFR 2.206" (DD-84-7), which is available for public inspection in the Commission's public document room, 1717 H Street, N.W., Washington, DC, and in the local public document room for the WNP-2 facility, located at the Richland Public Library, Swift and Northgate Street, Richland, WA 99352.

A copy of the decision will be filed with the Secretary for Commission review in accordance with 10 CFR 2.206(c).

Dated at Bethesda, Maryland, this 19th day of March, 1984.

For the Nuclear Regulatory Commission.

Richard C. DeYoung,

Director, Office of Inspection and Enforcement.

OFFICE OF PERSONNEL MANAGEMENT

Excepted Service

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: This gives notice of positions placed or revoked under Schedules A, B, and C in the excepted service, as required by Civil Service Rule VI, Exceptions from the Competitive Service.

FOR FURTHER INFORMATION CONTACT: Tracy Spencer, 202-632-6000.

SUPPLEMENTARY INFORMATION: The Office of Personnel Management published its last monthly notice updating appointing authorities established or revoked under the Excepted Service provisions of 5 CFR Part 213 on February 28, 1984 (49 FR 7318). Individual authorities established or revoked under Schedules A, B, or C between February 1, 1984 and February 29, 1984 appear in a listing below. Future notices will be published on the fourth Tuesday of each month, or as soon as possible thereafter. A consolidated listing of all authorities will be published as of June 30 of each year.

Schedules A and B

No Schedule A or B exceptions were established or revoked during the month of February.

Schedule C

The following exceptions are established:

Department of Agriculture

One Confidential Assistant to the Manager, Federal Crop Insurance Corporation. Effective February 6, 1984.

One Private Secretary to the General Counsel, Office of the General Counsel. Effective February 10, 1984.

One Confidential Assistant to the Director, Office of Rural Development Policy. Effective February 23, 1984.

One Confidential Assistant to the Director, Office of Equal Opportunity. Effective February 24, 1984.

One Special Assistant to the Director, Office of Transportation. Effective February 24, 1984.

Department of the Army

One Staff Assistant to the Special Assistant to the President for Public Liaison. Effective February 24, 1984.

Department of Commerce

One Confidential Assistant to the Director General of U.S. and Foreign Commercial Service, International Trade Administration. Effective February 3, 1984.

One Private Secretary to the Deputy Under Secretary, Office of the Secretary. Effective February 10, 1984.

One Confidential Assistant to the Director General of the U.S. and Foreign Commercial Service, International Trade Administration. Effective February 16, 1984.

One Confidential Assistant to the Deputy Assistant Secretary for Industry Projects, International Trade Administration. Effective February 21, 1984.

One Special Assistant to the Under Secretary for Travel and Tourism. Effective February 22, 1984.

One Confidential Assistant to the Assistant Secretary for Trade Development, International Trade Administration. Effective February 22, 1984.

One Special Assistant to the Assistant Director for Communications, Bureau of the Census. Effective February 23, 1984.

One Confidential Assistant to the Deputy Assistant Secretary for Trade Information and Analysis, International Trade Administration. Effective February 23, 1984.

One Congressional Affairs Assistant to the Deputy Assistant Secretary for Congressional Affairs. Effective February 24, 1984.

Department of Defense

One Personal and Confidential Assistant to the Deputy Secretary of Defense. Effective February 16, 1984.

Department of Education

One Executive Assistant to the Assistant Secretary for Legislation and Public Affairs. Effective February 3, 1984.

One Confidential Assistant to the Director of Regional Liaison, Office of the Under Secretary. Effective February 3, 1984.

One Special Assistant to the Assistant Secretary, Office of Elementary and Secondary Education. Effective February 3, 1984.

One Legislative Liaison to the Director, Legislative Liaison Staff, Office of Legislation and Public Affairs. Effective February 8, 1984.

One Confidential Assistant to the Executive Assistant to the Secretary. Effective February 10, 1984.

One Executive Director, Intergovernmental Advisory Council on Education, Office of the Deputy Under Secretary for Intergovernmental and Interagency Affairs. Effective February 23, 1984.

One Confidential Assistant to the Under Secretary, Office of the Under Secretary. Effective February 29, 1984.

Department of Energy

One Staff Assistant to the Assistant Secretary for Internal Affairs. Effective February 1, 1984.

One Private Secretary to the Chairman, Federal Energy Regulatory Commission. Effective February 24, 1984.

One Legal Advisor to a Member of the Commission, Federal Energy Regulatory Commission. Effective February 24, 1984

One Attorney-Advisor (Public Utilities) to the Chairman, Federal Energy Regulatory Commission. Effective February 24, 1984

One Attorney-Advisor (Public Utilities) to the Chairman, Federal Energy Regulatory Commission. Effective February 24, 1984

One Attorney-Advisor (Public Utilities) to the Chairman, Federal Energy Regulatory Commission. Effective February 27, 1984

One Attorney-Advisor (Public Utilities) to the Chairman, Federal Energy Regulatory Commission. Effective February 27, 1984

Department of Health and Human Services

One Director, Intergovernmental and Congressional Affairs in Dallas, Texas. Office of the Secretary. Effective February 3, 1984.

One Confidential Assistant to the Associate Administrator for External Affairs, Health Care Financing Administration. Effective February 8, 1984.

Department of Housing and Urban Development

One Special Assistant to the Assistant Secretary for Housing/Federal Housing Commissioner. Effective February 1, 1984.

One Staff Assistant (Typing) to the Assistant Secretary for Community Planning and Development. Effective February 3, 1984.

One Special Assistant to the Secretary. Effective February 6, 1984.

One Executive Assistant to the Assistant Secretary for Housing/Federal Housing Commissioner. Effective February 9, 1984.

One Confidential Assistant to the Under Secretary. Effective February 16, 1984.

One Senior Assistant for Legislation to the Deputy Assistant Secretary for Legislation. Effective February 21, 1984.

One Special Assistant to the Assistant Secretary for Public and Indian Housing. Effective February 24, 1984.

One Executive Assistant to the Assistant Secretary for Housing/Federal Housing Commissioner. Effective February 27, 1984.

One Special Assistant to the Secretary, Office of the Secretary. Effective February 27, 1984.

One Special Assistant to the Assistant Secretary for Housing/Federal Housing Commissioner. Effective February 29, 1984.

Department of the Interior

One Special Assistant to the Deputy Director, National Park Service. Effective February 21, 1984.

One Special Assistant to the Secretary. Effective February 21, 1984.

One Confidential Assistant to the Special Assistant to the Secretary. Effective February 24, 1984.

Department of Justice

One Confidential Assistant (Private Secretary) to the Assistant Attorney General, Antitrust Division. Effective February 1, 1984.

One Special Assistant to the Deputy Assistant Attorney General, Tax Division. Effective February 3, 1984.

One Secretary (Typing) to the Deputy Administrator, Office of Juvenile Justice and Delinquency Prevention.

Department of Labor

One Special Assistant to the Assistant Secretary for Employment and Training. Effective February 1, 1984.

One Special Assistant to the Deputy Under Secretary for Employment Standards. Effective February 6, 1984.

One Assistant to the Assistant Secretary for Legislative Affairs. Effective February 17, 1984.

One Staff Assistant to the Chief of Staff, Office of the Secretary. Effective February 24, 1984.

One Special Assistant to the Administrator, Pension and Welfare Benefit Programs. Effective February 29, 1984.

Department of State

One Special Assistant to the Under Secretary for Management. Effective February 6, 1984.

One Secretary (Stenography) to the Ambassador, U.S. Permanent Representative to the Organization of American States. Effective February 17, 1984.

Department of Transportation

One Congressional Liaison Officer to the Director, Office of Congressional Affairs. Effective February 1, 1984.

One Secretary (Typing) to the Deputy Secretary. Effective February 2, 1984.

One Director, Office of Public Affairs, Urban Mass Transportation Administration. Effective February 8, 1984.

One Special Assistant to the Assistant Secretary for Public Affairs. Effective February 10, 1984.

One Special Assistant for Marketing to the Administrator, Saint Lawrence Seaway Development Corporation. Effective February 14, 1984.

One Special Assistant to the Director, Office of Intergovernmental Affairs. Effective February 24, 1984.

One Chief, Minority Business Resource Center, to the Director, Office of Small and Disadvantaged Business Utilization. Effective February 24, 1984.

One Deputy Director, Office of Congressional Affairs. Effective February 24, 1984.

One Special Assistant to the Deputy Assistant for Governmental Affairs. Effective February 27, 1984.

One Confidential Assistant to the Assistant Secretary for Governmental Affairs. Effective February 29, 1984.

Department of the Treasury

One Staff Assistant to the Principal Deputy Assistant Secretary (International Affairs). Effective February 10, 1984.

Action

One Special Assistant to the Assistant Director of Policy and Planning. Effective February 10, 1984.

One Special Assistant to the Associate Director for Domestic and Anti-Poverty Operations. Effective February 16, 1984.

Administrative Office of the U.S. Courts

One Attorney-Advisor (Legislative) to the Legislative Affairs Officer. Effective February 3, 1984.

Agency for International Development

Special Assistant to the Assistant Administrator, Bureau for Program and Policy Coordination. Effective February 9, 1984.

One Deputy Assistant to the Administrator for Interbureau Affairs and Special Projects. Effective February 24, 1984.

Commission on Civil Rights

One Public Affairs Officer to the Assistant Staff Director for Congressional and Public Affairs, Office of the Staff Director. Effective February 29, 1984.

Commodity Futures Trading Commission

One Special Assistant to a Commissioner. Effective February 23, 1984.

Consumer Product Safety Commission

One Special Assistant (Legal) to the Chairman. Effective February 2, 1984.

Environmental Protection Agency

One Congressional Liaison Specialist to the Director, Office of Congressional Liaison. Effective February 6, 1984.

Equal Employment Opportunity Commission

One Deputy Director, Office of Public Affairs. Effective February 9, 1984.

Executive Office of the President

One Secretary to the Associate Director for Management, Office of Management and Budget. Effective February 29, 1984.

Export-Import Bank of the United States

One Secretary (Typing) to the President and Chairman, Office of the Board of Directors. Effective February 3, 1984.

Federal Emergency Management Agency

One Special Assistant to the Administrator, Federal Insurance Administration. Effective February 27, 1984.

International Trade Commission

One Staff Assistant (Economics) to a Commissioner. Effective February 24, 1984.

National Credit Union Administration

One Confidential Assistant to a Member of the Board. Effective February 1, 1984.

National Endowment for the Arts

One Director, Media, News and Special Events. Effective February 22, 1984.

Office of Personnel Management

One Special Assistant to the Assistant Director for Public Affairs. Effective February 3, 1984.

One Special Assistant to the Director, Office of the Director. Effective February 27, 1984.

One Confidential Assistant (Typing) to the Director, Office of Government Ethics. Effective February 27, 1984.

Securities and Exchange Commission

One Supervisory Public Affairs Specialist to the Chairman. Effective February 24, 1984.

One Confidential Assistant to a Commissioner. Effective February 29, 1984.

Small Business Administration

One Confidential Assistant to the Regional Administrator in New York, New York. Effective February 21, 1984.

One Special Assistant to the Administrator, Office of the Administrator. Effective February 21, 1984.

Office of Personnel Management.

Donald J. Devine,

Director.

BILLING CODE 6325-01-M

Proposed Extension of a Form

AGENCY: U.S. Office of Personnel Management.

ACTION: Notice of Proposed Extension of BRI 49–233, "Continuance of Child's Eligibility to Receive Benefits".

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (Title 44 U.S.C. Chapter 35) this notice announces a proposed extension of a form which collects information from the public. The BRI 49–233, Continuance of Child's Eligibility to Receive Benefits, was developed by the Office of Personnel Management, Civil Service Retirement System (OPM/CSRS), to determine continued survivor annuity eligibility for dependent children between the ages of 18 and 22 years. The form is sent at the end of each school year to collect information regarding the student's marital status and immediate plans to continue in school on a fulltime basis. Upon receipt of this completed form, OPM/CSRS determines whether or not benefits should be continued. For copies of this proposal, call John P. Weld, Agency Clearance Officer, on (202) 632–7720.

DATES: Comments on this proposal should be received on or before April 2, 1984.

ADDRESSES: Send or deliver comments to:

John P. Weld, Agency Clearance Officer, U.S. Office of Personnel Management, 1900 E Street, NW., Washington, D.C. 20415

and

Frank Reeder, Information Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3235, Washington, D.C. 20503

FOR FURTHER INFORMATION CONTACT: James L. Bryson on (202) 632–5472.

PENSION BENEFIT GUARANTY CORPORATION

Exemption From the Bond/Escrow Requirement Relating To Sale of Assets by an Employer That Contributes to a Multiemployer Plan; the Kittinger Company

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of exemption.

SUMMARY: The Pension Benefit Guaranty Corporation has granted The Kittinger Company an exemption from the bond/escrow requirement of section 4204(a)(1)(B) of the Employee Retirement Income Security Act of 1974, as amended. A notice of the request for exemption from this requirement was published on January 20, 1984 (49 FR 2567). The effect of this notice is to advise the public of the decision on the exemption request.

ADDRESSES: The request for an exemption and the PBGC response to the request are available for public inspection at the PGBC Communications & Public Affairs Department, Suite 7100, 2020 K Street, NW., Washington, D.C. 20006, between the hours of 9:00 a.m. and 4:00 p.m. A copy of these documents may be obtained by mail from the PBGC Disclosure Officer (160) at the above address.

FOR FURTHER INFORMATION CONTACT: James M. Graham, Attorney, Corporate Policy and Regulations Department (611), Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 20006; (202) 254–4860.

SUPPLEMENTARY INFORMATION:

Background

Section 4204(a)(1) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), 29 U.S.C. 1384, provides that the sale of assets of an employer that contributes to a multiemployer pension plan will not constitute a complete or partial withdrawal from the plan if certain conditions are met. One of these conditions is that the purchaser post a bond or deposit money in escrow for five plan years after the sale.

Section 4204(c) of ERISA authorizes the Pension Benefit Guaranty Corporation ("PBGC") to grant individual or class variances or exemptions from the purchaser's bond/escrow requirement of section 4204(a)(1)(B). Under § 2643.3(a) of the PBGC's regulation on procedures for variances for sales of assets (29 CFR Part 2643), the BPGC shall approve a request for a variance or exemption if it determines that approval of the request is warranted, in that it—

(1) Would more effectively or equitably carry out the purpose of Title IV of the Act; and

(2) Would not significantly increase the risk of financial loss to the plan.

The legislative history of section 4204 indicates a Congressional intent that the sales rules be administered in a manner

that assures protection of the plan with the least practicable intrusion into normal business transactions.

ERISA section 4204(c) and § 2643.3(b) of the regulation require the PBGC to publish a notice of the pendency of a request for a variance or an exemption in the **Federal Register**, and to provide interested parties with an opportunity to comment on the proposed variance or exemption.

Decision

On January 20, 1984 (49 FR 2567), the PBGC published a request from The Kittinger Company ("Kittinger") for an exemption from the requirement of ERISA section 4204(a)(1)(B). On December 15, 1983, pursuant to an asset purchase agreement with General Mills, Inc. ("General Mills"), Kittinger purchased substantially all of the assets of the Kittinger division of General Mills.

In connection with this sale, Kittinger has assumed the responsibilities of General Mills under a collective bargaining agreement with the United Furniture Workers of America, AFL–CIO, Local #39, which requires contributions to the United Furniture Workers Pension Funds A ("Fund"). General Mills' potential withdrawal liability to the Fund has been estimated to be $200,000. The amount of the bond/escrow that would be required under ERISA section 4204(a)(1)(B) is $81,497 (the annual contributions required to be made by General Mills for the plan year preceding the sale).

Kittinger is a new corporation, and thus was unable to submit financial statements in compliance with PBGC regulation (29 CFR 2643.2(d)(7)). All of its common stock is held by a newly formed holding company, The Corporate Holding Company ("Holding Company"). Kittinger did submit *pro forma* unaudited financial statements for its own operations as of December 15, 1983 (net assets of about $3 million) and for the Holding Company as of March 1, 1984 (net assets of $40,000).

Kittinger stated that the request for an exemption should be granted on a *de minimis* basis. The average annual contributions made by all employers to the Fund for the three plan years preceding the plan year in which the sale occurred was $5,401,840. Thus, the amount of the bond/escrow is about one and one-half percent of the amount of employer contributions. When the notice of pendency for this request was published, the PBGC indicated that it was considering granting the request for an exemption on a *de minimis* basis. No comments were received in response to the notice. The PBGC believes that when, as in this request, the amount of the bond/escrow is very small in comparison to the total annual contributions to a plan, an exemption from the bond/escrow requirement would not significantly increase the risk of financial loss to the plan. *Heinemann's, Inc., et al.* 48 FR 29638, June 27, 1983.

Therefore, based on the facts of this case and the representations and statements made in connection with the request for exemption, the PBGC has determined that this request is *de minimis* in nature and thus an exemption from the bond/escrow requirement is warranted, in that it would more effectively carry out the purpose of Title IV of ERISA and would not significantly increase the risk of financial loss to the Fund. Accordingly, the PBGC hereby grants the request by Kittinger for an exemption from the bond/escrow requirement. The granting of an exemption or variance from the bond/escrow requirement of section 4204(a)(1)(B) does not constitute a finding by the PBGC that the transaction satisfies the other requirements of section 4204(a)(1). The determination of whether the transaction satisfies such other requirements is made by the plan sponsor.

Issued at Washington, D.C. on this 16th day of March, 1984.

C. C. Tharp,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

Pendency of Request for Exemption From Bond Escrow Requirement Relating To Sale of Assets by an Employer That Contributes to a Multiemployer Plan; G. Heileman Brewing Company, Inc. (Lone Star Brewing Company)

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of pendency of request.

SUMMARY: This notice advises interested persons that the Pension Benefit Guaranty Corporation has received a request from G. Hileman Brewing Company, Inc. for an exemption from the bond/escrow requirement of section 4204(a)(1)(B) of the Employee Retirement Income Security Act of 1974 as amended. Section 4204(a)(1) provides that the sale of assets by an employer that contributes to a multiemployer pension plan will not constitute a complete or partial withdrawal from the plan if certain conditions are met. One of these conditions is that the purchaser post a bond or deposit money in escrow for five plan years beginning after the sale. The PBGC is authorized to grant exemptions from this requirement. Prior to granting an exemption, the PBGC is required to give interested persons an opportunity to comment on the exemption request. The effect of this notice is to advise interested persons of this exemption request and to solicit their views on it.

DATES: Comments must be submitted on or before May 11, 1984.

ADDRESSES: All written comments (at least three copies) should be addressed to: Director, Corporate Policy and Regulations Department (611), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, D.C. 20006. The request for exemption and the comments received will be available for public inspection at the PBGC Communications and Public Affairs Department, Suite 7100, at the above address, between the hours of 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: J. Ronald Goldstein, Attorney, Corporate Policy and Regulations Department (611), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, D.C. 20006; (202) 254-4860. [This is not a toll-free number.]

SUPPLEMENTARY INFORMATION:

Background

Section 4204(a)(1) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), 29 U.S.C. 1384, provides that a bona fide arm's-length sale of assets of a contributing employer to an unrelated party will not be considered a withdrawal if three conditions are met. These conditions, enumerated in section 4204(a)(1)(A)–(C), are that—

(A) The purchaser has an obligation to contribute to the plan for substantially the same number of contribution base units for which the seller was obligated to contribute;

(B) The purchaser obtains a bond or places an amount in escrow, for a period of five plan years after the sale, in an amount equal to the greater of the seller's average required annual contribution to the plan for the three plans years preceding the year in which the sale occurred or the seller's required annual contribution for the plan year preceding the year in which the sale occurred; and

(C) The contract of sale provides that if the purchaser withdraws from the plan within the first five plan years beginning after the sale and fails to pay any of its liability to the plan, the seller

shall be secondarily liable for the liability it (the seller) would have had but for section 4204.

The bond or escrow described above will be paid to the plan if the purchaser withdraws from the plan or fails to make any required contributions to the plan within the first five plan years beginning after the sale. Under ERISA section 4204(b)(2), the amount of the bond or escrow is doubled if the plan is in reorganization in the plan year in which the sale of assets occurs.

ERISA section 4204(c) authorizes the Pension Benefit Guaranty Corporation ("PBGC") to grant individual or class variances or exemptions from the purchaser's bond/escrow requirement of section 4204(a)(1)(B) and the contract-provision requirement of section 4204(a)(1)(C). The legislative history of section 4204 indicates a Congressional intent that the sales rules be administered in a manner that assures protection of the plan with the least practicable intrusion into normal business transactions. The granting of an exemption or variance from the requirements of section 4204(a)(1) (B) or (C) does not constitute a finding by the PBGC that the transaction satisfies the other requirements of section 4204(a)(1).

Under the PBGC's regulation on procedures for variances for sales of assets (29 CFR 2643.3(a)), the PBGC shall approve a request for a variance or exemption if it determines that approval of the request is warranted, in that it—

(1) Would more effectively or equitably carry out the purposes of Title IV of the Act; and

(2) Would not significantly increase the risk of financial loss to the plan.

Section 4204(c) of ERISA and § 2643.3(b) of the regulation require the PBGC to publish a notice of the pendency of a request for a variance or exemption in the **Federal Register**, and to provide interested parties with an opportunity to comment on the proposed variance or exemption.

The Request

The PBGC has received a request from G. Heileman Brewing Company, Inc. ("Heileman") to waive the bond/escrow requirement of ERISA section 4204(a)(1)(B). In the request, Heileman represents among other things, that:

1. Effective March 19, 1983, Heileman purchased the Lone Star Brewing Company ("Lone Star"), a wholly owned subsidiary of Pabst Brewing Company.

2. In connection with this sale, Heileman has assumed the responsibilities of Lone Star under a collective bargaining agreement with the International Association of Machinists and Aerospace Workers, Local 36, which requires contributions to the I.A.M. National Pension Fund, Benefit Plan A (the "Fund").

3. The estimated amount of Lone Star's withdrawal liability to the Fund is $529,562. The estimated amount of the bond/escow that would be required under ERISA section 4204(a)(1)(B) is $209,238 (the average annual contributions that Lone Star made to the Fund for the three plan years preceding the plan year in which the sale occurred).

4. In the purchase agreement, Lone Star agreed that, if the purchaser withdraws within the five year period commencing with the first plan year beginning after the date of the sale and fails to pay withdrawal liability, Lone Star would be secondarily liable for any withdrawal liability it would have had to the Fund but for the operation of ERISA section 4204.

5. According to its audited consolidated financial statements, Heileman had total net assets for its fiscal year ended December 31, 1982 of approximately $194 million. Heileman's average net income after taxes for its three fiscal years preceding the sale was $40.2 million.

6. Heileman has sent a copy of this request to the Fund and the collective bargaining representative of Lone Star's former employees by certified mail, return receipt requested.

Comments

All interested persons are invited to submit written comments on the pending exemption to the above address, by May 11, 1984. All comments will be made a part of the record. Comments received, as well as the application for exemption, will be available for public inspection at the address set forth above.

Issued at Washington, D.C. on this 16th day of March, 1984.

C. C. Tharp,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

Pendency of Request for an Exemption From the Bond Escrow Requirement Relating to a Sale of Assets by an Employer That Contributes To a Multiemployer Plan; Rock-Tenn Company

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of pendency of request.

SUMMARY: This notice advises interested persons that the Pension Benefit Guaranty Corporation has received a request from Rock-Tenn Company for an exemption from the bond/escrow requirement of section 4204(a)(1)(B) of the Employee Retirement Income Security Act of 1974. Section 4204 (a)(1) provides that the sale of assets by an employer that contributes to a multi-employer pension plan will not constitute a complete or partial withdrawal from the plan if certain conditions are met. One of these conditions is that the purchaser post a bond or deposit money is escrow for a five plan year period beginning after the sale. The PBGC is authorized to grant individual and class exemptions from this requirement. Prior to granting an exemption, the PBGC is required to give interested persons an opportunity to comment on the exemption request. The effect of this notice is to advise interested persons of this exemption request and to solicit their views on it.

DATES: Comments must be submitted on or before May 11, 1984.

ADDRESSES: All written comments (at least three copies) should be addressed to: Director, Corporate Policy and Regulations Department (611), Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 20006. The request for exemption and the comments received will be available for public inspection at the PBGC Communications and Public Affairs Department, Suite 7100, at the above address, between the hours of 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: J. Ronald Goldstein, Attorney, Corporate Policy and Regulations Department (611), Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 20006; (202) 254-4860. [This is not a toll-free number.]

SUPPLEMENTARY INFORMATION:

Background

Section 4204 of the Employee Retirement Income Security Act of 1974, as amended by the Multiemployer Pension Plan Amendments Act of 1980, (ERISA), 29 U.S.C. 1384, provides that a bona fide arm's-length sale of assets of a contributing employer to an unrelated party will not be considered a withdrawal if three conditions are met. These conditions, enumerated in section 4204(a)(1)(A)–(C), are that—

(A) The purchaser has an obligation to contribute to the plan for substantially the same number of contribution base units for which the seller was obligated to contribute;

(B) The purchaser obtains a bond or places an amount in escrow, for a period

of five plan years after the sale, in an amount equal to the greater of the seller's average required annual contibution to the plan for the three plan years preceding the year in which the sale occurred or the seller's required annual contribution for the plan year preceding the year in which the sale occurred; and

(C) The contract of sale provides that if the purchaser withdraws from the plan within the first five plan years beginning after the sale and fails to pay any of its liability to the plan, the seller shall be secondarily liable for the liability it (the seller) would have had but for section 4204. The bond or escrow described above will be paid to the plan if the purchaser withdraws from the plan or fails to make any required contributions to the plan within the first five plan years beginning after the sale.

Additionally, section 4204(b)(1) provides that if a sale of assets is covered by section 4204, the purchaser assumes by operation of law the contribution record of the seller for the plan year in which the sale occurred and the preceding four plan years.

Section 4204(c) of ERISA authorizes the Pension Benefit Guaranty Corporation ("PBGC") to grant individual or class variances or exemptions from the purchaser's bond/escrow requirement of section 4204(a)(1)(B) when warranted. The legislative history of section 4204 indicates a Congressional intent that the sales rules be administered in a manner that assures protection of the plan with the least practicable intrusion into normal business transactions. The granting of an exemption or variance from the requirements of section 4204(a)(1)(B) does not constitute a finding by the PBGC that a particular transaction satisfies the other requirements of section 4204(a)(1).

Under the PBGC's regulation on procedures for variances for sales of assets (29 CFR 2643.3(a)), the PBGC shall approve a request for a variance or exemption if it determines that approval of the request is warranted, in that it—

(1) Would more effectively or equitably carry out the purposes of Title IV of the Act; and

(2) Would not significantly increase the risk of financial loss to the plan.

Section 4204(c) of ERISA and § 2643.3(b) of the regulation require the PBGC to publish a notice of the pendency of a request for a variance or exemption in the **Federal Register**, and to provide interested parties with an opportunity to comment on the proposed variance or exemption.

The Request

The PBGC has received a request from the Rock-Tenn Company ("Rock-Tenn") to waive the bond/escrow requirement of ERISA section 4204(c)(1)(B). In the request, Rock-Tenn represents, among other things, that:

1. On August 1, 1983, Rock-Tenn purchased the assets of the Partition/Mill Division and Dallas Folding Carton Plant of the Clevepak Corporation ("Clevepak").

2. In connection with the sale, Rock-Tenn has assumed the responsibilities of Clevepak under collective bargaining agreements with the following unions: (a) United Paperworkers International Union, AFL–CIO and Local Union No. 826; (b) United Paperworkers International Union, AFL–CIO and Local Union No. 1106; (c) United Paperworkers International Union, AFL–CIO and Philadelphia Local Union No. 286; (d) United Paperworkers International Union, AFL–CIO and Local Union No. 200; and (e) United Paperworkers International Union, AFL–CIO and Greater Milwaukee Local No. 200. These agreements require contributions to the Paper Industry Union-Management Pension Fund ("Fund"). The Fund has computed Clevepak's potential withdrawal liability to be $0. Clevepak is continuing to contribute to the Fund for operations other than those subject to this sale of assets. [The PBGC takes no position as to whether there has been or will be complete or partial withdrawal with respect to the Fund as a result of the sale of assets described in this notice.]

3. The amount of the bond/escrow that would be required under ERISA section 4204(a)(1)(B) is $138,200 (the annual contribution required to be made by Clevepak for the three plan years preceding the sale).

4. In the sale contract, Clevepak agreed that, if the purchaser withdraws and fails to pay withdrawal liability within five years of the date of the sale, Clevepak would be secondarily liable for any withdrawal liability it would have had to the Fund but for the operation of ERISA section 4204.

5. In accordance with PBGC regulation (29 CFR 2643.2(d)(7)), copies of Rock-Tenn's unaudited financial statements for its fiscal years 1980, 1981 and 1982 were submitted as part of the application. However, Rock-Tenn has asserted that the financial information is exempt from disclosure under the Freedom of Information Act (5 U.S.C 552(b)(4)).

6. Rock-Tenn stated that the request for an exemption should be granted on a *de minimis* basis. Based on information provided by the Fund, the average annual contributions made by all employers to the Fund for the three plan years preceding the plan year in which the sale occurred were $23,937,019. Thus, the amount of the bond/escrow is about six-tenths of one percent of the amount of employer contributions. The PBGC is considering granting this request on a *de minimis* basis.

7. A copy of this request has been sent by Rock-Tenn to the Fund and the collective bargaining representatives of Clevepak's former employees, by certified mail return receipt requested.

Comment

All interested persons are invited to submit written comments on the pending request for exemption to the above address, on or before May 11, 1984. All comments will be made a part of the record. Comments received, as well as the relevant information submitted in support of the application for exemption, will be available for public inspection at the address set forth above.

Issued at Washington, D.C., on this 16th day of March 1984.

C. C. Tharp,

Executive Director, Pension Benefit Guaranty Corporation.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

March 20, 1984.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB (listed by submitting bureaus), for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of these submissions may be obtained from the Treasury Department Clearance Officer, by calling (202) 535-6020. Comments regarding these information collections should be addressed to the OMB reviewer listed at the end of each bureau's listing and/or to the Treasury Department Clearance Officer, Room 7227, 1201 Constitution Avenue, N.W., Washington, D.C. 20220.

Internal Revenue Service

OMB Number: 1545-0491
Form Number: IRS Forms 6243/6013

Type of Review: Revision
Title: SBW Information Card/SBW Evaluation Questionnaire
OMB Number: 1545–0197
Form Number: Forms 5300, Schedule T and 5301
Type of Review: Revision
Title: Application for Determination for Defined Benefit Plan, Supp. Application for Approval of Employee Benefit Plans Under TEFRA, Application for Determination for Defined Contribution Plan
OMB Number: 1545–0028
Form Number: Forms 940 and 940PR
Type of Review: Revision
Title: Employer's Annual Federal Unemployment Tax (FUTA) Return
OMB Number: 1545–0035
Form Number: Forms 943, 943PR, 943A, 943A–PR
Type of Review: Revision
Title: Employer's Annual Tax Return for Agricultural Employees
OMB Reviewer: Norman Frumkin (202) 395–6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, D.C. 20503

U.S. Customs Service

OMB Number: 1515–0029
Form Number: Customs Form 7573
Type of Review: Revision
Title: Drawback Entry for Exported Articles
OMB Reviewer: Judy McIntosh (202) 395–6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, D.C. 20503.

Gary Kowalczyk,
Departmental Reports, Management Office.

Customs Service

Application for Recordation of Trade Name: "The Drackett Company"

AGENCY: Customs Service, Treasury.
ACTION: Notice of application for recordation of trade name.

SUMMARY: Application has been filed pursuant to § 133.12, Customs Regulations (19 CFR 133.12), for the recordation under section 42 of the Act of July 5, 1946, as amended (15 U.S.C. 1124), of the trade name "THE DRACKETT COMPANY" used by the Drackett Company, a corporation organized under the laws of the State of Delaware, located at 5020 Spring Avenue, Cincinnati, Ohio 45232.

The application states that the trade name is used in connection with the following merchandise manufactured in the United States: household care products, including preparations for windows, floors, tile, etc.; furniture and furniture polishes; drain cleaners; air deodorants and disinfectants, etc.; mops and brooms.

Before final action is taken on the application, consideration will be given to any relevant data, views, or arguments submitted in writing by any person in opposition to the recordation of this trade name. Notice of the action taken on the application for recordation of this trade name will be published in the **Federal Register.**

DATE: Comments must be received on or before May 29, 1984.

ADDRESS: Written comments should be addressed to the Commissioner of Customs, Attention: Entry, Licensing and Restricted Merchandise Branch, 1301 Constitution Avenue, NW., Room 2417, Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Harriet Lane, Entry, Licensing and Restricted Merchandise Branch, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (201–566–5765).

Dated: March 19, 1984.
Edward T. Rosse,
Acting Director, Entry Procedures and Penalties Division.

1

FEDERAL COMMUNICATIONS COMMISSION

March 22, 1984.

The Federal Communications Commission will hold a Closed Meeting on the subjects listed below on Thursday, March 29, 1984 following the Open Meeting, which is scheduled to commence at 2:00 P.M. in Room 856, at 1919 M Street, N.W. Washington, D.C.

Agenda, Item No., and Subject

Hearing—1—Applications for Review of rulings dismissing an application and approving settlement agreements in the Yucca Valley, California, comparative FM proceeding (Docket Nos. 82–135 et. al.).

Hearing—2—Petition for Reconsideration in the Ventura, California FM proceeding (Docket Nos. 80–366, 80–367 and 80–369).

These items are closed to the public because they concern Adjudicatory Matters (See 47 CFR 0.603(j)).

The following persons are expected to attend:

Commissioners and their Assistants
Managing Director and members of his staff
General Counsel and members of his staff
Chief, Office of Public Affairs and members of his staff

Action by the Commission March 21, 1984. Commissioners Fowler, Chairman; Quello, Dawson, Rivera and Patrick voting to consider these items in Closed Session.

This meeting may be continued the following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from Sally Lawrence, FCC Public Affairs Office, telephone number (202) 254–7674.

William J. Tricarico,

Federal Communications Commission.

2

FEDERAL COMMUNICATIONS COMMISSION

March 22, 1984.

The Federal Communications Commission will hold an Open Meeting on the subjects listed below on Thursday, March 29, 1984, which is scheduled to commence at 2:00 P.M., in Room 856, at 1919 M Street, NW., Washington, D.C.

Agenda, Item No., and Subject

Private Radio—1—Title: Report and Order concerning aeronautical advisory station rules in the Aviation Services. Summary: The FCC will consider whether to amend rule Part 87 (Aviation Services) to remove the one aeronautical advisory station (unicom) per airport limitation at airports with control towers. The FCC will also consider whether to modify the rules concerning the frequencies available for assignment at airports which do not have control towers.

Private Radio—2—Title: Order in the Matter of Petition for Reconsideration of Specialized Mobile Radio System licensee Texas Two-Way, Inc. seeking reconsideration of the Commission's decision in *Texas Two-Way, Inc.*, FCC 83–472 (released October 26, 1983). Summary: The Commission will consider Texas Two-Way's argument that the Commission's *Memorandum Opinion and Order*, PR Docket No. 79–191, *et al.*, 48 FR 51917 (November 15, 1983), requires reconsideration of the denial of Texas Two-Way's Application for Review.

Audio—1—Title: The acceptability for filing of applications by E. Kaye Johnson for new commercial FM translator stations, in view of the requirement of express written retransmission consent pursuant to Section 325(a) of the Communications Act and Section I, Question 4(b) of FCC Form 346. Summary: The Commission will consider whether the applications contain sufficient express written retransmission consent and are technically feasible, and thus are acceptable for filing.

Audio—2—Title: Application for Review filed by Anthony R. Martin-Trigona and New Haven Radio, Inc., jointly and severally, of the application of Daniel Meister, Esq., Trustee in Bankruptcy, for consent to the involuntary assignment of the license of WNHC(AM), New Haven, Connecticut. Summary: The Commission considers an application for review filed by Anthony R. Martin-Trigona and New Haven Radio, Inc.

Audio—3—Title: Petition for Extraordinary Relief by West Coast Media, Inc., KIFM, San Diego, California. Summary: The Commission will consider the petition for Extraordinary Relief by West Coast Media, Inc., to permit "distress sale" of KIFM, San Diego, California, or, alternatively, interim operation.

Policy—1—Title: Application for Review filed by Stone Communications, Inc. seeking review of an FM rule making action. Summary: The Commission will consider an Application for Review of an action assigning Class C FM Channel 293 for Brewer, Maine, and denying the request for modification of Station WGUY–FM to specify the new channel.

Policy—2—Title: Mass Media Docket No. 82–441 relating to subscription television authorization for noncommercial educational television station licensees. Summary: The Commission will consider whether to authorize noncommercial educational television station licensees to transmit programming on a subscription basis.

Policy—3—Title: Amendment of Parts 2 and 73 of the Commission's Rules Concerning use of Subsidiary Communications Authorizations. Summary: The Commission will consider a recommendation by the Mass Media Bureau concerning maximum peak modulation levels for FM broadcast.

Policy—4—Title: Amendment of Part 76, Subpart J, of the Commission's Rules and Regulations Relative to Cable Television System's; and Postponement of Divestiture Requirement of 76.501 Relative to Prohibited Cross-Ownership in Existence on or before July 1, 1970. (Docket 20423). Summary: The Commission will consider whether to require divestiture of all commonly-owned, co-located cable/broadcast combinations which were in existence on or before July 1, 1970.

Policy—5—Title: Reexamination of the Commission's Rules and Policies regarding the Attribution of Ownership Interests in Broadcast, Cable Television and Newspaper Entities. (Dockets Nos. M 83–46, 20521, 20548, BC 78–239; RMs 3653, 3695, 4045.) Summary: The Commission considers a variety of modifications to its ownership attribution rules, including the establishment of a new benchmark at which to consider a stock interest as an ownership interest, the continuation of its use of separate benchmarks depending on the size of the licensee or the nature of the investor, the attribution of various kinds of nonvoting interests, the correct attribution to ultimate owners in vertical chains of ownership, the treatment of officers and directors of parent and sister corporations of licensee, and the reporting of the ownership of a licensee to the Commission.

Policy—6—Title: Amendments of Parts 2 and 73 of the Commission's Rules Concerning Use of Subsidiary Communications Authorization. Summary: The Commission will consider Petitions for Reconsideration of the *First Report and Order* in BC Docket No. 82–536, FM subchannels.

Policy—7—Title: The use of subcarrier frequencies in the aural baseband of television transmitters. Summary: The Commission will consider whether to allow expanded use of subcarriers in the aural portion of television signals. Uses could include, for example, stereophonic aural programming, a second language channel, paging, or most any other ancillary purpose.

Enforcement—1—Title: Application for Review of a Bureau ruling denying a Fairness Doctrine complaint, filed by Brent Buell, et al. Summary: The Mass Media Bureau found that complainants failed to establish a prima facie fairness complaint. The Commission will consider whether this finding is correct.

Enforcement—2—Title: Application for Review of a Bureau ruling denying a Fairness Doctrine complaint, filed by the Yes to Stop Callaway Committee. Summary: The Mass Media Bureau found that television station KTVI was not unreasonable in concluding that the need for the Callaway nuclear plant was not a current controversial issue of public importance. The Commission will consider whether this finding is correct.

This meeting may be continued the following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from Sally Lawrence, FCC Public Affairs Office, telephone number (202) 254–7674.

William J. Tricarico

Secretary, Federal Communications Commission.

3

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

March 21, 1984.

TIME AND DATE: 2:00 p.m., Monday, March 26, 1984.

PLACE: Room 600, 1730 K Street NW., Washington, D.C.

STATUS: Closed (Pursuant to 5 U.S.C. 552b(c)(10)).

MATTERS TO BE CONSIDERED: The Commission will continue with a previously announced meeting and discuss the following:

1. Secretary of Labor, MSHA v. Carbon County Coal Company, Docket No. WEST 82–10L

It was determined by a unanimous vote of Commissioners that the meeting described above be continued and that no earlier announcement of the continuation was possible. 5 U.S.C. § 552b(e)(1).

CONTACT PERSON FOR MORE INFORMATION: Jean Ellen (202) 653–5629.

Jean H. Ellen,

Agenda Clerk.

4

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

March 21, 1984.

TIME AND DATE: 10:00 a.m., Wednesday, March 28, 1984.

PLACE: Room 600, 1730 K Street, NW., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission will consider and act upon the following:

1. Bobby Holt v. Southern Stone Co., Docket No. Se 83–49–DM; Petition for Discretionary Review. (Issues include whether the administrative law judge erred in concluding that the operator did not discriminate against the miner and in dismissing the miner's discrimination complaint.)

2. Richard Bjes v. Consolidation Coal Company, Docket No. Penn 82—26–D. (Issues include whether the administrative law judge erred in concluding that the operator discriminated against the miner in violation of Section 105(c) of the Mine Act.)

CONTACT PERSON FOR MORE INFORMATION: Jean Ellen, (202) 653–5629.

Jean H. Ellen,

Agenda Clerk.

5

THE FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS

TIME AND DATE: 10:00 a.m., Monday, April 2, 1984.

PLACE: 20th Street and Constitution Avenue, NW., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204

Dated: March 23, 1984.

James McAfee,

Associate Secretary of the Board.

6

INTERNATIONAL TRADE COMMISSION

TIME AND DATE: 10:00 a.m., Monday, April 2, 1984.

PLACE: Room 117, 701 E Street, NW., Washington, D.C. 20436.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. Agenda.
2. Minutes.
3. Ratifications.
4. Petitions and complaints, if necessary.
5. Investigations 731–TA–134 and –135 (Color Television Receivers from the Republic of Korea and Taiwan)—briefing and vote.
6. Any items left over from previous agenda.

CONTACT PERSON FOR MORE INFORMATION: Kenneth R. Mason, Secretary, (202) 523–0161.

Kenneth R. Mason,

Secretary.

7

INTERNATIONAL TRADE COMMISSION

TIME AND DATE: 2:30 p.m., Thursday, April 5, 1984.

PLACE: Room 117, 701 E Street, NW., Washington, D.C. 20436.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. Presentation of service awards.
2. Petitions and complaints:
   a. Optical waveguide fibers (Docket No. 1036).
3. Investigation 731–TA–136 (Cyanuric Acid and Its Chlorinated Derivatives from Japan)—briefing and vote.

CONTACT PERSON FOR MORE INFORMATION: Kenneth R. Mason, Secretary, (202) 523–0161.

Kenneth K. Mason,

Secretary.

NATIONAL TRANSPORTATION SAFETY BOARD

[NM–84–11]

TIME AND DATE: 9 a.m., Tuesday, April 3, 1984.

PLACE: NTSB Board Room, 8th Floor, 800 Independence Ave., SW., Washington, D.C. 20594.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. *Safety Study* on the General Deterrence Approach to Drunk Driving.
2. *Highway Accident Report*—Valley Supply Company Truck Towing Farm Plows/Anchor Motor Freight, Inc., Car Carrier Truck/N.Y. Association for Retarded Children Bus Collisions and Fire, State Route 8, near Holmesville, New York, April 5, 1983.
3. *Highway Accident Report*—Samuel Coralozzo Company, Inc., Tractor Cargo TAnk Semitrailer, Mechanical Failure, Overturn, and Fire, Interstate 76, Philadelphia, Pennsylvania, October 7, 1983.
4. *Recommendations* to the Federal Highway Administration and Mack Trucks, Inc., concerning failure of commercial vehicle suspension components.
5. *Recommendations* to the Boston Gas Company, the American Gas Association, and the American Public Gas Association concerning natural gas overpressure and fire in East Boston, Massachusetts, September 23, 1983.

CONTACT PERSON FOR MORE INFORMATION: Sharon Flemming, (202) 382–6525.

H. Ray Smith, Jr.,

Federal Register Liaison Officer.

Environmental Protection Agency

Review of Standards of Performance for New Stationary Sources; Grain Elevators

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 60

[AD-FRL-2517-3]

Review of Standards of Performance for New Stationary Sources; Grain Elevators

AGENCY: Environmental Protection Agency.

ACTION: Review of Standards.

SUMMARY: The existing standards of performance to control emissions of particulate matter from grain elevators have been reviewed under the Clean Air Act. This review indicates that no revision to the standards is necessary.

DATES: *Comments.* Comments must be received on or before May 29, 1984.

ADDRESSES: *Comments.* Send comments (in duplicate if possible) to the Central Docket Section (LE–131), U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, Attention: Docket No. A–83–14.

Review Document. The review document, which summarizes information gathered during the review, may be obtained from the EPA Library (MD–35), Research Triangle Park, North Carolina, 27711, telephone number (919) 541–2777. Please refer to "Review of Standards of Performance for Grain Elevator Industry, EPA–450/3–84–001," January 1984.

Docket. Information used in reviewing the standards is contained in Docket No. A–83–14. The docket is available for public inspection and copying between 8:00 a.m. and 4:00 p.m., Monday through Friday, at EPA's Central Docket Section, West Tower Lobby, Gallery 1, Waterside Mall, 401 M Street, S.W., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

For Further information on policy questions contact: Mr. Robert Ajax, Standards Development Branch, Emission Standards and Engineering Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina, 27711, Telephone: (919) 541–5624.

For further information on technical questions contact: Mr. James U. Crowder, Industrial Studies Branch, Emission Standards and Engineering Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina, 27711, Telephone: (919) 541–5601

SUPPLEMENTARY INFORMATION:

Background

In January 1977, (42 FR 2842) standards of performance were proposed, under Section 111 of the Clean Air Act, to control emissions of particulate matter from grain elevators. The standards were promulgated on August 3, 1978 (43 FR 34340).

The Clean Air Act requires that standards of performance be reviewed every 4 years. The principal objectives of the review are to determine, (a) if the new source performance standards (NSPS) are being achieved based upon performance tests, (b) if there are new or improved emission control systems available which are capable of achieving additional emission reduction, (c) if there are unusual operating problems with emission control systems or problems in conducting performance tests, and (d) the capital and annualized costs of operating emission control systems. The review has been completed, draft copies of the findings were distributed to government, environmental, and industry representatives and discussed at the April 26, 1983, meeting of the National Air Pollution Control Techniques Advisory Committee NAPCTAC).

The NSPS apply only to new, modified, or reconstructed grain elevators with a permanent storage capacity of more than 88,100 cubic meters (m^3) or 2.5 million bushels. Country elevators with smaller capacities are exempted specifically via Section 111(i) of the Clean Air Act, as amended in 1977. The standards also apply to new, modified, or reconstructed grain storage elevators at wheat mills, flour mills, wet corn mills, dry corn mills (human consumption), rice mills, and soybean extraction plants with a permanent grain storage capacity of more than 35,200 m^3 or 1.0 million bushels.

The standards limit particulate matter emissions fom 10 types of affected facilities at grain elevators by limiting the visibility of emissions released to the atmosphere at the affected facilities and the concentration of particulate matter exhausted from the emission control devices. The affected facilities are each truck loading station, truck unloading station, railcar loading station, railcar unloading station, barge or ship loading station, barge or ship unloading station, grain dryer, and all grain handling operations.

The standards can be summarized as follows:

(a) Truck loading station—visible emissions may not exceed 10 percent opacity.

(b) Truck unloading station, railcar loading station, and railcar unloading station—visible emissions may not exceed 5 percent opacity.

(c) Ship or barge loading station—visible emissions may not exceed 20 percent opacity.

(d) Ship or barge unloading station—specified equipment or its equivalent must be used.

(e) Grain dryer—specified equipment must be used, or visible emissions may not exceed 0 percent opacity.

(f) All grain handling operations—visible emissions may not exceed 0 percent opacity.

(g) Emission control devices—visible emissions may not exceed 0 percent opacity; and the concentration of particulate matter in the exhaust gas discharged to the atmosphere may not exceed 0.023 g/dscm (0.01 gr/dscf).

Findings

Overview of the Grain Elevator Industry

The grain elevator industry consists of about 15,000 existing facilities, widely dispersed throughout the United States, with the majority located in the grain belt States. Grain elevator storage capacity can range from a few hundred thousand bushels for small country elevators to several million bushels for large terminals. Grain elevators will handle many times more grain on an annual basis than their storage capacity, and the industry prefers to be known as "grain handling facilities" rather than grain elevators.

Growth of grain production is unclear at this time because of world market uncertainties, surplus supplies, and governmental policies. However, it is anticipated that some new and modified grain elevator facilities will be constructed over the next 5 years and be subject to the NSPS.

Particulate Matter and Emissions Control Technology

Grain elevators are significant sources of particulate matter if good capture and control devices are not used. Particulate matter (PM) emissions are generated at all points where grain is handled. However, most modern grain handling facilities have installed enclosed grain handling equipment (e.g., elevator legs) and enclosed conveyor systems (at least all transfer points) and use baghouses exclusively as the control devices. All NSPS facilities are in compliance with the current standard and PM emissions are reduced substantially. For example, a typical facility that handles 80 million bushels of grain per year and has 5 million bushels of storage capacity

would emit about 2600 tons of PM per year without NSPS controls. If the plant were to meet the NSPS, emissions of PM would be reduced by about 96 percent or to about 100 tons of PM per year.

The EPA Regional offices, State and local air pollution control agencies, and industry representatives were contacted to determine the number and location of new, modified, or reconstructed facilities subject to the existing NSPS. Available test data and information from State and local air pollution control agencies and industry representatives regarding all facets of the existing standards were solicited. During the review, six grain elevators were located that were subject to the existing standards. Each of these grain elevators was visited and found to be in compliance with the existing standards. Additionally, 12 other well-controlled grain elevators were visited to obtain information on control technology and costs.

Based on the data and information gathered during these visits, no significant problems associated with the existing standards of performance were identified. The emission control technology and its performance remain essentially the same as that analyzed during the original investigations to develop the existing standards. No demonstrated particulate control technology was found which was more effective than fugitive emissions capture and ventilation to baghouses. As expected, the costs of emission control have increased somewhat in response to inflation; however, they remain quite reasonable. The average cost effectiveness of emission control, for example, ranges from a low of about $90 per ton of PM for the standard limiting emissions from grain dryers to a high of about $870 per ton for the standard limiting emissions from ship loading. The plant average cost-effectiveness of $500 per ton of PM removed.

Based on this review, no revisions to the existing standards of performance are considered appropriate. However, in the course of the reviews, various operating practices were observed and various questions raised which deserve comment or clarification of the existing standards. Each of these aspects is discussed below.

Truck Unloading

The existing standard for truck unloading is based on a shed that has doors that can be closed before unloading the truck. This system was found to still be the best demonstrated system of emission reduction. During visits to some new truck unloading facilities not subject to the standard, the EPA observed that those facilities that were open on each end did not reduce emissions to the level of the NSPS opacity standard. Only those truck unloading facilities with doors closed on one end of the truck unloading station were able to reduce opacity to the level of the standard.

Barge or Ship Loading

Compliance with the NSPS opacity standard for barge and ship loading was of some concern to the National Grain and Feed Association. In fact, the Association commented that the barge and ship loading opacity standard should be eased.

During loading, two types of pouring spouts can be used. One type is the standard telescoping spout. The spout can direct the grain into a ship's hold while the hold is covered with canvas. Another approach is to maintain the telescoping spout at a location within a few inches of the grain surface. This involves another telescoping pouring spout which uses a choke or controlled feeder on the end of the spout. Many loading spouts have aspiration at the end of the spout that captures the dust and directs it to a baghouse. These two systems were found to still be the best control techniques for capture and collection of particulate emissions.

All of these systems can comply with the NSPS opacity standard for barge and ship loading; however, they do require very careful and skillful operation of the loading spouts by the operators. The highest emissions during loading come during "topping off" or filling about the last 25 percent of the ship's hold, especially when tarps have to be removed so the operators can be sure the hold is completely filled, the grain is level, and the ship is balanced. Even under these conditions, however, careful operation of the loading spout will ensure compliance with the NSPS opacity limit of 20 percent. Observations during the review did not indicate a need to change the NSPS.

Dryers

During the review, the EPA found that one dryer manufacturer is using a woven wire screen with rectangular openings of 0.0486 inch by 0.5 inch to control emissions from the dryer rather than the mesh screen and perforated plates with circular openings that were in widespread use when the NSPS was developed. Observations by air pollution control enforcement personnel associated with the State of North Dakota indicate that this system can comply with the NSPS opacity limit for dryers. Consequently, there is no need to change the existing equipment standard to accommodate this type of woven wire screen.

Fugitive Emission Opacity Observations

Observing the opacity of fugitive emissions is sometimes difficult. EPA Reference Method 9 should be used by having the observer positioned so that he or she has a clear view of the emission source and the potential fugitive emissions, with the sun or other light source at the observer's back. The observer's position should be at least 15 feet from the source of emissions. The line of sight should be approximately perpendicular to the general flow of the potential fugitive emissions and readings of opacity should be made at the point of highest opacity. The development of the existing NSPS was based on the use of these techniques and, therefore, remains consistent with Method 9.

Modifications

Some confusion apparently exists concerning how the addition of storage capacity to an existing facility should be considered. Storage capacity determines only whether the NSPS potentially applies to some portion of a grain elevator. It does not determine whether any individual grain handling operation, such as a dryer or a ship loading station, has been modified. To be subject to the NSPS as a modified facility, an existing grain handling operation must be altered or changed in some manner which results in an increase in emissions. However, this alteration or change would exclude production increases, if accomplished without by capital expenditures as defined in the General Provisions of Part 60 of the Code of Federal Regulations which apply to all NSPS. Consequently, the addition of storage capacity to an existing grain elevator in the absence of any other alteration or change is not considered a modification of any of the individual existing grain handling operations at the elevator. However, if a grain storage elevator (mill) with 800,000 bushels of existing storage capacity adds another 800,000 bushels of new storage capacity and also adds associated new grain handling equipment, then the new grain handling equipment associated with the 800,000 bushels of new storage capacity would be subject to the standard. Any existing, unchanged grain handling equipment at the mill would not be covered by the standard.

Applicability Definition

Some confusion also apparently exists concerning the applicability of the NSPS to grain storage plants. For example, one

company questioned the applicability of the NSPS to a case in which the company constructed a large storage building to hold several million bushels of grain. The grain is unloaded and loaded from this plant and no other handling (screening, drying, etc.) is done to the grain. The individual loading, unloading, and grain handling operations at this plant would be subject to the NSPS, provided the permanent storage capacity is greater than 88,100 m^3 (2.5 million bushels), because the plant would still be considered a grain elevator.

Risks of Explosions

Many persons who commented on the proposed standards in 1978 were concerned about the safety aspects of enclosing grain handling areas and the possible increased risk of dust explosions at grain elevators resulting from the addition of control devices. Following some large grain elevator explosions in 1977, industry, labor, and government increased their explosion prevention efforts. One of these efforts, initiated by the Occupational Safety and Health Administration (OSHA), the Department of Agriculture, and the National Institute of Occupational Safety and Health (NIOSH), was a request for the National Academy of Sciences National Materials Advisory Board to establish a panel to study the grain-handling industry and to recommend measures to reduce explosion hazards. The panel included grain elevator and safety experts from the academic community, grain elevator owners and operators, contractors who construct elevators, vendors, insurance underwriters, government personnel, and other safety experts.

In 1982, the panel released their report, "Prevention of Grain Elevator and Mill Explosions." In this report, one of the top priorities for safe operation of grain elevators or mills is to remove the dust being generated during grain handling to keep it from being in a confined area or collecting or surfaces of equipment, floors, or walls. To accomplish this, the panel recommended that all dust generator systems be enclosed or hooded, and aspirated to a control device. This is consistent with the existing NSPS.

Small Elevators

Some commentators on the standards proposed in 1977 erroneously believed that the NSPS covers small country elevators as well as large grain elevators. Consistent with the 1977 Clean Air Amendments, the NSPS applied only to grain storage elevators (mills) of one million bushels of storage capacity or greater, and grain handling elevators of 2.5 million bushels of storage capacity or greater. Small country elevators are not covered by the NSPS.

Reporting and Record Keeping Requirements

Two types of reporting are associated with the existing standard. First, there are notification requirements, which enable EPA to keep abreast of facilities that are or would be subject to the standards. Second, there is reporting of the results of performance tests that have been or will be conducted to determine compliance with the standards. These reports are required by the General Provisions of 40 CFR Part 60, which apply to all NSPS. No changes in the existing reporting and record keeping requirements are being proposed.

List of Subjects in 40 CFR Part 60

Air pollution control, Aluminum, Ammonium sulfate plants, Asphalt, Cement industry, Coal, Copper, Electric power plants, Glass and glass products, Grains, Intergovernmental relations, Iron, Lead, Metal, Metallic minerals, Motor vehicles, Nitric acid plants, Paper and paper products industry, Petroleum, Phosphate, Sewage disposal, Steel, Sulfuric acid plants, Waste treatment and disposal, Zinc, Tires, Incorporation by reference, Can surface coating, Sulfuric acid plants, Industrial organic chemicals, Organic solvent cleaners, Fossil fuel-fired steam generators.

Dated: March 16, 1984.

William D. Ruckelshaus,

Administrator.

Part III

Department of Energy

Federal Energy Regulatory Commission

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978; Notices

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Vol. 1088]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: March 20, 1984.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection expect to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register.**

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd., Springfield, Va 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 Mile rule)
102–3: New well (1000 Ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease

Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal Seams
107–DV: Devonian Shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation

Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

[FR Doc. 84-8091 Filed 3-26-84; 8:45 am]

BILLING CODE 6717-01-C

[Vol. 1089]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: March 20, 1984.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection expect to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd., Springfield, Va 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 Mile rule)
102–3: New well (1000 Ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal Seams
107–DV: Devonian Shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation

Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

[Docket Nos. CE-SPRM NY001, WI002, CA003, MN004, OR005]

Energy Conservation Program for Consumer Products; Final Rules Regarding State Petitions for Exemption From Federal Standards for Clothes Dryers and Kitchen Ranges and Ovens

AGENCY: Office of Conservation and Renewable Energy, DOE.

ACTION: Final rules.

SUMMARY: The Energy Policy and Conservation Act, as amended by the National Energy Conservation Policy Act, as a general matter requires that the Department of Energy prescribe an energy efficiency standard for each of certain major household appliances unless it determines, by rule, that a standard will not result in significant conservation of energy, is not technologically feasible, or is not economically justified.

On December 22, 1982, DOE issued a final rule with respect to clothes dryers and kitchen ranges and ovens in which DOE determined that an energy efficiency standard for either of these products would not result in a significant conservation of energy and would not be economically justified. In addition, the final rule set forth the procedures by which States may obtain exemption for State or local efficiency standards that are statutorily preempted as a result of a final rule with respect to energy efficiency standards.

DOE received petitions from the States of California, New York, Wisconsin, Minnesota and Oregon requesting, in each case, that the State energy efficiency standard requiring intermittent ignition devices (IIDs) for clothes dryers and/or kitchen ranges and ovens be exempted from Federal preemption.

On August 1, 1983, the Department of Energy published proposed rules to grant each State's petition. Today's final rules reflect DOE's final determination with respect to each of the five petitions. DOE is adopting final rules granting each State's petition seeking exemption from Federal preemption for each State's applicable standard requiring IIDs for clothes dryers and/or for kitchen ranges and ovens.

DATES: The effective date of these rules is April 26, 1984.

SUPPLEMENTARY INFORMATION:

I. Introduction

a. Authority

Part B of Title III of the Energy Policy and Conservation Act (EPCA), Pub. L. 94-163, as amended by the National Energy Conservation Policy Act (NECPA), Pub. L. 95-619,[1] created the Energy Conservation Program for Consumer Products Other Than Automobiles. The consumer products subject to this program (referred to hereafter as "covered products") are: Refrigerators and refrigerator-freezers; freezers; dishwashers; clothes dryers; water heaters; room air conditioners; home heating equipment, not including furnaces; television sets; kitchen ranges and ovens; clothes washers; humidifiers and dehumidifiers; central air conditioners; and furnaces, as well as any other consumer product classified by the Secretary of Energy, if the product uses a specified minimum amount of energy. *See* Section 322. The Secretary has not so classified any additional products.

Under the Act, the program consists essentially of three parts; testing, labeling, and energy efficiency standards.

For each of the covered products, DOE is required to establish energy efficiency standards that are designed to achieve the maximum improvement in energy efficiency that is technologically feasible and economically justified. Section 325(a) (1) and (c). The Act provides, however, that no standard for a product is to be established if there is no test procedure for the product, or if DOE determines by rule either that a standard would not result in significant conservation of energy or that a standard is not technologically feasible or economically justified. Section 325(b).

Section 327 of the Act addresses the effect of Federal rules concerning testing, labeling, and standards on State or local laws or regulations concerning such matters. Generally, all such State or local laws or regulations (State laws) are superseded by the Federal rule. Section 327(a). A rule by DOE that an efficiency standard is not technologically feasible, economically justified, or likely to save significant amounts of energy would be a rule that supersedes any State standard. Section 325(b). A State whose energy efficiency standard would be superseded, however, may petition the Department for a rule that it not be superseded, on the basis that there is a significant State or local interest to justify the standard and the State standard is more stringent. However, DOE cannot issue the requested rule if it finds that the State standard would unduly burden interstate commerce. Section 327(b)(3).

Because Section 327(b)(3) requires DOE to consider each State petition individually before DOE can issue a rule exempting the State or local standard from preemption, DOE could not issue a rule that makes a blanket determination for all the five States that petitioned.

b. Background

On December 22, 1982, DOE published a final rule with respect to two covered products, clothes dryers and kitchen ranges and ovens. (47 FR 57198.) (Hereafter referred to as the December 1982 rule.) With respect to both products, DOE determined that a standard would not result in significant conservation of energy and would not be economically justified. The December 1982 rule also established procedures governing petitions to DOE both by States to obtain exemption from preemption of State or local energy efficiency standards as well as by manufacturers to obtain exemption from State or local energy efficiency standards.[2]

State standards subject to preemption include: energy efficiency requirements applicable to any particular type (or class) of covered products established by mandatory State or local building codes, including codes that incorporate consensus standards, such as those developed and issued by the American Society of Heating, Refrigerating, and Air Conditioning Engineers, Inc. (ASHRAE); prohibitions on standing pilot lights; and prohibitions on the

[1] Part B of Title III of EPCA, as amended by NECPA, 42 U.S.C. §§ 6291-6309, is referred to in this notice as the "Act."

[2] Persons subject to a State efficiency standard that has not been superseded by a Federal rule, may petition DOE to have the standard preempted based upon a finding by the Secretary of no significant State or local interest sufficient to justify the standard and a finding by the Secretary that the standard unduly burdens interstate commerce. Section 327(b)(1).

manufacture, sale and/or hook-up of appliances with less than a certain efficiency.

In the December 1982 rule, DOE also established the effective dates upon which supersession of State and local standards would take place. DOE determined that State and local laws for a particular product would be superseded 180 days after **Federal Register** publication of a final rule governing that particular product unless within 60 days of publication, a State had filed with the Department a notice of intent to petition DOE for an exemption for that product. The full petition itself had to be filed within 120 days of publication of the rule. When such a submission is made, the State or local rule will remain in effect until DOE reaches a final determination on the State petition.

In its petition, a State is required to present information which would appear on its face to show that the State's regulation is more stringent than the Federal standard and that there is a significant State or local interst in the State's regulation. The State is not required to provide information concerning the State regulation's impact on interstate commerce. A person opposing the State's petition should present information which would show that the State's proposed rule would place an undue burden on interstate commerce. Such a person may also present information to rebut the State's initial submission.

Five States, New York, California, Wisconsin, Minnesota, and Oregon, each submitted a notice of intent to petition and each petitioned the Department for a rule to allow each State to maintain its applicable energy efficiency standard for clothes dryers and/or kitchen ranges and ovens.

Each of the five States met the filing requirements set forth in the December 1982 rule. Each notice of intent to petition and each petition was received within the proper time period. The petitions also presented information which indicated that each State's regulation is more stringent than the Federal standard and that there is a significant State interest to justify the State regulation. DOE made a preliminary determination that there did not appear to be any undue burden on interstate commerce resulting from the State regulations and statutes. Therefore, on August 1, 1983, DOE proposed to amend § 430.33 to issue rules permitting each of the five States to maintain applicable appliance energy efficiency standards for clothes dryers and/or kitchen ranges and ovens. (48 FR 34858.) (Hereafter referred to as the August 1983 proposal.)

DOE requested comments on the petitions and encouraged interested parties to speak at public hearings to be held in each of the five States and in Washington, D.C. Although the Department did not receive sufficient interest to hold all the public hearings, hearings were held in Madison, Wisconsin on September 13, 1983 and in Washington, D.C. on September 30, 1983.[3]

II. Discussion

a. General

DOE is adopting final rules granting each of the five State petitions for exemption for each State's applicable standard requiring IIDs for clothes dryers and/or kitchen ranges and ovens.

The comments submitted in favor of DOE's proposed rules to grant each petition are State specific. These comments were submitted by States, public interest groups and some utilities. The comments received recommending denials generally address generic issues pertaining to most or all of the five petitions. These comments were submitted by appliance manufacturers and appliance manufacturer trade associations.

A very general criticism of the validity of the entire rulemaking process was submitted by the Gas Appliance Manufacturers Association (GAMA) (GAMA, No. 7, at 1).[4] GAMA criticized DOE for a statement in the December 1982 final rule which said that ". . . in general, these laws (those State laws and regulations currently in force) would qualify for an exemption from supersession."[5] GAMA contends that the Department prejudged the results of the petition process without having seen the required documentation.

GAMA's contention is without merit. DOE has held a full and open rulemaking process in its review of the five State petitions. Each State met the filing requirements set forth in the December 1982 rule within the proper time period. Moreover, each State was required to present information demonstrating that its regulation is more stringent than the Federal standard and that there is a significant State interest to justify the State regulation. DOE's preliminary determination with regard to these petitions and the proposal to grant each petition were based on DOE's initial review of the State regulations and assessment of each petition.

In these rulemakings, as in any rulemaking proceeding, the data received during the comment period is crucial to the Department's final determination. The statement GAMA quotes in the December 1982 preamble merely indicated DOE's belief concerning State and local standards prior to the actual implementation of a full rulemaking proceeding. Clearly, the final determinations contained in today's action were based on all of the materials contained in the record.

b. Stringency of State Standards, State Interest, and Effect on Interstate Commerce

Several manufacturers and industry associations argue that the States overstated the energy savings derived from their respective standards and failed to show significant State interest. Most of these commenters focused on issues pertaining to gas clothes dryers.

General Electric Company (GE) (GE, No. 6, at 4) and GAMA (GAMA, No. 7, at 3) first maintain that the State bans on pilot lights fail the EPCA requirement that a State standard be more stringent than the Federal standard. GAMA's position is that a ban on pilot lights in clothes dryers is equivalent to a de facto national standard since they assert that all gas clothes dryers produced are now equipped with IIDs. GE argues that a State standard must be greater than any standard DOE analyzed. GE maintains that the State bans are less stringent than the highest levels analyzed by DOE in the December 1982 final rule.

DOE rejects both of these arguments since the Act requires that a State standard, to be eligible for exemption from Federal preemption, must be more stringent than a Federal standard established by regulation. Clearly, the State standards requiring IIDs are more stringent than the Federal standard, since the Federal "no standard" standard allows the manufacture and sale of clothes dryers and ranges and ovens with pilot lights. Furthermore, the Act prescribes no criteria that States must meet in the exemption process concerning meeting or exceeding the efficiency levels analyzed by DOE to determine cost effectiveness of standards. Therefore, DOE rejects the argument that a State standard must be

---

[3] DOE received only one request to speak at each of the hearings scheduled to be held in Minnesota, New York, California and Oregon. These persons were invited to participate in the other hearings. The representative from Minnesota spoke at the Wisconsin hearing and the representative from New York spoke at the Washington, D.C. The individuals from California and Oregon did not present testimony at either of the hearings.

[4] Comments on the rulemaking were given docket numbers. Citations to comments provide those docket numbers.

[5] 47 FR 57214.

more stringent than the levels studied by DOE.

The Association of Home Appliance Manufacturers (AHAM) (AHAM, No. 9, at 4), Whirlpool Corporation (Whirlpool, No. 12, at 1), GAMA (GAMA, No. 7, at 3) and General Electric (GE, No. 6, at 3) point out that each of the three petitions seeking exemption for standards for gas clothes dryers rest on the assumption that the existing standards will save the energy claimed by each State. These commenters dispute the claims that State regulations have been responsible for the extensive use of IIDs in gas dryers, since IIDs were already widely used prior to any State's requirement for them. In fact, these commenters argue, there are no energy savings attributable to State laws banning pilot lights in gas dryers since no dryers containing pilot lights have been produced since 1976. The elimination of the standing pilot light in gas clothes dryers, according to these commenters, was the result of market forces (the rising cost of gas and maintenance problems with the pilot light design) and the cost of returning to a pilot light model would be much less cost effective than the current IID models.

With respect to gas clothes dryers, GE (GE, No. 6, at 2) also asserts that since preemption does not become effective until DOE issues a final determination, the savings data that result from earlier State actions are irrelevant. GE maintains that only future savings that the States expect to achieve as a result of the exemption are pertinent to the justification of the State's regulations. AHAM (AHAM, No. 9, at 7) maintains that the States have failed to meet the criteria of demonstrating significant State or local interest since if there are no energy savings, no benefits can accrue to the regulation and there can be no significant interest in retaining the existing standards. GE (GE, No. 6, at 2), GAMA (GAMA, No. 7, at 4) and Whirlpool (Whirlpool, No. 7, at 14) concur on this point and state that DOE has not required, nor have the States shown, that some distinctive benefit will result if the State regulations are exempted from preemption.

DOE has reviewed the data submitted by these commenters and agrees that under current conditions there is little specific data which sets forth energy savings derived from the laws banning pilot lights in clothes dryers. However, DOE believes that there is a significant State interest in States maintaining their ban on pilot lights. Without such a ban on pilot lights, manufacturers in the future could redesign their clothes dryers and sell clothes dryers with pilot lights.

DOE agrees that market forces and cost considerations were contributing factors for discontinuing production of clothes dryers with pilot lights, and since such models do not appear to be available in the marketplace, the Department acknowledges that these requirements do not result in measurable energy savings currently. However, several commenters supporting the ban on clothes dryers with pilot lights emphasized that while there appear to be no such clothes dryers in production now, it is of significant interest to the State to maintain such a ban since there is no guarantee of what the market will be like in the future. *See* testimony of September 13, 1983, by P. Herriges, West Central Wisconsin Community Action Agency, at 15; R. Christianson, Wisconsin Department of Administration, at 22; Sen. J. Strohl, Chairman, Wisconsin Senate Committee on Energy and Environment, at 38; D. Shott, Office of the Governor of Wisconsin, at 48; and Rep. C. Gerlach, Chairman, Wisconsin House Committee on Energy and Utilities, at 65.

DOE agrees with the commenters from Wisconsin. Although data suggests that manufacturers will not return to the manufacture of clothes dryers with pilot lights, DOE has received no assurances that pilot light manufacture will never be resumed for clothes dryers. In fact, the manufacturers and AHAM could not assure DOE that only clothes dryers with IID's will be manufactured and sold in the future.

White Consolidated Industries, Inc. (WCI) (WCI, No. 3, at 2) and GAMA (GAMA, No. 7, at 3) comment that the States are providing old data, that the rising cost of gas eliminated pilot lights from clothes dryers and seems likely to do the same for ranges and ovens. WCI asserts that since 1980 the percentage of ranges shipped with pilot lights has dropped from 58 percent to 43 percent nationwide and that some manufacturers, such as Frigidaire, no longer offer any pilot light models for ranges and ovens.

WCI, GAMA, and Whirlpool submitted data on the energy savings and/or the number of pilot lights presumably kept out of the States as a result of State requirements for IIDs on ranges and ovens. (*See* WCI, No. 3, at 1; GAMA, No. 7, at 2, and Whirlpool, No. 12, at 4.) For example, using GAMA data, WCI calculates that in the States of Wisconsin and Minnesota 19,155 and 14,925 pilot lights, respectively, would be banned each year in those States. These figures contrast to Wisconsin's revised estimate of 86,000 pilot lights banned each year, and Minnesota's 64,495. Futhermore, GAMA (GAMA, No. 7 at 1) maintains that all of the petitions overstate the yearly energy savings resulting from a ban on pilot lights in ranges and ovens. Moreover, Whirlpool (Whirlpool, No. 12 at 4, 7) argues that the savings claims by Wisconsin, California and Minnesota, do not account for the sales of ranges and ovens which would have been sold with IIDs in the absence of standards.

The Department recognizes that the increasing cost of gas and other market forces contributed to the apparently uniform production of clothes dryers with IIDs. DOE also agrees that these factors may contribute to the increase in IID's kitchen ranges and ovens. In addition, DOE is aware that some of the data provided in the petitions may be outdated or incomplete. However, no data were submitted to demonstrate that the existing regulations pertaining to kitchen ranges and ovens do not save energy. These commenters do not dispute the fact that energy is being saved, only the amount of energy saved. The States have demonstrated that their standards are more stringent than the Federal "no standard" standard with respect to kitchen ranges and ovens. DOE believes, moreover, that because energy is being saved, the States have shown a significant State interest in these cases in maintaining their applicable laws.

Whirlpool and GE also assert that DOE should provide more meaningful criteria for determining whether there is a significant State or local interest to justify a regulation. (*See* Whirlpool, No. 2, at 14; and GE, No. 6, at 2.) These commenters suggest that a State should demonstrate that some distinctive benefit will result from a standard or that no standard will result in adverse consequences. Whether GE and Whirlpool intend "more meaningful criteria" to mean more stringent criteria or additional criteria is unclear to DOE. The Department already requires a State petition to demonstrate a benefit of the existing standard and provide evidence that the State standard is more stringent than the Federal standard. DOE believes that if either a past or future energy savings can be attributed to a State or local standard, then that clearly demonstrates a benefit and therefore a significant State interest in maintaining the regulation.

Three commenters, GAMA, AHAM, and the National LP Gas Association (NLPGA), argue that the granting of the petitions poses a burden on interstate

commerce. (*See* GAMA, No. 7, at 2; AHAM, No. 8, at 2; and NLPGA, No. 11, at 2.) GAMA argues that granting these petitions will weaken the economies of a nationwide distribution system that results from the opportunities for national advertising and centralized warehousing and distribution. AHAM maintains that the mere existence of any State regulation is a burden on commerce and that if DOE accepts the States' claims, the door may be open to future outrageous or exaggerated claims about the benefits of standards. AHAM maintains that this could be the ruin of the national appliance marketplace. NLPGA states that the burden on interstate commerce will result from a "hodge-podge" of regulations where pilot lights are permitted in some States but not in others. Economic pressures will force some manufacturers to discontinue the production of appliances with pilot lights, leaving consumers with only one option, that of purchasing the more expensive IID-equipped appliances. GAMA also states that the petitions show that the potential gas savings associated with the State laws is so small, there appears to be no benefit from these laws which exceeds the burden on interstate commerce and the ensuing costs to the consumer.

The Department rejects these arguments. First, with regard to clothes dryers, the matter of any burden on interstate commerce is non-existent since few, if any, products are being produced or sold that would be affected if the Department were to grant the petitions. Second, the commenters have not provided any evidence to demonstrate how the existing State regulations banning pilot lights in kitchen ranges and ovens have caused an undue burden on interstate commerce. The New York State Energy Office stated that the New York law allows for manufacturers to petition for a waiver of the State regulation, and that no manufacturers have petitioned for a waiver from the State ban on pilot lights. Further, the New York State Energy Office concluded that since no manufacturer has petitioned for relief from the ban on pilot lights, the law did not impose an undue burden on manufacturers. DOE agrees with the New York State Energy Office that the manufacturers' failure to petition the State for relief from the ban on pilot lights indicates that the law has not placed an undue burden on interstate commerce. The other States provided no specific information on this matter. However, DOE did not receive any evidence that these regulations caused undue burden on manufacturers. No evidence has been provided that the mere existence of these State regulations is a burden on interstate commerce, especially in light of the fact that some of these same commenters emphasize that it was market forces only, not regulations, that led to industry-wide use of IIDs in clothes dryers and that the same market forces are responsible for the increase of IIDs in kitchen ranges and ovens.

GAMA did not submit data to support its claim that the savings associated with the State laws is so insignificant that there is no benefit which exceeds the burden on interstate commerce and consumer costs. A State petition to maintain an energy efficiency standard for a particular covered product must only show that the State standard is more stringent than the Federal standard and that there is a significant State interest in maintaining that standard. Nothing in the Act or in DOE's regulations requires a State to meet or exceed an energy savings threshold.

III. Conclusions and Determinations on State Petitions

a. General Conclusion

The Department has determined that each State petition seeking to maintain applicable appliance energy efficiency standards for gas clothes dryers and/or kitchen ranges and ovens has demonstrated that the State standard is more stringent than the Federal standard and that there is a significant State interest to justify each State's regulation. Even if the energy saved for ranges and ovens was less than the amount of energy set forth in the petitions, there is agreement, even from those opposing the granting of these petitions, that the State regulations do save energy. While clothes dryer standards presently would not appear to save much energy, the possibility exists that without standards, manufacturers could reintroduce pilot lights which use more energy than IIDs. Furthermore, the Department received no data showing that any of the State regulations impose an undue burden on interstate commerce.

b. Determinations on State Petitions

1. New York (NY001). The petition submitted by the New York State Energy Office seeks a rule exempting from Federal preemption Section 16–116 of New York State's Energy Law as it pertains to gas kitchen ranges and ovens. Section 16–116 of New York's law prohibits the sale, delivery or installation of any stove or range using a gaseous fuel (other than propane) that is not equipped with an IID. Exempted from this requirement are gas stoves or ranges containing a separate component specifically designed to provide space heating.

DOE has reviewed New York's petition and the comments on the proposed rule in accordance with the requirements of Section 327(b)(3) of the Act and § 430.47 of the regulation. Based on its analysis, DOE has determined that New York has demonstrated that Section 16–116 is more stringent than DOE's rule for gas kitchen ranges and ovens, is justified by a significant State interest and does not impose an undue burden on interstate commerce. Accordingly, DOE is amending § 430.33 exempting Section 16–116 of the New York Energy Law from the preemptive provisions of Section 327(a)(2)(A) of the Act.

2. Wisconsin (WI002). The petition submitted by the Wisconsin Department of Administration seeks a rule exempting from Federal preemption Wisconsin Statute 101.655 (1981) as it pertains to gas clothes dryers and gas kitchen ranges and ovens. The Wisconsin law prohibits the sale, distribution or installation of a new gas appliance that is not equipped with a State-certified IID.

DOE has reviewed Wisconsin's petition and the comments on the proposed rule in accordance with the requirements of Section 327(b)(3) of the Act and Section 430.47 of the regulation. Based on this analysis, DOE has determined that Wisconsin has demonstrated that Wisconsin Statute 101.655 (1981) is more stringent than DOE's rule for gas clothes dryers and kitchen ranges and ovens, is justified by a significant State interest and does not impose an undue burden on interstate commerce. Accordingly, DOE is amending § 430.33 exempting Wisconsin Statute 101.655 (1981) as it pertains to gas clothes dryers and kitchen ranges and ovens from the preemptive provisions of section 327(a)(2) of the Act.

3. California (CA003). The petition submitted by the California Energy Commission (CEC) seeks a rule exempting from Federal preemption Sections 25960 and 25964 of California's Public Resources Code and Title 20, California Administrative Code, Section 1605 and Title 24, California Administrative Code Sections 2–5352(1) and 2–5365 as they pertain to gas kitchen ranges and ovens. The California laws prohibit the sale or installation of gas appliances using a gaseous fuel (other than propane) that are not equipped with a State-certified IID.

DOE has reviewed California's petition and the comments on the proposed rule in accordance with the requirements of Section 327(b)(3) of the Act and Section 430.47 of the regulation. Based on this analysis, DOE has determined that California has demonstrated that Sections 25960 and 25964 of the California Public Resources Code, Title 20, California Administrative Code, Section 1605 and Title 24, California Administrative Code, Sections 2–5352(1) and 2–5365 are more stringent than DOE's rule for gas kitchen ranges and ovens, are justified by a significant State interest and do not impose an undue burden on interstate commerce. Accordingly, DOE is amending § 430.33 exempting Section 25960 and 25964 of the California Public Resources Code, and Title 20 California Administrative Code, Section 1605 and Title 24, California Administrative Code, Section 2–5352(1) and 2–5365 from the preemptive provisions of Section 327(a)(2) of the Act.

4. Minnesota (MN004). The petition submitted by the Minnesota Department of Energy seeks a rule exempting from Federal preemption Minnesota Statute Section 116J.18, Subd. 14, as it pretains to gas clothes dryers and gas kitchen ranges and ovens. Minnesota's law prohibits the sale or installation of gas clothes dryers and gas kitchen ranges and ovens that are equipped with a continuously burning gas pilot light.

DOE has reviewed Minnesota's petition and the comments on the proposed rule in accordance with the requirements of Section 327(b)(3) of the Act and § 430.47 of the regulation. Based on its analysis, DOE has determined that Minnesota has demonstrated that Minnesota Stat. § 116J.18, Subd. 14 is more stringent than DOE's rule for gas clothes dryers and kitchens ranges and ovens, is justified by a significant State interest and does not impose an undue burden on interstate commerce. Accordingly, DOE is amending § 430.33 exempting Minnesota Stat. § 116J.9 Subd. 14 as it pertains to gas clothes dryers and kitchen ranges and ovens from the preemptive provisions of Section 327(a)(2) of the Act.

5. Oregon (OR005). The petition submitted by the Oregon Department of Energy seeks a rule exempting from Federal preemption Section 1 of the Oregon Revised Statutes (ORS) 479.770 as it pertains to gas clothes dryers and gas kitchen ranges and ovens. The Oregon law prohibits the sale of gas clothes dryers and gas kitchen ranges and ovens unless they are equipped with IIDs.

DOE has reviewed Oregon's petition and the comments on the proposed rule in accordance with the requirements of Section 327(b)(3) of the Act and § 430.47 of the regulations. Based on its analysis, DOE has determined that Oregon has demonstrated that Section 1 ORS 479.770 is more stringent than DOE's rule for gas clothes dryers and kitchen ranges and ovens, is justified by a significant State interest and does not impose an undue burden on interstate commerce. Accordingly, DOE is amending § 430.33 exempting Section 1 ORS 479.770 as it pertains to gas clothes dryers and kitchen ranges and ovens from the preemptive provisions of Section 327(a)(2) of the Act.

IV. Environmental, Regulatory Impact, and Small Entity Impact Reviews

a. Environmental Review

In each case where DOE is requested to approve State standards, DOE conducts a National Environmental Policy Act (NEPA) review on a case-by-case basis. Currently, the five States have regulations requiring IIDs on gas clothes dryers and/or gas kitchen ranges and ovens. Granting the petitions received from these States will mean that these regulations will remain in effect. The Department's final rule granting the petitions with respect to clothes dryers and/or ranges and ovens, will result in no change in the environmental status quo of the five States, and therefore, will clearly have no significant environmental impact. No evironmental assessment or environmental impact statement is required.

It should also be noted that the Department has prepared and issued an Environmental Assessment (EA), DOE/EA–0113, on the impact of setting and implementing energy efficiency standards for all 13 types of consumer products identified in section 322(a) (1)–(13) of the Act. A Finding of No Significant Impact and Notice of Availability of that EA were published with the June 30, 1980 proposed rule for minimum energy efficiency standards for eight of the products. 45 FR 44088. Copies of the EA may be obtained from the address indicated at the beginning of this notice.

b. Regulatory Impact Review

In light of the foregoing analysis of the effect of today's actions, DOE has concluded that the rules are not "major rules" for the purposes of Executive Order 12291 because they will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Therefore, in accordance with section 3(c)(3) of the Executive Order, which applies to rules other than major rules, the rules were submitted to OMB for review without a regulatory impact analysis.

c. Small Entity Impact Review

In light of the foregoing, the Department has determined and hereby certifices pursuant to section 605(b) of the Regulatory Flexibility Act that the final rules will not have a "significant economic impact on a substantial number of small entities." Granting the State petitions will not affect the status quo. Based on evidence provided in these rulemakings, the existing State regulations have not had a significant impact on manufacturers, including small businesses.

In consideration of the foregoing, Part 430 of Chapter II of Title 10, Code of Federal Regulations, is amended as set forth below.

List of Subjects in 10 CFR Part 430

Administrative practice and procedure, Energy conservation, Household appliances.

Issued in Washington, D.C., March 15, 1984.

Pat Collins,

Acting Assistant Secretary, Conservation and Renewable Energy.

PART 430—ENERGY CONSERVATION PROGRAM FOR CONSUMER PRODUCTS

1. Section 430.33 is revised to read as follows:

§ 430.33 Preemption of State regulations.

Any State regulation providing for any energy efficiency standard or other requirement with respect to the energy efficiencies or energy use of a covered product that is not identical to a Federal standard (including a determination of no standard) in effect under this subpart is preempted by that standard, except that with respect to:

(a) Kitchen ranges and ovens:

(1) All gas kitchen ranges and ovens in New York subject to the New York State Energy Law, Section 16–116, are exempt from preemption;

(2) All gas kitchen ranges and ovens in Wisconsin subject to Wisconsin Statute 101.655 (1981) are exempt from preemption;

(3) All gas kitchen ranges and ovens in California subject to Sections 25960 and 25964 of the California Public Resources Code, Title 20, California Administrative Code Section 1605, and Title 24, California Administrative Code, Sections 2–5352(1) and 2–5365, are exempt from preemption;

(4) All gas kitchen ranges and ovens in Minnesota subject to Minnesota Statute § 116J.19, Subd. 14, are exempt from preemption; and

(5) All gas kitchen ranges and ovens in Oregon subject to Section 1 of the Oregon Revised Statutes 479.770 are exempt from preemption.

(b) Clothes dryers:

(1) All gas clothes dryers in Wisconsin subject to Wisconsin Statute 101.655 (1981) are exempt from preemption;

(2) All gas clothes dryers in Minnesota subject to Minnesota Statute § 116J.19, Subd. 14, are exempt from preemption; and

(3) All gas clothes dryers in Oregon subject to Section 1 of the Oregon Revised Statutes 479.770 are exempt from preemption.

Part V

Department of Health and Human Services

Office of Human Development Services

45 CFR Parts 1385, 1386, and 1387
Developmental Disabilities Program; Final Rule

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Human Development Services

45 CFR Parts 1385, 1386, and 1387

Developmental Disabilities Program

AGENCY: Department of Health and Human Services (HHS), Office of Human Development Services (HDS), Administration on Developmental Disabilities (ADD).

ACTION: Final rule.

SUMMARY: The Department is issuing final rules for the Developmental Disabilities programs. This final regulation implements the Developmental Disabilities Assistance and Bill of Rights Act of 1978, as amended, and contains management and administrative procedures which will reduce reporting and paper work requirements. These rules do not include requirements for the University Affiliated Facilities (UAF) except for the requirement that a UAF must provide an assurance regarding the rights of persons with developmental disabilities. Regulations for the UAF program are found at 45 CFR Part 1388.

EFFECTIVE DATE: April 26, 1984.

FOR FURTHER INFORMATION CONTACT: Jean K. Elder, Ph.D., Commissioner, Administration on Developmental Disabilities, Room 336–E Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, D.C. 20201. Telephone: (202) 245–2890.

SUPPLEMENTARY INFORMATION:

Background

Amendments to the Developmental Disabilities Assistance and Bill of Rights Act of 1978, and 1981 require some major modifications in the regulations to reflect statutory changes. In addition, Departmental policy and regulatory principles governing Executive Order 12291 and the Paper Work Reduction Act of 1981 are reflected in these final rules.

Description of Program

The Developmental Disabilities Assistance and Bill of Rights Act (42 U.S.C. 6001 et seq.), "the Act," has traditionally served a target population who, by virtue of their severe handicapping conditions, have been underserved or not served at all through existing programs.

Legislation originally enacted in 1963 as the Mental Retardation Facilities and Construction Act (Pub. L. 88–164) authorized planning activities and construction of facilities in which services were to be provided to the mentally retarded. Public Law 88–164 was subsequently amended by the Developmental Disabilities and Facilities Construction Act of 1970 (Pub. L. 91–517) which further expanded the target population to include individuals with cerebral palsy, epilepsy and other neurological disorders. It also created State Planning Councils to advocate for, plan, monitor and evaluate services for the developmentally disabled.

Public Law 91–517 and successive amendments to the Act emphasized that the purpose of the Developmental Disabilities Program was to strengthen, rather than supplant existing services, and to fill gaps in the human service delivery system. Section 101(a)(5) of the Findings and Purpose Section in the Act (42 U.S.C. 6000(a)(5)) explicitly states that "it is in the national interest to strengthen specific programs, especially programs that reduce or eliminate the need for institutional care * * *."

Public Law 94–103, the 1975 Amendments, deleted the construction authority, emphasized advocacy, and added a new requirement for States to establish a Protection and Advocacy system (42 U.S.C. 6012). It also introduced Section 111, "Rights of the Developmentally Disabled," (42 U.S.C. 6010) which stated findings with respect to the rights of persons with developmental disabilities.

The 1978 amendments (Pub. L. 95–602) introduced the provision of priority services to assist States in focusing their energies on specific areas needing remediation (42 U.S.C. 6001(8)).

In addition, these amendments added a new definition of developmental disabilities (42 U.S.C. 6001(7)). The term "developmental disability" in the 1978 amendments was defined as "* * * a severe chronic disability of a person which:

(A) Is attributable to a mental or physical impairment or combination of mental and physical impairments;

(B) Is manifested before the person attains age twenty-two;

(C) Is likely to continue indefinitely;

(D) Results in substantial functional limitations in three or more of the following areas of major life activity: (i) Self-care, (ii) receptive and expressive language, (iii) learning, (iv) mobility, (v) self-direction, (vi) capacity for independent living; and (vii) economic self-sufficiency; and

(E) Reflects the person's need for a combination and sequence of special, interdisciplinary, or generic care, treatment, or other services which are of lifelong or extended duration and are individually planned and coordinated."

This definitional change was arrived at following an extensive study and emphasizes functional deficits rather than clinical conditions. It is estimated that 3.9 million people in the United States now meet the functional definition of developmental disability.

The Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35) extends the Developmental Disabilities Program through September 30, 1984. It authorizes appropriations for the programs in the Act which include: (1) The basic State grant program (42 U.S.C. 6061–6068); (2) a system for protection and advocacy of individual rights (42 U.S.C. 6012); (3) the university affiliated facilities programs for administration and operation of interdisciplinary training, research and service programs (42 U.S.C. 6031–6033); and (4) special project grants for projects of national significance (42 U.S.C. 6081).

In addition, Section 912 of Pub. L. 97–35 repeals the requirement formerly contained in Section 110 of the Act (42 U.S.C. 6009) for a specific evaluation system for services furnished to persons assisted under the Developmental Disabilities Program.

The Department published a Notice of Proposed Rulemaking (NPRM) in the Federal Register on February 23, 1983 (45 FR 7700–7712). Interested persons were given sixty days in which to send written comments, suggestions or objections regarding the proposed regulations. During the sixty day comment period seventy letters containing approximately two hundred and twenty-five comments were received. In addition informal discussions on the NPRM were held in three major cities.

All written comments were analyzed and form the basis for changes which the Department has made in these final rules.

Part 1385 contains provisions which apply to all of the Developmental Disabilities programs. Part 1386 regulates the two formula grant programs: the Basic State Grant program authorized by Part C of the Act; and the Protection and Advocacy (P&A) program authorized by Section 113 of the Act. Part 1387 applies to Special Projects of National Significance authorized by Section 145 of the Act. Although rules for the University Affiliated Facilities program (UAF) are in 45 CFR Part 1388, these rules require an assurance by the UAFs of compliance with Section 111 of the Act regarding the rights of persons with developmental disabilities.

Summary of Major Comments, Departmental Response and Changes

The sections which follow include a summary of major comments, our response to those comments, and discussion of all significant changes that we have made in the NPRM to produce these final regulations.

PART 1386

Subpart A—Basic Requirements

Section 1386.2 Obligation of Funds.

Section 1386.2(c)(1) Obligation Based on Estimate.

Section 1386.2(c)(1) of the NPRM proposed that Protection and Advocacy Offices be permitted to obligate funds prior to the end of the fiscal year based on an estimate of potential costs to be incurred when an appearance in judicial and administrative proceedings on behalf of a person with developmental disabilities (litigation costs) is contemplated.

Comment: One commenter recommended that at least twelve months be allowed to reobligate funds which have been obligated for litigation purposes prior to the end of the fiscal year in which the funds become available.

Response: The Department cannot legally allow for obligation or reobligation of funds after the fiscal year in which those funds are appropriated and cannot change Section 1386.2(a) which provides for obligation of all funds within the same fiscal year they are appropriated. We believe that we are providing additional flexibility in this area by allowing an estimate of litigation costs to appear on an obligation document. We suggested that if litigation activity on behalf of an individual is tentative, the Protection and Advocacy System may obligate funds for that purpose in sufficient time during the fiscal year which will allow for reobligation in that same year in the event that litigative activity becomes unnecessary.

Section 1386.2(c)(2) Definition of litigation.

This section defines litigation as it relates to Section 1386.2(c)(1).

Comment: Five commenters indicated that the definition of litigation in § 1386.2 (c)(2) was too restrictive and suggested that the definition be expanded to include monitoring activities associated with court orders or consent decrees.

Response: We concur with this opinion and have expanded the definition of litigation costs to include the expenditure of funds for monitoring, review and oversight of the outcome of litigation. This cannot include salaries of P&A employees, as suggested by several individuals, since salaries are daily expenditures and cannot be part of an obligation to an outside agent or agency.

In addition, we want to clarify that funds used for salaries and expenses incurred in the day-to-day operation of the Protection and Advocacy Systems are part of the operating budget of the grantee. These funds cannot be utilized beyond the end of the fiscal year and cannot be treated in the same way as funds which are obligated to an outside agent or agency to achieve a specific objective, such as litigation and associated activities.

Section 1386.3 Liquidation of Obligations.

The NPRM stipulated that all obligations must be liquidated within one year of the close of the Federal fiscal year in which the funds were made available, or else they revert back to the Federal government.

Comment: There were more than twenty comments on this section proposing a longer liquidation period to address contingencies such as (1) start-up lag by subgrantees, (2) coordination of grant cycles with other State agencies, (3) reappropriation of funds by State Legislatures, and (4) previous time lag between the beginning of a fiscal year and States' receipt of allotment. In addition, commenters recommended that we consider a liquidation period which would coincide with the three year State plan cycle. Many individuals felt that there was a need for a thirty-six month period in which to liquidate obligations. An equal number recommended a twenty-four month period.

Response: The Department believes it has the latitude to establish a reasonable liquidation period which will not impose undue hardships on the States. As there was virtual unanimity that twelve months following the close of the fiscal year in which funds were allotted was too restrictive for liquidation of obligations, we have determined that a two year liquidation period will ease problems articulated by commenters. Section 1386.3 has been revised to reflect this decision and calls for all obligations to be liquidated within two years (twenty-four months) of the close of the Federal fiscal year in which the funds were made available or else they revert back to the Federal government.

Section 1386.4 Eligibility for Services.

Section 1386.4(b) Clients Previously Served.

This section addresses the "Grandfather Clause" in Pub. L. 95–602 which allows continued receipt of services by individuals who met the definition of developmental disability in Pub. L. 94–103, and who actually received one or more services under the Act between October 1, 1968 and October 1, 1978 and whose Individual Habilitation Plan (IHP) indicated a continuing need for those same services.

Comment: Eight of the commenters recommended that language in this section be changed to permit the continued eligibility for services under the Act of persons who were eligible under the former categorical definition of developmental disability, but who do not meet the criteria of the functional definition, provided their IHP specifies that they still need the same services as they did at the time of their entry into the DD service delivery system.

Two other respondents advocated that this "Grandfather Clause" be deleted from the regulation.

Other commenters indicated a need to delete the words "those same" from this section because client needs for services change as they mature and as a result of remediation.

Response: The Report of the Conference Committee accompanying HR 12467 noted that the functional "definition is intended to cover everyone currently covered under the [categorical] definition and it is also intended to add other individuals with similar characteristics * * *. It is not the intent to exclude anyone who legitimately should have been included under the definition in current law." HR Report No. 95–1789, 95th Congress, Second Session 104 (1978).

We believe that the NPRM addressed continued eligibility for individuals who were previously served under the categorical definition, but agree that services, in order to meet current needs of individuals, will change over a period of years and should be reflected in Individual Habilitation Plans. We have, therefore, deleted the words "those same" from this section.

We believe that this section should not be deleted as commenters suggested because it conveys the intent of Congress not to exclude anyone who was previously served and continues to be eligible under the functional definition.

Subpart B—State System for Protection and Advocacy of Individual Rights

Section 1386.20 Designated State Protection and Advocacy Office.

Section 1386.20(a) Accountable State Official.

Paragraph (a) of this section of the NPRM proposed that the Governor designate the State official or public or private agency accountable for the proper use of funds and conduct of the State Protection and Advocacy System.

Comment: One respondent pointed out that requiring Governors to designate State protection and advocacy agencies imposed restrictions on the States not intended by the Congress. In some States, for example, the legislature may wish to assume responsibility for designating the Protection and Advocacy agency, or may wish to place that responsibility on an officer of the legislature or on the Chief Justice of the State Supreme Court.

Five commenters apparently misinterpreted § 1386.20(a) as introducing another element of control over a State Protection and Advocacy System. This section relates only to designation of the agency to be responsible for the Protection and Advocacy System.

Response: The Department concurs that States should be given the maximum flexibility for designation of the State Protection and Advocacy System and have added the phrase "or other State official or entity" following the word "Governor."

Section 1386.20(b) Non-designation of Guardianship Agency.

This paragraph of the NPRM proposed to preclude an agency of the State which provides guardianship services from being designated as the Protection and Advocacy agency.

Comment: Seventeen commenters supported the prohibition against designation of agencies providing guardianship services. They agreed with the Department that guardianship should be considered a service and that allowing providers of guardianship services to receive the protection and advocacy designation would inherently promote conflict of interest for those agencies.

Five commenters felt that clarification was needed to determine if this section precluded the Protection and Advocacy agencies from representing clients in guardianship proceedings.

Response: The Department wishes to make clear the intent of this section. It prohibits designation as the Protection and Advocacy agency of any agency which provides direct services, including those which provide guardianship services, in order to avoid conflicts of interest. This section is not intended to dictate the kinds of cases which Protection and Advocacy agencies can handle. We have clarified § 1386.20(b) by inserting the following phrase after the word *State:* "or private agency providing direct services, including." States affected by this section will be given one year from the date of issuance of this regulation to redesignate their Protection and Advocacy agencies in the event that redesignation is necessary to comply with § 1386.20(b).

Section 1386.20(c) Responsible State Official.

This paragraph calls for the appointment of a responsible State official to receive notices of compliance actions and disallowances when an entity outside of State government is designated as the protection and advocacy agency.

Comment: Three commenters supported, without reservation, this section, four opposed it, and five indicated that it should be modified. Those in opposition or seeking modification felt that the independence of the Protection and Advocacy agency would be compromised.

Response: In response to those commenters who expressed concern that this section would adversely affect the independence of the Protection and Advocacy agencies, the Department wishes to make clear that this was not the intention of § 1386.20(c). The State official referred to in this section is to act in a liaison capacity in cooperation with the Protection and Advocacy agency in the event that there are instances of disallowance of funds or compliance actions. We have modified this section, for purposes of clarity, by making necessary technical changes which address this concern.

Section 1386.21 Requirements of the Protection and Advocacy System.

Section 1386.21(b)(1) Federal Access to Records.

This section of the NPRM provided for access to client records by authorized Federal officials.

Comment: Two respondents indicated that the opportunity for access afforded representatives of the Federal government in this section was too broad and violated confidentiality of records.

Response: The Department has addressed this issue by amending this section to tie Federal access to clients' records to official audit or other reviews conducted by the Federal government. The Department will fulfill its obligations to maintain confidentiality of personal records.

Comments: Three commenters indicated that granting unlimited access by parents or guardians to the records of minor clients would, in some cases, violate the Protection and Advocacy System's responsibilities to these clients. (e.g. where minors are represented in instances of alleged child abuse).

Response: The Department has amended this Section to protect client confidentiality and to recognize the primacy in these instances, not only of State law but also of court order and attorney-client privilege by adding the terms "court order" and "attorney-client privilege."

Section 1386.22 Triennial report on the State Protection and Advocacy System.

We have made technical changes to this section for clarity and, in one instance, have indicated an OMB clearance number.

Section 1386.23 Periodic Reports.

This section identifies required reports in addition to the triennial report.

Comment: One respondent indicated that it was not clear whether the responsibility for submitting the annual report resides with the Protection and Advocacy agency or with the State. Another commenter questioned whether it was appropriate to require that quarterly and final financial status reports be submitted by the Governor or appropriate State financial official.

Response: We agree and in each case have changed the requirement so that these reports must be submitted directly to the Department by the State Protection and Advocacy agency. In addition, we have revised the language for clarity.

Section 1386.24 Federal financial Participation: Allowable and non-allowable costs for Protection and Advocacy Systems.

Section 1386.24(b)(1) Costs incurred for activities not included in the triennial report are disallowed.

This section of the NPRM precluded Federal financial participation for activities not included in the triennial report.

Comment: One commenter noted that as new activities will occur after the triennial report has been submitted and as the annual report will be a summary of activities which have already taken place, problems for the State would

arise if this section remained as written in the NPRM.

Response: We concur that the rigidity of this provision would cause unnecessary problems for Protection and Advocacy Systems and have deleted section 1386.24(b)(1).

Section 1386.24(b)(2) Non-allowable Costs.

The NPRM proposed, in this section, that costs incurred for activities to solve problems not directly related to an individual's disability and which are faced by the general populace (e.g. drawing up of wills or divorce actions) would not be eligible for Federal financial participation.

Comment: Four commenters indicated that the examples cited in this section are sometimes part of an activity directly related to a person's disability and would inhibit the Protection and Advocacy Systems from carrying out their mandate.

Response: The Department concurs that if activities listed in the examples are part of the overall tasks of the Protection and Advocacy System in resolving a client's problem, then they should be allowable. We have decided to delete the example but retain the paragraph to convey that if a client seeks assistance solely to resolve a problem faced by the general populace, the client should be referred to other counsel or sources of assistance.

Access To Institutional Records

A section on "access to records" was not included in the regulation part of the NPRM but was discussed in the preamble section which described an earlier NPRM dated May 9, 1980. Numerous responses were received to the request for comment on this issue.

These comments stressed the importance of insuring that State Protection and Advocacy Systems are able to serve developmentally disabled persons residing in institutions as well as persons in the community. They felt that the intent of Congress was quite clear regarding the mandate of Protection and Advocacy Systems to employ all appropriate methods for ensuring the rights of *all* developmentally disabled persons, including those residing in institutions.

Response: As developmentally disabled persons residing in institutions are less likely to have access to a Protection and Advocacy System and less likely to understand the services afforded them by that system than are their counterparts residing in the community, special communication efforts may have to be made to insure that the services offered by Protection and Advocacy Systems are understood by and available to institutionalized developmentally disabled persons.

Where problems of access to records and facilities exist, it is important that States take action to address these systemic issues, e.g. through negotiation with individual institutions and agencies.

The Department does not wish to issue regulations granting blanket access to records because of potential conflict with the rights of persons who are competent and do not wish their records reviewed, especially if they receive no Federal or State assistance. However, we will endeavor to identify "best practices" and issue an information memorandum containing model agreements, practices and procedures.

Subpart C—State Plan for Provision of Services for Persons with Developmental Disabilities

Section 1386.30 (a) and (c)(2) Priority Areas.

These sections of the NPRM proposed to require that the States prepare and submit plans which meet the requirements of Section 133(b) and Section 137(b) of the Act, and that States select the priority area(s) in which sixty-five percent of the Federal allotment will be spent.

Comment: Two respondents commented that these provisions do not reflect the role of the Councils in conducting needs assessment, selecting the priorities, and developing the plans. One suggested that the language in the May 9, 1980 NPRM (1386.32) be included in this section. The May, 1980 NPRM described the specific responsibilities of the Council in the planning and priority selection process.

Response: It was not our intent to exclude the Councils from the planning and decisionmaking process. Consequently, the final rules have been modified to specify that States and Councils will jointly prepare and submit the State Plan which will include jointly selected priority areas.

Section 1386.30(c) State Plan Format.

This section of the NPRM supports Executive Order 12372 which allows States to submit their plans in any format they choose, as long as the plans contain all the required information and assurances.

Comment: Twelve commenters wanted the regulation changed to require States to use the State Plan Format which was jointly developed by the Administration on Developmental Disabilities (ADD) and the National Association of Developmental Disabilities Councils (NADDC).

The rationale for this suggestion was that the State plan is the most important document to assure the intent of the Act is being carried out, to provide consistent, comparable data, and to assist States in helping each other. There are twelve commenters who expressed concern that, without a standardized format, these important roles of the plans would be diluted.

One commenter supported the absence of a mandatory format in favor of "simplicity, flexibility, and substitution."

Response: The Department is maintaining its previous position in support of Executive Order 12372. This section in the regulation will allow for a State plan format of the States' choice (including use of the voluntary format developed by NADDC and ADD) as long as States submit plans which meet the requirements of Sections 133 and 137(b) of the Act and provide assurances regarding the development of individual habilitation plans.

Section 1386.30(c)(3) Identification of Council Members.

This section of the NPRM called for the identification in the State Plan of the members of the officially appointed State Planning Council.

Comment: One organization believed that identification of Council members in the State plan was too prescriptive and unnecessarily intrusive.

Response: We concur with this comment and have deleted Sections 1386.30(c)(3) and 1386.30(c)(4).

Section 1386.30(c)(4) Council Staffing.

This section of the NPRM set forth the requirement that the State assign a Director and such support staff as deemed necessary.

Comment: Twenty respondents commented on this position. Seven suggested that the language be amended to specify that the director and support staff should be solely responsible to the State Planning Council and eight respondents suggested that the Council should determine what support staff are necessary.

One commenter suggested that it is the State's prerogative to determine adequate support staff, and one suggested that such decisions should be made jointly by that State and the Council.

One respondent supported the deletion of the May 1980 NPRM requirement that the director be full time, and two advocated that a full time director be mandatory.

Response: ADD recognizes that there have been instances when Councils feel that States have not allocated sufficient staff to permit them to carry out their mandated responsibilities. A requirement that the need for support staff be determined by the Council and that the director and support staff be solely responsible to the Council might eliminate that problem.

However, it is the general policy of the Department to permit States to organize their governments as they see fit. While there may be occasions when Federal requirements necessitate a departure from this policy, we do not believe this is the case in this instance. In order to be responsive to comments and recognizing that a Council's views on what constitutes adequate staff are important in assisting a State in arriving at a proper decision, we have changed the regulation to require State agency consultation with the Council in determining staffing requirements.

The regulation clearly requires the State to identify and assign staff to the Council. This identification and assignment assures that Councils will have specific staff who will carry out the executive and administrative functions under council auspices. We decided that a full time director should not be required because in many States the assignment of a full time director precludes the assignment of part time support staff, a circumstance that restricts the flexibility of Councils to retain staff with a variety of skills. The proposed language has been modified to reflect that the authority for the determination of necessary staff, while still vested with the State, should be made with advice from the Council. These requirements are to be included in the State plan through an assurance rather than a description in section 1386.30(e)(4).

Section 1386.33 Protection of Employees Interests.

This section of the NPRM proposed to provide for fair and equitable arrangements to protect the interests of employees affected by actions under a State plan to provide alternative community living arrangement services.

Comment: There were twenty-two comments on this section, each addressing one of the following five points of view.

(1) Three commenters requested that the regulation contain language from the preamble which explicitly calls for "the protection of the interests of employees who work in institutions when the State has selected the priority area of alternative community living arrangements causing the return of clients from institutions to the community."

(2) Three commenters concluded that the protection of employee interests should be the responsibility of State civil service systems.

(3) Six commenters took issue with that portion of the preamble which referred to the protection of employee interests when the State plan identified alternative community living arrangements as a priority. They maintained that the law requires this protection when alternative community living arrangements services are provided irrespective of their selection as a priority.

(4) Three commenters felt that the regulation should take into account the types of alternative living arrangement services which would adversely affect institutional employment. They felt that the provision of respite care and aid to families of individuals (services under alternative community living arrangements) who had never been institutionalized was not a basis for providing employee protection and would be inappropriate and destructive to the objective of providing individuals with the least restrictive environment.

(5) Seven commenters maintained that Councils lack the authority to develop and implement a plan to protect the interests of employees.

Response: The Department agrees with the first comment that an employee protection plan must relate to institutional employees affected by alternative living arrangement services. In addition, we recognize that there was an error in the preamble of the NPRM, as pointed out in the third comment, stating that a plan for the protection of employees' interests is necessary when a State selects the priority area of alternative community living arrangements as a priority service. The Act requires an employee protection plan when any alternative community living arrangement services are provided, and not only when the priority area is selected (as erroneously stated in the preamble of the NPRM).

With regard to the second comment, the Act (Section 133(b)(7)(B)) requires development of an employee protection plan as discussed in the previous paragraph. Therefore, the Department has rejected the suggestion that the employee protection plan be left to State merit systems.

We also agree with the point of view expressed in paragraph four (4) above. However, since the provision of respite care for, and other aid to, families of individuals who have never been institutionalized can have no adverse effect on employees of institutions, no employee protection plan can logically be required or developed when these services are provided. Consequently, no change in regulation is called for.

The fifth issue regarding Councils' lack of authority to plan and implement a plan to protect the interests of employees fails to take into account that the State plan must be jointly developed by the Council and State administering agency. The plan is implemented by the State agency which is empowered to carry out an employee protection plan. The extent of Council authority is prescribed by the statute and the regulation is consistent with the statute. Since the Department cannot change the law by regulation, it has rejected this comment.

Section 1386.34 Provision of Priority Services.

This section addresses requirements that the State plan identify one or two priority areas in which sixty-five percent of the allotment is to be expended.

Comment: Four commenters requested that preamble language of the NPRM describing the Department's interpretation regarding priority services be included in the regulation.

Response: We concur and have added appropriate language to Section 1386.34.

Section 1386.35(b)(3) Nonallowable Cost.

In the NPRM, this paragraph listed non-allowable costs for basic State grants, including issuances of the Office of Management and Budget.

Comment: Two commenters expressed confusion on what specific issuances were referred to in this section, and suggested that the final rules list those applicable issuances.

Response: We concur that all responsible parties should be informed of the policies to which they must adhere. However, most of these policy issuances emanate from separate agencies, such as the Office of Management and Budget, and are subject to change. Any addition or deletion of a particular requuirement would necessitate amendment of these regulations should these policies be delineated in the final rules. Consequently, ADD will disseminate information on these issuances to all affected parties through an information memorandum which can be updated as needed.
